U.S. COIN AUCTION

APRIL 4-6, 2017 | DALLAS

15918

U.S. Coins

Featuring: The R. Thayer Sheets Yorktown Collection • The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars • The Pellegrini Collection, Part IV • The Martin Peterson Collection • The Oklahoma Morgan Collection PCGS Registry Set

April 4-6, 2017 | Dallas

Signature® Floor Sessions 1-4

(Floor, Telephone, HERITAGELive!®, Internet, Fax, and Mail)

Heritage Auctions, Dallas • 1st Floor Auction Room
3500 Maple Avenue • Dallas, TX 75219

Session 1

Tuesday, April 4, 2017 • 1:00 PM CT • Lots 15001-15648

Session 2 - PREMIER

Tuesday, April 4, 2017 • 6:00 PM CT • Lots 15649-16126

Session 3

Wednesday, April 5 • 1:00 PM CT • Lots 16127-16624

Session 4

Wednesday, April 5 • 6:00 PM CT • Lots 16625-16950

Signature® Internet Session 5

(HERITAGELive!®, Internet, Fax, & Mail only Session)

Session 5

Thursday, April 6 • 11:00 AM CT • Lots 17001-19232

LOT SETTLEMENT AND PICK-UP

Wednesday, April 5 – Thursday, April 6
10:00 AM – 1:00 PM CT

Extended Payment Terms available. Email: Credit@HA.com

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

Buyer's Premium Per Lot:

This auction is subject to a Buyer's Premium of 17.5% (minimum \$19).

TX Auctioneer licenses: Paul Minshull 16591; Teia Baber 16624; Edward Beardsley 16632; Holly Culbreath 17513; Sarah Davies 17505; Chris Dykstra 16601; Samuel Foose 11727; Alissa Ford 17104; Kathleen Guzman 16142; Gregory Holman 17653; Jennifer Marsh 17105; Marina Medina 17512; Bob Merrill 13408; Brian Nalley 17134; Scott Peterson 13256; Mark Prendergast 17118; Michael Provenzale 17157; Michael Sadler 16129; Barry Sandoval 17649; Martin Scammel, Jr. 17659; Nathan Schar 17365; Kimberly Serrano 17657; Anthony Singleton 17507; Andrea Voss 16406; Jacob Walker 16413; Phillip Wooten 17656.

Dear Bidder,

It is our pleasure to welcome you to Dallas – home of Heritage’s World Headquarters and site of the upcoming Dallas Signature event. It promises to be a great time in Texas! Featured Collections provide an important foundation for any auction, and the five Featured Collections in this catalog deserve special recognition:

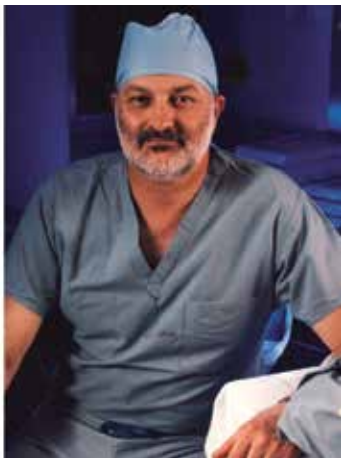

The R. Thayer Sheets Yorktown Collection

R. Thayer Sheets was a native of Charleston, West Virginia. He developed an interest in coins while helping his father with his vending business. Soon, Thayer attended Charleston coin club meetings and focused on building a collection, which became a lifelong pursuit. He graduated from the University of Virginia, where he received the first baseball scholarship ever awarded by the university. After graduation, he accepted a position at the NASA Langley Research Center in Hampton, Virginia, and he earned an MS from George Washington University. Thayer held many positions at NASA in his career, including Head of the Equal Opportunity and the Small Business Innovation programs. Through it all, he maintained his interest in coins and started a coin club while at NASA. His love of baseball never waned. He coached many Little League baseball players and took the team to a state championship. Thayer traveled to many coin club meetings and coin conventions throughout the United States, eventually becoming a skilled and successful numismatist and coin dealer. He held

Life Memberships in both the Virginia Numismatic Association and the ANA. Thayer was married to his wife, Betty, for 50 years. Two sons (who also became avid baseball players) are married with families of their own, making Betty and Thayer proud grandparents. Thayer passed away on May 24, 2016 and is greatly missed by his family.

The R. Thayer Sheets Yorktown Collection encompasses many U.S. series, although clearly Thayer had a preference for the silver and gold denominations. More than 450 total lots are represented in all floor sessions including 52 lots in the Premier Session, as well as many excellent selections in the Signature Internet portion of the auction.

The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars

Dr. John L. Pellegrini is a longtime Heritage client and consignor who assembled several notable collections – not only U.S. coins, but also paintings, sculpture, and other fine art. Dr. Pellegrini started collecting in earnest more than 35 years ago, after finishing his surgery residency at Brown University and Harvard University. He founded a highly successful surgery practice in Whitesburg, Kentucky in 1978. Numismatically, his special emphasis was silver dollars, and he assembled a fine collection of Seated Liberty dollars (sold by Heritage in 2005).

We are privileged to offer selections from his collection of Prooflike and Deep Mirror Prooflike Morgan dollars in the current consignment, which includes several examples of Morgan dollar dates and Mints that are seldom seen in either DMPL or PL format.

The Pellegrini Collection, Part IV

In addition to The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars, we are pleased to offer additional selections from the broader Pellegrini Collection of silver dollars. Dr. Pellegrini's varied interests are on display in Part IV of this pedigreed collection, which includes early dollars, Seated dollars, Trade dollars in both circulation-strike and proof formats, and Morgan dollars. With an eye focused on quality for the grade, the collection includes circulated as well as Uncirculated coins. Here is just a sampling:

- All three varieties of 1797 Draped Bust dollars, including the Small Letters B-2, BB-72
- An 1871-CC Seated dollar graded MS61 ANACS
- An 1878-CC Trade dollar, MS61 NGC, the key circulation-strike issue in the series
- Not one, not two, but three 1893-S Morgan dollars, each certified AU53
- An 1892-S Morgan graded MS63 NGC, rare in Select Uncirculated condition

The Martin Peterson Collection

A significant consignment of more than 200 lots makes up The Martin Peterson Collection, which is distributed among the various floor sessions and the online Signature Internet final session. This is an eclectic group of copper, silver, and gold coins, with many better dates and varieties, spanning several series and denominations. The collection includes both circulation-strike coins and proofs, with most examples in Choice Uncirculated or finer conditions. Seemingly, many examples were acquired during the 2000 to 2003 years, since they remain in older-generation holders from that era – always a positive signal for bidders who may want to take an extra-close look at those lots.

The Oklahoma Morgan Collection PCGS Registry Set

The Oklahoma Morgan Collection is a 100% complete PCGS Registry Set in the popular category of Morgan Dollars with Major Varieties, Circulation Strikes (1878-1921). Many of the coins are included in the Premier Session and Floor Session Three, as well as several lots in the online-only final session. Additional selections will appear in a future weekly internet auction. The Oklahoma Morgan Collection has a Set Rating of 61.91 of a possible 68.256, good for #17 in the list of current-finest sets for the category. Highlights include an 1878-CC graded MS66+ PCGS CAC, an important 1901 Shifted Eagle VAM-3 certified AU58 PCGS CAC (a strong example of the rare and popular variety), and an excellent 1879-CC Capped Die graded MS64 PCGS.

Other important lots in our Dallas event are numerous. We note a spectacular 1795 Flowing Hair half dime, a Gem 1929 double eagle, an 1873-CC Liberty Head twenty in Mint State, a Premium Gem 1909-D eagle, and an outstanding 1860 Clark, Gruber & Company five dollar gold piece, to name only a few. A trio of fantastic Colonials kicks off the opening section of the catalog:

- 1652 Pine Tree Shilling, Large Planchet, Reversed N, Noe-4, W-720, Salmon 4-D graded MS65 NGC, possibly the finest known.
- Another 1652 Pine Tree Shilling, No Pellets at Trunk, Noe-2, W-700, Salmon 2-C graded MS64 NGC, confirmed as the finest-known of its variety.
- A 1652 Noe-5 Oak Tree Shilling, MS64 NGC, a Condition Census example with an impeccable provenance.

Come to Dallas! Join your friends, clients, and dealer associates for a great event and an all-around good time. Heritage's building at 3500 Maple Avenue is newly remodeled, fully staffed and we are ready to serve any of your numismatic or bidding questions, as well as discuss future consignments. As always, we accept bids through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding and online bids with HERITAGELive!®.

Sincerely,

Greg Rohan
President

Todd Imhof
Executive Vice-President

SESSION ONE

COLONIALS

1652 Pine Tree Threepence, VF35 Pellets at Trunk, Noe-34

- 15001** 1652 Pine Tree Threepence, Pellets at Trunk, VF35 PCGS. Noe-34, W-630, Salmon 1-A, R.4. A charming deep walnut-brown Choice VF representative. The tree, date, and denomination are bold. Wear and mint-made clips affect portions of the peripheral legends, but NEW is virtually complete. The obverse is convex, and the reverse is concave, as issued. No marks are of any notice. Listed on page 41 of the 2017 Guide Book. NGC ID# 5JDS, PCGS# 45365 Base PCGS# 21

1787 Massachusetts Half Cent MS63 Brown, Ryder 4-C

- 15002** 1787 Massachusetts Half Cent MS63 Brown PCGS. Ryder 4-C, W-5940, R.2. A satiny and unabraded sea-green and golden-brown example. The centers retain the planchet texture, but the strike is sharp throughout the remainder of the design. Massachusetts struck half cents and cents in both 1787 and 1788, before passage of the U.S. Constitution ended state coinage. Listed on page 61 of the 2017 Guide Book. NGC ID# 2B22, PCGS# 296

- 15003** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, MS62 Brown PCGS. N. 13-X, W-6855, R.2. A smooth and well-centered olive-brown example. The strike is fairly sharp, and there are no evident abrasions or laminations. The left obverse border retains traces of the planchet texture. Probably from the Bank of New York Hoard, which included many Uncirculated 'X' reverse Fugios. Listed on page 89 of the 2017 Guide Book. *From The R. Thayer Sheets Yorktown Collection.* NGC ID# AX5E, PCGS# 883

HALF CENTS

1794 Half Cent, VF Details Challenging Cohen-8

- 15004** 1794 High Relief Head, C-8, B-8, R.5 — Rim Damage — Genuine PCGS. VF Details. Manley Die State 2.0. A nicely defined walnut-brown example of the very scarce to rare Cohen-8 variety. The PCGS designation refers to "the deep linear depression above L and BER of LIBERTY [that] appears to us to be mint-made," as described for its Norweb catalog appearance. The right obverse field retains fissures present on the planchet before the strike, and a spot is noted below the IT in UNITED. Our EAC grade Fine 12. *Ex: Melvin Danner Collection (James Kelly, 4/1959); Coin Galleries (Stack's, 11/1985), lot 1456; Rick Leonard; Don Valenziano; Bill Weber Collection (Superior, 6/2002), lot 2259; Norweb Collection (Stack's 11/2006), lot 2337, which realized \$5,750.*

- 15005** 1795 Plain Edge, Punctuated Date, C-4, B-4, R.3, Fine 15 PCGS. Manley Die State 2.0 with a bulged right obverse field. This lovely apple-green and plum-mauve representative is impressively free from abrasions and carbon. HALF CENT is softly brought up, as always seen on later die state Cohen-4 examples. Our EAC grade Fine 12. NGC ID# 2225, PCGS# 35080 Base PCGS# 1012

- 15006** 1802/0 Reverse of 1802, C-2, B-2, R.3 — Environmental Damage — Genuine PCGS. VG Details. Manley Die State 2.0. The 1802/0 is a stopper to the Draped Bust series. This highly collectible tan-brown example is nicer than the PCGS designations imply, since the granularity is light and even, and marks are confined to a couple of short field lines above the bust tip. A collector's envelope is included, and states the coin was acquired from Anthony Terranova at the January 2009 FUN show. Our EAC grade VG7.

- 15007** 1802/0 Reverse of 1802, C-2, B-2, R.3 — Environmental Damage — Genuine PCGS. VF Details. Manley Die State 2.0. The 1802/0 is the key Draped Bust date. Manley writes, "most 1802 C-2 half cents are in very low grades." This deep brown representative is minimally abraded and much sharper than the typical survivor, though the surfaces are intermittently granular. Our EAC grade Good 5. *From The R. Thayer Sheets Yorktown Collection.*

- 15008** 1804 Crosslet 4, Stems, C-4, B-2, FS-302, R.5, Good 6 PCGS. Manley Die State 1.0. A pleasing deep walnut-brown example. All legends are clear. C-4 ranks among the rarest 1804 die marriages. The evenly microgranular surfaces are uncommonly devoid of abrasions or spots. A collector's envelope accompanies the lot, and lists the pedigree as 2010 EAC; Tom Reynolds; Steve Fisher. Our EAC grade Good 5. PCGS# 35149 Base PCGS# 1069

- 15009** 1804 Crosslet 4, No Stems, C-12, B-11, R.2, AU58 PCGS. A golden-brown example with hints of steel-blue patina on the portrait high points. Satiny and minimally worn. Spots are absent, and minor marks are limited to the field above the bust tip and the ribbon ends near the fraction. Our EAC grade AU50. NGC ID# 222F, PCGS# 35173 Base PCGS# 1072

15010 1811 Close Date, C-2, B-2, Low R.3, VF20 PCGS. Manley Die State 2.0. The 1811 is key to a date collection of Classic Head half cents. The present example has deep brown fields and medium brown high points. Moderately granular near the F in HALF, and a thin line is noted above the E in CENT. Our EAC grade Fine 12. NGC ID# 222S, PCGS# 35242 Base PCGS# 1135

15011 1857 C-1, B-1, R.2, MS65 Brown PCGS. CAC. The final-year half cent is somewhat scarcer than its 1853 to 1856 predecessors, partly due to a low mintage of 35,180 pieces. Although designated as Brown, the present Gem displays generous amounts of Red on both sides, near the stars, letters, and wreath. The high points and open fields are medium brown. Our EAC grade MS62. NGC ID# 26Z3, PCGS# 35339 Base PCGS# 1239

LARGE CENTS

1795 S-78 Cent, AU50 Usual Plain Edge Type

15012 1795 Plain Edge, S-78, B-8, R.1, AU50 ANACS. Breen Die State IV, with a tiny break or chip under Liberty's chin. Faint clash marks are evident inside the left wreath branch and below TES OF. Given its status as the most plentiful 1795 large cent variety, the S-78 is an outstanding candidate for a date or type collection. Despite a small imperfection on the right obverse rim, this smooth light olive and chestnut-brown cent is an outstanding example for the grade. A few trivial planchet imperfections have no effect on the grade. Our EAC grade VF35. NGC ID# 223T, PCGS# 35729 Base PCGS# 1380

1799/8 S-188, B-2 Cent, VG Sharpness Key Draped Bust Issue

15013 1799/8 S-188, B-2, R.4 — Corroded-Burnished — ANACS. VG Details. The surfaces are quite heavily corroded, but the widely spaced date with knobbed 9s is discernible. Deep-brown surfaces show evidence of smoothing, yet some hair detail remains and the legends are complete. A collectible example of this key Draped Bust variety, seldom seen without problems. Our EAC grade AG3.

15014 1800/79 Style Two Hair, S-194, B-8, R.3, VF25 PCGS. Breen Die State VII with rim cud below the fraction and the C in AMERICA. This nicely detailed deep brown example displays wheat-gold and powder-blue undertones. Marks are minimal aside from a rim nick below the left ribbon end. A collector's envelope accompanies the lot. Our EAC grade Fine 15. NGC ID# 2U57, PCGS# 36161 Base PCGS# 1455

1800 S-206 Cent, AU53

15015 1800 S-206, B-27, R.3, AU53 PCGS. Breen Die State II. Die cracks near the fraction and a horizontal die crack below the hair ribbon allow prompt attribution. This lightly circulated cent has minimally granular walnut-brown and gunmetal surfaces. No marks are readily apparent. A desirable addition to an advanced holding. Our EAC grade VF35. NGC ID# 2248, PCGS# 36206 Base PCGS# 1449

15016 1804 S-266c, B-1, R.2 — Reverse Damage — NGC Details. Fine. The third major die state with a prominent cud on each side. The present deep brown example is sharper than most survivors of this key date. The fields are lightly granular, and clusters of thin parallel marks are noted on the reverse near 9:30 and 10:30. Our EAC grade Good 5.

15017 1810/09 S-281, B-1, R.1 — Cleaning — Genuine PCGS. XF Details. Breen Die State IV. Like all Classic Head varieties, the 1810 overdate is conditionally rare in better circulated grades. The present well-defined cent displays forest-green and lavender patina. Clashed near the T in CENT, but few marks are observed. Our EAC grade VF25.

From The R. Thayer Sheets Yorktown Collection.

15018 1811/0 S-286, B-2, R.3, VF20 PCGS. The underdigit 0 is apparent on both sides of the final 1 in the date. The scarce overdate is key to a *Guide Book* collection of Classic Head cents. This nicely defined example has lightly granular cobalt-blue and lavender surfaces. Refreshingly void of abrasions or spots. Our EAC grade Fine 12.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 224V, PCGS# 36490 Base PCGS# 1558

15019 1823 N-2, R.2, VF20 PCGS. The middle die state with two distinct rim die breaks near stars 4 through 6. An ebony-brown representative of this much better Matron Head date. Both sides are relatively unabraded, aside from a single thin line beneath the TA in STATES. Our EAC grade Fine 12. NGC ID# 225A, PCGS# 36757 Base PCGS# 1627

15020 1837 Plain Cords, Medium Letters, N-4, R.2, MS65 Brown NGC. CAC. A splendid light brown Gem with full cartwheel luster and mint frost, this piece has splashes of pale blue toning on each side with exceptional eye appeal. Our EAC grade MS63.

Ex: New York Signature (Heritage, 12/2011), lot 3034. PCGS# 37156 Base PCGS# 1735

15021 1839/6 Plain Cords, N-1, R.3, Fine 15 PCGS. CAC. A scarce *Guide Book* variety seldom seen above the Fine grade level. This piece displays even wear and smooth reddish-brown surfaces. The overdate feature and the plain hair cords are visible with a loupe. Our EAC grade VG10. Population: 11 in 15, 32 finer. CAC: 3 in 15, 7 finer (1/17). NGC ID# 225W, PCGS# 37261 Base PCGS# 1756

15022 1841 N-3, R.2, MS64 Brown PCGS. Grellman Die State d. Prominent peripheral die cracks attribute this chocolate-brown Choice cent. Nicely struck and satiny with an essentially mark-free reverse. The obverse exhibits minor contact on Liberty's neck and the field near star 10. Our EAC grade MS60. PCGS# 405800 Base PCGS# 1832

**1847/47 Cent, Glossy MS63 Brown
N-18, Rare Repunched Date Variety**

15023 1847/47 Large Over Small 47, N-18, R.5, MS63 Brown PCGS. Grellman Die State a. N-18 is a very scarce so-called Large Over Small 7 variety, but in fact all four digits of the date are repunched south. The Small 7 is clearly visible beneath the primary Large 7, and the 8 is strongly repunched. This Select Uncirculated example displays lustrous and glossy mahogany brown surfaces with brick-red undertones. A few tiny field ticks join the characteristic stippled appearance of the face, cheek, and neck diagnostic of the N-18 variety. Our EAC grade AU55. NGC ID# 226D, PCGS# 405929 Base PCGS# 1880

15024 1847 N-35, R.4, MS64 Red and Brown PCGS. Grellman Die State b. The middle die state without a crack through the base of the date. A virtually unabraded Choice cent with generous pockets of fire-red luster about the stars and peripheral legends. Open areas are steel-gray. The strike shows occasional softness, but the technical quality is delightful. Our EAC grade MS62. PCGS# 37350 Base PCGS# 1878

15025 1852 N-16, R.1, MS66+ Brown PCGS. CAC. Several tiny die lumps on ONE CENT confirm the Newcomb variety. Glimpses of faded Red cling to the date and legends, while the high points and open fields are chocolate-brown. The surfaces are carbon-free and unabraded. A late die state with an "orange peel" textures throughout the fields. Our EAC grade MS62. NGC ID# 226J, PCGS# 147269 Base PCGS# 1898

**1853 N-13 Cent, MS65 Red
Frosty, Coppery Surfaces**

15026 1853 N-13, R.1, MS65 Red PCGS. Grellman Die State b. The bottom of the 1 is doubled, and a small die lump occurs under the I in LIBERTY. A hoard of high-grade examples makes this a plentiful variety. Each side radiates frosty luster over coppery surfaces. The upper stars are incompletely defined, but the hair curls are bold. Encapsulated in a green label holder. Our EAC grade MS65. PCGS# 403930 Base PCGS# 1903

15027 1853 N-17, R.2, MS66 Brown PCGS. CAC. Although designated as Brown by PCGS, the date and reverse legends display generous amounts of orange-red. The portrait, wreath, and stars are also framed by glimpses of the initial color. The high points and open fields are steel-gray. An unabraded Premium Gem with moderate strike-throughs (as coined) on Liberty's neck. Our EAC grade MS62. PCGS# 406018 Base PCGS# 1901

**1855 N-4 Cent, MS65 Red
Upright 55**

15028 1855 Upright 55, N-4, R.1, MS65 Red NGC. Die State a. This available variety is often seen in high-grade type sets. The present Gem example displays unabraded, frosty surfaces with original copper-red color. Scattered tiny specks are only noticed with a loupe. The obverse portrait is sharp but several stars are weak. On the reverse, some weakness occurs on the high points of the wreath, and there are planchet voids around ONE. Our EAC grade MS64. Census (all varieties included): 37 in 65 Red, 6 finer (2/17). NGC ID# 226M, PCGS# 406155 Base PCGS# 1909

15029 1856 Slanted 5, N-3, R.1, MS64 Red and Brown NGC. Grellman Die State f. Lengthy die cracks on both sides allow prompt attribution of this unabraded near-Gem. The obverse is golden-brown and the deeper reverse is mahogany-brown. The dies were slightly out of parallel, such that the lower obverse and upper reverse display the sharpest strike. Our EAC grade MS60. NGC ID# 226N, PCGS# 406200 Base PCGS# 1922

15030 1856 Upright 5, N-6, R.1, MS65 Red and Brown PCGS. Grellman Die State a. Die lumps in front of the bust tip and on the O in ONE identify the Newcomb marriage. This lustrous and virtually unabraded Gem exhibits only trivial carbon. Open areas and high points are Brown, but Red outlines the stars and fills the legends. Our EAC grade MS62. NGC ID# 226N, PCGS# 404589 Base PCGS# 1920

FLYING EAGLE CENTS

15031 1857 MS64 NGC. Sharply detailed in most areas, this impressive Choice specimen shows just a touch of softness on the upper wreath. The well-preserved surfaces show predominant light brown patina, with areas of bright red around the devices. NGC ID# 2276, PCGS# 2016

15032 1857 MS64 PCGS. This attractive Choice example offers well-detailed design elements, with a touch of softness on the feathers at the top of the eagle's wing. The lightly marked surfaces exhibit slightly subdued satiny mint luster. NGC ID# 2276, PCGS# 2016

15033 1857 Doubled Die Obverse, Snow-4, FS-101, MS64 PCGS. The eagle's eye and beak are doubled, as are portions of AMERICA. From the broken wing tip hub, which distinguishes FS-101 from the similar FS-105. This crisply struck and satiny near-Gem is unabraded and displays dusky wheat-gold toning. Population: 7 in 64, 3 finer (2/17). NGC ID# 2276, PCGS# 37378 Base PCGS# 2016

15034 1858 Small Letters MS64 PCGS. Low Leaves Reverse. Close E in ONE. A semiprooflike near-Gem with reflective fields and a needle-sharp strike. The predominantly lemon-gold surfaces display hints of lime-green and orange toning. Without any noticeable detractors. NGC ID# 2279, PCGS# 2020

15035 1858 Small Letters, High Leaves, FS-1901, MS64 NGC. Closed E in ONE. A scarce design subtype from the final year of the short-lived series. A well struck Choice cent with dynamic luster and smooth peach-gold and sea-green surfaces. A small lamination (as made) above the second T in STATES.

From The Martin Peterson Collection. PCGS# 569235 Base PCGS# 2020

INDIAN CENTS

15036 1859 MS65 PCGS. A lovely, fully struck Gem example of this one-year Laurel Wreath type, showing satiny tan-gold luster with hints of lavender and peach color throughout. There are no distracting abrasions, and Liberty's cheek is particularly clean. PCGS has seen 33 numerically finer submissions (3/17). NGC ID# 227E, PCGS# 2052

1860 Cent, MS65 Pointed Bust

15037 1860 Pointed Bust, FS-401, MS65 PCGS. The scarcer Pointed Bust variety, this Gem 1860 Indian cent displays a bold strike and satiny bronze-gold luster. A single mark in front of Liberty's forehead is the only notable abrasion. Finer 1860 cents are scarce, finer Pointed Bust 1860 cents are rare. Population: 42 in 65 (3 in 65+), 13 finer (2/17). NGC ID# 227F, PCGS# 37393 Base PCGS# 2056

15038 1860 MS65 PCGS. The copper-red and crimson surfaces of this impressive Gem show some slight granularity on close inspection, but no mentionable distractions are evident and ample mint luster radiates from both sides. The design elements are well-detailed. NGC ID# 227F, PCGS# 2058

15039 1861 MS65 PCGS. This attractive Gem exhibits sharply detailed design elements, with some interesting clash marks on both sides. The copper-red surfaces are well-preserved, with vibrant mint luster and no mentionable distractions. Eye appeal is outstanding. NGC ID# 227G, PCGS# 2061

15040 1861 MS65 PCGS. A sharply detailed Gem, from the first year of the Civil War, this piece offers well-preserved copper-red surfaces, with hints of light brown patina in selected areas. Vibrant mint luster shines through the patina and eye appeal is outstanding. NGC ID# 227G, PCGS# 2061

15041 1861 MS66 PCGS. A bold strike and luminous tan-gold luster characterizes this Premium Gem 1861 Indian cent. Liberty's cheek is beautifully clean, and portions of the fields have a hint of reflectivity. Tinges of sun-gold also emerge from the fields when tilted beneath a light. Finer 1861 cents are rarely offered. Population: 89 in 66 (5 in 66+), 13 finer (2/17). NGC ID# 227G, PCGS# 2061

15042 1864 L On Ribbon MS65+ Red and Brown PCGS. CAC. A Plus-graded Gem example of this popular *Guide Book* variety, with sharply detailed design elements and lustrous original red surfaces that have mellowed to crimson in some areas. No mentionable distractions are evident. PCGS has graded eight numerically finer examples (2/17). NGC ID# 227M, PCGS# 2080

15043 1865 Fancy 5 MS66 Red and Brown PCGS. Orange-gold dominates the reverse, and fills the obverse border. Liberty and the nearby field display deep gunmetal and lilac toning. Sharply struck and lustrous with contact confined to a single unobtrusive line on the cheek. NGC ID# 227N, PCGS# 2083

15044 1869/69 Snow-3f, FS-301, MS66 Red and Brown NGC. Ex: Highland Collection. A delightful Premium Gem of this *Guide Book* repunched date variety. The obverse is far more red than brown, though the other side is deeper in hue. Sharply defined on the ribbon and feathers. NGC ID# 227T, PCGS# 37475 Base PCGS# 2095

15045 1877 XF40 PCGS. An attractive medium brown representative. Wear is moderate, and neither side has any mentionable marks. The "throwback" Shallow N subtype, elsewhere unseen since 1872. Encapsulated in an old green label holder. *From The Martin Peterson Collection.* NGC ID# 2284, PCGS# 2127

1877 Indian Cent, Glossy AU58

15046 1877 AU58 PCGS. CAC. Glossy chocolate-brown surfaces are the hallmark of this key Indian cent. The motifs are well-defined and show only brief circulation. The shallow N in ONE denotes all genuine 1877 cents. A collectible example, ideal for the enthusiast putting together an AU date and mintmark set. NGC ID# 2284, PCGS# 2127

15047 1891 MS65 Red PCGS. A fire-red Gem. Carbon is confined to a fleck between the ER in AMERICA, and the strike is sharp save for blending on the upper right portion of the wreath. Population: 74 in 65 (1 in 65+) Red, 19 finer (2/17). NGC ID# 228K, PCGS# 2180

15048 1892 MS65 Red PCGS. Snow-5. The 1 in the date is repunched south, apparent below the flag and base. Rick Snow states the obverse die also struck proofs. This lustrous fire-red Gem is sharply struck and essentially free from carbon. NGC ID# 228L, PCGS# 2183

15049 1894 MS65 Red PCGS. An orange-red Gem with hints of sea-green on the portrait and reverse field. The well struck and lustrous surfaces are refreshingly free from detractors. The 1894 has less than half the mintage of any other cent issue from the 1890s. NGC ID# 228N, PCGS# 2189

15050 1894 MS65 Red PCGS. Sharply struck with lustrous copper-red color over finely granular surfaces, this 1894 cent radiates strong eye appeal. A few small carbon flecks are noted on each side and a short line on the cheek, but there are no other marks to report on the attractive Gem surfaces. A slightly better date with the lowest mintage of the 1890s. Population: 85 in 65 (5 in 65+) Red, 35 finer (2/17). NGC ID# 228N, PCGS# 2189

15051 1894/1894 Repunched Date, Snow-1, FS-301, MS63 Red ANACS. The most dramatic repunched date variety of the Indian cent series. The date was initially entered with an upward slant, then corrected. A coruscating ruby-red, olive-green, and peach-gold example. Housed in a small-sized holder. *From The Martin Peterson Collection.* NGC ID# 228N, PCGS# 37584 Base PCGS# 92189

**1899 Cent, Impeccable MS66+ Red
Interesting O Clash Mark**

15052 1899 MS66+ Red PCGS. CAC. A sizeable number of 1899 Indian Head cents survive in the upper reaches of Mint State with original Red coloration, but that total is still small relative to the 53.6 million coins struck that year. Blazing frost swirls over this impeccable Premium Gem. The motifs are boldly impressed, and alloy spots are limited to a few obverse flecks. A spectacular clash mark from the O in ONE appears in the field adjacent to Liberty's nose and eye. There are 26 higher grading events at PCGS (2/17). NGC ID# 228U, PCGS# 2204

15053 1904 MS66 Red PCGS. CAC. Beautiful fire-orange luster coats this exceptionally well-preserved Premium Gem type coin, illuminating boldly struck design elements. There are no carbon spots, and we observe no mentionable abrasions beneath a loupe. Population: 72 in 66 (5 in 66+) Red, 7 finer. CAC: 12 in 66, 1 finer (2/17). NGC ID# 228Z, PCGS# 2219

15054 1906 MS66 Red NGC. A sharply struck olive-gold and peach Premium Gem that has vigorous luster and exquisite surfaces. Housed in a former generation holder. The 1906 is rare this fine and prohibitively so any finer. Census: 38 in 66 (1 in 66+) Red, 1 finer (2/17).
Ex: FUN Signature (Heritage, 1/2008), lot 354; FUN Signature (Heritage, 1/2009), lot 371. NGC ID# 2293, PCGS# 2225

15055 1909 MS66+ Red PCGS. CAC. A high-grade orange-gold cent. The strike is good, contact is absent, and the lustrous surfaces show only minor carbon. The Longacre initial appears die doubled (Snow-1, FS-101), although no premium is associated with the variety. NGC ID# 2297, PCGS# 2237

15056 1909-S MS64 Red and Brown PCGS. The design elements of this impressive Choice specimen are well-detailed, with just a touch of softness on the feather tips. The original red surfaces have mellowed to light brown in some areas but vibrant mint luster is evident on both sides. NGC ID# 2298, PCGS# 2239

15057 1909-S MS64 Red and Brown PCGS. Though reddish-brown shadings dominate each side of this Choice 1909-S Indian cent, elements of copper-orange are noted in the fields. Well-struck and appealing with no obvious evidence of carbon.
Ex: Summer FUN Signature (Heritage, 6/2008), lot 188. NGC ID# 2298, PCGS# 2239

15058 1909-S MS65 Red and Brown NGC. This olive-gold and lilac-red Gem has a bold strike, good luster, and an unmarked appearance. A few minute flecks near the date cannot deny the eye appeal. The lowest mintage regular issue of the cent denomination. Encased in a prior-generation holder.
From The Martin Peterson Collection. NGC ID# 2298, PCGS# 2239

**1909-S Indian Cent, MS64 Red
Low-Mintage Key**

15059 1909-S MS64 Red PCGS. CAC. A low-mintage key, from the final year of the design, the 1909-S Indian cent is always in demand. This impressive Gem displays well-detailed design elements, with a touch of the usual softness on the headdress feathers. The well-preserved copper-red surfaces radiate vibrant mint luster throughout and overall eye appeal is outstanding. NGC ID# 2298, PCGS# 2240

PROOF INDIAN CENTS

15060 1859 PR64 PCGS. Sun-gold outlines design elements, while open areas are display pastel lavender toning. Fully struck and flashy with the occasional minuscule fleck. Scarce as a single-year proof type. Encapsulated in a green-label holder.
From The Martin Peterson Collection. NGC ID# 2299, PCGS# 2247

15061 1861 PR64 NGC. Struck during the first year of the Civil War, before proof mintages were sharply reduced, this attractive Choice specimen offers sharply detailed design elements and deeply reflective copper-red fields with few signs of contact. Census: 32 in 64 (1 in 64★), 28 finer (2/17).
From The Martin Peterson Collection. NGC ID# 229B, PCGS# 2256

15062 1862 PR64 PCGS. Lovely orange-gold color is consistent throughout this well struck and lustrous Civil War near-Gem. No contact is apparent, and the only imperfection is an unobtrusive spot between the AM in AMERICA. Certified in a green-label holder.
From The Martin Peterson Collection. NGC ID# 229C, PCGS# 2259

15063 1863 PR64 PCGS. This Civil War proof cent is mostly orange-gold, though wisps of lime-green are also evident. The strike is intricate and no contact is consequential. Moderate carbon corresponds to the grade. Certified in a green-label holder.
From The Martin Peterson Collection. NGC ID# 229D, PCGS# 2262

15064 1863 PR64 PCGS. CAC. From a small Civil War mintage of 460 pieces, this attractive Choice specimen displays sharply detailed design elements and reflective fields throughout. The coppered surfaces show highlights of crimson on the reverse, with only minor signs of contact. Population: 78 in 64, 33 finer. CAC: 8 in 64, 4 finer (2/17). NGC ID# 229D, PCGS# 2262

15065 1864 Copper-Nickel PR64 PCGS. A wheat-gold Choice cent that has a needle-sharp strike and an absence of contact. A few tiny flecks, mostly west of the wreath ribbon, account for the grade. The final copper-nickel date, since the composition was changed to bronze to counter Civil War hoarding. Housed in a green label holder.
From The Martin Peterson Collection. NGC ID# 229E, PCGS# 2265

15066 1864 Bronze No L PR64 Red and Brown PCGS. The left borders are cherry-red, the fields are orange-gold, and the headdress is olive-green. A flashy and fully struck near-Gem with minor retained laminations near the U in UNITED and the T in CENT. Encapsulated in a green label holder.
From The Martin Peterson Collection. NGC ID# 229F, PCGS# 2277

15067 1866 PR65 Red and Brown NGC. Cherry-red, forest-green, and sun-gold alternate across this intricately impressed Gem. Contact and carbon are inconsequential. The portrait displays minor die rust, as produced. Certified in a green-label holder.
From The Martin Peterson Collection. NGC ID# 229J, PCGS# 2286

15068 1872 PR65 Red and Brown NGC. Bold N in ONE. The orange-gold obverse approaches full Red status, despite a blush of light olive-green on the cheek and left field. The reverse displays deeply variegated lilac and peach colors. Fully struck and devoid of contact.

From The Martin Peterson Collection. NGC ID# 229R, PCGS# 2304

1877 Cent, PR64 Red and Brown Amazing Iridescent Color

15069 1877 PR64 Red and Brown NGC. Given the perennially strong demand for 1877 Indian Head cent circulation strikes, of which only 852,500 pieces were produced, it is little wonder that proofs of that year come under such intense date pressure. This Choice Red and Brown proof cent is incredibly eye-appealing example with a spectacular array of iridescent rose, violet, blue, and sea-green color patina each side. Minuscule contact marks are unobtrusive. Encapsulated in a prior generation holder.

From The Martin Peterson Collection. NGC ID# 229W, PCGS# 2319

15070 1881 PR65 Red NGC. Magnificent fire-red and orange color ensures exemplary eye appeal for this precisely struck and prominently mirrored Gem. Only separated from perfection by a fleck or two on each side. Certified in a pre-hologram holder. Census: 30 in 65 Red, 15 finer (2/17).

From The Martin Peterson Collection. NGC ID# 2868, PCGS# 2332

15071 1885 PR66 Red and Brown PCGS. CAC. Eagle Eye Photo Seal. A crisply struck specimen with peach-gold color on the upper obverse and most of the reverse. The lower obverse and the upper reverse margin exhibit dusky ruby-red and forest-green shades.
Ex: Long Beach Signature (Heritage, 2/2013), lot 3147; FUN Signature (Heritage, 1/2015), lot 3272. NGC ID# 22A6, PCGS# 2343

15072 1894 PR66 Red and Brown PCGS. Reflective fields glimmer beneath fiery-orange, amber, and violet hues on this Premium Gem Red and Brown proof. The strike is sharp, and there are no distracting contact marks. Red and Brown coins are rare this well-preserved. Population: 4 in 66 (1 in 66+) Red and Brown, 1 finer (2/17). NGC ID# 22AG, PCGS# 2370

1906 Cent, PR67 Red and Brown Vivid Coloration

15073 1906 PR67 Red and Brown NGC. Deep forest-green toning dominates two-thirds of the obverse and about half of the reverse periphery. The remainder of this Superb Gem displays cherry-red and orange-gold. The strike is intricate, and the sole imperfection is a reverse fleck at 3 o'clock. Certified in a former generation holder. NGC ID# 22AV, PCGS# 2406

15074 1908 PR66 Red and Brown PCGS. The well-preserved surfaces of this impressive Premium Gem show a mix of original red and light brown patina, with deeply mirrored fields and no mentionable distractions. The design elements are sharply detailed throughout. Population: 29 in 66 (1 in 66+) Red and Brown, 5 finer (2/17). NGC ID# 22AX, PCGS# 2412

LINCOLN CENTS

15075 1909-S VDB MS64 Red and Brown PCGS. Pumpkin-gold is fairly abundant, especially on the reverse. The portrait and obverse field are mostly Brown. Crisply struck and lustrous with lovely, unblemished surfaces. Certified in a green-label holder.

From The Martin Peterson Collection. NGC ID# 22B2, PCGS# 2427

15076 1909-S VDB MS65 Red and Brown PCGS. The chestnut-gold and olive-green surfaces are closer to Red than Brown. A mark-free, sharply struck, and lustrous Gem. A solitary obverse fleck near 3 o'clock provides an identifier. Encased in an old green label holder.
From The Martin Peterson Collection. NGC ID# 22B2, PCGS# 2427

15077 1909-S VDB MS65 Red and Brown NGC. The mostly red surfaces of this impressive Gem show light brown patina in a few areas, but no mentionable defects are present and both sides display radiant mint luster. The design elements are sharply detailed in most areas, but the designer's initials are a little soft. NGC has graded 49 numerically finer examples (2/17).

From The Martin Peterson Collection. NGC ID# 22B2, PCGS# 2427

15078 1909-S VDB MS65 Red and Brown PCGS. CAC. This lustrous Gem Red and Brown S-VDB cent displays luminous copper-orange and gold hues blended throughout each side. The strike is bold, and there are no major abrasions. A few tiny, scattered specks are only visible with a loupe. Finer Red and Brown examples of this key date are scarce. NGC ID# 22B2, PCGS# 2427

15079 1909-S VDB MS64 Red PCGS. The obverse is primarily olive-green, with a hint of rose-red on Lincoln and a blush of butter-gold across the margin. The reverse has a lemon-gold center bounded by peripheral orange color. Well struck and unabraded with one small fleck above the 1 in the date.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 22B2, PCGS# 2428

15080 1909-S VDB MS64 Red PCGS. An impressive Choice example of this important series key, with blazing original red surfaces and few signs of contact. The design elements are sharply detailed in most areas, but some peripheral devices, including the designer's initials, were lightly impressed. NGC ID# 22B2, PCGS# 2428

**1909-S Lincoln Cent, MS66+ Red
Underrated Condition Rarity**

15081 1909-S MS66+ Red PCGS. The 1909-S is considerably scarcer in high grades than its famous 1909-S VDB counterpart, but it commands nowhere near the same level of attention. This lovely Premium Gem cent enjoys luminous, frosty luster over light coppery-gold surfaces. The devices are boldly rendered, and aside from a fleck on Lincoln's shoulder, there are no singular marks to report. Only nine submissions are graded finer at PCGS (2/17). NGC ID# 22B4, PCGS# 2434

15082 1911-D MS65 Red PCGS. The rose-gold and apple-green surfaces teem with cartwheel luster. A well struck and virtually unabraded Gem. A whisper of gray is noted on each side. An early and scarce branch issue. NGC ID# 22B8, PCGS# 2446

15083 1911-D MS66 Red PCGS. The first Denver Mint cent issue, the 1911-D is conditionally rare with unblemished full Red surfaces. This lustrous orange-gold example is nicely struck and unabraded. One unobtrusive spot is northwest of the right wheat ear. Population: 61 in 66 (6 in 66+) Red, 1 finer (1/17). NGC ID# 22B8, PCGS# 2446

15084 1911-D MS66 Red PCGS. Registry Set quality appears on each side of this Premium Gem Red 1911-D Lincoln cent, showing luminous coppery-orange luster and a well-executed strike. Die erosion in the fields produces a haziness around the design elements that contributes to the shimmering effect seen when rotated beneath a light. Population: 61 in 66 (6 in 66+) Red, 1 finer (2/17). NGC ID# 22B8, PCGS# 2446

15085 1911-S MS65 Red and Brown PCGS. CAC. The mostly red surfaces of this impressive Gem have mellowed to light brown and crimson in selected areas, but few signs of contact are evident. The design elements are sharply detailed, with satiny mint luster under the patina. Population: 85 in 65 (2 in 65+) Red and Brown, 0 finer. CAC: 12 in 65, 0 finer (2/17). NGC ID# 22B9, PCGS# 2448

15086 1913-D MS65 Red PCGS. The original red surfaces of this impressive Gem are well-preserved and lustrous, and the design elements are sharply detailed throughout. PCGS has certified 21 numerically finer examples (2/17). NGC ID# 22BE, PCGS# 2464

15087 1914-D AU58 PCGS. This near-Mint 1914-D Lincoln cent displays rich chocolate-brown toning but little high-point friction. The surfaces are smooth and problem-free other than a small carbon spot at 6 o'clock on the obverse rim. Lincoln cent collectors looking to fill this key-date hole in their collections need look no further.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 84BX, PCGS# 2471

**1914-D Cent, MS64 Brown
Hints of Red Remain**

15088 1914-D MS64 Brown PCGS. Brown Mint State 1914-D cents are scarce in MS64 and rare finer. This near-Gem is designated Brown, but it is more accurate described as auburn and burgundy with original hints of reddish luster shining through in the protected regions of the fields. Only one carbon spot is noticeable, located left of the C in CENT. The strike is sharp, and no distracting abrasions are observed. Population: 65 in 64 (1 in 64+) Brown, 18 finer (2/17). NGC ID# 84BX, PCGS# 2471

15089 1914-S MS64 Red and Brown PCGS. CAC. Overshadowed by its Denver counterpart, the 1914-S Lincoln cent is actually just about as scarce as the '14-D in high grade. This Choice Red and Brown example displays satiny luster with blended chestnut-brown and copper-gold colors. The O in ONE is poorly struck as usual. PCGS has seen 27 higher-grade examples (2/17). NGC ID# 22BJ, PCGS# 2475

15090 1915-S MS64 Red and Brown PCGS. Like other early branch issues, the 1915-S is elusive in quality Mint State. But the present near-Gem has a full strike, and the fine-grained dusky peach-gold surfaces are exceptionally free from abrasions. Certified in a green-label holder.
From The Martin Peterson Collection. NGC ID# 22BM, PCGS# 2484

15091 1915-S MS64 Red and Brown PCGS. CAC. The 1915-S cent is scarce in Gem condition with any color designation. This collectible Choice Red and Brown coin displays a sharp strike that includes partially squared rims. Satiny chestnut-brown toning graces golden-orange undertones, producing the Red and Brown look. There are 29 numerically finer Red and Brown pieces at PCGS (2/17). NGC ID# 22BM, PCGS# 2484

15092 1916 MS67 Red PCGS. It is difficult even for a loupe to find flaws in the luminous copper-orange and golden luster of this Superb Gem, save for a few tiny specks that do not detract. The strike is full, and the visual appeal is warmly pleasant. Among the finest Red coins certified. Population: 70 in 67 (11 in 67+) Red, 0 finer (2/17). NGC ID# 22BN, PCGS# 2488

15093 1916-D MS65 Red PCGS. The original red surfaces of this impressive Gem show no mentionable defects, with vibrant mint luster on both sides. The design elements are sharply detailed throughout. Population: 67 in 65 (3 in 65+) Red, 19 finer (2/17). NGC ID# 22BP, PCGS# 2491

15094 1917-S MS65 Red and Brown PCGS. The original red surfaces of this impressive Gem have mellowed to light brown in places, but no mentionable distractions are evident. The design elements are sharply detailed in most areas, but the letters in UNUM are a little soft. Population: 54 in 65 Red and Brown, 0 finer (2/17). NGC ID# 22BU, PCGS# 2502

15095 1920-D MS65 Red PCGS. Well-preserved, pumpkin-gold surfaces are aglow in satin luster. Typically struck with incompleteness on the beard, O in ONE, and AMERI. The fields are smooth, and grade-defining marks are of little consequence. An attractive Gem. PCGS shows seven finer Red submissions (2/17). NGC ID# 22C4, PCGS# 2527

**1920-D Cent, MS65+ Red
Extremely Rare Any Finer**

15096 1920-D MS65+ Red PCGS. A nice, high-end coppery-red example of this conditionally elusive Denver issue, showing a bold strike and satiny, unabraded luster. A few small flecks near the borders are unnoticed by the naked eye. PCGS has Plus-graded only six Gem Red coins, and that service reports seven finer examples (3/17). NGC ID# 22C4, PCGS# 2527

15097 1922-D MS65+ Red PCGS. This satiny copper-red Gem is sharply struck and devoid of obtrusive abrasions. A loupe reveals a few small flecks, but they are not bothersome. PCGS has seen only 14 finer Red examples of this semikey Denver issue (3/17). NGC ID# 22C8, PCGS# 2539

**1922 No D Cent, AU50
Strong Reverse**

15098 1922 No D, Strong Reverse, FS-401, AU50 PCGS. Die Pair 2. This AU 1922 No D cent was struck from an advanced state of the obverse that shows soft detail on that side, but with the reverse still strong. The surfaces display smooth chestnut-brown patina with hints of olive and rust-red seen beneath a loupe. A problem-free example of this semikey issue. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

15099 1922 Weak Reverse AU53 NGC. CAC. Die Pair 3. All 1922-dated cents were struck at Denver, but some lack a D mintmark, or show only a "shadow" of a D. The present No D example shows only slight wear, apparent on Lincoln's jaw and cheekbone. The surfaces are unabraded, but reverse peripheral elements are softly defined, as is IN GOD WE TRUST. NGC ID# 2U6G, PCGS# 2540 Base PCGS# 2537

15100 1924-D MS64 Red and Brown PCGS. CAC. The 1924-D is another little-known rarity in high grade, although this CAC-approved near-Gem remains accessible. Frosty copper-pink luster illuminates well-struck motifs and shows no major carbon spotting. Wisps of reddish-brown toning over each side confirm the Red and Brown designation. Finer coins are scarce in this color category, particularly with CAC approval. CAC: 21 in 64, 6 finer (2/17). NGC ID# 22CD, PCGS# 2553

**1925-D Cent, MS65 Red
Scarce in Gem, Unique Coloration**

15101 1925-D MS65 Red PCGS. Always elusive in the Red Gem grade, the 1925-D is a notorious strike rarity (as is its branch mint compadre, the poorly struck 1925-S). This Denver Mint cent is sharper than most, although we note traces of die erosion at the outermost legends. The flame orange surfaces are highly lustrous and free of all but the most minor, ticklike marks. Interesting quicksilver-blue accents occupy recesses on the portrait, margins, and around the lettering — an alloy-related quirk of the copper/tin/zinc bronze composition. A few random, tiny flecks appear on both sides but they are of little concern. Population: 67 in 65 (1 in 65+) Red, 2 finer (2/17). NGC ID# 22CG, PCGS# 2563

15102 1926-S MS64 Red and Brown PCGS. The 1926-S is famous for its great rarity in full Red. The present lustrous Choice cent displays considerable orange-gold on both sides, though sea-green and rose shades are also evident. Contact is essentially absent, and only a few pinpoint flecks emerge beneath a lens. Certified in a green label holder.
From The Martin Peterson Collection. NGC ID# 22CL, PCGS# 2574

15103 1926-S MS64 Red and Brown PCGS. CAC. Light tan and chestnut-brown surfaces retain full cartwheel luster on this Choice Mint State 1926-S cent. The strike is above average for this issue. PCGS has only certified 16 finer with the Red and Brown designation (2/17). NGC ID# 22CL, PCGS# 2574

15104 1928-S MS65 Red and Brown PCGS. CAC. Small S. A magnificent Gem. Contact and carbon are absent, and the lustrous surfaces are crisply impressed. A jade-green central obverse is framed by peripheral peach-gold. The reverse is orange-red with hints of lime-green. NGC ID# 22CT, PCGS# 2592

15105 1930-S MS66+ Red PCGS. CAC. 30th Anniversary Green Label Holder. A magnificent orange-red cent with a glimpse of russet color near the I in LIBERTY and the first U in PLURIBUS. Lustrous, carbon-free, well struck, and nearly devoid of contact. NGC ID# 22CZ, PCGS# 2611

**1931-S Lincoln Cent, MS66 Red
Popular and Elusive Issue**

15106 1931-S MS66 Red PCGS. This is one of the three famous key dates in the Lincoln cent series, alongside the 1909-S VDB and 1914-D cents. Some might contend that the 1955 Doubled Die Obverse error should also be on that list. This example is tied for the finest that PCGS has certified (2/17). The surfaces are brilliant orange with satin luster. All design elements are sharply defined. An impressive example for the advanced Registry collector. NGC ID# 22D4, PCGS# 2620

**1934 Cent, Top-Grade MS68 Red
Incredible Coloration**

15107 1934 MS68 Red PCGS. 30th Anniversary Green Label Holder. The 1934 Lincoln cent may be an available date overall, but Registry Set collectors will find top-grade coins to be rare acquisitions. Fewer than two dozen top-grade MS68 Red coins are certified by PCGS and NGC combined. This one displays extravagant frosty luster with fiery-orange surfaces that yield occasional glimpses of gold. The strike is sharp, and neither side exhibits distracting abrasions or spots. Population: 18 in 68 Red, 0 finer (2/17). NGC ID# 22D9, PCGS# 2635

15108 1944-D/S FS-511 MS64 Red PCGS. CAC. The upper curve and serif of a San Francisco mintmark emerge above the Denver mintmark. A desirable *Guide Book* variety, photographed on page 122 of the 2017 edition. A well struck and lustrous peach-red cent with a few gray freckles on the reverse. CAC: 8 in 64, 13 finer (2/17). NGC ID# 2734, PCGS# 37834 Base PCGS# 2728

15109 1946-D MS67+ Red PCGS. CAC. 30th Anniversary Green Label Holder. A gorgeous orange-red Superb Gem. Lustrous and well struck with essentially mark-free surfaces. The sole fleck is beneath the S in PLURIBUS. As of (2/17), PCGS has certified eight as MS67+ Red with none finer. NGC ID# 22EL, PCGS# 2746

15110 1949 MS67 Red PCGS. A magnificent Superb Gem, with impeccably preserved original red surfaces and blazing mint luster on both sides. The design elements are sharply detailed throughout and eye appeal is extraordinary. Population: 40 in 67 Red, 0 finer (2/17). NGC ID# 22EV, PCGS# 2770

15111 1950-S MS67+ Red PCGS. A lovely pumpkin-orange Superb Gem. Unabraded and lustrous with a good strike. A strong loupe is required to locate the few pinpoint imperfections. As of (2/17), PCGS has certified just 12 pieces as MS67+ with none finer. NGC ID# 22F2, PCGS# 2785

15112 1955 Doubled Die Obverse, FS-101 — Tooled — Genuine PCGS. AU Details. The 1955 FS-101 is arguably the most famous of all doubled die varieties. All obverse legends exhibit a dramatic spread. A lightly circulated chocolate-brown example. A cluster of lengthy vertical pinscratches through the E in CENT explains the PCGS designation.

15113 1955 Doubled Die Obverse, FS-101, MS62 Brown NGC. A charming tan-brown key date cent. Contact is minimal, the strike is good, and the obverse legends display the dramatic spread characteristic of the famous FS-101 variety.
From The Martin Peterson Collection. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

**1955 Lincoln Cent, MS63 Red and Brown
FS-101, Doubled Die Obverse**

15114 1955 Doubled Die Obverse, FS-101, MS63 Red and Brown PCGS. Forever scarce by collector demand, the obverse date and lettering show wide doubling that makes it the most famous Doubled Die Obverse in numismatics and arguably the most popular of all *Guide Book* varieties. This Select Mint State example displays plentiful copper-red luster with blue overtones. Numerous microscopic carbon flecks and a few tiny ticks dot the surfaces but do not distract from the substantial eye appeal. Housed in an old green label holder.

From The Martin Peterson Collection. NGC ID# 22FG, PCGS# 37911 Base PCGS# 2826

15115 2009-D Formative Years MS67 Red PCGS. The Formative Years reverse depicts Abraham Lincoln's early life as a rail splitter. Only a handful of Superb Gems have been certified at PCGS. This spectacular MS67 specimen offers fully struck design elements and impeccably preserved original red surfaces. Population: 7 in 67 Red, 0 finer (2/17). NGC ID# 22KE, PCGS# 407841

15116 2009-D Formative Years MS67 Red PCGS. The U.S. Mint sought to represent all phases of the life of Abraham Lincoln in 2009 through a series of four different reverse designs. The Formative Years design was released on May 14, 2009. This spectacular Superb Gem features virtually pristine original red surfaces and fully struck design elements throughout. Population: 7 in 67 Red, 0 finer (2/17). NGC ID# 22KE, PCGS# 407841

15117 2009-D Formative Years MS67 Red PCGS. The Formative Years Lincoln cent is the second of four reverse designs released in 2009 to portray various stages in the life of President Abraham Lincoln. This magnificent Superb Gem is sharply detailed and impeccably preserved, with blazing original red surfaces. Population: 7 in 67 Red, 0 finer (2/17). NGC ID# 22KE, PCGS# 407841

15118 2009-D Formative Years MS67 Red PCGS. Four reverse designs were issued for the Lincoln cent in 2009, each representing different stages in the life of the beloved President. The Formative Years design covers the era from 1816-1830, when Lincoln worked as a rail splitter. This fully struck Superb Gem displays virtually perfect original red surfaces with vibrant mint luster throughout. Population: 7 in 67 Red, 0 finer (2/17). NGC ID# 22KE, PCGS# 407841

15119 2009 Professional MS68 Red PCGS. A pristine example of this modern conditional rarity. A one-year type, the Professional Life design depicts Lincoln's career as an Illinois representative. It was the second of four designs commemorating Lincoln's birth bicentennial. Population: 3 in 68 Red, 0 finer (2/17). NGC ID# 22KG, PCGS# 407850

15120 2009 Professional MS68 Red PCGS. Lincoln poses before the Springfield, Illinois State Capitol. A fully struck and satiny pink-red representative. A loupe reveals only infrequent inconsequential imperfections. Population: 3 in 68 Red, 0 finer (2/17). NGC ID# 22KG, PCGS# 407850

PROOF LINCOLN CENTS

15121 1909 PR66 Red and Brown NGC. Generous blushes of fire-red and apple-green patina endow this precisely struck and carbon-free Premium Gem. Imperfections are absent aside from a brief, hair-thin line on Lincoln's shoulder.

From The Martin Peterson Collection. NGC ID# 22KS, PCGS# 3304

15122 1910 PR66 Red and Brown PCGS. A high-end Red and Brown example of this matte proof Lincoln, showing fiery copper-orange luster contrasted with blushed of rich plum and violet toning. The strike is full, and there are no distracting marks. Population: 34 in 66 (2 in 66+) Red and Brown, 5 finer (2/17). NGC ID# 22KT, PCGS# 3307

15123 1911 PR66 Red and Brown PCGS. Given the great popularity of the Lincoln cent series, the mintages of early matte proof cents are very low. The 1911 has a proof production of only 1,725 pieces. This needle-sharp specimen is mostly jade-green and olive-gold, though plum-red also participates in the color scheme. Housed in a first-generation holder.

From The Martin Peterson Collection. NGC ID# 22KU, PCGS# 3310

15124 1912 PR66 Brown PCGS. Forest-green and lavender-red colors compete for territory, with the former more extensive, especially on the reverse. A crisply struck and high-grade matte proof. Certified in a green-label holder.

From The Martin Peterson Collection. NGC ID# 22KV, PCGS# 3312

15125 1913 — Minor Lamination — PR65 Red and Brown PCGS. A small clamshell lamination on the field near Lincoln's chin explains the PCGS notation. A lustrous and fully struck Gem with predominant orange-gold color. The portrait and nearby field are lavender-red with cobalt-blue high points.

15126 1914 PR66 Brown PCGS. A fully defined specimen bathed in deep, original mauve and forest-green toning. The microgranular surfaces are exemplary throughout. The matte short set is key to the proof Lincoln series. Encased in a green label holder.

From The Martin Peterson Collection. NGC ID# 22KX, PCGS# 3318

15127 1915 PR65 Red and Brown PCGS. Magenta-red is prevalent across the obverse, save for glimmers of apple-green in design crevices. The two colors are more evenly distributed on the reverse. A crisply struck and coruscating Gem. Housed in an old green-label holder.

From The Martin Peterson Collection. NGC ID# 22KY, PCGS# 3322

15128 1916 PR63 Red and Brown NGC. This Select proof is razor-sharp with impressively well-preserved matte surfaces for the grade. Each side displays uniform chestnut-gold coloration with no distractions or discolorations. A collectible example of this scarce matte proof Lincoln. Census: 5 in 63 Red and Brown, 59 finer (2/17). NGC ID# 22KZ, PCGS# 3325

1916 Cent, PR64 Red and Brown Elusive Matte Proof Date

15129 1916 PR64 Red and Brown NGC. The final matte proof date has the lowest mintage of the series: just 1,050 pieces. An intricately struck near-Gem with a fine-grained but radiant matte surface. Sea-green centers are framed by orange-red margins. Minor carbon, mostly near the left wheat ear, denies an even finer third-party assessment. Housed in a pre-hologram holder.

From The Martin Peterson Collection. NGC ID# 22KZ, PCGS# 3325

15130 1936 Type One — Satin Finish PR66 Red and Brown PCGS. This is the first of two proof finishes that appeared in 1936. The satin finish is a cross between the matte proofs struck two decades earlier, and the brilliant proofs that reappeared later in 1936. This Premium Gem has nearly full red mint color on the obverse, and blends orange, violet, and green on the reverse. Population: 7 in 66 (2 in 66+) Red and Brown, 0 finer (2/17). NGC ID# 22L2, PCGS# 3331

15131 1936 Type Two — Brilliant Finish PR65 Red PCGS. Rich orange color ensures the eye appeal of this low mintage proof Gem. The crisply struck surfaces lack evidence of contact, and the grade is limited solely by a fleck on Lincoln's neck and the base of his coat. NGC ID# 22L3, PCGS# 3335

15132 1936 Type Two — Brilliant Finish PR65 Red PCGS. An undipped, glimmering Gem Red example of the Type Two 1936 proof cent, showing active mirrors and coppery-gold coloration. Only a few small marks are seen beneath a loupe. NGC ID# 22L3, PCGS# 3335

15133 1937 PR65 Red Cameo PCGS. CAC. The obverse is straw-gold, while pumpkin-gold dominates the reverse. The strike is full, and contact is absent. Two small specks below the M in UNUM decide the grade. Population: 17 in 65 Red Cameo, 32 finer (2/17). NGC ID# 22L5, PCGS# 83338

15134 1939 PR67 Red PCGS. CAC. A gorgeous orange-gold Superb Gem. The mirrored fields are essentially free from carbon, and the strike is precise throughout. Practically unobtainable any finer. Population: 44 in 67 (1 in 67+) Red, 0 finer. CAC: 18 in 67, 0 finer (2/17). NGC ID# 22L6, PCGS# 3344

15135 1942 PR66 Red PCGS. From a wartime proof mintage of 32,600 pieces, this delightful Premium Gem exhibits sharply detailed design elements and deeply mirrored fields throughout. The blazing original red surfaces show no mentionable distractions. PCGS has graded five numerically finer examples (2/17). NGC ID# 22L9, PCGS# 3353

15136 1942 PR66 Red Cameo NGC. This conditionally rare Red Cameo proof displays what would be more accurately described as silvery-pink coloration with appreciable field-device separation. The motifs are sharp and frosty, and the fields are deeply reflective. Census: 19 in 66 Red Cameo, 3 finer (2/17). NGC ID# 22L9, PCGS# 83353

15137 1950 PR66 Red Deep Cameo PCGS. Deep Cameos are scarce in all grades, and this Premium Gem is conditionally rare. The strike is full, and each side displays stark field-device contrast with fiery-orange coloration. A single speck on Lincoln's chin is noted with a loupe. Population: 19 in 66 (2 in 66+) Red Deep Cameo, 8 finer (2/17). NGC ID# 22LA, PCGS# 93359

15138 1950 PR66 Red Deep Cameo PCGS. Proof cents from the early 1950s seldom exhibit consequential cameo contrast, but the present pumpkin-gold specimen provides an exception. The glassy fields show minuscule freckles of deeper color, mostly near the stems of the wheat ears. Population: 19 in 66 (2 in 66+) Red Deep Cameo, 8 finer (2/17). NGC ID# 22LA, PCGS# 93359

15139 1960 Small Date PR68+ Red Deep Cameo PCGS. Deep Cameo Red examples of the Small Date 1960 proof are scarce in Superb Gem condition, and this high-end PR68 coin is tied for the finest at PCGS. The strike is flawless aside from a couple of tiny threadlike strike-throughs near the E in LIBERTY and the 1 in the date. Both sides display bright copper-red luster and stark field-device contrast. Eye appeal is outstanding. Population: 47 in 68 (2 in 68+) Red Deep Cameo, 0 finer (2/17). NGC ID# 22LL, PCGS# 93392

15140 1982-S PR70 Red Deep Cameo PCGS. Readily available just one grade point lower, the 1982-S proof cent is a great rarity in PR70 Red Deep Cameo. This Registry coin is fully struck and flawlessly contrasted. Fire-orange coloration catches the eye from a distance. Population: 18 in 70 Red Deep Cameo, (2/17). NGC ID# 22MG, PCGS# 93473

1990 No S Cent, FS-101 PR68 Red Ultra Cameo

15141 1990 No S, FS-101, PR68 Red Ultra Cameo NGC. Many examples of this rare and coveted variety show evidence of corrosion on the edge and rims, due to long-term storage within the humid Mint-issued proof set holder. But the present coin shows only a trace of patina, on the obverse rim at 7:30. A fully struck and prominently mirrored orange-gold specimen. Census: 35 in 68 Ultra Cameo, 25 finer (2/17). NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

TWO CENT PIECE

15142 1871 Doubled Die Obverse, FS-103, MS66 Brown PCGS. PCGS reports only three Brown 1871 two cent pieces as fine as MS66, and neither service has seen a numerically finer coin in any color category (3/17). This Premium Gem displays a sharp strike, satiny luster, and rich auburn-brown toning with hints of copper-red peeking through. Die doubling on IN GOD WE TRUST characterizes this collectible *Cherrypickers'* variety. PCGS# 569412 Base PCGS# 3609

PROOF TWO CENT PIECES

15143 1868 PR66 Red and Brown PCGS. The Red and Brown designation, although technically accurate, fails to accurately describe the impressive range of colors that adorns each side. They include iridescent shades of rose, green, gold, and fire-orange. Moderate contrast appears on the reverse. From a mintage of 600 proofs. Population: 22 in 66 Red and Brown, 3 finer (2/17). NGC ID# 274X, PCGS# 3637

15144 1868 PR66 Red and Brown NGC. An attractive Premium Gem proof with a Red and Brown designation denoting a blend of chestnut-brown, olive-green, and golden-orange hues. The strike is sharp and there are no distracting spots. Census: 23 in 66 (2 in 66+) Red and Brown, 5 finer (2/17). NGC ID# 274X, PCGS# 3637

15145 1868 PR64 Red PCGS. An intricate strike and luminous fields ensure the eye appeal of this orange-red Choice two cent piece. Perusal beneath a loupe reveals only incidental carbon. Just 600+ proofs were issued. Population: 31 in 64 Red, 33 finer (2/17). NGC ID# 274X, PCGS# 3638

15146 1869 PR65 Red and Brown PCGS. CAC. 30th Anniversary Green Label Holder. A lovely Gem that boasts a full strike, flashy fields, and an absence of both carbon and contact. The initial peach-gold color has mellowed only slightly over the many decades. NGC ID# 274Y, PCGS# 3640

15147 1870 PR66 Brown PCGS. CAC. Brown proof 1870 two cent pieces are rarely seen this fine, creating an opportunity for the budget-conscious collector to acquire an underappreciated condition rarity. This piece is tied with one other as the finest Brown proof endorsed by CAC. The strike is full, and both sides display subtle steel-blue and lavender hues amid rich chestnut-brown toning. Population: 2 in 66 Brown, 3 finer. CAC: 2 in 66, 0 finer (2/17). NGC ID# 274Z, PCGS# 3642

1872 Two Cent, PR66 Red and Brown Vivid Coloration

15148 1872 PR66 Red and Brown PCGS. A collectible but yet scarce Premium Gem example of the 1872 proof two cent issue, a popular alternative to the conditionally scarce circulation strike counterpart. The coin is fully struck and displays vivid fire-orange, lavender, and silvery-blue toning. A few small specks appear on the reverse. Population: 31 in 66 (1 in 66+) Red and Brown, 1 finer (2/17). NGC ID# 2752, PCGS# 3649

THREE CENT SILVER

1851-O Silver Three Cent, MS65 Original Mint Luster

15149 1851-O MS65 PCGS. This Gem is better struck than many examples of the three cent silver New Orleans issue, although heavy die lapping on the reverse has partially effaced the recesses of the C and several stars. The coin is frosty and well-preserved with areas of light golden-olive toning throughout. Population: 60 in 65 (1 in 65+), 31 finer (2/17). NGC ID# 22YY, PCGS# 3665

**1852 Silver Three Cent, MS66+
Frosty, Unabraded Luster**

15150 1852 MS66+ PCGS. CAC. A high-end type coin, this Plus-designated Premium Gem displays frosty silver luster and boldly struck central design elements. The reverse is attractively unclipped, but the peripheral stars are ill-defined. The obverse shows moderate die erosion in the fields as typical. PCGS has seen 23 finer examples, although the quality of the present coin may preclude the need to acquire such a piece for a high-grade type set. NGC ID# 22YZ, PCGS# 3666

15151 1853 MS66 PCGS. CAC. A nice Type Three three cent silver example with a bold strike and frosty, unabraded surfaces. This CAC-approved Premium Gem displays champagne interiors with olive, russet, and amber border toning. Finer examples are rare. Population: 78 in 66 (6 in 66+), 12 finer. CAC: 26 in 66, 9 finer (2/17). NGC ID# 22Z2, PCGS# 3667

15152 1858 MS65 NGC. This patinated Gem exhibits an unusually bold shield and star for the type, with frosty original luster that highlights mottled shades of amber, blue, and sun-gold as it cartwheels beneath a light. Close examination fails to discern any mentionable abrasions. Census: 47 in 65, 35 finer (2/17). NGC ID# 22Z7, PCGS# 3674

15153 1859 MS66 PCGS. The first issue of the Type Three design is scarce in high grade. This Premium Gem displays exceptionally well-preserved, frosty luster with original aquamarine, olive-gold, and violet border toning encircling light champagne interiors. Moderate strike weakness is seen on the central devices, as usual. Population: 21 in 66 (1 in 66+), 6 finer (2/17). NGC ID# 22Z8, PCGS# 3677

15154 1862/1 FS-301 MS66 PCGS. The impressive preservation of this Premium Gem example is the coin's chief appeal, although a sharp strike and golden border toning certainly contribute as well. This *Guide Book* variety is scarce in MS66 and rare finer. Population: 82 in 66 (5 in 66+), 17 finer (2/17). PCGS# 38580 Base PCGS# 3681

15155 1862/1 FS-301 MS66 PCGS. An early die state without a radial crack through the 1 in the date. A crisply struck and semiprooflike Premium Gem. The untuned surfaces are virtually void of contact. A popular Civil War overdate. Population: 82 in 66 (5 in 66+), 17 finer (2/17). PCGS# 38580 Base PCGS# 3681

15156 1862 MS66 PCGS. CAC. Low-intensity shades of violet, greenish-gold, and bluish-gray toning blanket the well-preserved, lustrous surfaces of this impressive Premium Gem. The design elements are sharply detailed throughout. PCGS has graded 20 numerically finer examples (2/17). NGC ID# 22ZB, PCGS# 3680

**1869 Three Cent Silver, MS64
Elusive, Low-Survival Issue**

15157 1869 MS64 PCGS. The production of just 4,500 three cent silver circulation strikes in 1869 continued the trend of small mintages that started in 1867 and ended with a final proof-only mintage in 1873. Even those few coins were, to a great extent, melted in 1873. This near-Gem piece survived with rich, iridescent toning on both sides in shades of aquamarine, amber-gold, and violet. A few small marks and light abrasions are visible, yet the eye appeal of this scarce, Choice Uncirculated piece is great. Population: 16 in 64, 12 finer (2/17). NGC ID# 22ZK, PCGS# 3689

PROOF THREE CENT SILVER

15158 1870 PR66 PCGS. A conditionally scarce Premium Gem proof with sharp design elements that offer modest field-device contrast against the mirrored fields. Both sides display light golden toning, and there is a spot in the upper part of the shield that serves as a pedigree marker. Population: 26 in 66 (3 in 66+), 2 finer (2/17). NGC ID# 27CF, PCGS# 3721

**1870 Silver Three Cent, PR66+
Conditionally Rare Proof Issue**

15159 1870 PR66+ PCGS. CAC. A needle-sharp strike from fresh dies delivers the design to its fullest extent on this high-end Premium Gem proof. The fields are deeply reflective, and modest cameo contrast is observed through deep toning. The obverse displays olive-gold color, while the reverse is aquamarine. Population: 26 in 66 (3 in 66+), 2 finer. CAC: 19 in 66, 2 finer (2/17). NGC ID# 27CF, PCGS# 3721

15160 1871 PR64 PCGS. Faint butter-gold patina visits this well struck and flashy Choice proof. A few thin tan horizontal streaks on the reverse appear mint-made. A low mintage date, seldom seen any finer. Certified in a green-label holder.
From The Martin Peterson Collection. NGC ID# 27CG, PCGS# 3722

15161 1873 PR63 PCGS. CAC. The proof-only final-year three cent silver has a *Guide Book* mintage of only 600 pieces. The present specimen is boldly struck and void of detractors. The gunmetal-gray surfaces reveal golden-brown and apple-green hues once rotated beneath a light. Certified in a first-generation "rattler" holder. NGC ID# 27CJ, PCGS# 3724

THREE CENT NICKELS

15162 1865 MS66+ NGC. Ex: Highland Collection. Brilliant satin luster casts this high-end Premium Gem in a vibrant glow that is uninterrupted by abrasions. Slight strike weakness is seen on the central Roman numerals, and the obverse has extensive clash marks. NGC ID# 22NJ, PCGS# 3731

15163 1866 MS66 PCGS. The 1866 three cent nickel is scarce in MS66 and rarely seen finer. This Premium Gem displays a bold strike and satiny, golden-toned mint luster. Struck with clashed dies. Population: 49 in 66 (9 in 66+), 3 finer (2/17).

From The R. Thayer Sheets Yorktown Collection. NGC ID# 22NK, PCGS# 3732

1866 Nickel Three Cent, Vibrant MS66+ Near-Terminal Die State

15164 1866 MS66+ PCGS. CAC. This high-end Premium Gem is vibrant, lustrous, and surprisingly well-struck despite heavy die clashing on both sides. The frosty surfaces retain their radiant eye appeal despite several radial die cracks and flowlines from the deteriorated dies. We note a large reverse die chip above the denomination and the resulting cauliflowerlike lump atop the first numeral. A brilliant coin that is as interesting for its die state as it is for the obvious quality, CAC-endorsed and Plus-graded by PCGS. Population: 9 in 66+, 3 finer. CAC: 19 in 66, 6 finer (2/17). NGC ID# 22NK, PCGS# 3732

15165 1869 MS66+ NGC. Ex: Highland Collection. The 1869 is scarce in MS66, and this Plus-graded example is one of only two Premium Gems so designated (both NGC coins); none are finer at either service (1/17). The coin displays soft, champagne-tinted nickel-gray luster with no detracting abrasions. Some die lapping is evident on the reverse along with numerous peripheral die cracks. The central Roman numerals are slightly incomplete with regards to strike. Census: 16 in 66 (2 in 66+), 0 finer (1/17). NGC ID# 22NL, PCGS# 3735

15166 1871 MS66 PCGS. CAC. This well-detailed Premium Gem shows just a touch of the usual softness on the hair, and some interesting clash marks on the reverse. The well-preserved surfaces radiate vibrant mint luster, under delicate shades of bluish-gray and pale gold toning. Population: 48 in 66 (10 in 66+), 1 finer. CAC: 16 in 66, 2 finer (2/17). NGC ID# 22NN, PCGS# 3737

15167 1873 Open 3 MS65 PCGS. CAC. The 1873 three cent nickel with the Open 3 in the date is much more difficult to locate than its Closed 3 counterpart. This attractive Gem exhibits well-detailed design elements and well-preserved lustrous surfaces, under shades of lavender and pale-gold toning. Population: 44 in 65 (3 in 65+), 5 finer. CAC: 18 in 65, 4 finer (2/17). NGC ID# 22NR, PCGS# 3740

1873 Nickel Three Cent, MS66 Open 3 Date

15168 1873 Open 3 MS66 PCGS. This is a well-preserved example with satiny silver luster and no major abrasions. The obverse is well-defined, although the reverse is weak on portions of the wreath and central Roman numerals, suggesting that the die was partially clogged with grease. The obverse is heavily clashed, but the Open 3 logotype of the date is easily identifiable. Population: 5 in 66 (1 in 66+), 0 finer (2/17). NGC ID# 22NR, PCGS# 3740

15169 1874 MS66 PCGS. CAC. Softly frosted luster delivers a light champagne glow on this CAC-approved Premium Gem, while the design elements are adequately brought up by the dies. Light clash marks appear in the fields, but there are no distracting abrasions. Finer examples are nearly unknown. Population: 19 in 66 (1 in 66+), 1 finer. CAC: 11 in 66, 2 finer (2/17). NGC ID# 2759, PCGS# 3742

15170 1879 MS66 PCGS. CAC. Traces of champagne toning grace the beautifully preserved surfaces and sharply rendered design elements. The reverse fields are faintly reflective. A loupe reveals a pair of tiny marks below STATES that are all that limit the grade. Population: 43 in 66, 11 finer. CAC: 11 in 66, 3 finer (2/17). NGC ID# 275Z, PCGS# 3747

1888 Three Cent Nickel, MS67+ Just One Finer Coin at PCGS

15171 1888 MS67+ PCGS. CAC. The 1888 three cent nickel is available for type representation, although high-end Superb Gems with the PCGS Plus designation and CAC endorsement will prove elusive. This piece is fully struck and seemingly flawless. Frosty silver-white luster glows on each side. Population: 2 in 67+, 1 finer. CAC: 18 in 67, 2 finer (2/17). NGC ID# 275H, PCGS# 3757

PROOF THREE CENT NICKELS

1866 Nickel Three Cent, PR66 Deep Cameo Warm Golden Toning

15172 1866 PR66 Deep Cameo PCGS. CAC. This is a fully struck, beautifully preserved Premium Gem proof with warm golden toning and stark cameo contrast. The eye appeal is exceptional, endorsed by the CAC green label. The 1866 is rare this fine in the Deep Cameo category. Population: 13 in 66 (1 in 66+) Deep Cameo, 6 finer. CAC: 12 in 66, 3 finer (1/17). NGC ID# 275L, PCGS# 93762

15173 1867 PR66+ Cameo NGC. A reported mintage of 625+ proofs ranks among the lowest in the series. This outstanding PR66+ Cameo three cent nickel enjoys bold white-on-black contrast and displays impeccable preservation. The NGC *Census* reports six finer Cameo submissions (2/17). NGC ID# 275M, PCGS# 83763

1871 Three Cent Nickel, PR67 One of Two Top Examples at PCGS

15174 1871 PR67 PCGS. The exact total of three cent nickel proofs produced in 1871 went undocumented, as was the policy for minor coinage at the time, but it is believed 960 or more specimens were struck. The 1871 is subject to ever-strong date pressure given the rarity of high-grade circulation strikes. This PR67 example is the finest PCGS example we have offered and one of only two such coins at that service. The surfaces are brilliant and partly contrasted, though not enough to warrant a formal designation. A couple of lint marks occur above Liberty's head. Population: 2 in 67, 0 finer (2/17). NGC ID# 275S, PCGS# 3767

15175 1873 Closed 3 PR66+ PCGS. CAC. A brilliant and boldly struck example. The flashy fields are free from both carbon and contact. Outstanding in all regards, and practically unobtainable any finer. Population: 18 in 66 (2 in 66+), 2 finer. CAC: 12 in 66, 1 finer (1/17). NGC ID# 27CJ, PCGS# 3769

15176 1875 PR66 PCGS. CAC. The design elements of this Premium Gem proof are strongly impressed and the fields are moderately reflective, with some faint, but interesting, planchet striations on the reverse. Subtle hints of pale gold toning enhance the well-preserved surfaces. Population: 22 in 66, 1 finer. CAC: 11 in 66, 0 finer (2/17). NGC ID# 22NV, PCGS# 3771

15177 1876 PR66+ PCGS. CAC. Delicate pastel hues paint this high-end Premium Gem in shades of lavender, ice-blue, lemon-gold, and sun-orange. The strike is razor-sharp, although some die polishing is evident in the recesses of the wreath. Eye appeal is outstanding. Population: 16 in 66 (1 in 66+), 1 finer. CAC: 4 in 66, 1 finer (2/17). NGC ID# 275W, PCGS# 3772

1877 Three Cent Nickel, PR65 Outstanding for the Grade

15178 1877 PR65 PCGS. This is a fully struck proof that is only a whisper away from Premium Gem quality. Delicate iridescent toning graces reflective fields and frosty devices, and there are no contact marks. A razor-thin line on the obverse portrait denotes an intact planchet lamination. Eye appeal is excellent. PCGS reports few finer representatives (2/17). NGC ID# 275X, PCGS# 3773

15179 1878 PR67 Cameo PCGS. CAC. Light almond-gold toning adorns this coruscating and fully struck Superb Gem. Perfect aside from a fleck on the field between the second and third columns. Population: 38 in 67 (6 in 67+) Cameo, 1 finer. CAC: 36 in 67, 0 finer (1/17). NGC ID# 275Y, PCGS# 83774

15180 1878 PR67 Cameo PCGS. CAC. A conditionally scarce Superb Gem Cameo with a full strike and brilliant surfaces. Field-motif contrast is excellent on both sides. PCGS and NGC combined have seen only three finer Cameos. Population: 39 in 67 (6 in 67+) Cameo, 1 finer. CAC: 36 in 67, 0 finer (2/17). NGC ID# 275Y, PCGS# 83774

1881 Three Cent Nickel, PR67+ Cameo Brilliant, Flashy Surfaces

15181 1881 PR67+ Cameo PCGS. CAC. This high-end Superb Gem Cameo proof boasts a beautiful blend of mirroring and cartwheel luster in the fields, illuminating brilliant, flawlessly preserved surfaces. The strike is full. Finer 1881 Cameos are extremely rare. Population: 37 in 67 (1 in 67+) Cameo, 4 finer. CAC: 32 in 67, 3 finer (2/17). NGC ID# 2763, PCGS# 83777

15182 1883 PR67 Cameo PCGS. CAC. A splendid Superb Gem. The undisturbed fields are reflective, and the precisely struck devices display noticeable frost. The brilliant surfaces lack discernible imperfections. Population: 54 in 67 (7 in 67+) Cameo, 1 finer. CAC: 34 in 67, 1 finer (2/17). NGC ID# 2765, PCGS# 83779

15183 1887/6 FS-302 PR66 Cameo PCGS. CAC. Much of the underdigit 6 is apparent beneath the crossbar of the 7. An intricately impressed and brilliant Premium Gem. Void of carbon and contact, and struck from clashed dies. Population: 47 in 66 (3 in 66+) Cameo, 10 finer. CAC: 23 in 66, 5 finer (2/17). NGC ID# 276A, PCGS# 416357 Base PCGS# 83784

15184 1888 PR67 PCGS. CAC. Exemplary olive-gray surfaces and a precise strike testify to the quality of this lustrous proof three cent nickel. Practically unobtainable in a higher numerical grade. Population: 32 in 67 (4 in 67+), 1 finer. CAC: 25 in 67, 0 finer (1/17). NGC ID# 276B, PCGS# 3785

SHIELD NICKELS

- 15185 1866 Rays MS65+ NGC.** The first year of issue for the nickel five-cent piece, and this unabrased Gem is a high-grade representative of the two-year Rays subtype. Both sides are light gray with satin luster and delicate golden-gray toning. One of only four Plus-graded Gems at NGC, with 29 Premium Gems finer (2/17).
Ex: Houston Signature (Heritage, 12/2010), lot 3321; Long Beach Signature (Heritage, 2/2012), lot 3246. NGC ID# 22NX, PCGS# 3790
- 15186 1868 MS66 PCGS.** Fletcher IIa Reverse, with the star pointing between AM. The 1868 Shield nickel is collectible through MS65, but rare in this high grade a monumental rarity any finer. Blushes of gold adorn virtually all-brilliant, radiantly lustrous surfaces with bold detail on the shield, leaves, and stars. Numerous die cracks on each side. Population: 40 in 66 (6 in 66+), 1 finer (2/17). NGC ID# 22P2, PCGS# 3795
- 15187 1870 MS66 NGC.** A spectacular Premium Gem, with well-preserved surfaces that radiate vibrant mint luster and show a few delicate highlights of champagne toning. The design elements are well-detailed and both sides exhibit a number of interesting die cracks. Census: 9 in 66, 1 finer (2/17). NGC ID# 22P4, PCGS# 3797
- 15188 1872 MS66 PCGS.** A brilliant, lustrous, and sharply struck Shield type coin. The obverse is practically pristine, and the reverse shows only a minor graze east of the large 5. Population: 33 in 66 (3 in 66+), 2 finer (1/17). NGC ID# 22P6, PCGS# 3799
- 15189 1872 MS66 PCGS Secure.** This sharply detailed Premium Gem shows an extensive network of interesting die cracks through the leaves on both sides of the shield. The lustrous surfaces show highlights of greenish-gold and lavender-gray toning, with no mentionable distractions. Population: 33 in 66 (3 in 66+), 2 finer (2/17). NGC ID# 22P6, PCGS# 3799
- 15190 1874 MS65 PCGS.** The reverse of this impressive Gem is sharply detailed, with evidence of recutting on some stars, but the arrows on the left side of the shield have been mostly effaced by die polishing. The surfaces are well-preserved and lustrous. Population: 45 in 65 (2 in 65+), 13 finer (2/17). NGC ID# 22P9, PCGS# 3803

1883/2 Shield Nickel, MS64 FS-302, Rare in High Grades

- 15191 1883/2 FS-302 MS64 ANACS.** There are several 1883/2 varieties for the date. This is an example of FS-302, with the underlying 2 left of the 3 but further from the 8 than on variety FS-301. Both variants are exceedingly scarce and highly desirable in this grade. The shield, leaves, and stars are well-defined. Swirling luster emanates from brilliant surfaces. Light die striae and minor chatter are noted on the reverse. Encapsulated in a small-sized holder.
From The Martin Peterson Collection. PCGS# 38413 Base PCGS# 3814

PROOF SHIELD NICKELS

1866 Shield Nickel, PR66 Cameo Contrasted With Rays Type Coin

- 15192 1866 Rays PR66 Cameo PCGS.** The 1866 is the ideal With Rays type coin in the proof Shield nickel series. This Premium Gem Cameo example is well-struck and brilliant, with deeply reflective fields and contrasted, frost-white motifs. Cameos are scarce this fine and rare finer, and Deep Cameos are rare regardless of grade. Population: 36 in 66 (1 in 66+) Cameo, 3 finer (2/17). NGC ID# 276G, PCGS# 83817
- 15193 1867 No Rays PR65 PCGS.** Always popular as the first year of the No Rays design, this impressive Gem displays sharply detailed design elements and well-preserved surfaces under pleasing shades of greenish-gold and lavender toning. Population: 34 in 65, 11 finer (2/17). NGC ID# 4T4L, PCGS# 3821
- 15194 1870 PR66 Cameo PCGS.** A conditionally rare Cameo example, showing modest contrast beneath a blanket of warm golden toning. The strike is full throughout, and no distracting marks are seen. Population: 26 in 66 (3 in 66+) Cameo, 2 finer (2/17). NGC ID# 276L, PCGS# 83824
- 15195 1871 PR66 PCGS. CAC.** This is a fully struck Premium Gem proof with reflective fields and satiny devices. Delicate ice-blue hues tint the silvery surfaces. Finer examples of the 1871 proof are prohibitively rare. Population: 47 in 66 (11 in 66+), 1 finer. CAC: 20 in 66, 0 finer (2/17). NGC ID# 276M, PCGS# 3825
- 15196 1878 PR65+ NGC.** A lovely Plus-graded Gem, with razor-sharp definition on all design elements and deeply mirrored fields, under vivid shades of greenish-gold and powder-blue toning. The surfaces are impeccably preserved and eye appeal is incredible. NGC ID# 276V, PCGS# 3832
- 15197 1883 With Cents PR67 NGC. CAC.** Spectacular apple-green, rose-red, and lemon-gold shades alternate across both sides of this fully struck and flashy final year proof Shield nickel. Encased in a former generation holder. NGC ID# 276Z, PCGS# 3838

LIBERTY NICKELS

1891 Nickel, Untoned MS66+ Highly Lustrous Surfaces

15198 1891 MS66+ PCGS. CAC. The 1891 is a scarcer date in the series, even though more than 16 million pieces were produced. Strike quality varies, but many examples are found with several areas of weakness. This is a highly lustrous coin with strong strike details — the only weak area is seen on the left ear of corn, as found on most dates. Untoned. Population: 34 in 66 (5 in 66+), 2 finer. CAC: 10 in 66, 1 finer (2/17). NGC ID# 2776, PCGS# 3852

15199 1893 MS66 PCGS. Subtle shades of pale gold and lavender-gray toning blanket the well-preserved surfaces of this attractive Premium Gem. The design elements are well-detailed, with a touch of the usual softness on the star centers and lower wreath. Population: 32 in 66 (4 in 66+), 1 finer (2/17). NGC ID# 2778, PCGS# 3854

15200 1894 MS65 PCGS. Vibrant cartwheel luster sweeps dusky aquamarine and lavender surfaces. Free from apparent marks, though the first two stars are incompletely struck. A lower mintage date, and scarce as a Gem. Population: 60 in 65 (3 in 65+), 41 finer (2/17).

From The R. Thayer Sheets Yorktown Collection. NGC ID# 2779, PCGS# 3855

15201 1895 MS66 PCGS. A conditionally scarce Premium Gem example of this otherwise plentiful Liberty nickel issue, showing golden-lavender toning, satin luster, and unusually well-defined wreath and star details. A single, tiny tick on Liberty's cheek appears to be all that limits the grade. Population: 33 in 66 (2 in 66+), 1 finer (2/17). NGC ID# 277A, PCGS# 3856

15202 1896 MS65 PCGS. CAC. Sharply detailed in most areas, this attractive Gem shows just a touch of the usual softness on the lower wreath. The well-preserved surfaces are visited by subtle shades of lavender-gray and pale gold toning, with ample luster underneath. Population: 67 in 65 (2 in 65+), 23 finer. CAC: 16 in 65, 11 finer (2/17). NGC ID# 277B, PCGS# 3857

15203 1905 MS66+ PCGS. CAC. Premium Gem-quality 1905 Liberty nickels are not elusive, but Plus-graded coins are. PCGS reports 25 MS66+ examples and four MS67s finer (2/17). This CAC-approved coin displays truly exceptional preservation cast in frosty luster with light golden interiors and sky-blue borders. The corn ear left of the wreath bow shows the usual weakness. NGC ID# 277G, PCGS# 3866

15204 1906 MS66 PCGS. This impressive Premium Gem exhibits sharply detailed design elements and well-preserved lustrous surfaces, with subtle highlights of lavender-gray and pale gold toning. Population: 39 in 66 (5 in 66+), 0 finer (2/17). NGC ID# 277H, PCGS# 3867

15205 1909 MS66 PCGS. CAC. This is a fully struck Premium Gem with vibrant luster that shows a hint of light golden color. No distracting abrasions are present. The 1909 nickel is scarce in this condition, and no Superb Gem examples have been certified. Population: 39 in 66 (5 in 66+), 0 finer. CAC: 12 in 66, 0 finer (2/17). NGC ID# 277K, PCGS# 3870

15206 1910 MS66 PCGS Secure. This spectacular Premium Gem exhibits well-detailed design elements, with a touch of the typical softness on the lower wreath and some star centers. Delicate hints of champagne-gold and lavender toning enhance the well-preserved, lustrous surfaces. Population: 30 in 66 (4 in 66+), 1 finer (2/17). NGC ID# 277L, PCGS# 3871

15207 1912-S MS64 ANACS. The 1912-S is the first branch mint issue of the nickel denomination, and has the lowest business mintage of the series. This lustrous cream-gray and powder-blue near-Gem offers good luster and minimal evidence of contact.

From The Martin Peterson Collection. NGC ID# 277R, PCGS# 3875

15208 1912-S MS64 PCGS. The first and only San Francisco issue of the series, the 1912-S also has by far the lowest commercial production of the series. This olive-green and lilac Choice nickel offers smooth, satiny surfaces. The strike is bold aside from the left ear of corn.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

15209 1883 No Cents PR67 NGC. Powder-blue and olive-gold adorn the obverse, while the reverse exhibits pastel apricot shades. The strike is sharp aside from the usual inexactness on the left ear of corn. Pristine save for a fleck or two along the obverse periphery. NGC ID# 22PU, PCGS# 3878

1884 Nickel, PR66 Deep Cameo Delicately Toned Condition Rarity

15210 1884 PR66 Deep Cameo PCGS. The 1 in the date is lightly recut, but this is not the popular *Cherry-pickers'* repunched date variety. Overall, PCGS has seen only nine Deep Cameo proof 1884 Liberty nickels, with only two being finer than the present example. This piece displays stark field-motif contrast and delicate ice-blue and rose-gold toning. The eye appeal is astounding. Population: 6 in 66 (2 in 66+) Deep Cameo, 2 finer (2/17). NGC ID# 22PV, PCGS# 93882

15211 1885 PR65 NGC. A Gem proof example of this popular date, which is a series key in the circulation-strike series. This proof offers full detail and mirrored fields with a blush of light golden toning. A hint of cameo contrast is seen on the obverse.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 277T, PCGS# 3883

15212 1885 PR66 PCGS. Iridescent lemon-gold and lilac toning adorns this prominently mirrored and fully struck specimen. The 1885 has the lowest Philadelphia business mintage of the series, and proofs are often called upon to fill collection gaps. Certified in a green label holder.

From The Martin Peterson Collection. NGC ID# 277T, PCGS# 3883

15213 1886 PR66 PCGS. A fully struck and lustrous Premium Gem. The smooth and lightly toned surfaces display green-gold and lilac tints. High grade proofs for the 1886 are sometimes collected as a substitute for business strikes, due to the date's low mintage.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 277U, PCGS# 3884

15214 1886 PR66+ PCGS. CAC. An intricately impressed Premium Gem. Lustrous and carbon-free with light wheat-gold toning on the reverse. The scarcity of the associated low mintage business issue increases demand for quality proofs. CAC: 47 in 66, 21 finer (2/17). NGC ID# 277U, PCGS# 3884

1886 Nickel, PR67 CAC
Fully Struck, Lightly Toned

15215 1886 PR67 PCGS. CAC. This is a fully struck Superb Gem proof with reflective fields and warm golden toning. There are no distractions. The 1886 proof Liberty nickel is rare in PR67 and unknown numerically finer (2/17). CAC-endorsed coins in this condition are in the minority. Population: 31 in 67 (2 in 67+), 0 finer. CAC: 22 in 67, 0 finer (2/17). NGC ID# 277U, PCGS# 3884

1887 Nickel, PR66+ Cameo
CAC-Approved Condition Rarity

15216 1887 PR66+ Cameo PCGS. CAC. No Deep Cameo 1887 proof nickels are certified, and Cameos are scarce in all grades. This high-end Premium Gem Cameo is rare. The strike is full, and modest field-motif contrast is warmed by delicate champagne toning. Eye appeal is outstanding. Population: 12 in 66 (5 in 66+) Cameo, 1 finer. CAC: 5 in 66, 1 finer (2/17). NGC ID# 277V, PCGS# 83885

15217 1895 PR66 Cameo PCGS. This is a fully struck Premium Gem proof with considerable cameo contrast beneath a hint of light golden toning. There are no contact marks, and eye appeal excels. Cameos are rarely offered this fine and are extremely rare any finer. Population: 10 in 66 Cameo, 3 finer (1/17). NGC ID# 2785, PCGS# 83893

15218 1901 PR67 PCGS. CAC. A fully struck, reflective Superb Gem proof with hints of iridescence throughout otherwise yellow-gold toning. There are no contact marks. The 1901 proof is scarce in this grade and rare finer. Population: 48 in 67 (9 in 67+), 1 finer. CAC: 19 in 67, 0 finer (2/17). NGC ID# 278B, PCGS# 3899

15219 1906 PR67 Cameo PCGS. An intricately impressed and nearly stone-white Superb Gem. Mirrored fields contrast with the portrait and wreath. Infrequent pinpoint flecks are all that limit the grade. Population: 23 in 67 (1 in 67+) Cameo, 2 finer (1/17). NGC ID# 278G, PCGS# 83904

15220 1909 PR66 Deep Cameo PCGS. CAC. This starkly contrasted, rare Premium Gem Deep Cameo displays a beautiful golden tint to the frosty motifs and liquidlike mirroring in the fields. A loupe reveals a faint graze in front of Liberty's nose, this being the only imperfection on the coin. Population: 8 in 66 Deep Cameo, 1 finer. CAC: 1 in 66, 1 finer (2/17). NGC ID# 278K, PCGS# 93907

BUFFALO NICKELS

15221 1913-S Type Two MS64 PCGS. Glimpses of golden-brown toning visit this coruscating and well-preserved example. The strike is good aside from the bison's tail and the hair above the braid. A popular low mintage issue. NGC ID# 22R3, PCGS# 3923

1913-S Type Two Buffalo Nickel, MS65
Lovely Mint Luster, Early Die State

15222 1913-S Type Two MS65 PCGS. The availability of this *Guide Book* key date is low in MS65 and even lower in MS66. The present Gem displays beautiful satin luster with iridescence throughout the light golden toning. Minor strike softness on the hair above the Indian's braid and on the bison's shoulder is not a major detractor. No mentionable die erosion is seen in the fields. PCGS reports 43 finer submissions (3/17). NGC ID# 22R3, PCGS# 3923

15223 1915-D MS65 PCGS. This softly frosted Gem displays silvery luster with hints of light champagne toning. The strike is typically soft on the bison's shoulder and the hair above the Indian's braid, but the fields exhibit less die erosion than is sometimes seen. Several faint die cracks on the obverse denote a late die state. PCGS has seen 44 finer submissions (3/17). NGC ID# 22R8, PCGS# 3928

15224 1915-D MS65+ PCGS. A high-end Gem example struck from lightly worn dies with metal flowlines in the fields. The design elements show minor weakness on the central high points as well as the bison's head. Light golden toning warms each side. Finer examples are scarce.

From The R. Thayer Sheets Yorktown Collection.
NGC ID# 22R8, PCGS# 3928

15225 1915-S MS64+ PCGS. CAC. A high-end Choice example of this better date from the early series, with satiny mint luster under shades of champagne-gold and ice-blue toning. Only minor signs of contact are evident. NGC ID# 22R9, PCGS# 3929

15226 1917-D MS65 PCGS. Gem 1917-D nickels are scarce, and finer representatives will be out of reach for most collectors. This MS65 coin displays mattelike luster such that it might be mistaken for a proof were it better struck and void of the Denver mintmark. Weakness is seen on the central high points and the bison's head, as usual. PCGS records 25 finer submissions (2/17). NGC ID# 22RE, PCGS# 3935

**1918/7-D Nickel, VF25
Famous Overdate, FS-101**

15227 1918/7-D FS-101 VF25 NGC. This VF25 example spent a good deal of time in circulation before being cherrypicked by a keen collector. The devices maintain good detail in spite of considerable use, while nickel-gray and olive tones provide color to each side. Most importantly, the 1918/7 overdate is clear. This is a splendid example of one of the most famous and desirable varieties in the Buffalo nickel series. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

**1925-D Buffalo Nickel, MS65
Conditionally Elusive Denver Product**

15231 1925-D MS65 PCGS. David Hall notes that the 1925-D is the second-rarest Buffalo nickel produced at the Denver Mint during the 1920s in Gem condition after the 1927-D. Strike can be problematic, and the bison's head shows the usual softness. Brilliant with pastel accents of blue, green, and rose. Two grade-limiting ticks appear on the Indian's head. Struck from rotated dies. Only 14 finer submissions are listed at PCGS (3/17). NGC ID# 22S3, PCGS# 3955

1920-S Nickel, Toned MS64

15228 1920-S MS64 PCGS. CAC. Ribbons of rose and green toning run through olive-gold patina on this Choice 1920-S Buffalo nickel. The design elements are well-defined, and abrasions are minimal. This issue is available through MS64, but higher-grade pieces are rare. PCGS lists 25 finer submissions (2/17). NGC ID# 22RS, PCGS# 3946

15229 1921 MS66 PCGS. Pastel sea-green and wheat-gold shades grace lustrous and well-preserved surfaces. Both sides are void of carbon. The strike falls short of full, but this early Philly issue is undeniably scarce in the present quality.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 22RT, PCGS# 3947

15230 1924-S AU50 PCGS. CAC. The 1924-S is a better date in high grade, boosting demand for attractive AU coins. This CAC-approved example shows little evidence of wear, and both sides offer delicate lavender, powder-blue, and champagne toning over subtly lustrous surfaces. NGC ID# 22RZ, PCGS# 3953

**1925-D Nickel, MS65+
Sharp for the Issue**

15232 1925-D MS65+ PCGS. Like other Denver Mint denominations from the mid-1920s, the quality of strike varies widely. This Plus-graded Gem nickel is refreshingly sharp for the issue, with lustrous peach-gold highlights and satin-smooth, high-end surfaces. The lower reverse is especially well-defined for a 1925-D. The legends are crisp except for E PLURIBUS UNUM, which shows minor distortion. Few examples are finer. Population: 12 in 65+, 14 finer (2/17). NGC ID# 22S3, PCGS# 3955

15233 1925-S MS63 PCGS. The 1925-S Buffalo nickel has a reputation as a strike rarity. This impressive Select specimen exhibits well-detailed design elements, with just a touch of the usual softness on the hair above the braid and the bison's shoulder. The lightly marked surfaces are blanketed in shades of golden-brown and lavender-gray toning. NGC ID# 22S4, PCGS# 3956

15234 1925-S MS64 PCGS. CAC. Although softly struck on the reverse with significant die erosion, this Choice 1925-S nickel appears visually finer than the MS64 grade level usually requires. There are no distinctive abrasions, and each side yields luminous champagne luster. PCGS reports 29 finer representatives (2/17). NGC ID# 22S4, PCGS# 3956

15235 1926 MS67 PCGS. Jade-green margins frame orange-gold centers. This Superb Gem type coin appears pristine, and its sole imperfection is minor inexactness of strike on the bison's tail and the hair above the braid. Population: 43 in 67 (1 in 67+), 0 finer (2/17). NGC ID# 22S5, PCGS# 3957

15236 1926-D MS64 PCGS. CAC. This CAC-endorsed near-Gem is impressively well-preserved for the grade, and a full Gem designation might have been achieved were it not for considerable strike softness on the devices — not an unusual characteristic for Denver issues of this period. Each side offers frosty luster and light champagne toning. NGC ID# 22S6, PCGS# 3958

1926-S Nickel, AU50 CAC
Low-Mintage Issue

- 15237 1926-S AU50 PCGS. CAC.** The 1926-S is the only issue in the Buffalo nickel series with a mintage of less than 1 million coins (970,000 pieces). This CAC-approved AU example displays a bold strike and little high-point wear. Dusky champagne toning blankets each side. A small planchet lamination is noted behind the Indian's hair braid above the 6 in the date. NGC ID# 22S7, PCGS# 3959

1927-D Nickel, Lightly Toned MS65
Unusually Well-Struck

- 15238 1927-D MS65 PCGS. 30th Anniversary Green Label Holder.** The '27-D is scarce in Gem condition and rare any finer. This example is impressively well-struck for a Denver issue of the 1920s, but evidence of die erosion is nonetheless visible in the fields on both sides, softening especially LIBERTY on the obverse. This satiny Gem offers delicate lavender and champagne toning with no distracting abrasions. Population: 81 in 65 (8 in 65+), 7 finer (2/17). NGC ID# 22S9, PCGS# 3961
- 15239 1929-D MS65 PCGS. CAC.** Satiny luster is largely unabraded on this Gem CAC example, showing delicate champagne iridescence throughout each side. The strike is slightly soft on the central high points, as usual for this 1920s Denver issue. Finer examples are scarce. NGC ID# 22SF, PCGS# 3967

1935-S Buffalo Nickel, Superb Gem
Among the Finest Certified

- 15240 1935-S MS67 NGC.** Nearly all 1935-S Buffalo nickels are weakly struck at the centers, but this Superb Gem example fares better than most. Lustrous, lilac hues float across the sharply defined surfaces to enliven the steely nickel patina. Neither major grading service has seen a numerically finer 1935-S from more than 4,400 total submissions. Census: 12 in 67 (2 in 67★), 0 finer (2/17). NGC ID# 22SR, PCGS# 3976

- 15241 1936-D MS67 PCGS. CAC.** Aquamarine and straw-gold shades invigorate this virtually pristine Superb Gem. The bison's tail lacks a full impression, but most of the design is sharp. Population: 74 in 67 (1 in 67+), 2 finer. CAC: 17 in 67, 0 finer (2/17). NGC ID# 22ST, PCGS# 3978

- 15242 1937-D Three-Legged, FS-901, AU58 NGC.** Slight wear on the bison's hip confirms a momentary stint in Great Depression commerce. This key-date nickel is refreshingly unabraded and displays delicate apple-green, stone-gray, and lilac toning. Certified in a prior generation holder.
From The Martin Peterson Collection. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

- 15243 1937-D Three-Legged, FS-901, AU58 PCGS.** All diagnostics for this famous mint error are readily apparent. The back leg is granular, and a trail of minute die lumps is present on the field below the bison's flank. Most important of all, the bison's leftmost leg is absent above the hoof. This coruscating near-Mint example displays mottled golden-brown and steel-blue toning on the Indian.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

- 15244 1937-D Three-Legged, FS-901, AU58 PCGS. CAC.** Although less coveted than the 1918/7-D and the 1916 Doubled Die Obverse, the 1937-D Three-Legged nickel is undoubtedly the best-known variety of the Buffalo nickel series. The present satiny near-Mint example displays light to medium green-gold toning. No marks are apparent, but the bison's hip exhibits minor rub. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

1937-D Buffalo Five Cent, MS63
Legendary Three-Legged Nickel

- 15245 1937-D Three-Legged, FS-901, MS63 NGC.** An exceptional MS63 example of the irrepressible Three-Legged nickel, sharply struck on both sides with all of the confirming attributes that define this enduring classic variety. Other similar die anomalies exist, but none can surpass the Three-Legged 1937-D in numismatic lore. Wheat-gold and lavender accents occupy the crisply defined nooks and crannies of this attractive, bluish-gray Select Uncirculated nickel.
From The Martin Peterson Collection. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

PROOF BUFFALO NICKELS

- 15246 1913 Type Two PR65 PCGS.** Rich matte luster adorns golden-toned surfaces on this Gem Type Two proof. The strike is full, and neither side exhibits mentionable marks. Eye appeal is outstanding. An excellent type coin. NGC ID# 278S, PCGS# 3990

**1913 Type Two Nickel, Lightly Toned PR67
Intricately Detailed Motifs**

15247 1913 Type Two PR67 PCGS. CAC. The Type Two 1913 matte proof Buffalo nickel is similar in high-grade scarcity to the Type One. This CAC-approved Superb Gem has a rarely offered degree of quality and eye appeal. The devices are struck to the full depth of the dies, and each side exhibits seemingly flawless preservation. Delicate lavender, ice-blue, and pale champagne toning appears over each side. Population: 61 in 67 (4 in 67+), 7 finer. CAC: 25 in 67, 7 finer (1/17). NGC ID# 278S, PCGS# 3990

15248 1915 PR65 PCGS. Beautiful Gem-quality matte surfaces showcase a full strike and lovely pastel toning. There are no distracting marks, and the eye appeal surpasses norms for the grade. The 1915 matte proof nickel boasts a small mintage of only 1,050 pieces. *From The Martin Peterson Collection.* NGC ID# 278U, PCGS# 3992

15249 1936 Type One — Satin Finish PR67 PCGS. The first proofs of 1936 employed a Satin finish, like the present coin. This impressive Superb Gem exhibits razor-sharp definition on all design elements and the impeccably preserved surfaces radiate vibrant satiny mint luster. PCGS has graded 45 numerically finer examples (2/17). NGC ID# 278X, PCGS# 3994

15250 1936 Type Two — Brilliant Finish PR65 PCGS. CAC. Iridescent apricot-gold, plum-mauve, lime-green, and powder-blue toning endows this sharply struck specimen. The concave fields exhibit pleasing reflectivity. A pass beneath a lens reveals unobtrusive obverse carbon. NGC ID# 278Y, PCGS# 3995

15251 1936 Type Two — Brilliant Finish PR66 PCGS. This practically brilliant specimen has a good strike and reflective fields. One tiny fleck on the cheekbone. After a two decade gap, proof coinage resumed in 1936. Mintages were limited, though, due to collector focus on the many silver commemorative issues that year. In a green-label holder. *From The Martin Peterson Collection.* NGC ID# 278Y, PCGS# 3995

15252 1936 Type Two — Brilliant Finish PR66 PCGS. CAC. Pastel honey-gold and powder-blue shades alternate across this well struck and immaculate Premium Gem. Careful study beneath a loupe fails to locate imperfections. A high grade and delightful proof type representative. NGC ID# 278Y, PCGS# 3995

15253 1937 PR66 PCGS. Light honey-gold toning accompanies this lustrous and unperturbed Premium Gem. The strike is full except on the hair above the braid. The final proof date of the series, though business strikes were coined at Denver the next year. Encapsulated in a green-label holder. *From The Martin Peterson Collection.* NGC ID# 278Z, PCGS# 3996

15254 1937 PR66 NGC. The Indian and bison display noticeable frost, and contrast with the glassy fields. This lovely Premium Gem appears brilliant upon first glance, though light tan toning visits both sides. Perfect aside from a minor lamination on the obverse rim near 3 o'clock. NGC ID# 278Z, PCGS# 3996

15255 1937 PR67 PCGS. Iridescent powder-blue and butter-gold toning graces this precisely struck and undisturbed Superb Gem. The sole imperfections are a few pinpoint flecks. A beautiful representative of the this scarce proof type.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 278Z, PCGS# 3996

15256 1937 PR67+ PCGS. CAC. A hint of sun-gold and ice-blue toning graces this prominently mirrored and pristine Superb Gem. The final year of the proof type, struck for only two years with a brilliant (instead of matte or satin) finish. NGC ID# 278Z, PCGS# 3996

15257 1937 PR67+ PCGS. CAC. Delicate lavender and champagne hues warm liquidlike mirroring in the fields on this high-end Superb Gem proof. The strike is bold, and there are no contact marks. PCGS has seen 34 finer examples of the final proof issue in the Buffalo nickel series (2/17). NGC ID# 278Z, PCGS# 3996

15258 1937 PR67+ PCGS. CAC. There are elements of powder-blue, sea-green, and rose color throughout this lovely Superb Gem Buffalo nickel proof, hence the CAC endorsement for eye appeal. Each side is satiny and virtually pristine. Rarely found finer. NGC ID# 278Z, PCGS# 3996

15259 1937 PR67+ PCGS. CAC. This is a beautifully preserved, CAC-endorsed Superb Gem example of the final proof issue in the Buffalo nickel series. The devices are fully struck, and the fields are deeply mirrored with no evidence of repolishing after the initial preparing of the dies. There is a hint of field-device contrast on each side beneath a touch of light golden toning. Clearly, this piece was struck from an early die state. PCGS reports 33 finer proofs (2/17). NGC ID# 278Z, PCGS# 3996

JEFFERSON NICKELS

1942-D Over Horizontal D Nickel FS-501, MS63 Full Steps

15260 1942-D D Over Horizontal D, FS-501, MS63 Full Steps PCGS. The D Mintmark was initially rotated a quarter turn, with the upright of the letter facing the top of the reverse. The mistake was immediately recognized, and the D was entered on top of the first punch with its correct orientation. This is one of many die errors in virtually every series that are collectively known as "blundered dies." The strike is sharp with vibrant luster beneath chestnut-gold toning. The reverse displays a few tiny gray flecks. Population: 4 in 63 Full Steps, 12 finer (2/17). NGC ID# 22TL, PCGS# 38496 Base PCGS# 84015

15261 1943-P Doubled Die Obverse, FS-106, MS67 PCGS. The popular "Doubled Eye" variety, enshrined in the *Guide Book* and among the most popular varieties for the series. Although Jefferson's eye is the pick-up point, all obverse legends are nicely die doubled. Lustrous and nearly pristine with a hint of golden toning. Population: 6 in 67, 4 in 67 Full Steps (2/17). NGC ID# 22TP, PCGS# 38497 Base PCGS# 4174

**1949-D Nickel, Iridescent MS67 Full Steps
Top-Quality Registry Coin**

15262 1949-D MS67 Full Steps PCGS. The Denver Mint struck nearly four times as many nickels in 1949 as the San Francisco Mint and a little more than half as many as the Philadelphia Mint. The D and S-mint coins are about equally rare in this high grade with Full Steps, while the Philadelphia coins are by far the rarest. A spectacular array of iridescent rose, orange, green, and blue tones graces the entirety of this razor-sharp Superb Gem. Satin luster glows beneath the patina. A lens reveals a couple of flecks on the central reverse, but nothing else. Population: 6 in 67 Full Steps, 0 finer (2/17). NGC ID# 22UC, PCGS# 84038

**1950 Nickel, MS67 Full Steps
Unseen Finer, Pastel Toning**

15263 1950 MS67 Full Steps PCGS. Pastel rainbow hues encircle bluish-gold centers on both sides, though the effect is more pronounced on the obverse of this fully Superb Gem nickel. Vibrant luster issues from the underlying surfaces. The colorful toning and luminous frost generate spectacular eye appeal. Population: 9 in 67 Full Steps, 0 finer (3/17). NGC ID# 22UE, PCGS# 84041

15264 1951 MS66 Full Steps PCGS. A delightful Premium Gem representative of this popular issue, with sharply detailed design elements and Full Steps definition on Monticello. The impeccably preserved, lustrous surfaces show highlights of greenish-gold toning and outstanding eye appeal. Population: 24 in 66 (1 in 66+) Full Steps, 2 finer (2/17). NGC ID# 22UG, PCGS# 84043

PROOF JEFFERSON NICKELS

**1939 Jefferson Nickel, PR68
Reverse of 1938, None Certified Finer**

15265 1939 Reverse of 1938 PR68 NGC. The wavy steps on Monticello distinguish the Reverse of 1938 from the Reverse of 1940, and while the distinction is meaningful, the vast majority of proofs are the Reverse of 1938. There is no Reverse of 1939 per se. This Reverse of 1938 example is a seemingly unimprovable, glittering Superb Gem. Intensely reflective surfaces surround smooth and sharply struck motifs. A hint of lemon-yellow at the rims does not intrude on the brilliant, fathomlessly deep-mirrored fields that are optically concave in relation to the forceful central devices. Census: 2 in 68, 0 finer (2/17). NGC ID# 279X, PCGS# 4176

15266 1941 PR67+ PCGS. CAC. A beautifully toned Superb Gem. Lemon-gold, lime-green, lilac, and rose-red patina fills both sides. The strike is full, and the surfaces are pristine aside from infrequent microscopic carbon. NGC ID# 27A2, PCGS# 4178

15267 1954 PR68 Deep Cameo PCGS. A magnificent PR68 Jefferson nickel, this piece possesses profound cameo contrast, unusual in proofs of the mid-1950s. The devices display pinpoint definition throughout, and the fields appear pristine. Housed in an old green label holder. Population: 13 in 68 (1 in 68+) Deep Cameo, 0 finer (2/17). NGC ID# 27A7, PCGS# 94186

15268 1971 No S PR69 Cameo PCGS. FS-501. A San Francisco mintmark was never added to the working obverse die, and in due course a few hundred pieces were struck and shipped to fortunate collectors. The present specimen offers frosty motifs and glassy fields. The strike is full and the preservation is pristine. Population: 21 in 69 Cameo, 14 in 69 Deep Cameo, 0 finer (2/17). NGC ID# 56PC, PCGS# 84204

EARLY HALF DIME

15269 1795 V-4, LM-10, R.3 — Damage — Genuine PCGS. VF Details. A cluster of small marks near the tip of the eagle's tail account for the PCGS designation. The late die state with a dramatic cud over star 9 and the TY in LIBERTY. Richly patinated powder-blue, rose-red, and sun-gold. A few left-side stars are softly defined, but Liberty and the eagle show substantial fine detail.

BUST HALF DIMES

1830 V-8, LM-3 Half Dime Album-Toned Gem Example

15270 1830 V-8, LM-3, R.2, MS65 PCGS. The multicolor toning is deepest at the borders, suggesting old-time album storage. Shades of orange-gold are most vibrant at the centers, with gunmetal-blue toning at the peripheries and violet accents intervening wherever they find a foothold. A sharply struck Gem, with crisp star centers and only the faintest incompleteness at the eagle's wing shoulders. Marks are limited to a few faint field lines barely visible beneath the rich patina. Population (all varieties): 36 in 65, 29 finer (2/17). *From The R. Thayer Sheets Yorktown Collection.* NGC ID# 232C, PCGS# 38640 Base PCGS# 4277

15271 1830 V-3, LM-4.1, R.2, MS64 PCGS. CAC. Tobacco-brown and gunmetal-gray toning encompasses this nicely struck and satiny Choice Bust half dime. An early die state without reverse clash marks. A radial die crack passes through two points of the first star. PCGS# 38641 Base PCGS# 4277

15272 1832 V-8, LM-5, R.1, MS65 PCGS. Exquisite bands of ocean-blue and autumn-brown toning endow the borders of this Capped Bust Gem. The centers lack a full impression, but peripheral elements are sharp, and the surfaces are uncommonly unabraded. NGC ID# 232E, PCGS# 38667 Base PCGS# 4279

15273 1833 V-7, LM-1, R.3, MS64 PCGS. A lovely cream-gray near-Gem with boldly struck and coruscating surfaces. Thorough inspection reveals only delicate imperfections. The date digits are progressively further from the dentils, and the upper loop is filled within the first S in STATES. NGC ID# 232F, PCGS# 38686 Base PCGS# 4280

1836 Half Dime, Brilliant MS65 V-6, LM-5, Small 5C

15274 1836 Small 5C, V-6, LM-5, R.2, MS65 PCGS. Star 1 and the N in UNITED are repunched. Both sides of this Gem half dime are extensively clashed. The surfaces are nearly fully brilliant and brightly lustrous with occasional wisps of champagne-gold color. The stars, curls, feathers, and olive leaves are as boldly struck as one may hope to find. Exceedingly rare in this high grade. Population (all Small 5C varieties): 13 in 65, 4 finer (2/17). NGC ID# 232J, PCGS# 38728 Base PCGS# 4288

SEATED HALF DIMES

15275 1837 No Stars, Large Date (Curl Top 1) MS64 NGC. V-1, Flynn MPD-001 and RPD-001. The date is obviously repunched south. The 8 is triple-punched, with the lowest impression touching the dentils. Deep ocean-blue toning encompasses both sides, save for Liberty's legs and shield, which are violet-red. Encapsulated in a former generation holder. *From The Martin Peterson Collection.* NGC ID# 232M, PCGS# 4311

15276 1837 No Stars, Large Date (Curl Top 1) MS64 PCGS. CAC. First year of the Seated design, the half dimes have two notable variants, Curl Top 1 and Flat Top 1. This is an originally toned example that shows horizontal streaks of gray-russet toning across each side. Only the slightest evidence of contact can be found with a loupe. NGC ID# 232M, PCGS# 4311

15277 1837 No Stars, Large Date (Curl Top 1) MS65 NGC. V-1, Flynn MPD-001 and RPD-001. The noticeable, widespread repunching on the bottom of all date digits attributes this as the V-1 die pairing. Medium to deep autumn-brown and olive-gray toning embraces sharply struck and undisturbed surfaces. *Ex: Long Beach Signature (Heritage, 9/2015), lot 3361, which realized \$1,528.* NGC ID# 232M, PCGS# 4311

15278 1851 MS66 PCGS. This lovely Premium Gem is fairly well-struck save for a couple of the right-side stars on the obverse. The light golden centers complement original aqua and russet border tones, and there are no mentionable contact marks. Population: 15 in 66 (1 in 66+), 6 finer (2/17). NGC ID# 233H, PCGS# 4347

15279 1853-O No Arrows — Scratch — Genuine PCGS. AU Details. The 1853-O No Arrows half dime has a small mintage of 160,000 pieces, and it appears that unused quantities were melted by the New Orleans Mint. The issue is much scarcer than, for example, the 1849-O, which has a slightly smaller production. This lightly circulated half dime displays suggestions of peach-gold toning. Relatively unimportant marks on the upper obverse and the F in OF correspond to the PCGS notation.

15280 1856-O MS65 PCGS. CAC. Autumn-brown and sea-green toning embraces the borders of this unmarked and coruscating Gem. The strike is full except on portions of the dentils. Both sides exhibit prominent clash marks, as made. Rare in the present quality. Population: 3 in 65, 3 finer. CAC: 1 in 65, 1 finer (2/17). NGC ID# 233R, PCGS# 4364

15281 1860 MS67+ PCGS. The 1860 is a plentiful date overall, but Superb Gem examples are scarce. This high-end type coin displays satiny luster with original multicolor border toning around silvery interiors. The upper-left portion of the wreath is ill-defined, but the strike is otherwise sharp. Population: 48 in 67 (6 in 67+), 4 finer (2/17). NGC ID# 2347, PCGS# 4377

15282 1861 MS66 PCGS. Softly struck on the upper left reverse wreath, with glowing satiny luster, a seemingly unmarked reverse, and a few tiny nicks in the obverse fields. A lightly toned and highly attractive Premium Gem. Population: 25 in 66 (2 in 66+), 3 finer (2/17). NGC ID# 2349, PCGS# 4379

PROOF SEATED HALF DIMES

15283 1858 PR64 Cameo PCGS. This is a sharp, well-contrasted Choice proof Cameo with delicate champagne toning that cedes to sea-green hues at the borders. A few hairlines in the fields limit the grade. Cameo examples of the 1858 proof are rare in all grades and underappreciated at current values. Population: 3 in 64 Cameo, 3 finer (2/17). NGC ID# 235N, PCGS# 84437

15284 1871 PR65 Cameo NGC. Ultra Cameo examples of the 1871 proof half dime are extremely rare, and Cameo pieces are scarce in all grades. This Gem Cameo displays a bold strike and brilliant-white coloration. Strong field-device contrast is seen on each side. The obverse figure shows moderate die rust. Census: 11 in 65 Cameo, 14 finer (2/17). NGC ID# 2368, PCGS# 84454

EARLY DIME

1796 JR-1 Dime, Very Good
Scarce Early Two-Year Type

15285 1796 JR-1, R.3, VG8 PCGS. The die break below star 1 attributes this first-year Draped Bust dime. Deep cream-gray and lavender toning encompasses both sides. All legends and stars are clear, and marks are inconsequential aside from a small field depression near Liberty's mouth and a tick atop the E in STATES. NGC ID# 236B, PCGS# 38742 Base PCGS# 4461

BUST DIMES

15286 1825 JR-2, R.2, MS62 PCGS. The coin shows no wear, although the shield stripes and the hair curls at Liberty's temple are slightly weak in regards to strike. This JR-2 representative offers satiny, brilliant luster with no individually significant abrasions. Pleasing for the grade. NGC ID# 2374, PCGS# 38808 Base PCGS# 4503

1828 JR-2 Dime, AU58
Large Date, Curl Base 2

15287 1828 Large Date, Curl Base 2, JR-2, R.3, AU58 PCGS. The year 1828 saw the introduction of a new edge collar, resulting in a slightly smaller size, more dentils, and a better-defined rim. Two varieties are known. Curl Base 2 coins are about twice as scarce as those with a Square Base 2 in the date (JR-1). This lovely near-Mint dime offers dramatic cobalt-blue toning with glints of lavender and gold. Well-struck, although considerable incompleteness occurs on the eagle's head. Population: 2 in 58 (1 in 58+), 1 finer (2/17). *From The R. Thayer Sheets Yorktown Collection.* NGC ID# 2376, PCGS# 38825 Base PCGS# 4506

1829 JR-3 Dime, MS66
Small 10C, Condition Census Quality

15288 1829 Small 10C, JR-3, R.4, MS66 NGC. A double cut denticle below the 1 in the date attributes the variety. Rich apple-green and golden-brown patina cedes to a brilliant center. This is a well-struck Gem, and the lack of detail within the vertical shield stripes is due solely to the reverse die. The reverse is lustrous and vibrant, and the devices appear to be free from contact. Possibly the finest example known of this scarce variety. Census (all Small 10C varieties): 7 in 66, 1 finer (2/17). *Ex: FUN Bullet Sale (Heritage, 1/2003), lot 480.* NGC ID# 2378, PCGS# 38828 Base PCGS# 4511

15289 1829 Small 10C, JR-6, R.3, MS60 PCGS. An unworn, satiny battleship-gray example with hints of light golden toning on each side. Grade-limiting abrasions are light and scattered with no singular defects. The reverse fields retain partial reflectivity from polished dies. NGC ID# 2378, PCGS# 38831 Base PCGS# 4511

15290 1829 Small 10C, JR-7, R.1, MS63 PCGS. A prooflike example that boasts a precise strike and impressive golden-brown, lilac, and apple-green toning. The coin is well-preserved aside from a subtle mark on the cheek and a few hairlines below the shoulder curl. PCGS# 38832 Base PCGS# 4511

SEATED DIMES

1842 Dime, MS65
Sharp and CAC-Approved

15291 1842 F-102, R.4, MS65 PCGS. CAC. Frosty luster displays light champagne toning on this Gem 1842 Seated dime. The strike is sharp, and there are no major abrasions. This issue is occasionally seen in MS63 or MS64, but rarely in Gem or finer condition. Population: 11 in 65, 4 finer. CAC: 4 in 65, 2 finer (2/17). PCGS# 537783 Base PCGS# 4581

15292 1843 Repunched Date, F-102, FS-301, MS64 NGC. All four date digits are clearly repunched north. Gerry Fortin lists the variety within his Top 100. This ocean-blue, straw-gold, and ruby-red Choice example is well preserved despite a delicate horizontal line above Liberty's head. Housed in a prior generation holder. *From The Martin Peterson Collection.* NGC ID# 385A, PCGS# 145488 Base PCGS# 4583

15293 1847 F-102, R.4, MS62 PCGS. Dove-gray fields and devices are bounded by sea-green and autumn-brown. A precisely struck representative without any relevant abrasions. The lower mintage 1847 is seldom encountered in Uncirculated grades. Population: 6 in 62, 7 finer (2/17). PCGS# 537848 Base PCGS# 4589

15294 1853 Arrows MS65 NGC. Lustrous fields adorn each side of this Gem Arrows type coin, while the design elements exhibit sharp definition. There are no major abrasions, and each side offers deep olive-gray and steel-blue toning. Housed in a prior generation holder. NGC ID# 2398, PCGS# 4603

15295 1853 Arrows MS66 NGC. A deeply frosted, original Premium Gem Arrows dime, with merlot overtones merging with pearlescent silver-gray surfaces. Virtually unmarked fields surround fully struck devices. Satiny luster reveals iridescent shades when rotated in light. Census: 42 in 66 (1 in 66+, 1 in 66 ★), 18 finer (2/17). Ex: *ANA Signature (Heritage, 8/2014), lot 3467.* NGC ID# 2398, PCGS# 4603

15296 1856-O Medium O, F-103, High R.5, MS63 PCGS. A well struck Select example bathed in forest-green, fire-red, and sun-gold patina. Die cracks connect all stars, but the radial die crack on the reverse at 5 o'clock is diagnostic for F-103. The obverse is clashed on the field near the pole, but the reverse is unclashed. NGC ID# AJKJ, PCGS# 538079 Base PCGS# 4612

15297 1858-O F-101, R.2, MS62 NGC. A satiny and crisply struck example of this scarcer New Orleans issue. Dappled autumn-brown and navy-blue toning embraces both sides. The obverse field has a couple of small strike-throughs, but marks are essentially absent. Ex: *Long Beach Signature (Heritage, 9/2005), lot 2349, which realized \$1,035.* NGC ID# 2392, PCGS# 538130 Base PCGS# 4617

15298 1868 F-102, R.3, MS65 NGC. A bold strike complements satiny mint luster on this Gem 1868 Seated dime. There are no distracting abrasions visible beneath the rich multicolor toning. The coin has an outstanding old-time appearance. Census: 8 in 65, 2 finer (2/17). PCGS# 538223 Base PCGS# 4647

1871-CC Dime, VF Details Inaugural Nevada Mint Coin

15299 1871-CC F-101, R.4 — Damage — PCGS Genuine. VF Details. According to specialist Gerry Fortin: "This Carson City date is one of the keys to the Liberty Seated Dime series. It is considered very scarce in circulated grades through VF. It becomes rare in EF-AU and excessively rare in Mint State." Dings around the edges and clusters of small marks across the obverse prevent a numerical assessment. Nevertheless, this lot presents an opportunity to reasonably acquire a well-detailed example of a famous Carson City key.

From The R. Thayer Sheets Yorktown Collection.

15300 1873 Arrows, F-113, R.3, MS64 PCGS. A coruscating example of this popular two-year design subtype. The lightly toned obverse lacks mentionable marks. The reverse exhibits light russet toning and is well preserved. The dies are moderately clashed, and the wreath exhibits a nearly vertical die crack near 9 o'clock. PCGS# 538314 Base PCGS# 4665

15301 1873-CC Arrows, F-101, R.4 — Corroded, Cleaned — ANACS. VF30 Details. The 1873-CC Arrows dime has a tiny *Guide Book* mintage of 18,791 pieces. All went into Old West circulation, with the exception of three Mint State examples, respectively from the Gardner, Norweb, and Boosel Collections. According to Seated dime specialist Gerry Fortin, "most come with varying levels of porosity." The present pearl-white piece has a granular obverse and a microgranular reverse. All legends are bold, including LIBERTY. *From The R. Thayer Sheets Yorktown Collection.*

15302 1875 F-116, R.2, MS66 PCGS. CAC. Rich golden-brown and forest-green borders encompass nearly brilliant centers. This lustrous Seated type coin has a bold strike and minimal evidence of contact. Housed in an old green label holder. PCGS# 538363 Base PCGS# 4672

1877-CC Seated Dime, MS66+ Type Two Reverse, Multicolor Toning

15303 1877-CC MS66+ PCGS. CAC. Type Two Reverse. Rich peach-gold centers are framed by sea-green and rose-red margins. Sharply struck, lustrous, and essentially pristine. The date and mintmark positions resemble Fortin-113 and Fortin-118, but a definitive link to those varieties is absent. The upper obverse border displays slender die cracks. Population: 53 in 66 (12 in 66+), 7 finer. CAC: 20 in 66, 2 finer (2/17). NGC ID# 23AM, PCGS# 4683

1883 Dime, Beautifully Toned MS67 High-End Seated Type Coin

15304 1883 F-118, R.3, MS67 PCGS. The 1883 is a popular type-coin issue, but Superb Gems are conditionally scarce. This piece is boldly struck and frosty with no abrasions. Lovely sea-green, lavender, and rose-gold toning embraces each side but on the reverse is concentrically laid. Population: 13 in 67 (1 in 67+), 3 finer (2/17). PCGS# 538677 Base PCGS# 4691

15305 1887 MS67 PCGS. Fortin-Unlisted. The reverse is extensively cracked around the margin and both sides are noticeably die clashed (the E in DIME is especially evident to the right of Liberty's elbow), yet we do not see this particular die pairing listed in Fortin. More than 11.2 million dimes were struck in 1887, but only a handful qualify for this lofty grade. The surfaces display thick mint frost and are essentially brilliant, showing just the slightest hint of color. Well-defined throughout. Population: 6 in 67 (1 in 67+), 0 finer (2/17). NGC ID# 23B5, PCGS# 4698

15306 1888-S Misplaced Date, F-107a, R.5, MS64 PCGS. Gerry Fortin states "the misplaced top loop of [an] 8 is above the final 8 in the date." This is among the scarcer Fortin varieties for the issue. Satiny, unabraded, and nicely struck, the obverse is white, while the reverse exhibits deep lavender, tobacco-brown, and aquamarine toning. Population: 10 in 64, 13 finer (2/17). PCGS# 538789 Base PCGS# 4701

- 15307 1889 MS66 PCGS.** Plentiful in lower grades, the 1889 Seated Liberty dime becomes conditionally scarce in MS66 and is rarely seen finer. This Premium Gem displays a bold strike and excellent preservation. The silvery interiors cede to lavender and ocean-blue border toning, with a vein of rainbow along the upper obverse. Population: 30 in 66 (2 in 66+), 8 finer (2/17). NGC ID# 23B9, PCGS# 4702

PROOF SEATED DIMES

1857 Seated Dime, PR64 Rare Pre-1858 Proof Issue

- 15308 1857 PR64 PCGS. F-101, R.6.** While the exact number of proofs struck in 1857 is unknown, an estimated mintage of 70 pieces may be on the high side. PCGS suggests 30 to 50 pieces are known. This example is faintly iridescent beneath slate and olive-gray toning. The mirrored fields retain their reflectivity beneath the toning, while the coin is exceptionally well-struck and Choice for the assigned grade. A diagnostic die line from the rim to R in AMERICA helps confirm the proof die pair. Population: 12 in 64, 9 finer (2/17). NGC ID# 23CB, PCGS# 4746

- 15309 1867 PR64 Cameo PCGS. CAC. F-103, R.5.** The 1 in the date is recut on this proof die pair. The 1867 proof is rarely seen in Cameo grades, and this Choice example is deeply reflective and sharply struck. Both sides display lavender-gray toning that transitions to bluish hues near the rims. Population: 17 in 64 Cameo, 12 finer. CAC: 12 in 64, 7 finer (2/17).
Ex: Royal Sale/Dr. C.A. Allenburger Collection (B. Max Mehl, 3/1948), lot 1281. NGC ID# 23CR, PCGS# 84760

- 15310 1871 PR64 Cameo PCGS. F-101, R.5.** The 18 in the date is repunched north, with a spread sufficient to place the variety within Gerry Fortin's Top 100 ranking. Light sun-gold toning drapes this flashy near-Gem. The strike is sharp except on Liberty's hair. Smooth aside from a small depression on the field near Liberty's left (facing) elbow. NGC ID# 23CV, PCGS# 84764

- 15311 1878 Type Two Reverse, F-101, R.3, PR65 PCGS. CAC.** Orange-gold and lime-green fills the obverse margin. The seated Liberty is olive-green. The reverse toning is even more impressive, and features a lavender and powder-blue center framed by peach patina. In a green label holder. NGC ID# 23D3, PCGS# 539041 Base PCGS# 4775

- 15312 1879 PR65 Cameo PCGS. F-102, R.3.** The pick-up point for Fortin-102 is a pair of lengthy but inconspicuous die scratches (as coined) within the lower left portion of the wreath. This nicely struck caramel-gold Gem displays noticeable cameo contrast and is free from evident detractors. NGC ID# 23D4, PCGS# 84776

1880 Dime, PR67 Excellent Visual and Technical Quality

- 15313 1880 F-101, R.3, PR67 PCGS.** The date placement and a die defect on the M in DIME distinguish Fortin-101 from the other 1880 proof die pair (Fortin-102). Orange and lavender tones paint the obverse, while the reverse displays predominantly steel-blue and green hues. Devoid of all but a few microscopic flecks. In this lofty grade, circulation strikes and proofs are roughly equally available. However, collector demand for high-grade examples from the low-mintage business-strike issue of only 36,000 pieces, places pressure on carefully preserved proofs such as this Superb Gem. NGC ID# 23D5, PCGS# 539047 Base PCGS# 4777

1887 Seated Dime, PR67 Cameo Splendid Multicolor Toning

- 15314 1887 PR67 Cameo PCGS. F-101, R.3.** Sharply struck and exquisitely preserved, this is a gorgeously toned representative with clean surfaces and bold field-to-device contrast observed on each side. The obverse displays hues of deep electric-blue and russet-brown patina that is prevalent near the border regions, leaving Liberty's motif nearly untuned. The reverse has an autumn-gold margin that surrounds a sea-green center. A conditionally rare example from an original mintage of only 710 coins. Population: 4 in 67 Cameo, 1 finer (2/17).
Ex: Long Beach Signature (Heritage, 9/2014), lot 3104. NGC ID# 23DC, PCGS# 84784

1887 Seated Dime, PR66 Sole Ultra Cameo Example

- 15315 1887 PR66 Ultra Cameo NGC. F-117, R.6.** Contrast between the frosted motifs and watery field captures and holds the attention of the viewer, which is then drawn to the impeccable preservation displayed throughout. The surfaces remain brilliant with pale border toning. From a distribution of 710 proofs, this is the only example designated as Ultra or Deep Cameo by NGC or PCGS (2/17). NGC ID# 23DC, PCGS# 94784

BARBER DIMES

15316 1893-O MS65 NGC. A satiny and well-struck cream-gray and straw-gold Gem with remarkably smooth surfaces. Early New Orleans issues are scarcer in Mint State than their mintages might imply, and the 1893-O is no exception. Census: 8 in 65 (1 in 65+), 6 finer (2/17). NGC ID# 23DR, PCGS# 4801

1895-O Dime, Choice XF Outstanding Original Patina

15317 1895-O XF45 PCGS. The 1895-O is the key to the Barber dime series and the issue is particularly elusive in the upper circulated grades. This Choice XF example displays pleasing detail for the grade, with original olive, russet, amber, and lavender-gray patina. An outstanding coin for the grade. With a small mintage of only 440,000 pieces, the '95-O is the only true "stopper" in the series in all grades (the ultra-rare 1894-S aside). NGC ID# C4KL, PCGS# 4807

15318 1899-S MS64 PCGS. A brilliant and satiny Choice dime. No marks are apparent, and the strike is intricate. The 1899-S has less than one-tenth the mintage of its Philadelphia cousin, and is very scarce in Mint State. Population: 34 in 64, 37 finer (2/17). NGC ID# 23EB, PCGS# 4820

15319 1900-O MS63 PCGS. This is a well-struck example of the conditionally elusive 1900-O dime, but evidence of die wear exists on each side with small rim cups around parts of the peripheries. The coin is satiny with silvery luster. No distracting abrasions are seen. Population: 10 in 63, 29 finer (2/17). NGC ID# 23ED, PCGS# 4822

15320 1903-S MS65 PCGS. This is a well-struck Gem with traces of light golden toning atop satiny silver-white luster. A few faint grease streaks struck into the reverse attest to uncleaned surfaces. Eye appeal is pleasing. The 1903-S dime is rare this fine. Population: 8 in 65, 11 finer (2/17). NGC ID# 23EP, PCGS# 4832

1905-O Dime, Lightly Patinated MS66 Sharp Strike for the Issue

15321 1905-O MS66 PCGS. CAC. Frosty and extremely lustrous, each side of this sharp 1905-O is largely brilliant with a dappling of olive-gold toning that confirms the originality of the Premium Gem surfaces. The strike is needle-sharp throughout the centers and nearly so at the legends and borders. An outstanding representative of this conditionally challenged O-Mint issue. Population: 19 in 66, 6 finer. CAC: 4 in 66, 6 finer (2/17). NGC ID# 23EU, PCGS# 4836

15322 1913 MS66+ PCGS. CAC. Dappled apple-green and wheat-gold toning fills the margins, along with a glimpse of cherry-red patina above STATES. A lustrous and fully struck Barber representative. Population: 56 in 66 (19 in 66+), 0 finer. CAC: 15 in 66, 0 finer (2/17). NGC ID# 23FR, PCGS# 4863

PROOF BARBER DIMES

15323 1894 PR66 PCGS. Fire-red and apricot-gold borders encompass aquamarine centers. This lustrous and undisturbed specimen exhibits an intricate strike and is devoid of visible detractors. NGC ID# 23G6, PCGS# 4878

15324 1894 PR66+ Cameo PCGS. CAC. Golden-orange border toning leaves minimally toned interiors, and the obverse has an additional layer of blue-violet on the rim. A captivating piece that comes close to Superb Gem preservation and has eye appeal that is practically there. Population: 19 in 66 (1 in 66+) Cameo, 2 finer. CAC: 11 in 66, 6 finer (2/17). (A piece of plastic inside the holder appears at about 11:00 on the reverse rim in the online images.)
Ex: Chicago Signature (Heritage, 8/2011), lot 3645. NGC ID# 23G6, PCGS# 84878

15325 1897 PR66 NGC. The sharply detailed, frosty design elements of this impressive Premium Gem create noticeable, if undesignated, contrast with the deeply reflective fields. The well-preserved surfaces are blanketed in subtle shades of pale gold toning. Census: 35 in 66, 21 finer (2/17).
From The Martin Peterson Collection. NGC ID# 23GA, PCGS# 4881

15326 1904 PR65 Cameo PCGS. Dappled shades of greenish-gold toning visit the well-preserved surfaces of this attractive Gem, with razor-sharp frosty design elements that contrast boldly with the deeply reflective fields. A small planchet flaw is evident in the lower reverse field. Population: 7 in 65 (1 in 65+) Cameo, 8 finer (2/17). NGC ID# 23GH, PCGS# 84888

15327 1911 PR66 PCGS Secure. CAC. Beautiful multicolor toning envelops deeply mirrored fields and sharp, frosty devices in mottled patterns on this Premium Gem proof dime. There are no bothersome contact marks. Finer 1911 proofs are rarely offered. Population: 29 in 66 (1 in 66+), 17 finer. CAC: 11 in 66, 16 finer (2/17). NGC ID# 23GS, PCGS# 4895

15328 1915 PR66+ PCGS. Glimmering fields accentuate sharp, satiny design elements on this high-end Premium Gem proof. Sea-green, blue, amber, and lavender hues appear over each side. Population: 12 in 66 (4 in 66+), 11 finer (2/17). NGC ID# 7U3S, PCGS# 4899

MERCURY DIMES

15329 1916-D VG8 ANACS. All legends are bold on this attractively toned key date dime. The powder-blue, lavender, and straw-gold surfaces are unblemished. The vertical fasces lines are partly present. Certified in an ANA cache holder.
From The Martin Peterson Collection. NGC ID# 23GY, PCGS# 4906

**1916-D Mercury Dime, Fine 15
Collector-Grade Example**

15330 1916-D Fine 15 PCGS. CAC. This piece is steel-gray with a splash of deeper crimson and velvet green on the upper obverse. Each side is well defined for an extensively circulated coin, and this is a well-preserved example of this popular key date issue. An excellent choice for the date collector.

Ex: Long Beach Signature (Heritage, 9/2005), lot 2487; Long Beach Signature (Heritage, 5/2012), lot 3544. NGC ID# 23GY, PCGS# 4906

15331 1917 MS67 Full Bands PCGS. A delightful Superb Gem from the second year of the Mercury design, this coin features sharp definition on all devices, including Full Bands on the fasces. The virtually pristine lustrous surfaces show a few hints of greenish gold toning. Population: 34 in 67 (5 in 67+) Full Bands, 0 finer (2/17). NGC ID# 23H2, PCGS# 4911

**1917-D Mercury Dime, MS65 Full Bands
Condition Rarity in Finer Grades**

15332 1917-D MS65 Full Bands PCGS. Although more than 9.4 million Mercury dimes were struck at the Denver Mint in 1917, the issue is rare in MS65 condition, and very rare any finer. This sharply detailed Gem exhibits fully split and rounded bands on the fasces and the well-preserved surfaces radiate vibrant mint luster, with outstanding eye appeal. Population: 45 in 65 Full Bands, 14 finer (2/17). NGC ID# 23H3, PCGS# 4913

15333 1918-S MS64 Full Bands PCGS. A glimpse of mauve toning on the reverse exergue denies full brilliance, but this lustrous and unmarked Choice dime will please even the demanding specialist. The strike is bold except on the tops of the TY in LIBERTY. Population: 78 in 64 (1 in 64+) Full Bands, 46 finer (2/17). NGC ID# 23H7, PCGS# 4921

15334 1919-D MS63 Full Bands PCGS. This Select example displays a full strike and satiny, champagne-tinted mint luster. Scattered light handling marks determine the grade but none are individually noteworthy. The 1919-D is a scarce issue in the Full Bands category.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 23H9, PCGS# 4925

**1921-D Mercury Dime, MS65
Elusive This Fine**

15335 1921-D MS65 PCGS. High-grade 1921-D dimes are more often seen in Full Bands than not, making the more affordable non-Full Bands pieces seem underappreciated. This Gem displays delicate champagne toning and satin luster. The obverse is sharp, but the reverse shows expected weakness on the fasces bands. There are no bothersome abrasions. Population: 19 in 65, 13 finer (2/17). NGC ID# 23HF, PCGS# 4936

15336 1923-S MS64 Full Bands PCGS. A glimpse of autumn-brown toning is limited to the right obverse periphery. This sharply struck and lustrous near-Gem is uncommonly smooth for the designated grade. Very scarce in the present quality.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 23HH, PCGS# 4941

15337 1924-S MS63 Full Bands PCGS. A fairly early branch mint issue, the 1924-S is elusive in Mint State. This lustrous Select example is well struck except for minor fadeaway on the left margins. Marks are inconsequential for the conservatively assessed third-party grade.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 23HL, PCGS# 4947

15338 1927-S MS64 Full Bands PCGS. CAC. The 1927-S is quite scarce with a sharp strike. This Choice Full Bands example displays largely unmarked satin luster with delicate lavender and gold toning. Population: 50 in 64 (1 in 64+) Full Bands, 56 finer. CAC: 5 in 64, 10 finer (2/17). NGC ID# 23HW, PCGS# 4965

15339 1929-D MS67 Full Bands PCGS. A conditionally scarce Full Bands example, among the finest that most collectors will ever have a chance to acquire. The strike is sharp, as the grade and designation suggest, and each side offers beautifully preserved silver luster. Population: 70 in 67 (3 in 67+) Full Bands, 2 finer (2/17). NGC ID# 5LXC, PCGS# 4975

15340 1931-S MS65 Full Bands PCGS. Struck near the bottom of the Great Depression, the 1931-S has one of the lowest mintages of the business series. The present brilliant and lustrous Gem has a good strike and minimal signs of contact.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 23J9, PCGS# 4987

15341 1935-D MS67 Full Bands PCGS. Most Superb Gem 1935-D dimes reside in the Full Bands category, but that does not make such pieces common. This PCGS coin is among the finest certified and is conditionally scarce. Frosty mint luster shows no distracting abrasions, and the design elements are boldly rendered. Traces of light golden toning appear on each side. Population: 52 in 67 (7 in 67+) Full Bands, 0 finer (2/17). NGC ID# 23JD, PCGS# 4995

15342 1935-D MS67 Full Bands PCGS. The population of the 1935-D dime in Full Bands tops out at the MS67 numeric level, with a few examples awarded Plus designations. This scarce Registry coin displays a bold strike and softly frosted luster with daubs of olive-gold toning on each side. Population: 52 in 67 (7 in 67+) Full Bands, 0 finer (2/17). NGC ID# 23JD, PCGS# 4995

15343 1936-D MS67+ Full Bands PCGS. CAC. Fully brilliant surfaces appear as fresh as the day this Superb Gem dime was struck and lack significant abrasions. The central devices and marginal legends feature needle-sharp detail. Although the 1936-D claims a mintage in excess of 16.1 million coins, there are only nine finer examples at PCGS (2/17). NGC ID# 5C48, PCGS# 5001

15344 1936-D MS67+ Full Bands PCGS. CAC. An intricately struck, blazing Superb Gem with beautiful iridescent toning that is accompanied by deeper olive-gold patches in the left-hand margins. A loupe fails to reveal a single noteworthy flaw. PCGS reports only nine finer Full Bands examples (2/17). NGC ID# 5C48, PCGS# 5001

**1942/1 FS-101 Dime, Lustrous MS63
Desirable Guide Book Variety**

15345 1942/1 FS-101 MS63 PCGS. This popular *Guide Book* and *Cherry-pickers'* variety features the 2 punched clearly over an underlying 1, making it the most easily identifiable and desirable variant in the Mercury dime series. Each side retains its brilliance with occasional specks of color near the borders. The strike is strong, although the extreme centers display moderate softness. Population: 19 in 63, 37 finer (2/17).

From The R. Thayer Sheets Yorktown Collection.
NGC ID# 23K4, PCGS# 145473 Base PCGS# 5036

15346 1942/1 FS-101 AU58 Full Bands PCGS. CAC. The famous World War II overdate, more prominent than its 1942/1-D cousin. A lustrous and minimally marked key date dime. Primarily silver-white, but the reverse shows hints of tan toning, and the obverse has a few blushes of gray patina. PCGS# 145474 Base PCGS# 5037

**1942-S Dime, MS67+ Full Bands
Attractive Pastel Toning**

15347 1942-S MS67+ Full Bands PCGS. CAC. Trumpet Tail S. Lovely caramel-gold, ice-blue, and lime-green toning graces this lustrous and practically pristine Superb Gem. The strike is crisp at the centers, though the top of the B in LIBERTY shows minor fadeaway. PCGS has certified only eight examples as MS67+, with just two pieces finer (2/17). NGC ID# 23K7, PCGS# 5043

PROOF MERCURY DIMES

15348 1939 PR68 PCGS. A boldly struck, reflective high-end proof with dusky champagne toning over each side. This unmarred 1939 Mercury dime is among the finest proofs certified of the date. Population: 50 in 68 (1 in 68+), 0 finer (2/17). NGC ID# 5AMD, PCGS# 5074

15349 1939 PR68 PCGS. A fully struck top-grade proof with a hint of pale champagne toning over the mirrored surfaces. The 1939 proof Mercury dime is seldom offered this fine, particularly in a PCGS holder. Population: 50 in 68 (1 in 68+), 0 finer (2/17). NGC ID# 5AMD, PCGS# 5074

**1941 Mercury Dime, Immaculate PR68
Brilliant Silver Reflectivity**

15350 1941 PR68 PCGS. A seemingly unimprovable proof Mercury dime, brilliant and deeply mirrored with a deep impression on the raised elements and liquid silver reflectivity across the glassy fields. No examples are graded finer for the issue at PCGS. Population: 27 in 68, 0 finer (2/17). NGC ID# 27DM, PCGS# 5076

ROOSEVELT DIMES

15351 1947-S MS68 Full Bands NGC. Sans Serif S. Vibrant orange, lime, and lilac toning endows this lustrous and immaculate example. The strike is bold, and the eye appeal is compelling. Ideal for the competitive Registry holding. Census: 3 in 68 (1 in 68★) Full Bands, 0 finer (2/17). NGC ID# 23KP, PCGS# 85087

15352 1961-D MS67+ Full Bands PCGS. 30th Anniversary Green Label Holder. The tobacco-brown, magenta-red, and apple-green toning is especially prominent on the obverse. Lustrous and crisply struck with contact limited to the torch. Population: 21 in 67 (5 in 67+) Full Bands, 1 finer (2/17). NGC ID# 23LV, PCGS# 85123

**1963 Dime, MS67 Full Bands
Beautifully Toned Registry Coin**

15353 1963 MS67 Full Bands PCGS. Registry Set collectors find the 1963 Roosevelt dime to be a major rarity in Superb Gem Full Bands condition. This piece not only ranks among the finest known, but it also displays vivid multicolor toning on the obverse with gold and plum on the reverse. Satiny luster shows no distracting abrasions beneath the toning. Population: 6 in 67 (2 in 67+) Full Bands, 0 finer (2/17). NGC ID# 23LY, PCGS# 85126

15354 1965 MS67 Full Bands PCGS. First year of clad coinage, the mintage of 1965 dimes was substantial with 1.6 billion pieces produced. However, only a tiny sliver of a fraction were set aside and qualify for a Superb designation today by PCGS. This is an all-brilliant coin that shows a uniformly bright finish over both the fields and devices. Population: 10 in 67 Full Bands, 1 finer (2/17). NGC ID# 27EY, PCGS# 85130

TWENTY CENT PIECES

15355 1875-CC AU50 PCGS. BF-2, R.1. Dove-gray and golden-brown toning envelops this well defined and unblemished Carson City example. Portions of the eagle are incompletely brought up, but peripheral elements are well struck. NGC ID# 23R6, PCGS# 5297

15356 1875-CC AU50 PCGS. BF-2, R.1. Deep stone-gray toning encompasses this attractive Carson City type coin. Refreshingly free from abrasions, and although the strike is typical for the issue, luster accompanies design crevices. NGC ID# 23R6, PCGS# 5297

1875-S Twenty Cent, MS65 Outstanding Luster and Toning

15357 1875-S MS65 PCGS. CAC. BF-9, R.2. The 1875-S is the ideal type-coin issue in the short-lived twenty cent series. This Gem example displays beautifully preserved, frosty luster with a dusting of lavender-gold toning. There are no abrasions; Only a few faint lines in the right obverse field prevent an even finer grade. The upper portion of the eagle's left (facing) wing is slightly soft, but the strike is otherwise bold. Finer examples are elusive. NGC ID# 23R7, PCGS# 5298

15358 1875-S Misplaced Date, FS-301, MS64+ PCGS. The top of an 8 is concealed within the dentils below the 8 in the date. A coruscating Choice Seated type coin that boasts unblemished surfaces. The dusky surfaces are principally silver-gray, but show splashes of autumn-brown and forest-green on the reverse. PCGS# 395943 Base PCGS# 5298

15359 1875-S/S Misplaced Date, FS-302, MS64 PCGS. BF-16, R.1. The popular "Dollar Sign" variety with repunched serifs on the mintmark. According to Brunner and Frost, the errant digit in the dentils below the date is the top of a 5. This lightly toned and thoroughly lustrous Choice double dime has pleasing surfaces and a good strike.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 23R7, PCGS# 145009 Base PCGS# 5298

15360 1876 MS64 PCGS. BF-2, R.2. Peach-gold toning visits both borders, though it is more prominent on the reverse. Lustrous and crisply struck with exceptionally smooth surfaces. A Centennial-year type coin with a scant business mintage of 14,750 pieces.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 23R8, PCGS# 5299

15361 1876 MS64 PCGS. BF-2, R.2. Splashes of blue-green and golden-brown toning accompany this lustrous and razor-sharp Choice double dime. Marks are difficult to discern, and the eye appeal is considerable. Only 14,750 pieces were struck. NGC ID# 23R8, PCGS# 5299

EARLY QUARTER

15362 1805 B-3, R.1, VF25 PCGS. Tompkins Die State 5/3. Rich cobalt-blue, golden-brown, and lavender-red toning dominates the reverse, although the eagle's head, neck, and shield are brilliant. The obverse margin displays a narrow band of forest-green and tan-gold patina.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 23RC, PCGS# 38925 Base PCGS# 5313

BUST QUARTERS

15363 1815 "L" Counterstamp, B-1, R.1 — Damage — Genuine PCGS. AU Details. The "damage" consists of a letter L counterstamp on the upper obverse field. "L" and "E" counterstamps on better-grade 1815 and 1825 quarters are well-known among Bust quarter specialists, and their significance has been the subject of hobby speculation since the 19th century. The "L" stamp is scarcer than its "E" counterpart. This is a slightly glossy and minimally abraded pearl-gray piece.

15364 1824/2 B-1, R.3, Fine 12 PCGS. B-1 is the only 1824-dated die marriage, and is scarce in all grades. This deep cream-gray early quarter shows all letters in E PLURIBUS UNUM, although the Us in UNUM are faint. Smooth aside from minor hair-thin marks above the date and near the profile. NGC ID# 23RR, PCGS# 38972 Base PCGS# 5335

15365 1828 25 Over 50C, B-3, R.5, Good 6 PCGS. The U.S. Mint struck 102,000 1828-dated quarters. Despite the low mintage, it appears that the facility ran out of problem-free reverse dies, and had to resurrect the blundered denomination reverse die, held in storage since 1822. The mintage for this variety, B-3, was undoubtedly small, struck only until the new B-4 reverse die became available. This attractive cream-gray example has sharp legends except for the mostly worn E PLURIBUS UNUM. NGC ID# 23RV, PCGS# 38979 Base PCGS# 5343

15366 1831 Small Letters, B-2, R.2, MS61 PCGS. Tompkins Die State 2/4, with no recutting on stars 11-13 and some small cuds on the die crack between D in UNITED and S in STATES. This attractive Mint State example displays strongly impressed design elements throughout, but lapping has resulted in some small loss of detail in the eagle's claws. An extensive network of peripheral die cracks is evident on the reverse. Pleasing shades of greenish-gold and lavender-blue toning visit the lustrous surfaces, with scattered, minor contact marks and a few thin scratches on both sides. NGC ID# 23RW, PCGS# 38981 Base PCGS# 5348

1832 B-1 Quarter, MS63 Smooth and Semiprooflike

15367 1832 B-1, R.1, MS63 PCGS. Tompkins Die State 3/4. A semiprooflike example with rich sea-green borders and chestnut-gold fields. The devices are cream-gray. The surfaces are refreshingly unabraded, with only a small tick on the cheek worthy of mention. Well struck except for the shield borders and the forehead curls. NGC ID# 23RX, PCGS# 38987 Base PCGS# 5351

15368 1834 O Over F in OE, B-1, FS-901, R.1, MS62 NGC. Tompkins Die State 1/4, but we note that Tompkins overlooked the die crack from 1 o'clock to Liberty's cap. Medium to deep steel-blue and autumn-brown toning embraces inoffensively marked surfaces. This is a great old-time-looking type coin. NGC ID# 23RZ, PCGS# 38992 Base PCGS# 5353

1834 Bust Quarter, MS62
Rarity-5 Browning-5
Among Finest Known

15369 1834 B-5, R.5, MS62 PCGS. A remarkable example of the rarest 1834 quarter variety. The obverse displays splendid orange-gold, powder-blue, and lavender-red toning. The reverse exhibits rich orange, violet, and aquamarine patina. The fields are semiprooflike, and the strike is bold except near the shoulder curl, and opposite atop the right (facing) wing. Possibly the finest survivor of the die marriage, challenged only by the John J. Pittman MS62 NGC example.

Ex: Auction '84 (*Superior*, 7/1984), lot 113.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 23RZ, PCGS# 38996 Base PCGS# 5353

1835 B-2 Quarter, MS62
Lightly Toned and Unmarked

15370 1835 B-2, R.2, MS62 PCGS. Tompkins Die State 3/2. A charming pearl-gray Capped Bust type coin. The minutely granular surfaces are lustrous and impressively free from contact. The strike is intricate, and the eye appeal is exemplary for the MS62 level. The dies are clashed, usual for Browning-2. For all 1835 die varieties, Population: 25 in 62, 47 finer (2/17).

From The R. Thayer Sheets Yorktown Collection. NGC ID# 23S2, PCGS# 38998 Base PCGS# 5354

1835 Capped Bust Quarter, MS63
B-7 Variety, Richly Toned

15371 1835 B-7, R.2, MS63 PCGS. The Browning-7 variety is easily identified by the lack of a period following 25 C. Richly toned surfaces display copper-red centers surrounded by rich cobalt-blue margins. The strike is sharp, and careful evaluation beneath a loupe reveals generally smooth fields and only minor facial marks.

Ex: *Chicago Central States Signature* (*Heritage*, 4/2014), lot 4213. NGC ID# 23S2, PCGS# 39003 Base PCGS# 5354

1836 B-2 Quarter, MS62
Iridescently Patinated
Ex: Green, Newman

15372 1836 B-2, R.2, MS62 NGC. Ex: "Col." E.H.R. Green. Tompkins Die State 6/1. The lengthy obverse die cracks are characteristic of the Browning-2 marriage. The variety is plentiful in VF and XF, but attractive Mint State examples are rare. The present satiny specimen has delightful ruby-red, sky-blue, and autumn-gold toning. Consequential contact is confined to a slender field line east of the shield. Among the finest-known examples of the die marriage.

Ex: "Colonel" E.H.R. Green; *Green Estate*; *Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.*; Eric P. Newman; Eric P. Newman Numismatic Education Society; Eric P. Newman Collection Part II (*Heritage*, 11/2013), lot 33177, which realized \$4,700. NGC ID# 23S3, PCGS# 39006 Base PCGS# 5355

SEATED QUARTERS

1843-O Quarter, MS62
Small O, Briggs 1-A

15373 1843-O Small O MS62 PCGS Secure. Briggs 1-A. The Briggs reverse is readily identified by the vertical shield lines, which extend deep into the horizontal lines. The 1843-O is regularly encountered in well-circulated grades, but VF and better examples are much scarcer than the mintage would suggest. In Mint State, the issue is undeniably rare. This dove-gray and autumn-brown New Orleans quarter is well struck and satiny. Marks are surprisingly few, though we note a faded brief field line near Liberty's lower wrist. NGC ID# 23SS, PCGS# 5405

**1844 Quarter, Sharp MS64+
Conditionally Rare**

15374 1844 MS64+ PCGS. CAC. Although the 1844 is among the more plentiful pre-Arrows and Rays Seated quarter issues in high grade, it is still rare in Choice or finer condition. This Plus-designated piece displays a razor-sharp strike and satiny luster. Both sides have a dusting of lavender-blue and champagne color, with the obverse showing additional, mottled olive patina. Eye appeal is quite pleasing. Population: 7 in 64 (2 in 64+), 2 finer. CAC: 5 in 64, 2 finer (2/17). NGC ID# 23ST, PCGS# 5406

15375 1853 Arrows and Rays MS62 PCGS. The present die variety is unlisted by Briggs, but if he had seen it prior to publication of his classic Seated quarter reference, he would surely have included it. A small cud is present on the dentils below the space between the 53 in the date, and both sides display interesting die cracks. Brilliant aside from peach-gold toning. Satiny and well struck. A single-year type.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 23U4, PCGS# 5426

**1854-O Huge O Quarter, VF35
Original Toning**

15376 1854-O Huge O, Briggs 1-A, FS-501, VF35 PCGS. This coin is well-detailed despite high-point wear, and each side displays uniformly mottled olive-gold and russet toning. There are no distracting impairments. This popular *Guide Book* variety is rarely encountered above the VF grade level. Population: 10 in 35, 13 finer (2/17). NGC ID# 23U7, PCGS# 395933 Base PCGS# 5434

**1860-S Quarter, XF Details
Key San Francisco Issue**

15377 1860-S — Cleaning — PCGS Genuine. XF Details. Briggs 1-A. Most examples of the 1860-S are well-worn or impaired in one way or another — a fact confirmed by extremely low population numbers at both PCGS and NGC. This example displays finely granular surfaces indicating a cleaning beneath smooth, dove-gray toning that deepens in sheltered areas of the motifs. Nice XF sharpness remains on both sides. We note some small crescent-shaped marks above the eagle's neck and wings, as well as a few light pinscratches on the reverse that are hidden in the toning. Still quite desirable, a coin that will find a home in an advanced Seated quarter collection.

15378 1867 AU58 PCGS. CAC. On the obverse, the field is sea-green and the left border is golden-brown. The reverse has an autumn-gold field and jade-green margin. Despite a meager mintage of 20,000 pieces, two different reverse dies are known on commercial 1867 quarters. One has a die scratch *within* the banner below IN. The other, the present variety, has a die scratch *through* the banner below IN. NGC ID# 23UD, PCGS# 5470

**1871-CC Quarter, Good Details
Excessively Rare Key**

15379 1871-CC — Cleaning — PCGS Genuine. Good Details. Briggs 1-A. Fewer than 100 examples of the 1871-CC quarter are believed extant. Although 10,890 coins were struck, nearly all were thrust into circulation. Collectors had little interest in mintmarks at the time, and so few examples were saved for numismatic purposes. Only 18 years after the issue was put out, August G. Heaton described the 1871-CC as “excessively rare.” The obverse shows deep steel-gray patina, while the reverse is brighter. Both sides exhibit faint, wispy lines from cleaning, but the date, mintmark, and major design elements are clear.
From The R. Thayer Sheets Yorktown Collection.

15380 1872-CC — Damage — Genuine PCGS. VF Details. Briggs 1-A. Liberty and the eagle display noticeable marks, with the most consequential between the middle arrowhead and the right (facing) wingtip. A nicely defined stone-gray example of this early and difficult Carson City issue.
From The R. Thayer Sheets Yorktown Collection.

1875-CC Quarter, AU58
Rarely Offered in High Grades

15381 1875-CC AU58 PCGS. Briggs 1-A. The date is even, and the second C in the mintmark is clear of the R. Probably no more than 30 or 40 examples of the 1875-CC quarter (140,000 coins struck) survive in mint condition, placing heightened demand on high-end AU representatives like the brilliant and semiprooflike AU58 coin offered in this lot. Minor strike incompleteness is apparent on the right-hand stars and Liberty's head, and clashing occurs near the pole. Minimally marked. Population: 5 in 58, 25 finer (2/17). *From The R. Thayer Sheets Yorktown Collection.* NGC ID# 23UY, PCGS# 5499

1875-S Seated Quarter, MS65
Rare Issue in High Grades

15382 1875-S MS65 PCGS. Briggs 3-C. An impressive Gem example of the Medium Mintmark variety with heavy die cracks throughout the reverse periphery. The die shows sinking at the outer reaches, creating a biplanar surface that results in weakly impressed lettering on the reverse and flatness of several obverse stars. Lovely sea-green, blue, and chestnut-gold toning covers both sides of this scarce San Francisco issue. Population: 7 in 65, 3 finer (2/17). *From The R. Thayer Sheets Yorktown Collection.* NGC ID# 23UZ, PCGS# 5500

15383 1876-CC MS63 Prooflike NGC. Large CC. Type Two Reverse. Frosty devices rise above reflective fields. The lightly abraded surfaces display faint straw-gold toning. A desirable Carson City type coin. NGC has certified only three '76-CC quarters as Prooflike. Census: 1 in 63 Prooflike, 1 finer (2/17). NGC ID# 23V3, PCGS# 85502 Base PCGS# 5502

15384 1877/77-CC Briggs 2-B, FS-301, MS64 NGC. The base of the 7s in the date are widely repunched. Rich orange-red toning embraces the borders of this lustrous and crisply struck near-Gem. Impressively devoid of contact, and a prize for the advanced Seated specialist. *From The Martin Peterson Collection.* PCGS# 395941 Base PCGS# 5505

1878-CC Briggs 1-A Quarter, MS65
Final Carson City Issue

15385 1878-CC MS65 PCGS. Briggs 1-A. The 1878-CC was the final Carson City quarter issue, since the Bland-Allison Act compelled the U.S. Mint to switch production to silver dollars. The '78-CC mintage was less than one-fourth the '76-CC and '77-CC coinage, and high grade survivors are correspondingly scarcer. This thoroughly lustrous Gem displays lightly dappled tan and sea-green toning. Marks are confined to a tick on the cheek and wispy grazes on the field below TRUST. Population: 23 in 65, 14 finer (1/17). NGC ID# 23V9, PCGS# 5509

15386 1884 MS64 NGC. Briggs 1-A. Gold, blue, and violet border toning offers a subdued contrast to the frosted silver brightness of the interiors. Great eye appeal for this later Seated quarter issue, which is scarce in finer grades. Census: 19 in 64, 37 finer (2/17). *Ex: New York Signature (Heritage, 12/2011), lot 3475; ANA Signature (Heritage, 8/2014), lot 7556.* NGC ID# 23VG, PCGS# 5516

15387 1891 MS66 PCGS. Briggs 3-C. Booming cartwheel luster sweeps brilliant and essentially pristine surfaces. A well-struck, high-grade example from the final year of the long-lived Seated type. The fields display moderate clash marks, as produced. Population: 31 in 66 (5 in 66+), 4 finer (2/17). *From The R. Thayer Sheets Yorktown Collection.* NGC ID# 23VR, PCGS# 5524

PROOF SEATED QUARTERS

1857 Quarter, Toned PR63
Fewer Than 100 Survivors Known

15388 1857 PR63 PCGS. Briggs 7-G. The mintage of the 1857 proof quarter was not recorded, although the survival rate is estimated to be fewer than 100 coins, according to PCGS. The scarcity of auction appearances substantiates this assessment. The present coin is boldly struck with deeply reflective fields and bold sea-green and golden-gray toning. Any grade-limiting hairlines are well-hidden by the rich patina. A loupe reveals a few mint-made file lines on Liberty's breasts and left (facing) arm, not fully struck out of the planchet by the dies. Population: 12 in 63 (1 in 63+), 13 finer (2/17). NGC ID# 23WJ, PCGS# 5553

**1882 Seated Quarter, PR66 Cameo
High-Contrast Surfaces**

- 15389** 1882 PR66 Cameo NGC. Briggs 2-B. Deeply mirrored fields are free of all but a few trivial, widely separated delicate lines. The devices are crisply impressed with a fresh, frost-white appearance to earn the well-deserved Cameo designation — this despite being struck from dies that display numerous signs of die rust on Liberty's portrait. We note a Mint-caused, tiny die flaw at O in OF, the sole mark to mention on this mostly brilliant and untoned Premium Gem proof. Housed in a previous generation NGC holder. Census: 8 in 66 Cameo, 13 finer (2/17).
Ex: Philadelphia 2000 Signature (Heritage, 8/2000), lot 5834; FUN Signature (Heritage, 1/2001), lot 6927.
From The Martin Peterson Collection. NGC ID# 23XE, PCGS# 85583

- 15390** 1884 PR66 PCGS. Briggs 2-B. Fire-red toning dominates the obverse of this flashy and fully struck specimen. Additionally, the obverse displays speckles of steel-gray. The reverse is principally sea-green, although lavender and orange also appear. A meager 875 proofs were produced. NGC ID# 3TWH, PCGS# 5585

- 15391** 1885 PR65 Cameo NGC. Briggs 3-B. Beautiful peach-red patina accompanies the peripheries of this well-preserved Gem. The margins also offer glimpses of cobalt-blue toning. The strike is sharp except on the right-side stars, and the frosty eagle and seated Liberty ensure outstanding eye appeal. Census: 17 in 65 Cameo (2 in 65★), 25 finer (2/17).
From The Martin Peterson Collection. NGC ID# 23XH, PCGS# 85586

- 15392** 1887 PR66 Cameo NGC. Briggs 2-B. Ice-white motifs rise in exemplary detail above darkly mirrored fields. An outstanding example of this low mintage date. A small retained lamination (as issued) below star 1 provides the sole imperfection.
From The Martin Peterson Collection. NGC ID# 23XK, PCGS# 85588

**1890 Quarter, PR65 Deep Cameo
Bold Contrast, Pleasing Color**

- 15393** 1890 PR65 Deep Cameo PCGS. Thickly frosted centers are minimally toned with surrounding rings of gold, lavender, and blue. Bold field-motif contrast enhances the tremendous visual quality of this dazzling Gem Deep Cameo proof. The 1890 claims one of the smaller proof mintage in the Seated Liberty series. Only 590 specimens were struck. Population: 13 in 65 (2 in 65+) Deep Cameo, 15 finer (2/17).
From The R. Thayer Sheets Yorktown Collection. NGC ID# 23XN, PCGS# 95591

- 15394** 1891 PR65 Cameo PCGS. Briggs 1-A. Iridescent ocean-blue, violet-red, and peach-gold toning consumes this well struck, flashy, and undisturbed Gem. Inspection beneath a lens fails to locate any relevant imperfections. Only 600 proofs were issued. Population: 15 in 65 Cameo, 21 finer (2/17). NGC ID# 597E, PCGS# 85592

BARBER QUARTERS

- 15395** 1892 MS66 PCGS. Type One Reverse. A sea-green and tan-brown obverse margin frames lilac-red fields and a gunmetal-blue portrait. The reverse displays moderate golden-brown toning with the deeper shades near the rim. Lustrous and well struck with pristine fields and only delicate contact on Liberty's cheek. NGC ID# 23XT, PCGS# 5601

- 15396** 1895 MS65 PCGS. CAC. Vivid shades of lavender-gray and sea-green toning blanket the well-preserved surfaces of this impressive Gem, with most of the color on the obverse. The design elements are sharply detailed and vibrant mint luster shines through the patina. Population: 21 in 65, 18 finer. CAC: 7 in 65, 10 finer (2/17). NGC ID# 23Y4, PCGS# 5610

**1896-S Quarter, VF25
Scarce Collector-Grade Coin**

- 15397** 1896-S VF25 PCGS. CAC. The key-date 1896-S is rarely offered in this mid-to-upper circulated grade level, and CAC-approved coins are rare in any grade. This well-detailed VF example displays original pewter-gray toning with olive and russet patina in the margins. LIBERTY is entirely readable. The 1896-S comes from a mintage of only 188,039 pieces. NGC ID# 23Y9, PCGS# 5615

- 15398** 1897-S XF45 PCGS. CAC. This is a boldly detailed example, at the very least deserving of the XF45 grade. The CAC green label approves of the PCGS designation. Hints of olive-gold toning appear within the faintly glossy steel-gray surfaces. The LIBERTY band is crisp. The 1897-S Barber quarter is a scarcer date, particularly in high grade. NGC ID# 23YC, PCGS# 5618

- 15399** 1901 MS66+ PCGS. CAC. This boldly struck high-grade silver type coin exhibits vibrant cartwheel luster shining through blended olive and rose-gold toning, with an area of deeper ocean-blue along the upper-right reverse border. Population: 15 in 66 (1 in 66+), 2 finer. CAC: 6 in 66, 3 finer (2/17). NGC ID# 23YN, PCGS# 5628

**1901-S Quarter Dollar, VG Details
Series Key Date**

15400 1901-S — Graffiti — PCGS Genuine, VG Details. There are several old pinscratches on the obverse portrait, but these blend into the deep olive-gray patina and are mostly unnoticed by the naked eye. The mintmark is clear, and the LI and TY in LIBERTY are mostly discernible. The 1901-S is the most challenging Barber quarter issue in low grades.

15401 1902-S MS64+ PCGS. A smallish mintage of just over 1.5 million pieces contributes to the scarcity of high-grade 1902-S quarters. This lightly toned, upper-end Choice Uncirculated example would be designated prooflike if not for some cloudy stone-gray toning in the right obverse field. Elsewhere, the coin displays brilliant, mirrorlike fields surrounding lightly frosted motifs. A crisp strike reveals only a few tiny marks. Population: 25 in 64 (1 in 64+), 24 finer (2/17). NGC ID# 23YU, PCGS# 5633

15402 1905-O MS64 PCGS. Here is an impressively well-preserved near-Gem, held from a finer designation only by light marks on Liberty's cheek. The interiors are brilliant, surrounded by beautiful multicolor album toning. The 1905-O is elusive this fine and rare finer. Population: 25 in 64 (1 in 64+), 24 finer (2/17). NGC ID# 23Z3, PCGS# 5640

15403 1905-O MS64 PCGS. Frosty original luster engulfs minimally marked surfaces, and each side of the coin has traces of light golden toning. Trivial strike softness occurs on the eagle's right (facing) wing junction and the fletchings. The 1905-O quarter is scarce in this grade and rare finer. Population: 25 in 64 (1 in 64+), 24 finer (2/17). NGC ID# 23Z3, PCGS# 5640

15404 1906 MS66 PCGS. Dappled chestnut-gold toning embraces the obverse. The reverse exhibits delicate lime-green and tan tints. This lustrous representative has a good strike despite minor merging on the fletchings. Population: 33 in 66 (2 in 66+), 2 finer (2/17). NGC ID# 23Z5, PCGS# 5642

15405 1908-S MS64 PCGS. CAC. It is difficult to imagine a finer 1908-S quarter below the Gem grade level, as this CAC-approved Choice example displays exceptionally smooth and frosty surfaces. Original russet-gold and olive-green toning blankets each side. Finer coins are rare. Population: 20 in 64 (1 in 64+), 22 finer. CAC: 5 in 64, 11 finer (2/17). NGC ID# 23ZF, PCGS# 5652

15406 1913-S VG10 PCGS. This evenly worn tan-gray 1913-S quarter displays a pleasing circulation-cameo appearance with smooth surfaces. The rims are complete, and the LI and Y in LIBERTY are clear, with the T partially visible. An excellent collector-grade example of this key date. NGC ID# 23ZW, PCGS# 5666

**1915-S Quarter, MS66+
Exquisite Visual Impression**

15407 1915-S MS66+ PCGS. Intense mint luster glistens across the silky-smooth surfaces of this high-end Premium Gem 1915-S, while a faint patina of pale-violet and ice-blue hues add a translucent glow of color. A splash of brassy-gold toning at stars 4 to 6 provides an exclamation point to the exquisite visual impression. Only a bit of blending on the eagle's claw and arrow fletchings subtracts from the otherwise full strike. David Lawrence called this San Francisco issue "ticky-tacky" for the unavoidable marks that appear on even high-grade pieces. This coin has a few, but they are exceedingly minor in light of the overwhelming eye appeal. Population: 20 in 66 (3 in 66+), 4 finer (2/17). NGC ID# 2424, PCGS# 5672

15408 1916-D MS66+ PCGS. CAC. Light to medium golden-brown toning adorns the borders of this lustrous representative. The fields are mark-free, and the portrait displays only delicate grazes. 1916 was the final year for Charles Barber's dime and quarter design. He died on February 18, 1917. NGC ID# 2426, PCGS# 5674

PROOF BARBER QUARTERS

15409 1892 PR65 Cameo NGC. Type Two Reverse, as are most first-year proofs. Pastel almond-gold and lavender toning graces the borders of this flashy and fully struck Gem. The eagle and portrait are frosty, and contact is confined to a solitary small tick on Liberty's jaw. Census: 27 in 65 Cameo (1 in 65+), 42 finer (2/17). *From The Martin Peterson Collection.* NGC ID# CEF4, PCGS# 85678

15410 1894 PR66 PCGS. Variegated blue, violet, and gold toning visits the obverse and reverse surfaces of this Premium Gem. An exceptional example with bold design motifs and excellent eye appeal. PCGS has graded 19 examples in PR66, with a single example in PR66+, and 14 finer (2/17). NGC ID# 2429, PCGS# 5680

**1894 Quarter, PR67 Cameo
Boldly Contrasted and Well-Preserved**

15411 1894 PR67 Cameo PCGS. This spectacular Superb Gem proof displays well-detailed design elements with a richly frosted texture that contrasts boldly with the deeply reflective fields. The well-preserved surfaces are enhanced by shades of greenish-gold and cerulean-blue toning. The eye appeal is top-notch. Population: 5 in 67 (1 in 67+) Cameo, 0 finer (5/16). *Ex: ANA Signature (Heritage, 8/2014), lot 3623; PNG New York Signature (Heritage, 10/2014), lot 4730; Long Beach Signature (Heritage, 6/2016), lot 4459.* NGC ID# 2429, PCGS# 85680

15412 1896 PR66 PCGS. Navy-blue, olive-green, butter-gold, and lavender toning encompasses this sharply struck specimen, although the coin must be viewed in person to fully appreciate the patina. It is flawless aside from a solitary delicate hairline on Liberty's jaw. Population: 25 in 66 (1 in 66+), 22 finer (2/17). NGC ID# 23Y7, PCGS# 5682

15413 1904 PR66 PCGS. Due to the extreme rarity of Cameos in high grade, the 1904 proof Barber quarter is most heavily collected in high-end non-Cameo grades. This toned Premium Gem features lavender, gold, and gunmetal-blue toning over unmarked surfaces. The strike is full. Population: 35 in 66 (1 in 66+), 14 finer (2/17). NGC ID# 242K, PCGS# 5690

15414 1906 PR65 PCGS. Splashes of apple-green and tan-brown toning enrich the borders of this fully struck Gem. The devices exhibit noticeable frost, though the coin is undesignated as Cameo. A mere 675 proofs were issued.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 242M, PCGS# 5692

15415 1914 PR66 PCGS. CAC. Rich steel-blue, gold, and iridescent toning slightly subdues the fully mirrored surfaces of this Premium Gem. A sharply defined example for an advanced Registry set. Population: 22 in 66, 19 finer. CAC: 6 in 66, 11 finer (2/17). NGC ID# 242W, PCGS# 5700

STANDING LIBERTY QUARTERS

15416 1917-D Type One MS66 Full Head PCGS. CAC. A well-struck, lustrous Premium Gem example of this Denver Type One issue, showing original russet and golden toning that deepens toward the borders. A small tick below Liberty's neck is the only mentionable flaw. PCGS has seen 28 finer Full Head submissions (2/17). NGC ID# 2432, PCGS# 5709

15417 1917-D Type One MS66 Full Head NGC. CAC. Ex: Rev. Dr. James G. K. McClure. Dusky original toning casts this Premium Gem Full Head Type One quarter in shades of autumn-gold, pale olive, and champagne, while frosty underlying luster illuminates the eye appeal. The 1917-D Type One is not seen sharply struck nearly as often as its Philadelphia counterpart, and this piece shows some modest weakness on the shield, central figure, and leading edge of the eagle's left (facing) wing. A small tick on Liberty's breast is the only mentionable abrasion. Few finer coins are certified.

Long Beach Signature (Heritage, 6/2016), lot 3771. NGC ID# 2432, PCGS# 5709

15418 1917-S Type One MS65 Full Head PCGS. This is a sharp, nearly brilliant Gem Full Head example of the Type One San Francisco issue. There are no major abrasions, and the devices are well brought up. The obverse die shows fine rust throughout, save for in areas of the fields and the recesses of Liberty's gown where die lapping has occurred.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 2433, PCGS# 5711

15419 1919 MS67 PCGS. The 1919 quarter is occasionally seen in MS67, but this only makes such pieces even more popular with collectors due to the extreme rarity of most other pre-1925 dates in this grade. The present coin is remarkably sharp, including 95% head detail. The shield rivets, date numerals, stars, and eagle feathers are bold. The frosty, brilliant surfaces lack a single distraction. Population: 30 in 67 (1 in 67+), 3 finer (2/17). NGC ID# 243B, PCGS# 5728

1919-D Quarter, Lightly Toned MS65

15420 1919-D MS65 PCGS. Warm golden toning graces satiny Gem surfaces on this semikey Standing Liberty quarter. The shield rivets show above-average definition, although Liberty's head is predictably weak, and the date numerals lack full roundness. The eagle is well-defined. There are no distracting abrasions. Population: 54 in 65 (1 in 65+), 33 finer (2/17).

From The R. Thayer Sheets Yorktown Collection. NGC ID# 243C, PCGS# 5730

15421 1920 MS65 Full Head PCGS. A boldly struck, golden-toned Gem with razor-sharp head detail, this well-preserved 1920 Standing Liberty quarter is an ideal choice for the quality-conscious collector assembling an MS65 Full Head set. The date is flat but clear. PCGS has seen 50 finer Full Head coins (3/17). NGC ID# 243E, PCGS# 5735

1920-D Quarter Dollar, MS66 Above-Average Strike

15422 1920-D MS66 PCGS. CAC. The 1920-D is a challenging issue in high grade, even without a Full Head designation. This Premium Gem CAC coin displays bold date numerals and shield rivets, but the strike is weak on Liberty's ear and on the right-hand reverse stars. Lovely champagne toning graces frosty luster on each side, and there are no distracting abrasions. Finer examples of this underappreciated date are rare. Population: 37 in 66 (1 in 66+), 3 finer. CAC: 8 in 66, 1 finer (2/17). NGC ID# 243F, PCGS# 5736

15423 1921 MS62 PCGS. Limited in grade mostly by slide marks over the high points of the devices, this semikey Standing Liberty quarter shows satiny luster with glimpses of light golden toning throughout. The date is flat, as usual, but clear. Liberty's head shows the usual weakness at the temple, but the shield rivets are well-defined.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 243H, PCGS# 5740

15424 1921 MS64 PCGS. A very typically struck example of the 1921 quarter, showing a sharp shield and eagle but combined with a flat date and an incomplete temple on Liberty's head. Nonetheless, there are no major abrasions, and the lightly toned surfaces are pleasing for the grade. Mainly champagne hues include some lavender and steel-green color.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 243H, PCGS# 5740

15425 1921 MS64 NGC. CAC. Ex: Rev. Dr. James G. K. McClure. The 1921 is a key date, and few Mint State pieces are CAC-endorsed. This coin displays brilliant, vibrant luster and impressively well-preserved surfaces for the grade — faint slide marks on the high points of Liberty's figure appear to be all that limit the NGC assessment. The shield and eagle are characteristically sharp, while Liberty's temple and the date show expected weakness. CAC: 18 in 64, 19 finer (4/16).
Ex: *Long Beach Signature* (Heritage, 6/2016), lot 3789. NGC ID# 243H, PCGS# 5740

15426 1923-S XF40 PCGS. CAC. This lightly circulated 1923-S quarter displays pleasing gray patina with no major abrasions. The date is frequently weak on this semikey issue, but the present coin shows clear numerals. The CAC endorsement adds to the appeal. An excellent choice for the budget-restricted date and mintmark collector. NGC ID# 243K, PCGS# 5744

1923-S Quarter, MS66 Elusive Branch Mint Key

15427 1923-S MS66 PCGS. CAC. This lustrous Premium Gem example displays above-average sharpness on the shield and eagle's feathers, although Liberty's head is a little too soft at the temple to warrant a Full Head designation. The obverse shows tinges of apricot-gold toning over pale champagne surfaces, while the reverse is largely the former color. A few minute ticks are evident upon close examination, but nothing is out of line for the grade. Population: 35 in 66 (1 in 66+), 7 finer. CAC: 15 in 66, 2 finer (2/17). NGC ID# 243K, PCGS# 5744

1924-S Quarter, MS65 Full Head Scarce in This Grade

15428 1924-S MS65 Full Head NGC. The usual satin luster and light golden toning characterize each side of this Gem 1924-S Standing Liberty quarter. Liberty's head detail is sharp at the temple and grows gradually weaker toward the earhole. Clash marks and die polishing lines appear in the fields and recesses of the gown. The date is sharp. This issue is scarce at the Gem Full Head level and exceedingly so any finer. Census: 35 in 65 (1 in 65+) Full Head, 7 finer (2/17). NGC ID# 243N, PCGS# 5751

15429 1925 MS66 Full Head NGC. A lustrous and splendidly smooth peach-gold and ice-blue Premium Gem. Despite its high mintage, the 1925 is conditionally rare in the present quality. Census: 39 in 66 (3 in 66+) Full Head, 13 finer (1/17). NGC ID# 243P, PCGS# 5753

15430 1926-S MS64 PCGS. The 1926-S is a better date in high grade, but this Choice example remains accessible for many collectors. The strike is typical of the issue — weak on the head, shield rivets, and eagle. Both sides display gold, russet, and lavender-gray toning to mask any minor, grade-consistent abrasions. NGC ID# 4462, PCGS# 5758

15431 1926-S MS64 PCGS. CAC. The 1926-S is a slightly better date in Mint State. This Choice CAC-endorsed example displays satiny luster with lemon-gold toning. Die polishing lines and erosion-induced metal flowlines in the obverse fields and recesses accompany slightly incomplete head and shield detail, as usual. NGC ID# 4462, PCGS# 5758

1926-S Quarter, Toned MS65 Better Date in High Grade

15432 1926-S MS65 PCGS. A satiny Gem that shows nearly full head detail, this 1926-S Standing Liberty quarter displays light golden and lavender toning across the interiors with deeper amber and olive hues at the borders. A few tiny marks are not out of line for the grade. Finer 1926-S quarters are rarely offered. Population: 73 in 65 (2 in 65+), 22 finer (2/17). NGC ID# 4462, PCGS# 5758

15433 1927 MS66 Full Head PCGS. This spectacular Premium Gem exhibits Full Head definition, with just a touch of softness on some of the shield rivets. A few hints of pale gold and powder-blue toning visit the well-preserved lustrous surfaces. Population: 67 in 66 (8 in 66+) Full Head, 7 finer (2/17). NGC ID# 243U, PCGS# 5761

15434 1927-D MS65 Full Head NGC. Light golden toning and satiny luster appear on each side of this Gem Full Head 1927-D quarter, an underrated issue in such condition. The shield rivets and Liberty's toes nonetheless exhibit the usual weakness of strike. No major abrasions distract. Census: 49 in 65 (1 in 65+) Full Head, 12 finer (2/17). NGC ID# 243V, PCGS# 5763

1929-D Quarter, MS65 Full Head Frosty Original Luster

15435 1929-D MS65 Full Head NGC. This final-issue Denver quarter dollar is surprisingly difficult to locate with full head detail and in Gem condition, and it is exceedingly rare finer. This piece has scintillating mint luster and is strongly defined in all areas, not just on Liberty's head — the shield rivets, toes, and eagle feathers are also well-defined. Mostly brilliant, close examination reveals a hint of pale golden color on each side. Census: 21 in 65 (1 in 65+) Full Head, 10 finer (2/17).

Ex: *FUN Signature* (Heritage, 1/2004), lot 6283. NGC ID# 2443, PCGS# 5775

15436 1929-S MS66+ Full Head PCGS. CAC. Caramel-gold and lime-green shades enrich this lustrous and nearly unabraded silver type coin. The strike is sharp except on the two shield rivets near the waist. As of (2/17), PCGS has certified only 13 pieces as MS66+ Full Head, and just 17 examples finer. NGC ID# 2444, PCGS# 5777

WASHINGTON QUARTERS

- 15437 1932-D MS63 PCGS.** An impressive Select example of this low-mintage, first-year key, with sharply detailed design elements and lightly marked, brilliant surfaces that radiate vibrant mint luster from both sides. The overall presentation is most attractive. NGC ID# 2448, PCGS# 5791
- 15438 1932-D MS64 PCGS.** Delicate straw-gold and ice-blue toning accompanies this lustrous and lightly abraded near-Gem. The '32-D is regarded as the rarest business issue of the series, due to a low mintage and the economic necessity of spending examples during the Great Depression.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 2448, PCGS# 5791
- 15439 1932-D MS64 PCGS.** Occasional daubs of navy-blue and russet toning accent the satiny silver surfaces of this Choice 1932-D Washington quarter. The strike is bold, and grade-limiting abrasions are at a minimum. A suitable, quality Mint State example of this important key issue. NGC ID# 2448, PCGS# 5791
- 15440 1932-D MS64 PCGS. CAC.** Satiny luster shows original dusky-gold toning overall, with deeper amber hues along the upper obverse border. The strike is sharp, and only a few small ticks on Washington's cheek limit the grade. NGC ID# 2448, PCGS# 5791
- 15441 1932-D MS64 PCGS. CAC.** This is a sharp example of the Denver key, showing satiny luster and light golden toning with wisps of iridescence. There are only a few minor abrasions. Finer 1932-D Washington quarters are scarce and at a price point that is out of reach for average collector. NGC ID# 2448, PCGS# 5791
- 15442 1934-D Medium Motto MS66 PCGS.** Amazing lavender and gold patina covers the entirety of this marvelous Premium Gem quarter. The only visible imperfection is a reeding mark on the eagle's breast. Each side is carefully preserved and satiny. There are merely eight finer submissions at PCGS (2/17). NGC ID# 244C, PCGS# 5796
- 15443 1934-D Heavy Motto MS66+ PCGS. CAC.** Heavy Motto coins are scarce in Premium Gem condition and rare finer. This Plus-graded CAC coin displays a bold strike and frosty, delicately toned champagne luster. Close study of the surfaces fails to reveal distracting abrasions. Population: 63 in 66 (16 in 66+), 3 finer. CAC: 11 in 66, 2 finer (2/17). NGC ID# 244C, PCGS# 85796
- 15444 1936-D MS66 PCGS. CAC.** An attractively toned Premium Gem with shades of pine-green, orange, violet, and champagne spread over each side in a mottled pattern. The strike is sharp, and the preservation is excellent. PCGS has seen only 21 Superb Gems finer (2/17). NGC ID# 244H, PCGS# 5801
- 15445 1937-S MS67 PCGS.** The 1937-S is scarce in MS67 and unknown numerically finer. This PCGS example displays a bold strike and beautifully preserved satin luster. Gold and russet border toning frames pale champagne interiors. Population: 43 in 67 (3 in 67+), 0 finer (2/17). NGC ID# 244M, PCGS# 5805

1939-S Quarter, MS67+ CAC Minor Doubled Die Obverse

- 15446 1939-S Doubled Die Obverse, FS-101, MS67+ PCGS. CAC.** 30th Anniversary Green Label Holder. FS-101 is a minor doubled die obverse variety, showing a spread most plainly on the date but also on IN GOD WE TRUST. This remarkable MS67+ example is tied for the finest of the variety and the date both, and the CAC green label heightens its appeal to Registry collectors. The strike is sharp, and the satiny surfaces show no distracting abrasions. Ice-blue interiors cede to gold and crimson border toning. Population (all varieties included): 69 in 67 (6 in 67+), 0 finer. CAC: 33 in 67, 0 finer (2/17). NGC ID# 244T, PCGS# 145020 Base PCGS# 5810

1940-S Quarter, MS67+ Speckled Iridescent Patina

- 15447 1940-S MS67+ PCGS. CAC.** The obverse of this Registry-quality 1940-S quarter has the look of a Jackson Pollock painting, with speckled multicolor iridescence around the borders. The other side is mostly brilliant with a few wisps of golden color. An interesting, spearlike die crack travels through the eagle's head. This frosty Superb Gem is fully struck and nearly flawless. Population: 94 in 67 (10 in 67+), 1 finer. CAC: 41 in 67, 0 finer (2/17). NGC ID# 3TEK, PCGS# 5813
- 15448 1942-D MS67+ PCGS.** Despite a production approaching 17.5 million coins, the 1942-D is very scarce in MS67. Plus-designated Superb Gems are exceedingly rare. We have yet to offer a numerically finer PCGS example, although that service reports two finer submissions (2/17). This crisp MS67+ coin features delicate rainbow border toning and satiny, light golden centers. Die cracks travel across both sides. NGC ID# 2453, PCGS# 5818
- 15449 1943-S Doubled Die Obverse, FS-101, MS65 PCGS.** 30th Anniversary Green Label Holder. Although GOD and TRUST exhibit the widest spread, all obverse legends are nicely die doubled. A lustrous, crisply struck, well preserved, and minimally toned Gem of the popular *Guide Book* variety. NGC ID# 2457, PCGS# 145154 Base PCGS# 5823
- 15450 1950-S/D FS-601 MS66 PCGS. CAC.** The upright and right curve of the underlying Denver mintmark is obvious beneath a loupe. This lustrous and crisply struck Premium Gem displays a narrow arc of autumn-brown and blue-green toning along the right obverse margin. The left obverse field shows a faint fingerprint fragment. Population: 57 in 66 (11 in 66+), 6 finer. CAC: 18 in 66, 2 finer (2/17). NGC ID# 245V, PCGS# 145639 Base PCGS# 5845

15451 1952-D MS67 ★ NGC. Intense shades of burnt-orange, sea-green, and magenta toning blanket the impeccably preserved surfaces of this delightful Superb Gem, with sharply detailed design elements and vibrant mint luster underneath. The outstanding eye appeal is confirmed by the Star designation. Census: 34 in 67 (3 in 67★), 1 finer (2/17). NGC ID# 2462, PCGS# 5850

**1961 Quarter, Multicolor MS67
Tied for Finest Certified**

15452 1961 MS67 PCGS. 30th Anniversary Green Label Holder. High-grade 1961 Washington quarters are occasionally seen with beautiful multicolor toning, and this Superb Gem does not disappoint. The obverse is concentrically toned and the reverse mottled. Sharp design elements and satiny fields show no distracting abrasions. The 1961 is rare this fine and unknown finer, making this example an important Registry Set acquisition. Population: 12 in 67, 0 finer (2/17). NGC ID# 246M, PCGS# 5870

15453 1964-D MS67+ PCGS. Fewer than a dozen Superb Gem 1964-D quarters are Plus-designated at PCGS and none are finer (2/17). This beautiful rainbow-toned Registry coin showcases delightful color overall all of both sides, with sharp design elements and luminous, frosty luster. Population: 67 in 67 (11 in 67+), 0 finer (2/17). NGC ID# 246V, PCGS# 5877

PROOF WASHINGTON QUARTERS

15454 1939 PR67+ PCGS. CAC. A fully struck, high-end proof with original champagne toning that yields bits of russet and amber near the borders. The fields are deeply reflective, and the eye appeal is pleasing. PCGS reports only five finer examples (3/17). NGC ID# 27HS, PCGS# 5978

15455 1950 PR67 Cameo PCGS. This spectacular Superb Gem displays sharply detailed design elements with a thick coat of mint frost that contrasts boldly with the deeply mirrored fields. The brilliant surfaces are impeccably preserved. Population: 24 in 67 Cameo, 8 finer (2/17). NGC ID# 27VA, PCGS# 85982

15456 1968-S PR69 Deep Cameo PCGS. A conditionally rare example of the 1968-S proof quarter, tied for the finest Deep Cameo certified and essential for a Registry Set collector. Fully struck, frosty design elements and watery fields enjoy warm champagne toning on each side. Population: 35 in 69 Deep Cameo, 0 finer (2/17). NGC ID# 2495, PCGS# 96000

15457 1968-S PR69 Deep Cameo PCGS. This immaculate early clad quarter is deeply contrasted and free of mentionable distractions, one of a small number to achieve this ultimate grade at PCGS. A Registry Set essential. Population: 35 in 69 Deep Cameo, 0 finer (2/17). NGC ID# 2495, PCGS# 96000

PROOF STATEHOOD QUARTERS

15458 Five-Piece 1999-S Silver Statehood Quarter Set PR70 Deep Cameo PCGS. The separately encapsulated but identically graded quintet includes the Connecticut, Delaware, Georgia, New Jersey, and Pennsylvania issues. An unimprovable grouping of the first-year silver statehood varieties. (Total: 5 coins)

EARLY HALF DOLLARS

15459 1795 2 Leaves, O-102, T-26, R.4 — Repaired — PCGS Genuine. VF Details. Tompkins Die State 1/1. The repair indicated on the holder is an attempt to fill an old piercing at the reverse edge near OF. The surfaces of this otherwise pleasing Flowing Hair half display natural, old-silver color and sharp definition for the VF level. As always on the O-102, feather detail on the eagle shows premature wear due to low rims, and the obverse is about five points finer as a result. Numerous small marks are scattered across both sides. *From The R. Thayer Sheets Yorktown Collection.*

15460 1795 2 Leaves, O-107a, T-31, R.5, VG8 PCGS. A heavy reverse die crack between 2 and 8 o'clock is the most noteworthy feature of this deep gunmetal-gray early half dollar. Liberty's profile is complete, and her hair shows inner detail, though most right-side stars are well-worn. NGC ID# 24E7, PCGS# 39224 Base PCGS# 6052

**1795/1795 3 Leaves Flowing Hair Half, Fine 12
O-111, Date Dramatically Doubled**

15461 1795/1795 3 Leaves, O-111, T-19, High R.4, Fine 12 NGC. Ex: Hilt Collection. While every aspect of the O-111 variety is interesting to examine, it is hard to choose which feature is more dramatic and desirable. This is the only Flowing Hair half with three leaves under each wing, making it unique as a variety and the sole choice for completeness of the type. The date is broadly doubled to the south (a characteristic shared with the Overton-112 variety), to the extent that parts of the figures reach into the dentils. Finally, the reverse is severely cracked with a heavy die break through the eagle's body, across the left wing, and to the milling near the S in STATES. Sinking of the die allows the lower portion of the reverse to show little wear in comparison to the rest of the coin regardless of grade. This example shows smooth wear over silver-gray surfaces. The rims are full. Unquestionably one of the most desired types in all of numismatics, the O-111 is a necessity for many collectors and its value normally exceeds both its numeric grade and its perceived availability. NGC ID# 24E7, PCGS# 39245 Base PCGS# 6053

15462 1803 Small 3, Large Reverse Stars, O-104, T-4, R.3, VF30 PCGS. CAC. The scarce Overton-104 is the only Small 3 Bust die marriage. The present evenly circulated CAC-endorsed representative has cream-gray high points and gunmetal fields. One thin mark noted near the T in UNITED. NGC ID# 24EF, PCGS# 39274 Base PCGS# 6067

15463 1805 O-112, T-2, R.2 — Cleaned — ANACS. AU50 Details. The surfaces have retoned somewhat from the cleaning, with apricot and violet most prominent around the margins. The coin is nicely struck with light high-point wear and scattered hairlines. Eye appeal surpasses expectations for a Details-graded Draped Bust half dollar. *Ex: Denver Signature (Heritage, 8/2006), lot 3268.*

15464 1806 Pointed 6, No Stem, O-109, T-15, R.1 — Cleaning — Genuine PCGS. AU Details. Overton-109 receives its own *Guide Book* listing, as the sole Pointed 6, No Stem die marriage. This stone-gray representative displays slight wear on Liberty's shoulder and forehead. The surfaces are subdued but virtually without marks. The reverse exhibits a few narrow, minor streaks of struck-in grease.

15465 1806 6 Over Inverted 6, O-111, T-11, R.3, VF30 PCGS. Reverse rim cud has not yet developed on this early die state. The chief feature of O-111 is the 6 Over Inverted 6 obverse, which commands a modest premium over other varieties of this date. Deep gunmetal-gray and olive-gold toning blankets each side of this well-detailed VF example, while some strike weakness is seen on the front of Liberty's bust and on the eagle's right (facing) wing. *From The R. Thayer Sheets Yorktown Collection.* NGC ID# 24EL, PCGS# 39336 Base PCGS# 6078

**1806 O-111a Half Dollar, XF40
Scarce 6 Over Inverted 6 Variety**

15466 1806 6 Over Inverted 6, O-111a, T-11, R.4, XF40 NGC. The popular blundered date variety commands a significant premium. The inverted digit is readily observed above the loop of the 6, and west of its base. The scarce intermediate die state with a cud over the E in UNITED, but without a second cud above UN. A richly toned example bathed in russet-brown, steel-gray, and lavender shades. Both sides are refreshingly unmarked, though a hint of struck-in grease is noted near the arrow shafts. NGC ID# 24EL, PCGS# 39337 Base PCGS# 6078

BUST HALF DOLLARS

**1807 50 Over 20 Capped Bust Half Dollar, VF20
O-111a, Famous Bearded Goddess Die Crack**

15467 1807 Capped Bust, Large Stars, 50 Over 20, O-111a, R.5, VF20 PCGS. PCGS has certified the coin solely as the Large Stars, 50/20 variety, which is technically correct, but it ignores the all-important slender die break from Liberty's chin to the chest. All legends are clear on this circulated example. A glossy, deep olive-gold representative of the famous early Capped Bust variety, listed in the *Guide Book* at a whopping premium. *Ex: FUN Signature (Heritage, 1/2008), lot 8590; ANA Signature (Heritage, 8/2010), lot 4832.* NGC ID# 357A, PCGS# 39355 Base PCGS# 39357

**1807 Capped Bust Half, AU55
Interesting 50 Over 20 Blunder, O-112**

15468 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU55 PCGS. CAC. A charming first-year Capped Bust half with the engraving blunder 50 over 20. The diemaker began to enter the denomination as 25C before realizing the mistake. A similar 25 over 50C error occurs on 1822 and 1828 quarters. This example is tan-gray with gunmetal toning over the high points of the devices. Satiny luster shimmers from the protected areas. Impressively unabraded despite its light circulation. NGC ID# 24EN, PCGS# 39356 Base PCGS# 6086

**1808 O-102a Half Dollar, AU58
Luster Remains in the Fields**

15469 1808 O-102a, R.2, AU58 PCGS. This coin is in the late die state, showing heavy metal flowlines in the fields and a bisecting die crack on the obverse from the 0 in the date to the rim above Liberty's cap. The central devices are well-defined, showing light high-point friction. Both sides display olive-green and golden-gray toning. NGC ID# 24EP, PCGS# 39363 Base PCGS# 6090

**1810 Half Dollar, AU58
Golden-Gray Patina, O-106a**

15470 1810 O-106a, R.3, AU58 PCGS. A long die line runs from the right shield corner parallel to the slope of the wing and ends about halfway before the wingtip. Intermittent weakness along the obverse rim results in flattening of the rim, dentils, and stars — visible especially at the back of the cap and at stars 8 and 9 — to confirm the O-106a variety. Nearly full luster remains on this solid AU58 example, with pleasing champagne-gold toning and occasional bluish-gold accents. A few light marks are grade-appropriate and minor in scope. NGC ID# 24ET, PCGS# 39413 Base PCGS# 6095

15471 1811/10 O-101, R.1, AU55 NGC. The die dot between the 8 and 1 in the date, with the visible undertype of the last two digits, confirms the O-101 variety. This attractive Choice AU specimen is well-detailed and lightly worn, with bright mint luster and highlights of lavender-gray, greenish-gold, and amber toning. Some interesting clash marks show on both sides. Census (for O-101): 6 in 55, 10 finer (2/17). NGC ID# 24EV, PCGS# 39421 Base PCGS# 6099

15472 1812 Large 8, O-103, R.1, MS61 PCGS. Vertical die lines above the eagle's left (facing) shoulder are diagnostic for Overton-103. The present satiny example displays dusky olive-gold and cream-gray toning. Devoid of marks except for small bright areas below the beak and right scroll end. NGC ID# 24EW, PCGS# 39446 Base PCGS# 6100

15473 1814 O-103, R.1, AU58 PCGS. The thick vertical die line from the left scroll end down to the wing is diagnostic for Overton-103. Golden-brown and sea-green margins frame stone-gray fields and motifs. Clash marks are prominent, but abrasions are absent. Luster illuminates the borders. NGC ID# 24F3, PCGS# 39477 Base PCGS# 6105

1818 O-109a Half Dollar, Smooth MS63 Delicate Toning Around the Peripheries

15474 1818 O-109a, R.1, MS63 NGC. The 1s in the date are higher than the adjacent 8s, and the N in UNITED is higher than the U and I beside. This is a late die state example with bold clashing on both sides and a die crack through TED STATES. Scintillating luster shines from this Select Uncirculated half dollar. The centers are mainly brilliant with pale lilac, gold, and ice-blue accents around the peripheries. The obverse is boldly struck, while the wing tips and olive leaves display a hint of softness. Exemplary eye appeal and remarkably smooth for the grade. Census (all 1818 die pairs): 18 in 63, 28 finer (2/17). NGC ID# 24F9, PCGS# 39526 Base PCGS# 6113

15475 1819 O-112, R.3, AU58 PCGS Secure. A hint of almond-gold toning touches the rims, yet this near-Mint 1819 half is nearly entirely brilliant and highly lustrous with only minor signs of circulation on the frosted surfaces. The strike retains pinpoint detail. T and E in STATES are joined at the top (but not at the bottom) to confirm the moderately scarce O-112 variety. As often seen with AU58 Bust halves, the eye appeal exceeds that of many technically Uncirculated coins. NGC ID# 4FXD, PCGS# 39550 Base PCGS# 6117

15476 1821 O-103, R.2, AU58 NGC. Orange-red and navy-blue endow the margins of this partly lustrous Bust half. Well struck and exceptionally free from marks. The reverse die was made using defective A and E punches. The As lack a right foot, and the Es have no left-side serifs. These defects are diagnostic of Overton-103. In a former generation holder.

From The Martin Peterson Collection. NGC ID# 24FF, PCGS# 39578 Base PCGS# 6128

1821 Bust Half, MS64 Scarce O-107 Variety

15477 1821 O-107, R.3, MS64 NGC. The position of star 7 is higher in the field than any other 1821 variety and points to the front edge of the cap rather than to the headband. A challenging variety, the O-107 is by far the scarcest of the 1821 die pairs. This example displays sharp stars and rich, charcoal-gray toning at the borders with reddish-gold interior toning. Slight high point blending on the upper cap folds and drapery is noted, yet the strike is otherwise bold. Only a few scattered light abrasions exist on this pleasing and softly lustrous near-Gem. NGC ID# 24FF, PCGS# 39586 Base PCGS# 6128

15478 1824 O-113, R.1, MS62 PCGS. The prime Overton-113 die state with a horizontal line inside the 2 in the date, unmentioned by Overton. The so-called "worm" die break is present above the eagle's left (facing) shoulder. A satiny example draped in peripheral sea-green, chestnut-gold, and lavender shades. NGC ID# 24FK, PCGS# 39634 Base PCGS# 6137

15479 1826 O-104a, R.3, MS62 PCGS. This late die state variety shows peripheral cracks along the lower right reverse border. The present coin is unworn and shows bold definition of both the stars and central devices. Softly frosted luster displays green-gold and champagne-gray toning over minimally marked surfaces. NGC ID# 24FM, PCGS# 39671 Base PCGS# 6143

1827 Half Dollar, Brilliant MS64 Square Base 2, O-120a

15480 1827 Square Base 2, O-120a, R.3, MS64 PCGS. Both O-120 and O-149 share a common obverse with die lines below the bust left of the date. This variety features a reverse without the bases of AT in STATES joined. Cracks travel through the tops of UNITED STATES. The central design elements exhibit pinpoint definition, but the strike softens around the rims. Each side is lustrous and brilliant, showcasing traces of translucent gunmetal patina near the reverse legends. Rare any finer. NGC ID# 24FN, PCGS# 39718 Base PCGS# 6144

1827 O-132 Half Dollar, MS63
Square Base 2

15481 1827 Square Base 2, O-132, R.3, MS63 PCGS Secure. Ex: Link. Although 49 die marriages are known for the 1827, O-132 is attributed easily, if the specialist knows where to look. The C in 50 C has a recut serif, and a vertical die line is present northwest of the I in LIBERTY. These pick-up points are courtesy of Dr. Glenn Peterson's invaluable reference to the series. This lightly toned example shows an arc of tan-brown toning on the left obverse field. No marks are of any consequence, and luster dominates the margins and motifs. NGC ID# 24FN, PCGS# 39731 Base PCGS# 6144

15482 1827 Curl Base 2, O-146, R.2, MS62 PCGS. The 1827 has 49 die marriages, more than any other date of the Lettered Edge Capped Bust series. But among those 49 varieties, only two exhibit a Curl Base 2. They are O-146 and the very scarce O-147. This nearly white O-146 example offers sweeping luster, a good strike, and an unmarked appearance.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 24FN, PCGS# 39749 Base PCGS# 6145

1827 O-146 Half Dollar, MS62
Curl Base 2, Challenging Guide Book Type

15483 1827 Curl Base 2, O-146, R.2, MS62 PCGS. Only two varieties have the Curl Base 2 among 49 die pairs identified for the 1827 halves — the O-146 and O-147. This sharp and lustrous O-146 example displays satin-smooth surfaces and sharply struck devices. The stars, scroll, and eagle's talons are crisply struck (not always the case for the die pair), while a few areas of deep, bluish-gray toning prevail among the reverse legend. The overall toning is luminescent champagne-gold with ivory highlights. Population (Curl Base 2 varieties): 6 in 62, 10 finer (2/17). NGC ID# 24FN, PCGS# 39749 Base PCGS# 6145

1827 O-146 Half Dollar, Lustrous MS63
Curl Base 2, Elusive Type for the Year

15484 1827 Curl Base 2, O-146, R.2, MS63 PCGS. A whopping 49 varieties exist for the 1827 Bust halves (not counting sub-varieties by die state), yet only two varieties exist with the Curl Base 2. Each is of great interest to collectors of the series. This O-146 example displays a faint vertical line through the horizontal shield lines far above gule 6, while the second A of AMERICA nearly touches the top arrowhead. The coin is sharply struck with some nominal incompleteness on the left-hand star centers, but crisply defined across the central motifs. Pleasing grayish-gold toning deepens around the raised devices with strong mint luster beneath the frosty surfaces. This Select half dollar ranks near the low end of the Condition Census for the variety. NGC ID# 24FN, PCGS# 39749 Base PCGS# 6145

1828 O-116 Half Dollar, MS64
Square Base 2, Small 8s, Large Letters

15485 1828 Square Base 2, Small 8s, Large Letters, O-116, R.2, MS64 PCGS. Diagnostic parallel die defect lines are visible left of the date on this O-116 example, from an obverse die that was used earlier for O-115. The surfaces are otherwise essentially mark-free on this Choice Mint State 1828 half dollar. The fields and devices display smooth, satin luster and sharp central details with slight peripheral weakness, especially through the stars that are mostly flat. Both sides are richly toned in violet-gray shades mixed with splashes of attractive blue, burnt-orange, and gold toning. NGC ID# 24FR, PCGS# 39770 Base PCGS# 6151

15486 1830 Small O, O-116, R.2, MS63 PCGS. Rich dove-gray and autumn-brown patina encompasses this satiny and nicely struck Select Bust half. The surfaces are minimally marked for the grade. This piece represents a late die state with the stars drawn to the rim. NGC ID# 24FU, PCGS# 39827 Base PCGS# 6156

15487 1831 O-110, R.2, MS63 PCGS. Orange-gold, navy-blue, and violet-red toning graces the borders of this lustrous and well-preserved Select Bust half dollar. The strike shows occasional softness on the stars and the URI in PLURIBUS.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 24FV, PCGS# 39846 Base PCGS# 6159

15488 1831 O-119, R.3, MS63 PCGS. Lovely autumn-brown and navy-blue toning grace the borders of this lustrous and lightly marked half dollar. The centers are well struck, though the letters PLUR are incomplete, since they were struck in opposition with Liberty's bust tip.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 24FV, PCGS# 39856 Base PCGS# 6159

15489 1832 Small Letters, O-111, R.1, MS62 PCGS. Vibrant luster sweeps this unmarked and virtually brilliant Bust type coin. The URI in PLURIBUS is soft, but a majority of the design is well struck. Liberty's profile is lightly strike doubled.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 9KXV, PCGS# 39869 Base PCGS# 6160

**1834 O-109 Half Dollar, MS64
Small Date and Small Letters**

15490 1834 Small Date, Small Letters, O-109, R.1, MS64 PCGS. CAC. This beautifully toned Choice Uncirculated half dollar displays aquamarine borders and chestnut-gold centers. The coruscating surfaces are unabraded aside from a hair-thin horizontal line beneath 50 C. on the reverse exergue. A couple of the stars are softly impressed, but most of the design is pinpoint sharp. Just outside the Condition Census for the die pairing. Population: 76 in 64 (4 in 64+), 13 finer. CAC: 17 in 64, 11 finer (2/17). NGC ID# 24FY, PCGS# 39913 Base PCGS# 6166

15491 1834 Small Date, Small Letters, O-112, R.3, MS62 PCGS Secure. Ex: Link. Several shield lines extend into the horizontal lines above, and the letters TATE of STATES have an unusual up-and-down configuration with the A too high, the second T about level with A, and the E once again too high. On the obverse, Liberty's upper lip shows a disparaging curl, a smirk of sorts. The strike is sharp in most areas, but less so on the scroll and Liberty's top-most cap folds. Attractive golden-gray toning with blue overtones covers both sides of this glossy and appealing half. Few marks of any kind are visible even with a lens. NGC ID# 8S2S, PCGS# 39916 Base PCGS# 6166

15492 1835 O-101, R.1, MS62 NGC. This is a well-struck Mint State example of this plentiful Bust half dollar issue, showing satiny luster that takes on lavender and cobalt-blue rings of toning around the borders. Grade-limiting abrasions are minor, mainly existing as handling marks on the cheek of Liberty and in the fields. Both sides display a thorough cartwheel effect. NGC ID# 24FZ, PCGS# 39927 Base PCGS# 6168

15493 1835 O-105, R.1, MS62 NGC. Recutting on star 4 is the clearest attribution marker. Tan patina blankets this Uncirculated Capped Bust half dollar. The strike is incomplete around the legends, and (PL)URIBU(S) is indistinguishable. Softly lustrous and attractive. NGC ID# 24FZ, PCGS# 39931 Base PCGS# 6168

15494 1835 O-107, R.1, MS62 PCGS. Splashes of peach and olive-green toning adorn this satiny and unblemished example. The RI in PLURIBUS is readable, though not fully brought up. Struck from late dies with only partial dentilation. NGC ID# 4EKB, PCGS# 39933 Base PCGS# 6168

15495 1836 Lettered Edge, O-103, Low R.4, MS62 PCGS. The base of the 1 in the date is recut, as are stars 7 and 8. The claws above 50 are very thin. Possibly within the Condition Census for this very scarce variety. Lustrous, minimally marked, and well struck with rich golden-brown, ruby-red, and sea-green peripheral patina.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 24G2, PCGS# 39940 Base PCGS# 6169

REEDED EDGE HALF DOLLARS

**1837 GR-4 Half Dollar, Pleasing MS63
Prooflike on Both Sides**

15496 1837 GR-4, R.3, MS63 PCGS. One of four uses of the obverse, the GR-4 variety is scarcer than the more-available GR-5 but paired with a different reverse. This is prooflike example on both sides (undesignated) with colorful, medium-toned surfaces that display shades of cerulean-blue, lilac, and glimpses of lavender. Pale-gold luster covers the sharply struck silver centers. A diagnostic, long die crack branches at the bust point, curving upwards across the cheek and cap to star 8. A few light marks do not diminish the Select Uncirculated appeal.

From The R. Thayer Sheets Yorktown Collection. PCGS# 531050 Base PCGS# 6176

**1837 Reeded Edge Half Dollar, MS63
GR-17, Lustrous and Attractive**

15497 1837 GR-17, R.1, MS63 PCGS. Satiny slate-blue and rose toning covers both sides of this lustrous, Select Uncirculated Bust half. Struck from a late die stage with die clashing on both sides, the coin shows a strong die crack from CEN in CENTS that curves through the left-hand legend to the top of ST in STATES. The strike is sharp throughout, with traces of fine granularity in the fields typical of the advanced die state. NGC ID# 24G4, PCGS# 531063 Base PCGS# 6176

**1837 Reeded Edge Half, Lustrous MS63
GR-21, Colorfully Toned**

15498 1837 GR-21, R.2, MS63 PCGS. Vibrant iridescent toning encompasses both sides of this Select Uncirculated example. Orange and gold shades occupy the borders, while blue and violet hues enrich the centers of this lustrous and frosted, minimally marked Reeded Edge half. A large die lump in the reverse field below O in OF helps confirm the GR-21 attribution. The central devices are quite sharp, although signs of die fatigue are visible at the highest points and at the outer margins. The eye appeal is exceptional.
From The R. Thayer Sheets Yorktown Collection. PCGS# 531069 Base PCGS# 6176

15499 1837 GR-24, R.2, MS62 PCGS. GR-24 is attributed by delicate die lines within the shield and on the field near the base of Liberty's neck. This coruscating representative is impressively unabraded. The strike is precise at the centers though peripheral elements show incompleteness. Dove-gray and wheat-gold toning embraces both sides. NGC ID# 24G4, PCGS# 531078 Base PCGS# 6176

**1837 GR-24 Half Dollar, Near-Gem
Golden-Brown Borders**

15500 1837 GR-24, R.2, MS64 NGC. A coruscating and carefully preserved representative of this short-lived Bust subtype. Golden-brown and lilac toning adorns the borders. The strike is sharp at the centers, though a few stars shows softness. A small area of ebony patina is noted near star 11. GR-24 is a variety familiar to specialists, best identified by delicate die lines above the eagle's left (facing) shoulder. NGC ID# 24G4, PCGS# 531078 Base PCGS# 6176

15501 1838 GR-3, R.2, MS63 PCGS. A late die state. This Select 1838 Reeded Edge half dollar displays a sharp strike and frosty, champagne-toned mint luster with no severe abrasions. An attractive type coin. Finer 1838 Reeded Edge halves are elusive. PCGS# 531082 Base PCGS# 6177

**1838 GR-10 Half Dollar, MS63
Colorful Patina, Shattered Reverse Die**

15502 1838 GR-10, R.3, MS63 PCGS. Die markers include a recut 8 and a small tine inside the N in UNITED. This is a late die state with extensive cracks throughout the reverse. The Reeded Edge half dollar reference notes that this is a difficult variety to find in original Mint State grades. This MS63 example is tied for finest on the Condition Census for GR-10. An undeniably untouched Select representative, each side is toned in eye-appealing shades of violet, blue, green, and gold. Luster emanates from beneath the toning. Well-defined with only a few light marks beneath the chin, now toned over.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 24G5, PCGS# 531091 Base PCGS# 6177

15503 1839-O GR-1, R.1, VF35 PCGS. The 1839-O is the only affordable New Orleans Bust issue, and as such is in demand from Southern type set collectors. This lavender-gray Choice VF example is nicely defined and impressively free from abrasions. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181

SEATED HALF DOLLARS

15504 1839 No Drapery, WB-101, AU50 PCGS. This inaugural one-year type is scarce and in high demand at the AU grade level. The present coin displays sharp detail with slight high-point wear on Liberty's legs and breast. Gold-tinted pewter-gray toning blankets each side, with hints of luster in the protected regions of the fields. The surfaces are smooth and problem-free. NGC ID# 24GK, PCGS# 572000 Base PCGS# 6230

15505 1842 Medium Date, Large Letters, WB-104, MS63 PCGS. Dusky russet-brown toning embraces portions of both sides, though the right obverse and the reverse field display light green-gold patina. This Seated half offers coruscating luster and a crisp strike. The fields exhibit scattered, inoffensive marks. NGC ID# 24GU, PCGS# 572013 Base PCGS# 6239

15506 1843-O WB-101, Die Pair 7, R.3, MS63 NGC. The 1843-O half dollar is rare in Mint State, particularly above the current MS63 grade level. This piece displays bold central devices with slight weakness on the upper obverse stars. Both sides exhibit attractive multicolor toning over satiny mint luster. The reverse shows significant die rust, as is diagnostic of the variety. Census: 19 in 63 (1 in 63+), 5 finer (1/17). NGC ID# 24GY, PCGS# 572023 Base PCGS# 6244

15507 1847-O/O WB-102, Die Pair 8, R.3, MS62 PCGS. The mintmark is lightly repunched north, but the many reverse die cracks also allow for prompt attribution. An untuned and unworn example of this popular New Orleans variety. The strike is good save for blending on the eagle's left (facing) ankle.

From The R. Thayer Sheets Yorktown Collection. PCGS# 572058 Base PCGS# 6259

15508 1850 Repunched Date, WB-102, AU55 PCGS. The 0 in the date is repunched southeast. The date is also lightly strike doubled south. Any 1850 half dollar is scarce, since much of the mintage of 227,000 pieces was melted by antebellum bullion speculators. This lightly circulated example has a whisper of gold toning and a paucity of relevant marks. Population: 14 in 55, 39 finer (2/17). NGC ID# 24HG, PCGS# 572075 Base PCGS# 6264

15509 1851-O WB-101, Die Pair 2, R.4, MS62 NGC. A coruscating and well struck New Orleans half dollar. The fields are only lightly abraded, and display rich cobalt-blue, plum-red, and straw-gold toning. For all Wiley-Bugert varieties combined, Census: 6 in 62, 16 finer (2/17). PCGS# 572082 Base PCGS# 6267

15510 1859-S Large S, WB-101, Die Pair 3, R.3, MS61 PCGS. Despite a relatively high mintage, the 1859-S is very scarce in Uncirculated grades. This brilliant representative is refreshingly unabraded, though a cluster of tiny strike-throughs (as made) is on the field above the right (facing) claw.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 24J2, PCGS# 524237 Base PCGS# 6298

15511 1861 WB-101 MS64 PCGS. An arc of autumn-gold toning enriches the margins. The fields and motifs are brilliant. A lustrous and well-preserved near-Gem. The strike is good, despite the usual merging of detail on the eagle's left (facing) ankle.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 24J7, PCGS# 572144 Base PCGS# 6302

15512 1870-CC WB-101, Die Pair 3, R.6, Good 4 PCGS. The first-year Carson City half dollar is scarcer than its silver dollar counterpart, despite a mintage nearly five times greater. Apparently, some of the dollars were saved as local pride souvenirs, while the half dollars remained in commerce. This cream-gray example has a bold date and mintmark. Star 13 is faint, but the country name and denomination are clear. Minimally granular, and without relevant marks.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 6466, PCGS# 572190 Base PCGS# 6328

15513 1872-CC WB-101, Die Pair 2, R.4, VF35 PCGS. A better-date Carson City half dollar. This stone-gray Choice VF example shows glimmers of luster within the drapery and legends. Relevant marks are confined to a brief, faded line below star 6.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 646EJ, PCGS# 572203 Base PCGS# 6334

**1873-CC No Arrows Half Dollar, XF40
Very Scarce Western Issue**

15514 1873-CC No Arrows, Small CC, WB-101, Die Pair 1, R.3, XF40 PCGS. Both 1873-CC No Arrows variants share a common reverse with a Small CC mintmark. The date placement is the simplest way of distinguishing Die Pair 1 from the rarer Die Pair 2. The Carson City Mint struck 122,500 half dollars before arrows were added, signifying an insignificant weight increase. These No Arrows coins are slightly scarcer, but each enjoy ever-strong demand because of their Western origin. A trace of dappled golden-orange and blue patina adheres to the recesses, while the exposed areas are bright silver-gray. Well-struck motifs display expected friction. Population (both No Arrows varieties): 16 in 40, 37 finer (2/17). *From The R. Thayer Sheets Yorktown Collection.* NGC ID# 24KC, PCGS# 572214 Base PCGS# 6338

15515 1873 Large Arrows, WB-106, MS63 PCGS. A well-struck example overall but slightly weak on Liberty's temple as usual. This Select Large Arrows 1873 half dollar displays satiny luster with dusky golden-gray toning that has hints of olive-green and lavender throughout. Abrasions are minimal. NGC ID# 24L7, PCGS# 572211 Base PCGS# 6343

**1873-CC Arrows Half Dollar, AU50
Scarce in This Grade**

15516 1873-CC Arrows AU50 ANACS. WB-Unlisted, Die Pair 7, R.4. Large CC Reverse. The 1873-CC With Arrows half dollar is scarce in high grade. This example shows a sharp strike and light high-point wear. Both sides display deep gunmetal-gray toning with golden undertones that emerge when tilted beneath a light. There are no surface problems. Housed in an old white ANACS holder. NGC ID# 24L8, PCGS# 6344 Base PCGS# 6344

**1876 WB-101 Half Dollar, MS65
Brilliant With Frosted Luster, Few Are Finer**

15517 1876 Open Bud, WB-101, MS65 PCGS. The Type One reverse with a split berry (open bud) confirms the WB-101 designation, although numerous die pairs were undoubtedly required to accomplish the large mintage of more than 8.4 million pieces. It is amazing so few Gem coins or finer exist from such a large mintage in the Centennial year. This is a primarily brilliant and frosty example with deep and abiding mint luster. Gunmetal-blue and orange-gold toning at the borders verifies the original surfaces. A dot of similar toning is noted on Liberty's left (facing) elbow, a useful pedigree marker. Population (all varieties): 21 in 65 (3 in 65+), 11 finer (2/17). *From The R. Thayer Sheets Yorktown Collection.* NGC ID# 645N, PCGS# 572234 Base PCGS# 6352

15518 1876-CC Medium CC, WB-102, Die Pair 8, R.3, MS62 NGC. Dusky dove-gray and wheat-gold toning blankets this satiny Carson City type coin. Only the eagle's left (facing) ankle lacks a precise strike. Marks are surprisingly few overall, though we note wispy field abrasions near the mintmark. NGC ID# 645S, PCGS# 572239 Base PCGS# 6353

15519 1876-CC Large CC, WB-103, WB-2, R.3, MS63 PCGS. This lustrous and brilliant Carson City type coin has a good strike and an essentially pristine reverse. The obverse is smooth aside from a graze on the left field and a mark on Liberty's lowered elbow. *From The R. Thayer Sheets Yorktown Collection.* NGC ID# 24KH, PCGS# 572240 Base PCGS# 6353

15520 1878-CC WB-101, Die Pair 1, R.4, Fine 12 PCGS. Rich golden-brown and gunmetal-gray toning encompasses this moderately abraded example. Six letters in LIBERTY are present. Carson City abandoned the half dollar denomination in early 1878 to strike silver dollars. The '78-CC has a stingy mintage of 62,000 pieces. NGC ID# 24KP, PCGS# 572257 Base PCGS# 6359

15521 1879 Closed Bud, WB-102, MS64 PCGS. Production of half dollars dropped to token levels with the advent of the Morgan dollar. The 1879 mintage was solely at Philadelphia, and confined to 4,800 business strikes and 1,100 proofs. This is a virtually brilliant near-Gem that boasts vibrant luster and an unmarked appearance. *From The R. Thayer Sheets Yorktown Collection.* NGC ID# 24KS, PCGS# 572260 Base PCGS# 6361

15522 1889 WB-101 MS63 PCGS. A crisp strike and dynamic cartwheel luster attest to the quality of this lightly toned Select half dollar. The fields show only delicate marks. The 1889 has a mintage of only 12,000 pieces, since the Philadelphia Mint was busy churning out silver dollars that year. *From The Martin Peterson Collection.* PCGS# 572274 Base PCGS# 6371

PROOF SEATED HALF DOLLARS

15523 1860 PR64 PCGS. Beautiful blue, lavender, and gold toning resides beneath a dusky blanket of steel-gray on each side of this near-Gem proof. The strike is sharp, and any grade-limiting marks are hidden beneath the rich patina. Population: 40 in 64, 26 finer (2/17). NGC ID# 27TK, PCGS# 6414

15524 1864 PR64 PCGS. This toned Choice proof has a full strike and displays vivid sun-gold, olive, and autumn-red coloration. Any minor marks or hairlines are hidden beneath the patina. Finer 1864 proof halves are scarce. Population: 57 in 64 (1 in 64+), 24 finer (2/17). NGC ID# 27TR, PCGS# 6418

15525 1867 PR63 PCGS. Violet-red centers are framed by deep aquamarine peripheries. The glassy fields are void of contact and carbon. The strike is full except on the eagle's left (facing) ankle. A mere 625 proofs were distributed. NGC ID# 27U2, PCGS# 6425

15526 1869 PR64 PCGS. WB-101. An attractive Choice example from a limited proof mintage of 600 pieces, this coin exhibits razor-sharp definition on all design elements and the fields are deeply mirrored. The lightly marked surfaces show a few hints of champagne toning. Population: 62 in 64 (3 in 64+), 23 finer (2/17). NGC ID# 27U4, PCGS# 6427

1870 Half Dollar, PR65 Contrasted Obverse

15527 1870 PR65 PCGS. This sharp Gem proof exhibits subtle cameo contrast on the obverse but is brilliant on the central reverse. Both sides display amber, violet, and ocean-blue border toning. The coin is beautifully preserved. A loupe reveals a few shallow planchet striations around Liberty's right (facing) shoulder. Population: 16 in 65 (1 in 65+), 4 finer (2/17). NGC ID# 27U5, PCGS# 6428

15528 1872 PR65 PCGS. This is a beautifully toned, multicolor Gem proof that might have garnered a Cameo designation on the obverse were it not for deeper coloration on the reverse that prevents the needed contrast on that side. The strike is full, and the fields are deeply reflective. Population: 16 in 65 (1 in 65+), 5 finer (1/17). NGC ID# 27U7, PCGS# 6430

15529 1872 PR65 PCGS. This Gem proof might have received a Cameo designation were it not for the beautiful mint-gold, blue, lavender, and autumn-orange toning that electrifies the mirrored fields. The strike is bold, and eye appeal is outstanding. Finer proofs are rare. Population: 17 in 65 (1 in 65+), 5 finer (2/17). NGC ID# 27U7, PCGS# 6430

1872 Proof Half Dollar, Ex: Eliasberg Sharply Struck Premium Gem

15530 1872 PR66 NGC. Ex: Eliasberg. The attractive toning patterns on the obverse and reverse help identify this Premium Gem proof as the former Eliasberg coin, an attribution confirmed by the prior generation NGC holder. Mirrored fields are moderately toned in attractive shades of champagne-gold and cerulean-blue, with violet accents on the reverse. The frosted motifs show a full strike and discernible contrast with the glassy fields. This is a lovely proof coin with an important pedigree, one that easily conveys its careful preservation over the past 145 years. Census: 9 in 66, 3 finer (2/17).

Ex: William Dickinson Collection (Chapman Brothers, 3/1894); J.M. Clapp; John H. Clapp. Clapp Estate, 1942, to Louis E. Eliasberg, Sr.; unidentified private collections. NGC ID# 27U7, PCGS# 6430

1875 Half Dollar, Iridescent PR66 Exemplary Preservation and Eye Appeal

15531 1875 PR66 PCGS. In 1875, the Mint removed the arrows beside the date that had been implemented for two years in 1873 and 1874. A total of 700 proof half dollars were struck. This outstanding specimen displays gorgeous multicolor iridescence throughout the obverse in shades of blue, green, rose, and peach-orange. Similar hues encompass the reverse borders, ceding to brilliant centers. Preservation and eye appeal place this Premium Gem proof among a small group of top-notch pieces. Population: 11 in 66, 3 finer (2/17). NGC ID# 27U9, PCGS# 6436

15532 1876 PR64 NGC. This glimmering Choice proof displays uniform olive-green and lavender-gold toning on each side, while the devices showcase sharp definition everywhere except on the eagle's left (facing) talons. A few light marks are consistent with the grade. Census: 47 in 64, 28 finer (1/17). NGC ID# 27UA, PCGS# 6437

15533 1879 PR63 Cameo PCGS. An elusive Cameo example with sharp design elements and modest field-device contrast. Light golden toning appears over each side, and trivial grade-limiting marks and lines are unobtrusive. Population: 12 in 63 Cameo, 45 finer (2/17). NGC ID# 27UE, PCGS# 86440

1882 Half Dollar, PR65 Cameo
Frost-White Motifs

15534 1882 PR65 Cameo NGC. A halo of honey-gold toning frames the brilliant-white centers of this boldly contrasted late-series half. Circulation strikes of the low-mintage 1882 issue outnumbered proofs 4 to 1 when struck, but today proofs far outnumber business-strike survivors in Gem or finer grades. The present proof offers dazzling eye appeal with nearly flawless fields and razor-sharp frosted motifs. Census: 17 in 65 Cameo, 25 finer (2/17).
From The Martin Peterson Collection. NGC ID# 27UH, PCGS# 86443

15535 1883 PR64 Cameo PCGS. A narrow band of golden-brown toning enriches the peripheries of this nicely struck near-Gem. Icy motifs rise above prominently mirrored fields. The proof-only Trade dollar pushed up the proof set mintage, but quality specimens are nonetheless elusive.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 27UJ, PCGS# 86444

15536 1883 PR64 Deep Cameo PCGS. Ice-white devices demonstrate exemplary contrast with glassy fields. Peripheral golden-brown and navy-blue toning contributes further to its charms. A low mintage date, and surprisingly affordable given its considerate eye appeal. Population: 8 in 64 (2 in 64+) Deep Cameo, 5 finer (2/17).
From The R. Thayer Sheets Yorktown Collection. NGC ID# 27UJ, PCGS# 96444

1885 Half Dollar, PR66
Dazzling Array of Colors

15537 1885 PR66 PCGS. The mirrored fields display vibrant gold toning that yields to a dazzling array of color at the margins, where fiery-red shades complement vivid blue and violet accents. Importantly, the toning is equally dramatic on both sides of this memorable Premium Gem proof, while the strike is uniformly sharp throughout. Just 930 pieces were struck. Population: 15 in 66 (3 in 66+), 3 finer (2/17). NGC ID# 27UL, PCGS# 6446

15538 1888 PR64 NGC. A brilliant-white, near-Gem example with moderate mirroring and lightly frosted devices. A glass reveals delicate lines in the fields that temper the reflectivity at certain angles. Still, the surfaces are Choice and most of the design elements are bold. Liberty's hair strands show minor incompleteness yet the surrounding stars are pinpoint sharp. Just 832 proofs were struck. Census: 53 in 64 (1 in 64+), 38 finer (2/17). NGC ID# 27UP, PCGS# 6449

BARBER HALF DOLLARS

1892 Half Dollar, MS66 CAC
First Generation Holder
Remarkable Quality

15539 1892 MS66 PCGS. CAC. The 1892 Barber half was better-saved in high grade than most later dates in the series, but Premium Gems are nonetheless scarce, and finer coins are rare. This CAC-approved MS66 is housed in a first generation holder, and it displays nearly pristine, frosty mint luster. There are no abrasions on the reverse, and the obverse has only a single small tick below Liberty's eye that prevents a Superb Gem designation from PCGS. Original blue border toning cedes to lavender in the margins and delicate champagne in the centers. Eye appeal abounds. Population: 55 in 66 (6 in 66+), 13 finer. CAC: 23 in 66, 12 finer (2/17). NGC ID# 24LF, PCGS# 6461 Base PCGS# 6461

15540 1892-S MS62 PCGS. CAC. The 1892-S Barber half is a challenging date in Uncirculated condition, making this collectible MS62 coin appealing. The surfaces yield satiny luster beneath lavender-gray and champagne toning. Slight weakness is noted on the eagle's right (facing) shoulder and talons, as usual. NGC ID# 24LJ, PCGS# 6464

15541 1893-S AU58 PCGS. CAC. A better date, seldom offered in either Mint State or high-end AU. This CAC-approved near-Mint 1893-S half dollar displays a bold strike and significant satin luster. Light golden toning intrudes from the borders. Population: 22 in 58, 61 finer. CAC: 3 in 58, 13 finer (2/17). NGC ID# 24LM, PCGS# 6467

1895-S Half Dollar, MS64
Lightly Toned CAC Coin

15542 1895-S MS64 PCGS. CAC. The 1895-S Barber half dollar is collectible in MS64 but rare finer. This CAC-endorsed near-Gem displays a sharp strike and mostly unmarked surfaces. Uniform champagne toning blankets each side. CAC green labels are rarely awarded to 1895-S halves in this and finer grades. Population: 38 in 64, 18 finer. CAC: 4 in 64, 7 finer (1/17). NGC ID# 24LU, PCGS# 6473

15543 1896-O AU53 NGC. The 1896-O half dollar is scarce in Mint State, heightening the appeal of this About Uncirculated example. Both sides show virtually complete original detail, although some strike weakness is seen on the eagle's right (facing) shoulder and talons. Light golden toning on each side is visited by burnt umber along the lower obverse and upper reverse rims. Census: 2 in 53, 29 finer (2/17). NGC ID# 24LW, PCGS# 6475

15544 1897-S XF40 PCGS. Like most Barber San Francisco issues struck prior to the 1906 earthquake and fire, the 1897-S is available in well circulated grades, but is rare as a problem-free XF. This is a pleasing cream-gray and olive-green example with glimpses of charcoal patina in portions of the reverse. NGC ID# 24M2, PCGS# 6479

15545 1898-O AU50 PCGS. The scarcity of the 1898-O half dollar in Mint State drives a healthy collector market for AU coins. This piece is well-detailed on the obverse but shows moderate strike weakness on the reverse over the right side of the eagle. Both sides have uniform lavender-gray toning. A small mark on Liberty's cheek is the only abrasion of note. Population: 6 in 50, 87 finer (2/17). NGC ID# 24M4, PCGS# 6481

15546 1899 MS65 PCGS. A moderately plentiful date in the context of the series, the 1899 Barber half is still scarce in Gem condition and is rarely seen finer. This piece showcases bold detail throughout the eagle and stars, with frosty luster and mottled multicolor toning. A few faint grazes on Liberty's cheek are barely discernible. Population: 25 in 65 (2 in 65+), 14 finer (2/17). NGC ID# 24M6, PCGS# 6483

1901-S Barber Half, AU55 Better Date in High Grade

15547 1901-S AU55 PCGS. CAC. The 1901-S Barber half dollar is rare in Mint State, making this CAC-approved Choice AU representative highly appealing to the budget-conscious collector. The strike is bold, and high-point wear is minimal. Remnants of silver luster can be seen in the fields when rotated beneath a light. Light handling marks are consistent with the grade. NGC ID# 5EPB, PCGS# 6491

1903-S Half Dollar, MS65 Toned Condition Rarity

15548 1903-S MS65 PCGS. Areas of brilliance combine with splashes of gold, crimson, and cobalt-blue patina that occurs mainly around the borders. The obverse stars are well brought-up, while the usual softness appears on the headband, right (facing) talon and shield corner. Overall preservation is excellent with just a couple of small ticks on the cheek. Population: 10 in 65, 8 finer (2/17). NGC ID# 24ML, PCGS# 6497

15549 1904-S VF30 PCGS. CAC. The 1904-S is a better date, represented by a higher-than-usual number of certified coins in low circulated grades. However, VF30 examples are seldom seen. This CAC coin offers grade-consistent wear with even pewter-gray patina. We observe no mentionable flaws for the grade. NGC ID# 24MP, PCGS# 6500

15550 1904-S VF30 PCGS. CAC. Attractive lavender and blue-gray toning darkens the peripheral fields of this well-detailed VF example, while the interiors exhibit more traditional battleship-gray color. LIBERTY is clear. The 1904-S is a better date among 20th century Barber halves. Mint State coins are rare. NGC ID# 24MP, PCGS# 6500

1907-D Barber Half Dollar, MS66 Medley of Multicolor Patina

15551 1907-D MS66 PCGS. CAC. Ex: Shireman. This is one of the more available issues in the Barber half dollar series that can be located in Gem grades and higher, making it a suitable type alternative to the 1892 or 1915-D. A medley of orange, crimson, blue, green, and rose coloration richly tones the surfaces of this CAC-endorsed Premium Gem. Design definition is needle-sharp, aside from moderately incomplete fletchings. Destined for a high-end set. Population: 13 in 66 (2 in 66+), 2 finer (11/15). Ex: eBay (1/21/2004); The Dr. Peter and Janice Shireman Collection / FUN Signature (Heritage, 1/2016), lot 4135. NGC ID# 24MZ, PCGS# 6509

1908-D Half Dollar, MS66 Beautiful Two-Sided Toning

15552 1908-D MS66 PCGS. CAC. Like most other dates in the Barber half series, the 1908-D is plentiful in middle and lower Mint State grades but conditionally rare in MS66 and finer. This CAC-approved Premium Gem displays frosty original luster beneath original forest-green, lavender, and sun-orange toning on each side. The eagle's right (facing) wing junction is slightly soft, but the strike is otherwise bold on this Denver type coin. Population: 13 in 66 (5 in 66+), 4 finer. CAC: 12 in 66, 3 finer (2/17). NGC ID# 24N5, PCGS# 6513

15553 1913-S MS64 NGC. This is a boldly struck, golden-toned near-Gem that at first glance appears too nice for the grade. Nonetheless, a loupe shows some faint handling marks on the cheek. The 1913-S Barber half is rarely offered finer. Census: 32 in 64, 21 finer (2/17). NGC ID# 24NM, PCGS# 6529

**1915-D Half Dollar, MS66
None Finer at PCGS or CAC**

15554 1915-D MS66 PCGS. CAC. A conditionally rare example of this late-series Denver issue and among the finest at PCGS and CAC. A sharp obverse strike contrasts with minor weakness on the reverse eagle's right (facing) wing junction. Softly frosted luster displays champagne toning with flecks of russet. We find no mentionable abrasions. Population: 23 in 66 (3 in 66+), 0 finer. CAC: 14 in 66, 0 finer (2/17). NGC ID# 24NS, PCGS# 6533

PROOF BARBER HALF DOLLARS

15555 1892 PR64 PCGS. A flashy and practically brilliant Choice specimen. The strike is intricate, and the eye appeal is imposing. The first year of the Barber type, a silver design with low proof mintages relative to its successors.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 24NU, PCGS# 6539

15556 1893 PR64+ Cameo PCGS. Lightly toned, watery fields and thickly frosted design elements account for the marked Cameo contrast on each side. A ring of golden color paints the rims, adding to the eye appeal of this Choice Barber half proof. Tiny contact marks are effectively concealed, and the impression is predictably full. Population: 27 in 64 (4 in 64+) Cameo, 46 finer (2/17). NGC ID# 24NV, PCGS# 86540

**1895 Half Dollar, Sparkling PR65 Cameo
Fully Struck on Both Sides**

15557 1895 PR65 Cameo NGC. Although its mintage is the same as the highly-sought 1895 proof dollar (880 pieces), the half dollar is more readily available and much less expensive. This brilliant-white example displays strong field/device contrast to earn the Cameo designation, seldom awarded for the issue. A delightful Gem, the silver-mirrored fields are deeply reflective with just a few wispy, widely scattered lines. The strike on the raised motifs is absolutely full, without any weakness at the shield corner or wing junction. The eagle's leg, talons, and arrow fletchings are razor-sharp. Census: 10 in 65 Cameo, 43 finer (2/17).

From The Martin Peterson Collection. NGC ID# 24NX, PCGS# 86542

**1901 Barber Half Dollar, PR65
Sharply Struck, Deeply Mirrored Proof**

15558 1901 PR65 PCGS. Splashes of rainbow toning daub the margins of this lightly toned Gem proof. Pale tan and reddish-gold patina embellishes the mirrored silver surfaces, moreso on the reverse than the obverse. Delicate die polish lines of Mint origin appear under a loupe. The proof mintage of 813 pieces welcomed the 20th century with minor design changes to the Barber half design. This sharply struck example exhibits the Type Two obverse, with WE not touching the nearby leaf. Population: 28 in 65, 36 finer (2/17). NGC ID# 24P5, PCGS# 6548

15559 1910 PR64 NGC. The flashy fields and boldly struck devices exhibit dappled canary-gold, cobalt-blue, and rose-red toning. A delightful specimen that shows hints of cameo contrast despite the multicolor patina. A mere 551 proofs were issued. Certified in a former generation holder.

From The Martin Peterson Collection. NGC ID# 26A4, PCGS# 6557

WALKING LIBERTY HALF DOLLARS

15560 1916 MS65 PCGS. Dappled autumn-brown and gunmetal-blue toning embraces this coruscating and well struck first-year Gem. Uncommonly free from contact. Among Philadelphia issues, only the 1921 has a lower mintage.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 24PL, PCGS# 6566

**1916-S Half Dollar, MS64
Crisply Struck, Lightly Toned**

15561 1916-S MS64 PCGS. A whisper of soft-gray toning visits the right obverse field, but otherwise this first-year San Francisco example is untuned and sharply lustrous. The strike is crisp for the issue, with some thumb and finger detail visible on the branch hand and Liberty's facial details complete. The eagle's plumage shows only slight blending on the trailing leg. A single scrape at Liberty's neckline is visible with a glass, the only mentionable mark of any significance. NGC ID# 24PN, PCGS# 6568

1916-S Walker, MS64
Attractive Mint Luster

- 15562 1916-S MS64 PCGS.** The 1916-S tends to be weakly struck on Liberty's hand and head and on the eagle's breast (Bruce Fox, 1993). Not so on the present near-Gem. While the feathers on the eagle's left (right facing) leg are weak, the breast feathers are strong, as are Liberty's head and left hand and adjacent branches. Highly lustrous surfaces are essentially untoned, and while possessing a couple of minute obverse marks, are free of the prominent abrasions that typify this issue.
Ex: *Central States Signature* (Heritage, 5/2007), lot 2961. NGC ID# 24PN, PCGS# 6568

- 15563 1917-S Obverse AU55 PCGS. CAC.** An attractive Choice AU specimen, from the last year with the prominent obverse mintmark. This piece shows some slight wear on the design elements and lightly abraded surfaces that retain some of their original mint luster. NGC ID# 26G7, PCGS# 6572

- 15564 1917-S Reverse MS63 PCGS.** Satiny mint luster gives this Select 1917-S Walker pleasing visual appeal, illuminating surfaces that exhibit minimal abrasions for the grade. Traces of light golden toning appear on each side. The obverse is well-struck, but the eagle's trailing leg feathers show minor softness. NGC ID# 24PU, PCGS# 6573

- 15565 1918 MS64 NGC.** This is a largely unabraded, vibrantly lustrous example that likely would have received Gem classification were it not for some faint lines in the right obverse field that are discernible with a 10x loupe. Partial thumb separation defines the strike, and each side displays warm golden toning. NGC ID# 24PV, PCGS# 6574

1919-D Half Dollar, AU53
Original Coloration

- 15566 1919-D AU53 PCGS. CAC.** Original luster remains in the protected regions of the fields on this About Uncirculated semikey Walker. Warm golden toning appears over each side, lightening toward the centers. Wear is minimal. The 1919-D is among the more challenging acquisitions in the date and mintmark set in high grade. NGC ID# 24PZ, PCGS# 6578

- 15567 1921 XF40 PCGS. CAC.** This is an uncommonly attractive XF representative of the key Philadelphia issue. Golden toning blankets medium gray surfaces, and each side is devoid of visual distractions. Hints of luster are still to be seen in the protected peripheral fields. NGC ID# 24R6, PCGS# 6583

1921-D Half Dollar, XF40
Well-Detailed and Appealing

- 15568 1921-D XF40 PCGS.** Daubs of olive-gold and russet toning appear in the margins on this lightly circulated key date Walker. The motifs are well-detailed, and the interiors show medium battleship-gray color. Hints of luster cling to the peripheral regions, revealed when rotated beneath a light. NGC ID# 24R7, PCGS# 6584

1921-S Half Dollar, XF40
Seldom Available in This Grade

- 15569 1921-S XF40 PCGS.** Sharp definition remains despite moderate circulation on this medium-toned 1921-S half. An overall skin of olive-gray patina allows glimpses of silver luster to show through. Only tiny marks exist in sparse distribution across the pleasing surfaces on both sides. The date is full and the rims are wholly unmarked. An ideal coin for a mid- to high-grade circulated set. NGC ID# 24R8, PCGS# 6585

- 15570 1923-S AU55 PCGS.** Satiny luster remains in the fields while the motifs show light high-point friction. Scattered marks are relatively unnoticed by the naked eye and are in harmony with the grade. This Choice AU 1923-S half dollar is nearly brilliant and will fit in well with an otherwise Mint State date and mintmark collection. NGC ID# 24R9, PCGS# 6586

1923-S Half Dollar, AU58
Lustrous Fields

- 15571 1923-S AU58 PCGS. CAC.** This better date is challenging in Mint State but collectible in AU. The present CAC-approved near-Mint coin displays substantial luster in the fields with little evidence of high-point wear on the devices. Weakness on Liberty's branch hand is due to strike. This coin shows delicate champagne toning overall. NGC ID# 24R9, PCGS# 6586

1923-S Half Dollar, MS63
Challenging in High Grade

15572 1923-S MS63 PCGS. The 1923-S is a better date in Uncirculated condition, particularly scarce at the Gem level. This Select representative is well-within the reach of most collectors, making it a more ideal candidate for a basic date and mintmark set than the high-priced finer coins. The strike partially defines the thumb on Liberty's branch hand and is bold elsewhere. Hints of light golden toning appear over each side along with a few unobtrusive abrasions. NGC ID# 24R9, PCGS# 6586

1927-S Half Dollar, MS64
Elusive in Better Condition

15573 1927-S MS64 PCGS. The 1927-S is a better date in Uncirculated condition, being genuinely scarce above MS64. This near-Gem remains accessible by most collectors and yet shows excellent surface quality with brilliant, frosty luster. Moderate weakness on the central high points of each side contribute to the grade. NGC ID# 24RA, PCGS# 6587

15574 1929-S MS63 PCGS. CAC. Comprehensively dappled olive-green and butter-gold toning confirms the originality of this coruscating and crisply struck better-date half dollar. Both sides appear surprisingly free from abrasions. A difficult issue to acquire with CAC approval. NGC ID# 24RD, PCGS# 6590

15575 1929-S MS64 PCGS. Dappled shades of powder-blue, olive-green, and silver-gray toning visit the well-preserved, lustrous surfaces of this impressive Choice specimen. The design elements show a touch of the typical softness on the wreath hand and eagle's leg. NGC ID# 24RD, PCGS# 6590

15576 1933-S MS64 PCGS. Softly frosted luster lies beneath a dusting of champagne toning on this Choice 1933-S half, and bits of olive-gold are tucked around the edges of many relief elements. A few scattered abrasions are not out of line for the grade. Liberty's head is shy of fully defined, but the branch hand and the eagle's leg feathers are bold. NGC ID# 24RE, PCGS# 6591

1933-S Half Dollar, MS66
Few Available Finer

15577 1933-S MS66 PCGS. This Premium Gem 1933-S is sharply struck, including bold thumb separation on Liberty's branch hand. The satiny surfaces are cast in light golden toning, and there are no major abrasions. The 1933-S is scarce in this grade and rare finer, where PCGS has graded only 15 coins (2/17). NGC ID# 24RE, PCGS# 6591

1934-S Walking Liberty Half, MS65
Challenging Middle Series Issue

15578 1934-S MS65 NGC. Glimpses of pale ivory appear at the borders of this satiny Gem, yet the coin is essentially creamy-white with strong silver luster. The strike is sharp through the centers on both sides, an important factor when viewing the 1934-S. A few minuscule ticks on Liberty's leg are seen under a loupe, but the coin is essentially mark-free in all other areas. The eye appeal is exceptional. NGC lists just 49 numerically finer coins (2/17). *From The Martin Peterson Collection.* NGC ID# 24RH, PCGS# 6594

1934-S Half Dollar, Frosty MS65
In an Old 'Rattler' Holder

15579 1934-S MS65 PCGS. CAC. The 1934-S Walker is a better date in Gem condition, and coins grading finer than MS65 are particularly scarce. This piece yields frosty original luster that is framed at the borders by warm golden toning. The strike is sharp throughout the interiors, and there are no distracting abrasions. CAC-approved in a first generation holder. NGC ID# 24RH, PCGS# 6594

**1934-S Walker, Lustrous MS66
Bold Head and Branch Hand**

15580 1934-S MS66 PCGS. CAC. Aside from bits of pleasing almond and lemon-gold toning at the outermost margins, this satiny, sharply struck 1934-S Walker is brilliant and alive with silver luster. Series experts will appreciate the minimally marked surfaces and the crisp gown lines that define a true Premium Gem grade. CAC endorsed. It is worth noting just eight pieces have received a finer numeric grade from PCGS (2/17). NGC ID# 24RH, PCGS# 6594

**1935-D Walking Liberty Half Dollar, MS66+
Vibrant Luster, Smooth Surfaces**

15581 1935-D MS66+ PCGS. Over the past quarter century, NGC and PCGS have certified more than 100 1935-D Walkers as MS66. However, only five examples have in addition attained a Plus designation, and there is only one piece known finer, at NGC (2/17). This representative is lustrous with light green-gold toning and exemplary preservation. The strike shows customary softness on Liberty's head and branch hand, but other detail is brought up nicely.
Ex: Rosemont Signature (Heritage, 4/2011), lot 4452; New York Signature (Heritage, 12/2011), lot 3848; Long Beach Signature (Heritage, 2/2012), lot 4093. NGC ID# 24RK, PCGS# 6596

**1935-S Half Dollar, MS66
Brilliant and Frosty**

15582 1935-S MS66 PCGS. A frost-white coin with outstanding surface quality and a sharp strike for the issue. While the 1935-S is neither scarce as an issue nor challenging in lesser grades, it is nothing short of rare in Superb Gem condition, making this outstanding Premium Gem a logical candidate for the perceptive bidder. Only three coins are certified numerically finer at PCGS. NGC ID# 24RL, PCGS# 6597

**1935-S Walking Liberty Half, MS66+
Exquisite Color and Luster**

15583 1935-S MS66+ NGC. CAC. Impressive luster is but one component of the amazing eye appeal of this high-end Premium Gem. Fantastic colors best described as chartreuse and emerald take over much of the surfaces, while occasional windows into frosty silver-gray are also present. NGC reports just five numerically finer representatives. Census: 2 in 66+, 5 finer. CAC: 38 in 66, 3 finer (2/17).
Ex: FUN Signature (Heritage, 1/2011), lot 5798. NGC ID# 24RL, PCGS# 6597

15584 1936-D Doubled Die Obverse, FS-101, MS66+ PCGS. CAC. The variety is undesignated on the PCGS holder, but die doubling is apparent on the tail of the 9 and the left edges of IN. Light olive-gold and cream-gray toning graces this lustrous Great Depression Walker. A lens reveals minor carbon and unobtrusive contact on the sapling. PCGS# 145782 Base PCGS# 6599

15585 1936-S MS66 PCGS. Available in MS66, the 1936-S Walker is suddenly rare in MS67 and out of reach for most collectors. This Premium Gem offers champagne-tinted mint luster and mostly unmarked fields. Some strike softness is seen on Liberty's branch hand and the eagle's leg feathers. PCGS reports 11 finer examples of the date (2/17). NGC ID# 24RP, PCGS# 6600

15586 1936-S MS66 PCGS. CAC. The 1936-S is often available in MS66, but finer examples are rare and far out of reach for most collectors. CAC-endorsed coins in this and finer grades are scarce. The present piece displays a full strike and vibrant, champagne-tinged mint luster. There are no major abrasions. PCGS has seen 11 Superb Gems finer. CAC: 77 in 66, 4 finer (1/17). NGC ID# 24RP, PCGS# 6600

15587 1936-S MS66+ PCGS. CAC. Creamy luster emits a warm champagne hue as it illuminates beautifully preserved surfaces on this high-end Premium Gem. The strike lacks completeness on Liberty's branch hand and the eagle's trailing leg, as usual, but the exceptional preservation balances the eye appeal. As the Plus designation and CAC endorsement suggest, this piece is only a whisper away from achieving a full MS67 grade. PCGS has seen only 11 finer examples (2/17). NGC ID# 24RP, PCGS# 6600

15588 1938-D MS65 NGC. This impressive Gem is sharply detailed in most areas, with some separation between Liberty's thumb and fingers on the wreath hand. The lustrous surfaces are free of all but the most insignificant signs of contact and eye appeal is terrific.
From The Martin Peterson Collection. NGC ID# 24RV, PCGS# 6605

15589 1938-D MS65+ PCGS. CAC. Hints of light golden toning accent frosty luster on this high-end Gem, while Liberty's branch hand exhibits the usual strike softness. The 1938-D enjoys heightened popularity due to its mintage of only 491,600 pieces. NGC ID# 24RV, PCGS# 6605

15590 1938-D MS66+ PCGS. CAC. The mintage for the 1938-D is less than half that of any other post-1921 issue. It is popular even in well-worn grades. The present piece, however, has immaculate fields and radiant brilliance. Lustrous and eye-catching with a good strike. There are merely 45 higher-graded examples at PCGS (2/17). NGC ID# 24RV, PCGS# 6605

15591 1938-D MS66+ PCGS. CAC. This high-end Premium Gem exhibits a much better-than-average strike, with visible separation between Liberty's thumb and finger. Delicate shades of pale gold toning visit the well-preserved, lustrous surfaces. PCGS has graded 45 finer examples (2/17). NGC ID# 24RV, PCGS# 6605

15592 1939-S MS67 PCGS. This frosty, champagne-tinted Superb Gem is among the finest 1939-S Walkers at PCGS (2/17), an excellent Registry Set candidate. The surfaces are devoid of abrasions, although some minor strike weakness is seen on Liberty's branch hand. A vertical die crack nearly bisects the reverse. NGC ID# 24RY, PCGS# 6608

15593 1939-S MS67 PCGS. CAC. A spectacular Superb Gem, with some separation between Liberty's thumb and fingers on the wreath hand and sharp definition on the other design elements. The impeccably preserved, lustrous surfaces display subtle hints of golden-tan toning. PCGS has graded no numerically finer examples (2/17). NGC ID# 24RY, PCGS# 6608

15594 1941-S MS66+ PCGS. The 1941-S is another date that is plentiful in MS66 but rare in MS67. This Plus-designated Premium Gem offers exceptional surface quality and eye appeal without breaching the often untouchable price level of a Superb Gem. Rainbow border toning frames silvery interiors, and there are no distractions. Strike weakness on Liberty's branch hand and the eagle's trailing leg is typical of the issue. PCGS reports nine finer examples (2/17). NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613

15595 1941-S MS66+ PCGS. A Plus-graded Premium Gem with well-detailed design elements that show a touch of the typical softness on the wreath hand. The well-preserved surfaces radiate vibrant mint luster, under highlights of sea-green and lavender toning. PCGS has graded nine numerically finer examples (2/17). NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613

15596 1941-S MS66+ PCGS. CAC. A high-end example with frosty, brilliant luster and no distracting abrasions. Mild weakness in the definition of Liberty's branch hand and the eagle's trailing leg is not unusual for the date. PCGS reports nine Superb Gems finer (2/17). NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613

15597 1941-S/S FS-501 MS65+ PCGS. CAC. The curve of an errant mintmark impression is northwest of the lower serif of the prominent mintmark. The present lustrous Gem displays peripheral golden-brown and forest-green toning. The strike is sharp except on the branch hand, and marks are exceptionally few. FS-501 Population: 4 in 65 (2 in 65+), 1 finer. CAC: 2 in 65, 0 finer (2/17). NGC ID# 24S5, PCGS# 145787 Base PCGS# 6613

15598 1942-S MS66+ PCGS. CAC. Plus-graded Premium Gems are scarce, and finer coins are rare, with only nine reported at PCGS (2/17). This CAC-endorsed 1942-S Walker displays remarkably well-preserved surfaces with a hint of ice-blue toning. The expected strike weakness is seen on the eagle's trailing leg feathers and Liberty's branch hand. NGC ID# 24S8, PCGS# 6617

1944 Half Dollar, Splendid MS67+

15599 1944 MS67+ PCGS. The PCGS Plus designation is an important endorsement of the frosted silver surfaces and sharply struck motifs that differentiate this lustrous, high-end Walker from other Superb Gem examples of this Philadelphia issue. A fiery ring of sunset-orange toning encircles about 70% of the obverse, casting an iridescent sheen across the right field as a focal point for the exquisite eye appeal. PCGS reports just one numerically finer piece, an extraordinary fact given the large 28 million-piece mintage. Population: 22 in 67+, 1 finer (2/17). NGC ID# 24SC, PCGS# 6621

15600 1944-S MS66 PCGS. CAC. The mintmark is minutely recut at the upper serif, but this is not one of the prominent varieties listed in the *Cherrypickers'* reference. Strike weakness occurs on Liberty's branch hand and the eagle's leg, but otherwise the coin is well-defined. Frosty, brilliant luster adorns each side. PCGS has seen eight finer submissions (2/17). NGC ID# 24SE, PCGS# 6623 Base PCGS# 6623

15601 1944-S MS66+ PCGS. CAC. The serif of the Large S mintmark is repunched. This lustrous and virtually pristine Premium Gem has only a hint of olive-gold toning. The strike is sharp on Liberty's head, though her skirt lines show incompleteness. NGC ID# 24SE, PCGS# 6623 Base PCGS# 6623

15602 1946 Doubled Die Reverse, FS-801, MS65 PCGS. The best known doubled die variety of the Walking Liberty series. E PLURIBUS UNUM and the wing plumage exhibit a dramatic spread. The present well-struck Gem displays sweeping luster and light straw-gold toning. The surfaces are splendidly free from contact. Population: 36 in 65, 21 finer (2/17). NGC ID# 24SJ, PCGS# 145152 Base PCGS# 6632

PROOF WALKING LIBERTY HALF DOLLARS

15603 1936 PR64 PCGS. Light butter-gold toning is consistent across this intricately defined Choice half dollar. The first-year proof Walker is the scarcest, especially without any indication of hairlines or contact marks. Housed in a green-label holder.

From The Martin Peterson Collection. NGC ID# 27V4, PCGS# 6636

1936 Walking Liberty Half, Brilliant PR66 First Proof Issue of the Series

15604 1936 PR66 PCGS. CAC. A gleaming and glassy-smooth proof, with deeply mirrored surfaces and sharply struck motifs that radiate untuned silver brilliance. The preservation is impeccable and the eye appeal is outstanding. The 1936 issue had the lowest mintage of the short proof series at just 3,901 pieces. This example is CAC-endorsed and rightfully so. NGC ID# 27V4, PCGS# 6636

1936 Half Dollar, PR66+ Subtle Obverse Contrast

15605 1936 PR66+ PCGS. CAC. The inaugural Walking Liberty half dollar proof boasts a small mintage of 3,901 coins, and pieces grading finer than the current example are scarce. This Plus-designated, CAC-approved Premium Gem displays a bold strike with modest cameo contrast on the obverse. A hint of light golden toning shows its deepest hues near the reverse peripheries. There are 42 finer submissions at PCGS (2/17). NGC ID# 27V4, PCGS# 6636

**1936 Walking Liberty Half Dollar
CAC-Approved PR66+**

15606 1936 PR66+ PCGS. CAC. The debut proof Walker is scarce in high grade, with PCGS having seen only 44 examples finer than the present (3/17). This high-end Premium Gem displays a full strike and deeply mirrored fields. Hints of tan-gold toning emerge from the borders on each side, and no distractions are observed. NGC ID# 27V4, PCGS# 6636

15607 1937 PR67 PCGS. This second-year proof Walker has a wisp of golden toning and a precise strike. The glassy fields are void of detractors. The mintage of 5,728 pieces is significantly lower than subsequent proof dates.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 5ESS, PCGS# 6637

**1937 Half Dollar, PR67+
Rarely Available Any Finer**

15608 1937 PR67+ PCGS. Many superlatives can be offered for this high-end Superb Gem Walking Liberty proof, but in the end the coin speaks for itself with its obvious originality and self-evident eye appeal. Lightly toned with whispers of olive-gray and umber patina, the glittering surfaces and sharply defined devices are virtually without fault. PCGS reports just 10 numerically finer examples. Population: 26 in 67+, 10 finer (2/17). NGC ID# 5ESS, PCGS# 6637

FRANKLIN HALF DOLLARS

15609 1951-D MS66+ Full Bell Lines PCGS. CAC. A dusting of green-gold toning graces the frosty surfaces of this high-end Premium Gem, while a sharp strike earns the Full Bell Lines designation. Examples in this grade are occasionally available, but PCGS has seen only a single finer Full Bell Lines coin (3/17). NGC ID# 24SZ, PCGS# 86659

15610 1951-S MS67 PCGS. CAC. A rarity in MS67 and unknown numerically finer. This high-end CAC coin displays vibrant luster beneath iridescent champagne toning that is framed by russet and olive-green borders. The strike is bold, although the bell lines are slightly incomplete in the vicinity of the crack. Population: 7 in 67 (1 in 67+), 0 finer. CAC: 5 in 67, 0 finer (1/17). NGC ID# 24T2, PCGS# 6660 Base PCGS# 6660

15611 1952-S MS66 Full Bell Lines PCGS. The 1952-S is scarce this fine and rarely offered finer. A sharp strike complements frosty mint luster, and both sides display dusky sea-green and golden toning. Population: 54 in 66 (8 in 66+) Full Bell Lines, 3 finer (2/17). NGC ID# 24T5, PCGS# 86663

15612 1954 "Bugs Bunny", FS-401, MS66+ Full Bell Lines PCGS. The impression of the eagle's wing feathers got transferred to the obverse through die clashing, creating one of the most famous varieties of the series, the "Bugs Bunny" Franklin half dollar. This Plus-graded Premium Gem exhibits sharply detailed design elements and vibrant mint luster, with attractive highlights of greenish-gold and cerulean-blue toning. Full definition is evident on the bell lines. Population: 32 in 67 (1 in 67+) Full Bell Lines, 0 finer. CAC: 25 in 67, 0 finer (2/17). PCGS# 147871 Base PCGS# 86667

15613 1956 MS67 Full Bell Lines PCGS. CAC. The impeccably preserved surfaces of this spectacular Superb Gem are blanketed in vivid shades of golden-tan, sea-green, and lavender-gray toning, with vibrant mint luster underneath. The design elements are well-detailed and this coin has received the Full Bell Lines designation from PCGS. Population: 32 in 67 (1 in 67+) Full Bell Lines, 0 finer. CAC: 25 in 67, 0 finer (2/17). NGC ID# 24TD, PCGS# 86671

15614 1956 MS67 Full Bell Lines PCGS. CAC. Ice-blue luster displays overtones of sea-green, yellow-gold, lavender-gray, and pale amber. This top-grade Registry coin is well-detailed and frosty. Any faint, grade-limiting surface grazes are well-hidden by the lovely toning. Population: 33 in 67 (1 in 67+) Full Bell Lines, 0 finer. CAC: 25 in 67, 0 finer (2/17). NGC ID# 24TD, PCGS# 86671

15615 1959 MS66 Full Bell Lines PCGS. The impeccably preserved surfaces of this delightful Premium Gem show a few delicate highlights of golden-tan toning, with vibrant mint luster underneath. The design elements are well-detailed, with Full Bell Lines definition on the Liberty Bell. Population: 63 in 66 (4 in 66+) Full Bell Lines, 0 finer (2/17). NGC ID# 24TJ, PCGS# 86676

**1960 Franklin, MS66+ Full Bell Lines
Only One Coin Finer**

15616 1960 MS66+ Full Bell Lines PCGS. 30th Anniversary Green Label Holder. The Plus designation sets this piece apart from its peers, placing it within the Condition Census for the 1960 Franklin half. The strike is sharp, and both sides display satiny silver luster with wisps of light golden toning. Population: 79 in 66 (3 in 66+) Full Bell Lines, 1 finer (2/17). NGC ID# 5H6J, PCGS# 86678

15617 1962 MS65 Full Bell Lines PCGS. This impressive Gem exhibits sharply detailed design elements, including full definition on the bell lines. The brilliant surfaces show no mentionable distractions, with vibrant mint luster throughout. PCGS has graded 16 numerically finer examples (2/17). NGC ID# 24TR, PCGS# 86682

15618 1962 MS65+ Full Bell Lines PCGS. The 1962 Franklin is elusive in high grade with Full Bell Lines. PCGS reports 15 MS65+ coins and 16 MS66 finer in the FBL category (2/17). The present high-end Gem displays bold definition and satiny luster. Yellow-gold toning warms each side, and die polishing lines appear in the obverse fields. NGC ID# 24TR, PCGS# 86682

**1962 Half Dollar, MS66 Full Bell Lines
A Top-Certified Representative**

15619 1962 MS66 Full Bell Lines PCGS. A delightful Premium Gem Franklin half dollar with sharply detailed design elements that show full definition on the bell lines and virtually pristine surfaces that radiate vibrant mint luster on both sides. Hints of golden-tan, magenta, and burnt-orange toning add to the outstanding eye appeal. Population: 16 in 66 Full Bell Lines, 0 finer (2/17). NGC ID# 24TR, PCGS# 86682

15620 1962-D MS66 Full Bell Lines PCGS. Booming luster sweeps this virtually pristine late-date Franklin half dollar. Only a trace of ice-blue toning is present, west of the clapper. A well struck and outstanding Premium Gem. Population: 34 in 66 (1 in 66+) Full Bell Lines, 0 finer (2/17). NGC ID# 24TS, PCGS# 86683

15621 1962-D MS66 Full Bell Lines PCGS. This sharp Premium Gem was struck from fresh dies, with satiny luster that shows die preparation lines in the fields. A dusting of light champagne toning blankets each side. Only a couple of microscopic ticks on Ben's cheek limit the grade. Population: 34 in 66 (1 in 66+) Full Bell Lines, 0 finer (2/17). NGC ID# 24TS, PCGS# 86683

15622 1963 MS65+ Full Bell Lines PCGS. This high-end Gem offers a sharp strike and untuned, satiny mint luster. A few tiny ticks on each side determine the grade. PCGS has seen only five finer submissions in the Full Bell Lines category (2/17). NGC ID# 24TT, PCGS# 86684

PROOF FRANKLIN HALF DOLLARS

15623 1950 PR67 PCGS. The 1950 is the first and lowest mintage proof Franklin half date. The present brilliant and lustrous Gem appears devoid of post-strike imperfections. The strike is good, with only slight incompleteness on Franklin's cheek and the bottom of the Liberty Bell. NGC ID# 27VA, PCGS# 6691

15624 1950 PR67 PCGS. CAC. Light almond-gold toning accompanies this pristine and crisply struck Superb Gem. Although later proof dates of the series had mintages into the millions, the 1950 is much scarcer, due to a production of only 51,386 pieces. NGC ID# 27VA, PCGS# 6691

**1950 Half Dollar, PR66 Cameo
Conditionally Elusive**

15625 1950 PR66 Cameo PCGS. The inaugural proof Franklin half dollar is scarce in high-grade Cameo. This Premium Gem displays brilliant, contrasted surfaces with a full strike and deeply mirrored fields. Registry Set collectors especially will be interested in the scarcity of this piece, as finer examples are rare. Population: 66 in 66 (5 in 66+) Cameo, 21 finer (2/17). NGC ID# 27VA, PCGS# 86691

15626 1951 PR67 PCGS. Glimmering fields have subtle contrast with the satiny devices on this Superb Gem proof, and the strike is full throughout. Delicate olive and lavender-blue toning emerges from the borders, but the interiors are widely brilliant. PCGS has seen four finer non-Cameo proofs (2/17). NGC ID# 27VB, PCGS# 6692

15627 1951 PR67 PCGS. CAC. This brilliant, glimmering Superb Gem proof displays a full strike and essentially unblemished surfaces with modest field-device contrast on each side. Only four numerically finer proofs are reported at PCGS. CAC: 52 in 67, 3 finer (1/17). NGC ID# 27VB, PCGS# 6692

15628 1951 PR67 PCGS. CAC. This spectacular Superb Gem proof exhibits razor-sharp definition on all design elements and deeply reflective fields throughout. The impeccably preserved surfaces show just the faintest hint of pale gold toning at selected angles. PCGS has graded five numerically finer examples (2/17). NGC ID# 27VB, PCGS# 6692

15629 1951 PR66 Cameo PCGS. Mercury-like liquidity in the fields gives this Premium Gem Cameo proof exceptional visual appeal. The strike is full, and the frosty motifs offer stark cameo contrast. Neither side exhibits toning. NGC ID# 27VB, PCGS# 86692

15630 1951 PR66 Cameo PCGS. A fully struck specimen that boasts frosty devices and smooth, glassy fields. Though the coin appears brilliant upon cursory inspection, a lens reveals a distribution of minute autumn-gold and blue-green freckles. Population: 80 in 66 (3 in 66+) Cameo, 24 finer (2/17). NGC ID# 27VB, PCGS# 86692

15631 1954 PR68 Cameo PCGS. CAC. This magnificent PR68 specimen exhibits needle-sharp definition on all design elements and the deeply mirrored fields contrast boldly with the frosty devices. The brilliant surfaces are virtually pristine. Population: 61 in 68 (1 in 68+) Cameo, 0 finer. CAC: 35 in 68, 0 finer (2/17). NGC ID# 27VE, PCGS# 86695

15632 1955 PR67 Deep Cameo PCGS. CAC. The Liberty Bell and Franklin display dramatic frost. The mirrored fields are void of imperfections. One tiny fleck on the bell near the crack provides an identifier. Population: 66 in 67 (3 in 67+) Deep Cameo, 35 finer. CAC: 18 in 67, 23 finer (2/17). NGC ID# 27VE, PCGS# 96696

**1956 Half Dollar, PR69 Deep Cameo
Type Two Reverse, Extraordinary Eye Appeal**

15633 1956 Type Two PR69 Deep Cameo PCGS. The Type Two design is more available and the proof quality is often exceptional, but no other Deep Cameo example exceeds this exquisite Superb Gem. Pristine motifs are stark-white against jet-black mirrors on both sides, with nary a fault or distraction. Only the eye appeal exceeds the technical grade, which is tied for finest at either service. Population: 72 in 69 Deep Cameo, 0 finer (2/17). NGC ID# 24TW, PCGS# 96697

**1956 Type Two Franklin, PR69 Deep Cameo
Top-Grade Registry Coin**

15634 1956 Type Two PR69 Deep Cameo PCGS. The usual Type Two reverse, showing the eagle boldly defined. This almost flawlessly preserved Deep Cameo is conditionally scarce and tied for the finest certified (2/17). A full strike enjoys strong field-device contrast and thick frost-white luster on the relief elements. Population: 72 in 69 Deep Cameo, 0 finer (2/17). NGC ID# 24TW, PCGS# 96697

15635 1956 Type One, FS-901, PR68+ Ultra Cameo NGC. The reverse eagle is less well defined on the Type Two 1956 proof. This high-end Ultra Cameo displays full detail and stark white-on-black contrast with no distracting marks or hairlines. The coin is entirely untoned. PCGS# 510121 Base PCGS# 96686

15636 1957 PR69 Cameo NGC. The brilliant surfaces of this magnificent PR69 specimen are just one tick away from perfection and the sharply detailed, frosty design elements contrast boldly with the deeply reflective fields. Census: 37 in 69 Cameo (8 in 69★), 0 finer (2/17). NGC ID# 24TX, PCGS# 86698

15637 1957 PR68 Deep Cameo PCGS. Most proof 1957 Franklin halves exhibit minimal cameo contrast, but the present brilliant piece exhibits ice-white motifs and legends. Fully struck and flawless. Population: 85 in 68 Deep Cameo, 4 finer (2/17). NGC ID# 24TX, PCGS# 96698

15638 1957 PR68 Deep Cameo PCGS. CAC. The sharply detailed design elements of this spectacular PR68 specimen have a frosty texture that creates intense cameo contrast with the deeply mirrored fields. The brilliant surfaces are impeccably preserved, with incredible eye appeal. Population: 86 in 68 Deep Cameo, 4 finer. CAC: 25 in 68, 0 finer (2/17). NGC ID# 24TX, PCGS# 96698

15639 1961 PR68 Deep Cameo PCGS. This magnificent PR68 half dollar is a virtually perfect coin, with sharply detailed, frosty design elements that contrast profoundly with the deeply mirrored fields. The brilliant surfaces show no sign of toning. PCGS has graded one numerically finer example (2/17). NGC ID# 24TZ, PCGS# 96702

15640 1963 PR68+ Deep Cameo PCGS. Although Deep Cameos are available in PR68, PCGS has only designated five PR68+ and just 20 PR69 (2/17). This piece displays full detail and immaculately preserved surfaces with brilliant frost-white motifs and untuned fields. Dramatic white-on-black contrast captivates the eye. NGC ID# 27VL, PCGS# 96704

KENNEDY HALF DOLLAR

15641 1972-D No "FG", FS-901, MS63 PCGS. The *Cherrypickers* Guide, 5th edition, attributes the missing designer's initials to die abrasion. This pleasing Select specimen is sharply detailed on the obverse, but the reverse devices are softly rendered. The lightly marked surfaces show hints of golden-tan and lavender toning. Population: 4 in 63, 1 finer (2/17). NGC ID# 24UD, PCGS# 147888 Base PCGS# 411635

SMS KENNEDY HALF DOLLAR

15642 1966 SMS, No FG, FS-901, SP67 PCGS. Frank Gasparro's initials are missing from the reverse of this elusive and popular *Cherrypickers*' variety. This Superb Gem example is conditionally rare and tied for the finest at PCGS. The strike is bold, and neither side displays noticeable toning. The fields and the devices are equally reflective. Population: 11 in 67, 0 finer (2/17). NGC ID# 24WH, PCGS# 145426 Base PCGS# 411636

PROOF KENNEDY HALF DOLLARS

15643 1964 PR69 Deep Cameo PCGS. The debut Kennedy half proof in 90% silver is scarce in this, the top Deep Cameo grade, particularly in a PCGS holder. The present coin offers brilliant white-on-black contrast and surfaces that appear flawless to all but the most trained and discerning eyes. An excellent Registry coin or proof type representative. Population: 91 in 69 Deep Cameo, 0 finer (2/17). NGC ID# 24WF, PCGS# 96800

15644 1964 PR69 Deep Cameo PCGS. Type Two Reverse. Icy motifs rise in full detail above the mirrored fields. Brilliant aside from a few pinpoint tan flecks on the cheek and the field near the chin. Population: 91 in 69 Deep Cameo, 0 finer (2/17). NGC ID# 24WF, PCGS# 96800

15645 1964 Accented Hair, FS-401, PR68 Cameo PCGS. The popular Accented Hair variety, showing accentuated detail in Kennedy's hair. This high-end Cameo displays brilliant surfaces and crystal-like mirroring in the fields. Field-device contrast is impeccable and attractive. NGC ID# 4EA9, PCGS# 145626 Base PCGS# 86801

15646 1964 Accented Hair, FS-401, PR68 Cameo PCGS. Publicized during the 1990s, the introductory "Accented Hair" proof subtype has since achieved *Guide Book* recognition. The hair above the ear is deeply delineated, relative to its more prevalent successor. This brilliant and flashy example is immaculate and exhibits a bold strike. NGC ID# 4EA9, PCGS# 145626 Base PCGS# 86801

15647 1970-S Doubled Die Obverse, FS-101, PR69 Cameo NGC. The date and TRUST are nicely die doubled. The single-finest certified example of this surprisingly scarce *Cherrypickers*' variety. Fully struck and brilliant with immaculate preservation. Census: 1 in 69 Cameo, 0 finer (2/17). NGC ID# 24WL, PCGS# 146065 Base PCGS# 86806

15648 1971-S PR69 Deep Cameo PCGS. Proof 1971-S Kennedy halves are available in PR69 and PR69 Cameo, but Deep Cameos are scarce in this condition and unknown finer. A hint of light golden toning warms the current example. The design elements are fully struck, and both sides display stark field-device contrast. Population: 69 in 69 Deep Cameo, 0 finer (2/17). NGC ID# 24WM, PCGS# 96807

End of Session One

SESSION TWO

COLONIALS

1652 Noe-5 Oak Tree Shilling, MS64
 Condition Census, Among the Finest Known
 Ex: Hawn, Partrick

15649 1652 Oak Tree Shilling, IN at Bottom, MS64 NGC. Noe-5, W-470, Salmon 3-D, R.2. Ex: Donald G. Partrick Collection. 67.7 grains. A satiny, deep gunmetal-gray example with beautiful, original surfaces. The strike is crisp except at the top of the tree, which is at the crest of the S-wave characteristic of rocker press emission. As usual for Noe-5, the obverse is somewhat misaligned due south with IN M partly off the flan. The reverse of this Choice Mint State piece has nearly perfect centering. The familiar die state for Noe-5, which features a heavy horizontal obverse break at 12 o'clock, prominent vertical breaks on the right reverse, a less conspicuous vertical break below the 2 in the date, and chipping within the N and M in AN DOM. Listed on page 41 of the 2017 Guide Book.
 Ex: Reed Hawn Collection of Massachusetts Silver (Stack's, 5/1998), lot 8; Donald Groves Partrick Collection / FUN Signature (Heritage, 1/2015), lot 5532. NGC ID# 2ARL, PCGS# 45362 Base PCGS# 20

1652 Pine Tree Shilling, MS64
 Large Planchet, Noe-2, W-700, Salmon 2-C
 The Finest Known, Ex: Eliasberg, Partrick

15650 1652 Pine Tree Shilling, Large Planchet, No Pellets at Trunk, Noe-2, W-700, Salmon 2-C, R.5, MS64 NGC. Ex: Eliasberg, Donald G. Partrick Collection. 73.1 grains. No Pellets at Trunk. The Straight Tree. In a Ford:XII catalog description for a Noe-2 lot, the writer noted "the fact that none of the four Boyd-Ford coins are better than Choice EF shows that this is about as good as it gets for the variety."

The present lot proves an exception to the rule. Graded "MS-60 or finer" in its Eliasberg catalog appearance two decades ago, the coin was noted as "clearly a Condition Census contender" with the comment, "it would be difficult to imagine a finer example of N-2."

One can imagine a Noe-2 with complete peripheral legends, but that would be the sole consequential improvement over the present coin. The light-to-medium cream-gray and chestnut-gold surfaces are satiny. They are also unabraded, save for a solitary tick on the base of the first I in XII and a trivial hairline west of the lowest left tree branch. The strike is bold throughout, although about half of IN MAS is absent and several other letters, mostly on the reverse, are missing their upper tips. No Noe-2 Pine Tree shillings are known with complete legends.

Incomplete peripheral letters are characteristic of Large Planchet Pine Tree shillings, which were struck on dies that were oversize relative to the irregular diameter planchets, typically clipped down to standard weight at the Boston Mint. The current piece is larger than most Noe-2 examples. For example, it exceeds in weight three of the four Ford:XII pieces, and all five of the Hain Family coins.

The NGC Census has recorded a total of 47 Large Planchet, No Pellets Pine Tree shillings. Among all varieties (Noe-1 through Noe-14), NGC has certified five pieces as MS64, two as MS65, and none finer (2/17). This example is the finest known Noe-2. Listed on page 41 of the 2017 *Guide Book*.

Ex: Louis E. Eliasberg, Sr. Collection (*Bowers and Merena*, 5/1996), lot 9; Donald Groves Partrick; Partrick Collection (*Heritage*, 1/2015), lot 5569; ANA Signature (*Heritage*, 8/2016), lot 3923. NGC ID# 5JDU, PCGS# 45370 Base PCGS# 23

1652 Pine Tree Shilling, MS65
Possibly the Finest Known Noe-4
Ex: F.C.C. Boyd, Ford, Partrick

15651 1652 Pine Tree Shilling, Large Planchet, Reversed N, MS65 NGC. Noe-4, W-720, Salmon 4-D, R.4. 72.6 gn. No Pellets at Trunk. Reversed N in IN. First N reversed in ENGLAND. Noted in the Ford catalog as “on a par for technical grade with both Uncirculated Hain coins (ex: Roper and ex: Norweb) and far nicer than Picker’s. ... The top of the reverse seems scraped but this is actually a result of the piece going through the roller dies, elongating the letters in AND and the dots in the outer beaded border above them. Struck from the broken state of the reverse with die breaks forming in the left reverse field.” The field break somewhat resembles a narrow cauldron with flames flickering from the top. The break lacks the unified upper “tail” found on the late die state Noe-4.5. The “stretching” of upper obverse or reverse design elements is encountered fairly often on Large Planchet Pine Tree shillings, and helps make each piece unique, along with other characteristics such as the irregular diameters and degree of “S” shaped wave.

The present Gem is a magnificent example that, in our opinion, is equal to, or finer than the Norweb-Hain example, and finer than the first Ford coin, ex: Wurtzbach. This piece is far finer than the third Ford coin, a borderline Uncirculated example. The walnut-brown, dove-gray, and jade-green surfaces shimmer with luster and are devoid of remotely mentionable detractions. The centers retain the central horizontal wave characteristic of rocker press emission. The strike is crisp across all design elements, although portions of MAS and the N and W in NEW lack their tops due to a Boston Mint straight clip. A desirable contribution to either a variety or type set of Massachusetts silver. Listed on page 41 of the 2017 *Guide Book*.

Ex: F.C.C. Boyd Collection; John J. Ford, Jr. Collection, Part XII (*Stack's*, 10/2005), lot 84; Donald Groves Partrick Collection (*Heritage*, 1/2015), lot 5571; Long Beach Signature (*Heritage*, 2/2016), lot 3005. NGC ID# 2ARX, PCGS# 45372 Base PCGS# 23

1652 Noe-16 Pine Tree Shilling
Small Planchet, AU50
Evenly Struck

15652 1652 Pine Tree Shilling, Small Planchet, AU50 NGC. Noe-16, W-835, Salmon 2-B, R.2. 70.0 gn. A fairly late die state with breaks in the lower left branches, and on the beads and ornament beneath the tree. This sea-green and wheat-gold example is slightly lozenge-shaped from a few Boston Mint clips, but the legends are complete aside from the top of IN. Wear is minimal, and no post-strike marks are apparent. Listed on page 41 of the 2017 *Guide Book*. NGC ID# 2ARZ, PCGS# 24

1787 Fugio Cent, STATES UNITED, MS65 Brown
4 Cinquefoils, Pointed Rays, Newman 11-X

15653 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, MS65 Brown PCGS. N. 11-X, W-6790, R.4. This impressive Gem offers smooth medium brown surfaces, with faded traces of original red on the reverse. Well-centered and well-preserved, with sharply detailed design elements and some heavy clash marks in the right obverse field. The high grade of this coin and a vertical die crack at 6 o'clock may indicate this piece was one of the 132 examples preserved in the Bank of New York Hoard, which was finally dispersed in 1948. Listed on page 89 of the 2017 *Guide Book*. Population: 12 in 65 (1 in 65+) Brown, 3 finer (2/17). NGC ID# AX5E, PCGS# 883

HALF CENT

1855 C-1 Half Cent, MS65 Red
Lustrous and Attractive

15654 1855 C-1, B-1, R.1, MS65 Red PCGS. Lustrous terra-cotta red blends into flame-orange at the margins of this lustrous Gem half cent. Pale-blue accents join a peppering of microscopic carbon flecks that seem strategically placed to be inconsequential. The strike is centrally sharp but less-crisp at the margins, where some of the stars are rounded and about one-third of the dentils are mushy. Our EAC grade MS65. PCGS reports no finer coins in Red. Population: 33 in 65 Red, 0 finer (1/17). NGC ID# 26YZ, PCGS# 35335 Base PCGS# 1235

LARGE CENTS

1793 Wreath Cent, S-8, B-13, VF30
Vine and Bars Edge

15655 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3, VF30 PCGS. A pleasing VF30 specimen of this important first-year issue. Thin leaves pointing right, a triangular ribbon bow, and the beginnings of a diagonal bulge inside the wreath on the reverse are diagnostic of the popular Sheldon-8 *Guide Book* variety. The lightly worn high points feature attractive rose-gray color, leaving the fields and lower-relief areas with a pleasing layer of steel-blue patina. Strongly defined and well-centered without any distracting flaws. Housed in a green label holder. Our EAC grade Fine 15. Population: 1 in 30, 11 finer (2/17).
From The Martin Peterson Collection. NGC ID# 223H, PCGS# 35456 Base PCGS# 1347

1794 Head of '94 Cent, VF30**Rare Sheldon-39 Variety****The Eighth Finest Known**

15656 1794 Head of 1794, S-39, B-27, R.6, VF30 PCGS. Breen Die State II, with a faint crack from the lower reverse rim through the left ribbon end. Both die chips in the obverse field below the cap are visible, although the smaller one near the dentils is faint. Sheldon-39 is rare in all grades, and the present example is near the Condition Census, the eighth finest known, and sixth best in collectors' hands. Wear is light and even, and the surfaces are mostly smooth with medium brown color. The obverse shows several scattered marks, and the lower portion of the date is weak. The reverse has some minor granularity in the recesses of the wreath. Each side has a mildly glossy appearance and presents well to the naked eye. Our EAC grade VF20.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 223P, PCGS# 35582 Base PCGS# 901374

INDIAN CENTS**1877 Indian Cent, MS63 Red and Brown****Series Key Date**

15657 1877 MS63 Red and Brown PCGS. The 1877 Indian cent is not seen as frequently in Mint State as the certified population totals would suggest. This collectible Red and Brown example displays luminous copper-red undertones with primarily auburn-brown toning. The strike is sharp, and abrasions are at a minimum. NGC ID# 2284, PCGS# 2128

1899 Cent, MS67 Red**Ideal 19th Century Type Coin**

15658 1899 MS67 Red PCGS. The 1899 is a popular choice for type purposes, given its relative availability in high grade and its status as the final 19th century date. Glints of lavender accent primarily copper and pumpkin-gold surfaces aglow in swirling luster. This impeccable Superb Gem offers bold ribbon and feather detail. The O in ONE is clashed in the field left of Liberty's visage. Population: 24 in 67 (3 in 67+) Red, 2 finer (2/17). NGC ID# 228U, PCGS# 2204

PROOF INDIAN CENTS**1863 Indian Cent, PR65 Deep Cameo****The Only PCGS Deep Cameo Proof****Only 460 Pieces Struck**

15659 1863 PR65 Deep Cameo PCGS. From a small wartime mintage of 460 pieces, the 1863 proof Indian cent is seldom encountered with Deep Cameo surfaces. This delightful Gem exhibits razor-sharp definition on all design elements, and the deeply mirrored fields contrast intensely with the frosty devices. No mentionable distractions are evident and eye appeal is terrific. Population: 1 in 65 Deep Cameo, 0 finer (2/17). NGC ID# 229D, PCGS# 92262

1864 Copper-Nickel Cent, PR66 Cameo
Impeccable Quality

15660 1864 Copper Nickel PR66 Cameo PCGS. Whispers of soft lilac and ice-blue gather on the strongly cameoed yellow-gold surfaces of this Premium Gem proof. An exacting strike imparts strong definition to the frosty design elements, further enhancing the coin's overall appeal. Both sides are impeccably preserved. Population: 9 in 66 Cameo, 1 finer (2/17).
Ex: *Central States Signature (Heritage, 4-5/2009)*, lot 1179. NGC ID# 229E, PCGS# 82265

1887 Cent, PR66 Red and Brown
Conditionally Rare

15661 1887 PR66 Red and Brown PCGS. Glimmers of copper-orange emerge from beneath auburn-brown toning on this Premium Gem proof. Red and Brown coins are rarely seen this fine, and full Red pieces are prohibitively rare so well-preserved. The strike is sharp and there are no major carbon spots. Population: 11 in 66 (1 in 66+) Red and Brown, 2 finer (1/17). NGC ID# 22A9, PCGS# 2349

LINCOLN CENTS

1914-D Lincoln Cent, MS64 Red and Brown
Sought-After Series Key

15662 1914-D MS64 Red and Brown PCGS. CAC. From a mintage of fewer than 1.2 million pieces, the 1914-D Lincoln cent was somewhat overlooked by contemporary collectors and high-grade examples with red and brown surfaces are quite elusive in today's market. The original red surfaces of this attractive Choice example have mellowed to light brown in some areas, but few signs of contact are evident. The design elements are sharply detailed throughout and eye appeal is outstanding. NGC ID# 22BH, PCGS# 2472

1916-D Cent, MS66 Red
Satin and Well-Struck
Rare This Fine

15663 1916-D MS66 Red PCGS. This satiny copper-orange Premium Gem displays a full strike despite minor die erosion around the relief elements. No carbon spotting is observed, and the fields are free of bothersome abrasions. The 1916-D is rare this fine in Red condition, and higher-grade pieces are prohibitively so. Population: 17 in 66 (4 in 66+) Red, 2 finer (1/17). NGC ID# 22BP, PCGS# 2491

1916-D Lincoln Cent, MS66 Red
Impeccably Preserved and Lustrous

15664 1916-D MS66 Red PCGS. The original red surfaces of this delightful Premium Gem are impeccably preserved, with radiant mint luster on both sides. Razor-sharp definition is evident on all design elements and the surfaces have a charming matte-like texture, reminiscent of the proof issues of that era. Overall eye appeal is terrific. Population: 17 in 66 (4 in 66+) Red, 2 finer (2/17). NGC ID# 22BP, PCGS# 2491

1922 No D Cent, Choice About Uncirculated
Die Pair 2, Strong Reverse
Old Green Label Holder

15665 1922 No D, Strong Reverse, FS-401, AU55 PCGS. The strong second 2 in the date and the razor-sharp reverse indicate this cent was struck from Die Pair 2, the most-sought variety of this in-demand Denver issue with the Missing D. The obverse is smooth and lightly worn with only minor ticks on the high points, while the reverse retains nearly all of its pinpoint sharpness. There is no trace of the D mintmark. Housed in an old green label holder. Population: 92 in 55, 94 finer (2/17).
From The Martin Peterson Collection. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

1922 No D Cent, AU55
Die Pair 2, Strong Reverse

15666 1922 No D, Strong Reverse, FS-401, AU55 PCGS. Die Pair 2. This deeply toned chocolate-brown example has faint olive-colored hues over the lightly worn high points, with smooth surfaces overall. The Die Pair 2 variety is the most highly desired of all of the 1922-D Lincoln cent varieties. The reverse is strong, and the mintmark is complete effaced. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

1923 Cent, MS67+ Red
Registry Set Quality

15667 1923 MS67+ Red PCGS. CAC. Although somewhat unexciting in circulated condition, the 1923 Lincoln cent becomes an important condition rarity when sought in a Registry Set-worthy grade. This high-end, CAC-approved Superb Gem displays a full strike and luminous copper-orange mint luster. A couple of tiny flecks tucked inside the O in ONE are the only discernible imperfections. Finer examples of this date will be nearly impossible to acquire. Population: 20 in 67 (2 in 67+) Red, 2 finer. CAC: 3 in 67, 0 finer (2/17). NGC ID# 22CA, PCGS# 2545

1985 Cent, Dazzling MS68+ Red
Flaming Orange Luster
Tied for the Finest at PCGS

15668 1985 MS68+ Red PCGS. It is extremely rare that a Lincoln cent from this period warrants a grade from PCGS as fine as MS68+ Red, but this piece fully deserves it. The coin appears virtually flawless even under magnification, and a 10x loupe scrutinizing every square millimeter of the surfaces finds microscopic imperfections that can be counted on one hand with fingers leftover. This glowing copper-orange 1985 cent is tied for the finest at PCGS. In fact, the first issue in the series that can usually be considered collectible in finer condition at PCGS is the 1999-D. Population: 41 in 68 (3 in 68+) Red, 0 finer (2/17). NGC ID# 22J3, PCGS# 3071

PROOF LINCOLN CENTS

1936 Satin Finish Cent, PR66 Red
Just One Finer Example at Both Services

15669 1936 Type One — Satin Finish PR66 Red PCGS. CAC. The Satin Finish proofs of 1936 were the first proof cents struck that year and survive in far smaller numbers than the later Brilliant Finish specimens. This is a magnificent Premium Gem example with full Red surfaces and complementary accents of rose. A strong lens picks up minute contact marks on the shoulder, but the fields are exceptionally clean. Population: 36 in 66 (3 in 66+) Red, 1 finer. CAC: 6 in 66, 0 finer (2/17). NGC ID# 22L2, PCGS# 3332

**1936 Lincoln Cent, PR66 Red Cameo
Brilliant Finish
Only One Finer Coin at PCGS**

15670 1936 Type Two — Brilliant Finish — PR66 Red Cameo PCGS.

The Philadelphia Mint resumed its program of commercial proof set offerings in 1936, after a two-decade hiatus. The cents produced early in the year had a Satin finish, but this proved unpopular with collectors, so the Mint switched to the Brilliant Finish partway through the year. Coins with Cameo contrast are seldom encountered. A total of 5,569 proof Lincoln cents was produced in 1936, split between the two finishes. Proofs could be ordered by the set, but individual pieces could also be requested. The cent was priced at 16 cents per coin, but single coin purchases required the same 8 cents postage as a full proof set, so buying by the set was certainly advantageous. The original packaging was somewhat primitive, with each coin enclosed in a transparent cellophane envelope, but this helped keep the price of proof offerings down to a reasonable level. Most of the coins were soon removed from the original packaging and stored in albums or commercially produced flips. All these storage methods tended to result in finger prints from handling, oxidation, and fly spotting, making 1936 proof cents with pristine surfaces quite elusive today.

The present coin is a spectacular Premium Gem, with impeccably preserved original red surfaces that show highlights of crimson on the upper reverse. The design elements are sharply detailed and the fields are deeply mirrored, contrasting boldly with the frosty devices. Eye appeal is terrific Population: 4 in 66 Cameo, 1 finer (2/17). NGC ID# BY3A, PCGS# 83335

**1941 Cent, PR67 Red
Tied for Finest Certified
Registry Set Essential**

15671 1941 PR67 Red PCGS. The 1941 proof Lincoln cent is plentiful in most grades but becomes rare at the Superb Gem Red level. PCGS lists only eight submissions in PR67 Red and none finer, while NGC contributes just nine more in this grade, also with none finer (2/17). No Cameos are known. These rare top-tier coins are actively sought-after by Registry collectors. This piece is fully struck from highly polished dies, delivering watery copper-orange fields that display unsurpassed preservation. A couple of tiny flecks appear near the T in TRUST, but there are no other mentionable imperfections. Eye appeal is outstanding. NGC ID# 3H34, PCGS# 3350

TWO CENT PIECES

**1866 Two Cent, MS66 Red
None Certified Finer**

15672 1866 MS66 Red PCGS. This magnificent 1866 two cent is one of the finest examples extant from an original mintage of 3.1 million coins. The obverse is light pumpkin-gold with razor-sharp detail on the olive leaves and shield. A touch of softness occurs on the reverse wreath. Blushes of deep color complement rose-gold color on that side. Housed in a first generation holder. Population: 13 in 66 Red, 0 finer (2/17).

From The Martin Peterson Collection. NGC ID# 274R, PCGS# 3590

1872 Two Cent Piece, MS65 Red and Brown
Doubled Die Obverse

15673 1872 Doubled Die Obverse, FS-101, MS65 Red and Brown NGC. The *Cherrypickers'* reference comments: "... this doubled die is scarce in relation to the total 1872 population." Doubling is most easily seen on IN GOD WE TRUST. The 1872 two cent piece overall is scarce in Gem condition, and this Red and Brown example displays lovely violet and copper-orange hues. The strike is weak on the wreath bowknot but well-executed elsewhere. No finer Red and Brown coins have been certified by the grading services (2/17). NGC ID# 22NG, PCGS# 38293 Base PCGS# 3613

PROOF THREE CENT SILVER

1867 Three Cent Silver, PR67
Remarkable Multicolor Patina

15674 1867 PR67 NGC. Spectacular apple-green, cherry-red, and peach-gold patina endows this fully struck and pristine specimen. Three cent silver pieces were replaced by fractional currency and three cent nickels during this period, explaining 1867 three cent silver's low mintage of 4,000 business strikes and 625 proofs. Census: 11 in 67 (2 in 67+★), 1 finer (2/17). NGC ID# 27CD, PCGS# 3717

PROOF THREE CENT NICKEL

1868 Nickel Three Cent, PR67 Cameo
Top-Grade Coin at PCGS

15675 1868 PR67 Cameo PCGS. CAC. Tied with one other as the finest Cameo at PCGS, with no Deep Cameos numerically equal. This piece offers a full strike complemented by thick, frosty luster on the devices. The fields are deeply mirrored, and hints of light champagne toning grace each side. The CAC endorsement is significant, as only one other Superb Gem Cameo has been so awarded. Population: 2 in 67 Cameo, 0 finer. CAC: 2 in 67, 0 finer (2/17). NGC ID# 275N, PCGS# 83764

LIBERTY NICKEL

1907 Liberty Nickel, MS66+
Only One Finer Coin at PCGS

15676 1907 MS66+ PCGS. CAC. This Plus-graded Premium Gem exhibits sharply detailed design elements in most areas, but a touch of softness shows on the lower wreath. The well-preserved surfaces radiate especially vibrant mint luster and show a few highlights of greenish-gold toning. Overall eye appeal is simply tremendous. Population: 52 in 66 (5 in 66+), 1 finer. CAC: 12 in 66, 0 finer (2/17). NGC ID# 277J, PCGS# 3868

BUFFALO NICKELS

1915-D Buffalo Nickel, MS66+
Only Three Finer Coins at PCGS

15677 1915-D MS66+ PCGS. Despite the mintage of more than 7.5 million pieces, the 1915-D Buffalo nickel is almost never seen in grades above the MS66 level. This spectacular Plus-graded Premium Gem exhibits sharply detailed design elements and impeccably preserved surfaces, with vibrant mint luster throughout. Population: 41 in 66 (4 in 66+), 3 finer (2/17).
From The R. Thayer Sheets Yorktown Collection. NGC ID# 22R8, PCGS# 3928

1923 Nickel, Iridescent MS67
Top-Grade Registry Coin

15678 1923 MS67 PCGS. The 1923 Buffalo nickel is rare in Superb Gem condition, and the present MS67 coin is among the finest known. The beautifully preserved surfaces yield rich satin luster with subtle iridescence throughout. The strike is a trifle soft on the bison's shoulder and the hair above the Indian's braid, but the overall sharpness is above average for the issue. Population: 17 in 67, 0 finer (1/17). NGC ID# 22RV, PCGS# 3949

1924-D Nickel, Toned MS65+
Above-Average Strike

15679 1924-D MS65+ PCGS. CAC. The profound strike softness with which examples of this issue were typically produced contributes to the scarcity of high-grade survivors. This high-end Gem exhibits a minor degree of weakness on the bison's head and shoulder, as well as on portions of the obverse portrait, though the strike seems above-average for the issue. The Indian's braid, the date, the bison's horn and tail, and the lettering are all sharply defined. Excellent surface preservation confirms this coin's Gem status. Iridescent champagne, lavender, and ice-blue toning encompasses each side, adding to the eye appeal. PCGS has graded just eight examples finer (2/17). NGC ID# 22RY, PCGS# 3952

1925-S Nickel, Well-Struck MS65+
Only One Numerically Finer at PCGS

15680 1925-S MS65+ PCGS. CAC. The 1925-S nickel is available through MS64, but at the Gem level, where strike quality begins to factor into the grade assessment, the certified population plummets. The branch mints in the 1920s took little concern with the strike quality of their coins, and the Buffalo nickel, already difficult to strike properly due to the hardness of the alloy, arguably suffered the most as a result. This high-end Gem representative (the only MS65+ coin at PCGS) is deeply satiny, with blended rainbow peripheral hues surrounding lighter lavender-gold and pale blue centers. The obverse die is fairly fresh, while the reverse die shows fatigue in the border recesses, an often seen characteristic, as the undated reverse dies were frequently used well into the next year if they had not already completely failed. Some of the highest details on the reverse are soft, as a result, though the horn is complete and the obverse is well-defined. Population: 28 in 65 (1 in 65+), 1 finer. CAC: 7 in 65, 0 finer (2/17). NGC ID# 22S4, PCGS# 3956

1927 Nickel, Frosty MS67
None Graded Finer

15681 1927 MS67 PCGS. A common date in lower grades, the 1927 Buffalo nickel becomes a major condition rarity in MS67 and is unknown finer. This glistening, iridescently silver Superb Gem displays seemingly flawless surfaces with softly frosted mint luster. Slight strike weakness on the central high points is not obtrusive. Population: 16 in 67, 0 finer (2/17). NGC ID# 22S8, PCGS# 3960

EARLY HALF DIMES

1794 Flowing Hair Half Dime, XF45
First-Year of Design, V-2, LM-2

15682 1794 V-2, LM-2, R.5, XF45 NGC. The second-scarcest among the four known 1794 varieties. Deep dove-gray and lavender toning dominates, though the reverse margin also displays sun-gold and blue-green. Unabraded save for a couple of hair-thin marks near the profile and above the left (facing) wing. Census: 9 in 45, 90 finer (2/17).

Ex: *Long Beach Signature* (Heritage, 2/2012), lot 3270. NGC ID# 22ZU, PCGS# 38582 Base PCGS# 4250

1795 Flowing Hair Half Dime, MS66
Only Two Numerically Finer at PCGS
Popular V-6, LM-9 Variety

15683 1795 V-6, LM-9, R.4, MS66 PCGS. CAC. The 1795 Flowing Hair half dime claims a mintage of 78,660 pieces, with 10 die varieties known for the date. A total of eight obverse and five reverse dies were combined to produce the 10 known varieties. This coin represents the LM-9 variety, identified by the low position of L in LIBERTY, with IB distant, and the reverse with one inner and no outer berries under the eagle's left (facing) wing. The LM-9 variety is scarce in absolute terms, but it is one of the three most "common" varieties of this date. The obverse die was used previously to strike the LM-8 variety of 1795. This was the only use of the reverse die.

The 1795 Flowing Hair half dime has been popular with collectors since the earliest days of the hobby. The issue began appearing at auction as early as the A.C. Kline Sale (M. Thomas & Sons, 6/1855), where an example was offered in lot 259. Philadelphia attorney and coin collector Harold P. Newlin published the first work on half dime die varieties in 1883, listing the LM-9 variety as his number 3 and noting, "This variety is scarce." The record price realized for a 1795 half dime was recently set by the spectacular MS67 PCGS LM-10 specimen in the Pogue Collection, which brought \$176,250.

The present coin is a delightful Premium Gem with sharply detailed design elements and vibrant mint luster throughout. Both sides show heavy clash marks and the obverse shows the characteristic die crack from the rim through Y and the bust, down through the top of 7 and back to the rim. A few light planchet adjustment marks show in the area of the eagle's legs. The well-preserved surfaces display attractive shades of lavender, blue, and greenish-gold toning and eye appeal is terrific. Population (all varieties): 11 in 66 (2 in 66+), 2 finer. CAC: 7 in 66, 1 finer (1/17). PCGS# 38593 Base PCGS# 4251

BUST HALF DIMES

1831 V-4, LM-4 Half Dime, MS67
Ex: Eliasberg, Gardner

15684 1831 V-4, LM-4, R.2, MS67 NGC. Star 2 is repunched. The reverse, shared with the V-2, LM-3 variety, shows MERI joined at their bases. The distinction between proofs and Mint State or Uncirculated specimens of early U.S. (and Colonial, for that matter) coinage is not always clear-cut, and many educated numismatists can disagree over the status of a particular piece, as in this case. The intent of the coiner is certainly hard or impossible to read — oftentimes centuries after the fact — save for whatever evidence remains on the coins themselves.

This immaculate coin was cataloged as a Premium Gem proof in the Bowers and Merena catalog of the Eliasberg Collection, but NGC has now graded it MS67. This coin was formerly also specifically mentioned in the census of the *Breen Proof Encyclopedia*. Beautiful multicolor toning graces each side of this exceptional Superb Gem half dime, complementing fully mirrored fields. The surfaces are sharply detailed throughout, and faint die striations run diagonally from northeast to southwest on the obverse. Census (all varieties): 18 in 67 (2 in 67+, 2 in 67★), 1 finer (2/17).

Ex: Louis E. Eliasberg, Sr. Collection, Part I (Bowers and Merena, 5/1996), lot 916; Eugene H. Gardner Collection, Part III (Heritage, 5/2015, as MS66 PCGS with CAC approval), lot 98157.160 NGC ID# 232D, PCGS# 38659 Base PCGS# 4278

1834 Half Dime, Splendid MS67
V-1, LM-2, Vibrant Gold and Indigo Toning

15685 1834 V-1, LM-2, R.1, MS67 NGC. This is a beautiful Superb Gem coin with a rich and natural color scheme, ranging from deep-gold to indigo — reminiscent of coins that resided in a carefully preserved Wayne Raymond album or coin board, acquiring the vibrant hues of a late sunset from the sulfite-infused paperboard. Glowing luster and a strong strike only serve to further the visual appeal. To date, the major grading services have certified just a single 1834 half dime in a numerically finer grade, regardless of variety. NGC Census: 7 in 67 (1 in 67★), 0 finer (2/17).
Ex: ANA Signature (Heritage, 7/2008), lot 10. NGC ID# 232G, PCGS# 38702 Base PCGS# 4281

EARLY DIMES

1798/7 Dime, JR-1, MS61
16 Stars Reverse, Lustrous Fields

15686 1798/97 16 Stars Reverse, JR-1, R.3, MS61 NGC. Medium lilac and sea-green colors embrace the obverse, and the reverse is also naturally patinated in golden-russet hues. Shimmering luster rolls across this undisturbed early dime. The coin is a bit softly struck on the central reverse, although other areas of the design are crisp, especially the right side obverse stars. Limited in grade by prominent mint-made adjustment marks on the portrait and date.
Ex: Central States Signature (Heritage, 5/2005), lot 6361; Dallas Signature (Heritage, 12/2005), lot 421. NGC ID# 236F, PCGS# 38750 Base PCGS# 4468

1798 Large 8 Dime, JR-4, MS61
Impressive 18th Century Type Coin

15687 1798 Large 8, JR-4, R.3, MS61 NGC. The usually seen Normal Date or Large 8 variety, with five berries on the branch on the reverse. This impressive Mint State representative shows lustrous, light-silver accents among intermingled shades of gold, russet, and steel-blue toning, resulting in a stunning display. The JR-4 variety is noted for its flat-top 1, small 7, and larger 8 versus other varieties, but it is the outsized 9 that dwarfs the other digits in the date. All 1798 dimes are exceedingly rare in Mint State. This is a wonderful opportunity to obtain a high-end 18th century type. Census for the variety: 3 in 61, 4 finer (2/17). NGC ID# 236E, PCGS# 38753 Base PCGS# 4466

BUST DIME

1824/2 JR-1 Dime, MS64
Rich Original Toning

15688 1824/2 Flat Top 1, JR-1, R.3, MS64 PCGS. Deep autumn-brown, lavender, and gunmetal-gray toning embraces this Choice Capped Bust dime. Smooth aside from a hair-thin line on the cheek and an interesting mint-made strike-through near stars 11 to 13. The strike is sharp at the borders although the centers are incompletely impressed. Only two 1824-dated John Reich varieties are known, struck from the same overdated obverse die. The overdate feature is plain to the unaided eye. Population (both varieties included): 8 in 64, 3 finer (2/17). NGC ID# 2373, PCGS# 38805 Base PCGS# 4502

SEATED DIMES

1837 No Stars Seated Dime, MS65+
Large Date, Recut 7

15689 1837 No Stars, Large Date, F-101b, R.2, MS65+ PCGS. Pie-shaped die cracks on the lower obverse and a lack of clash marks on either side denote the variety. The 7 in the date is also recut at its base. This high-end Gem is conditionally scarce for the date overall, let alone the variety. The strike is sharp, and each side yields frosty silver luster with a hint of light golden toning around the borders. We find no mentionable abrasions. Population of No Stars, Large Date dimes: 27 in 65 (1 in 65+), 9 finer (2/17). NGC ID# 237R, PCGS# 537636 Base PCGS# 4561

1838 No Drapery, Large Stars Dime, MS66
Only Two Coins Finer at PCGS

15690 1838 No Drapery, Large Stars, F-110, R.4, MS66 PCGS. Sharply struck and attractive, this Premium Gem shows blended violet, lilac, blue, and orange hues over each carefully preserved side. Vibrant luster glistens through the patina, rounding out the appeal. Star 1 nearly touches the rock on this variety, and a die crack runs from the lower-right obverse rim below Liberty's sandal through the base to the lower gown. The reverse is a late die state of the Partial Drapery reverse with a weak die clash mark behind the E in DIME. Population (all varieties): 18 in 66, 2 finer (2/17). PCGS# 537665 Base PCGS# 4570

1872-CC Dime, Attractive VF35
Seldom Offered This Fine

15691 1872-CC F-101, Low R.4, VF35 PCGS. It is unusual to find the rare 1872-CC Seated dime as fine as the VF35 grade level with problem-free surfaces. This well-detailed example displays uniform lavender and olive-gray toning over smooth surfaces. A mint-made planchet defect just to the left of the date serves as a pedigree marker. The 1872-CC boasts a small mintage of only 35,480 coins, and most pieces experienced extensive circulation and do not survive for modern-day collectors. Population: 15 in 35, 22 finer (2/17).
From The R. Thayer Sheets Yorktown Collection. NGC ID# 23A8, PCGS# 538286 Base PCGS# 4657

1874-CC Seated Dime, VG8
Key Issue in All Grades

15692 1874-CC Arrows, F-101, R.4, VG8 PCGS. The 1874-CC is a key date in the Seated dime series, rarely seen in any condition. Only 10,817 pieces were struck, and most survivors grade VG or lower. This collectible example displays pewter-gray toning over evenly worn but abraded surfaces. LIBERTY is almost complete, being a hallmark of the technical appeal. Population: 8 in 8, 29 finer (2/17).
From The R. Thayer Sheets Yorktown Collection. PCGS# 538347 Base PCGS# 4669

PROOF SEATED DIMES

1860 Seated Liberty Dime, PR68
Outstanding Quality and Eye Appeal

15693 1860 Doubled Die Reverse, F-101, R.3, PR68 NGC. A fairly generous mintage of 1,000 proof Seated Liberty dimes was achieved in 1860, on the brink of the Civil War. This magnificent PR68 example possesses tremendous eye appeal and the highest available technical quality, with sharply detailed design elements and impeccably preserved surfaces that show attractive shades of pale gold and cerulean-blue toning. Census: 5 in 68 (1 in 68 ★), 0 finer (2/17). NGC ID# 23CJ, PCGS# 539007 Base PCGS# 4753

1872 Dime, PR67+ Cameo
Finest at PCGS

15694 1872 PR67+ Cameo PCGS. CAC. F-103, R.3. Pale orange-gold toning around the edges frames brilliant, boldly contrasted centers. A layer of frost over the devices combines with deeply mirrored, practically pristine fields to account for the Cameo designation. PCGS has also awarded a Plus designation and CAC a green sticker, both for quality with the grade. Population: 3 in 67 (1 in 67+) Cameo, 0 finer. CAC: 2 in 67, 0 finer (2/17). NGC ID# 23CW, PCGS# 84765

1873 Closed 3 Dime, PR67 Cameo
No Arrows, One Finer at PCGS

- 15695** 1873 No Arrows, Closed 3 PR67 Cameo PCGS. F-101, R.3. Rich orange-gold toning adorns the obverse margin and frames the ice-white seated Liberty. The reverse displays consistent plum-red and peach toning. An intricately struck Superb Gem that provides exemplary eye appeal, strong contrast, and high technical merit. PCGS lists just one finer coin in Cameo. Population: 2 in 67 Cameo, 1 finer (2/17). NGC ID# 23DH, PCGS# 84766

1889 Dime, PR67+ Cameo
Repunched 1 in Date

- 15696** 1889 PR67+ Cameo PCGS. CAC. F-125, R.3. Repunching on the top of the 1 in the date identifies this die pair, although a proof example has not before been documented. This high-end Superb Gem Cameo proof displays a full strike with considerable field-device contrast on each side. The coin is essentially brilliant with deeply mirrored fields. Cameos are rarely seen this fine, regardless of die variety. Population: 8 in 67 (3 in 67+) Cameo, 0 finer. CAC: 5 in 67, 0 finer (1/17). NGC ID# 23DE, PCGS# 84786

BARBER DIMES

1906-D Barber Dime, Exceptional MS67
None Certified Numerically Finer

- 15697** 1906-D MS67 PCGS. CAC. This frosty and lustrous 1906-D excels both technically and aesthetically to earn a place among the half-dozen finest examples at both of the major grading services combined. Still, it is one of the unsung condition rarities of the series, perhaps because a healthy 4 million pieces were struck in the first year of producing Barber dimes at the newly opened Denver Mint.

This pristine example is brightly lustrous beneath a dappling of olive, forest-green, and warm-gray patina. The frosted surfaces show virtually no marks whatsoever, and Liberty's cheek is refreshingly clear of blemishes. The reverse is equally well-preserved, while the strike on both sides is sharply rendered. CAC endorsement is important at the Superb Gem level, an award easily won by this exceptional example. Population: 4 in 67 (2 in 67+), 0 finer. CAC: 5 in 67, 0 finer (2/17). NGC ID# 23EY, PCGS# 4839

PROOF BARBER DIMES

1893 Barber Dime, PR67 Deep Cameo
Tied for the Finest Graded

15698 1893 PR67 Deep Cameo PCGS. CAC. This extraordinary Superb Gem proof Barber dime has deeply-mirrored fields and heavily frosted devices. It possesses razor-sharp strike definition and impressively preserved fields and devices that are equally distraction-free, creating remarkable eye appeal. Population: 2 in 67 Deep Cameo, 0 finer (4/14).

Ex: FUN Bullet Sale (Heritage, 1/2004), lot 30765; Long Beach Signature (Heritage, 6/2014), lot 3611. NGC ID# 23G4, PCGS# 94877

1896 Dime, PR67 Deep Cameo
Unseen Finer at PCGS

15699 1896 PR67 Deep Cameo PCGS. Proof dimes were struck to the extent of 762 pieces in 1896. Only four examples, however, have been awarded this remarkable PR67 Deep/Ultra Cameo grade from PCGS and NGC combined. A single example is known finer. This amazing Superb Gem specimen is completely black-and-white with profoundly mirrored fields and thickly frosted design elements. Void of mentionable contact. Population: 3 in 67 Deep Cameo, 0 finer (2/17). NGC ID# 23G9, PCGS# 94880

MERCURY DIMES

1916-D Mercury Dime, AU55
Partially Lustrous and Appealing

15700 1916-D AU55 PCGS. This Choice AU 1916-D Mercury dime likely qualified as a Full Bands coin when it was Uncirculated, although light wear over the high points of the central devices blends the fascies bands together. This golden-toned, partially lustrous key-date coin displays generally smooth surfaces and excellent eye appeal for the grade. The '16-D is seldom offered in this grade level with original surfaces. NGC ID# 23GY, PCGS# 4906

1916-D Mercury Dime, AU58 Full Bands
Attractive Series Key

15701 1916-D AU58 Full Bands NGC. One of the most celebrated rarities among 20th century coins, the mintage of just 264,000 pieces is by far the lowest of the series and solidifies the issue's status as not only the key issue of the Mercury dime series, but also earns it the number 65 slot on the Garrett and Guth list of 100 Greatest U.S. Coins. (Surprisingly, the 1895 Morgan dollar is ranked below it at number 66)!

This sharply struck example is nearly entirely brilliant and lustrous, with silver-white surfaces that are essentially untoned save for a few powder-gray speckles. The Full Bands designation, while normally reserved for Mint State coins, is a nice endorsement of the fully impressed reverse. The strike on the portrait is sharp but not full, with slight blending at the hairline. A few hair-thin lines in the right reverse field are microscopic and do not distract. NGC ID# 23GY, PCGS# 4907

1916-D Mercury Dime, MS62 Full Bands
Variegated Patina, Sought-After Key

15702 1916-D MS62 Full Bands PCGS. Mercury dimes, along with Lincoln cents, Buffalo nickels, and Morgan dollars, easily rank among the most widely collected series in all of American numismatics. The set contains a number of semikeys, in-demand varieties, and condition rarities, but no other issue holds a candle to the 1916-D. With its meager production of 264,000 coins, this unchallenged, first-year key is far and away the lowest-mintage date in the series. All examples from Good through Mint State are highly desirable.

This attractive, richly toned MS62 Full Bands dime displays variegated lavender-gray, ice-blue, and golden patina over surfaces that show minimal marks for the grade. The legends and central motifs, including the bands of the fasces, are razor-sharp. NGC ID# 23GY, PCGS# 4907

1945-S Micro S Dime, MS67 Full Bands

15703 1945-S Micro S, FS-512, MS67 Full Bands PCGS. CAC. Low-intensity shades of violet and pale gold toning visit the impeccably preserved, lustrous surfaces of this delightful Superb Gem. The design elements are sharply detailed throughout, with fully split and rounded bands on the fasces. The micro S punch is significantly smaller than other S punches of the 1940s. Population: 34 in 67 (2 in 67+) Full Bands, 3 finer (2/17). NGC ID# 37PD, PCGS# 145415 Base PCGS# 5063

PROOF ROOSEVELT DIME

1968 No S Dime, PR68 Cameo
Top-Grade Modern Rarity

15704 1968 No S, FS-501, PR68 Cameo PCGS. Ranked third in Schechter and Garrett's *100 Greatest U.S. Modern Coins*, the 1968 No S proof dime is among the most sought-after modern rarities in American coinage. Examples are rare in all grades, and no Deep Cameos are certified at PCGS. This high-end Superb Gem Cameo is tied for the finest (2/17). The strike is full, and both sides offer champagne-tinted cameo contrast with no interrupting marks or hairlines. Eye appeal is superb. No S proof dimes were also struck in several later years, including 1970, 1975, 1983, and 1990, but the 1968 No S proof is among the rarest of these. Population: 6 in 68 Cameo, 0 finer (2/17). NGC ID# 27F3, PCGS# 395117 Base PCGS# 85245

PROOF TWENTY CENT PIECES

1878 Twenty Cent Piece, Toned PR64

15705 1878 PR64 PCGS. The short-lived twenty cent denomination came to an end in 1878, with a final proof-only mintage of 600 pieces. This impressive Choice specimen offers sharply detailed design elements and reflective fields, under vivid shades of greenish-gold, lavender-gray, and violet toning. The well-preserved surfaces add to the attractive overall presentation. PCGS has graded 38 numerically finer examples (2/17). NGC ID# 27H5, PCGS# 5306

1878 Twenty Cent, PR64 Cameo Final Year of Proof-Only Production

15706 1878 PR64 Cameo NGC. BF-1, R.3. This was the second proof-only and final issue in the four-year twenty cent series. A single pair of dies was used to manufacture 600 proofs in 1878. All show a small, raised die lump right of the shield. Each side of this marvelous Choice specimen is largely brilliant with elements of powder-blue, tan-gold, and green. The delicate patina fails to inhibit stark field-motif contrast throughout. Very scarce this fine. Census: 20 in 64 Cameo, 23 finer (2/17).

From The Martin Peterson Collection. NGC ID# 27H5, PCGS# 85306

BUST QUARTERS

1818/5 Quarter, B-3, MS64 High-End Example

15707 1818/5 B-3, R.3, MS64 PCGS. Tompkins Die State 3/2. Dusky caramel-gold toning embraces this well-struck Choice Bust quarter. The reverse is lustrous, and the obverse exhibits satin sheen. The drapery and eyebrow display steel-gray. Marks are inconsequential, and the eye appeal is bold. Population (both 1818/5 varieties included): 22 in 64 (1 in 64+), 13 finer (2/17).

Ex: Houston Signature (Heritage, 12/2009), lot 496; Long Beach Signature (Heritage, 6/2010), lot 633; FUN Signature (Heritage, 1/2011), lot 3390. NGC ID# 23RH, PCGS# 411648 Base PCGS# 5323

1837 B-4 Quarter, Important MS65+ Finest Known of the Variety

15708 1837 B-4, R.3, MS65+ PCGS. CAC. The Coinage Act of 1837 changed the mandated alloy ratio to 90% silver, 10% copper, resulting in a nominal reduction in the weight of quarters. While half dimes and dimes transitioned to the Seated design, Capped Bust quarters continued to be minted in both 1837 and 1838, but in reduced quantities from the higher mintages in 1835 and 1836. The official 1837 mintage was 252,400 pieces, although some numismatists believe part of the 1838 mintage consisted of 1837-dated coins. (A total of six die pairs produced the 1837 coins, while only a single die marriage is known for the larger-mintage 1838 issue.)

This outstanding Gem 1837 example of the scarce Browning-4 variety was heretofore unknown in any of the Condition Census rosters. Both the Tompkins and Rea-Koenings-Haroutunian Census top out at the MS64 level. Lilac and rose-gray toning merges with pale-blue and reddish-gold highlights for delightful eye appeal. The strike is strong for the issue, with only slight blending on a few obverse star centers. A few tiny marks exist beneath the toning, but none are distracting in the least. Population (all varieties): 13 in 65 (1 in 65+), 7 finer. CAC: 6 in 65, 5 finer (2/17). NGC ID# 23S4, PCGS# 39013 Base PCGS# 5356

SEATED QUARTERS

1842-O Quarter, Choice XF
Elusive Small Date Variant

15709 1842-O Small Date, Briggs 1-A, XF45 PCGS. The scarce Small Date variant of an otherwise plentiful early New Orleans issue. Most examples of this variety are in VF or lower grades, and AU coins are major rarities. The present Choice XF representative displays bold detail and attractively smooth surfaces. Both sides have deep olive-gray toning. NGC ID# 23SN, PCGS# 5403

1853/53 No Arrows Quarter, MS66
Important Melt Rarity

15710 1853/53 No Arrows, Briggs 1-A, FS-301, MS66 NGC. Briggs 1-A, FS-301, showing repunching on the 53 in the date. The sole dies known for the No Arrows issue. This Gem 1853 No Arrows quarter displays splendid peach, rose, and ocean-blue patina on lustrous surfaces devoid of mentionable marks. Strong eye appeal and a splendid, sharp strike make this No Arrows quarter an obvious target for series specialists.

The *Guide Book* records a mintage of more than 15 million pieces for the 1853 Arrows and Rays quarters, versus only 44,200 pieces for the 1853 No Arrows. Imbalances in the ratios of gold and silver after 1849, due to the California Gold Rush, had made silver coinage overvalued — worth more as melted bullion than its face value — and in 1853 the Mint would reduce the amount of silver proportionally in all denominations smaller than one dollar to a level that would make melting unprofitable. This reduced weight standard was denoted by the Arrows design on half dimes and dimes, and Arrows and Rays on quarters and half dollars. Census: 4 in 66, 4 finer (2/17). NGC ID# 23TA, PCGS# 395930 Base PCGS# 5421

1853-O Arrows and Rays Quarter, MS65
High-Grade Survivor, Ex: Gardner

1865 Quarter, Prooflike MS65
Extremely Rare in This Grade

15711 1853-O Arrows and Rays MS65 NGC. Briggs 1-B. Briggs' 2008 series update in the *Coin Dealer Newsletter* called this issue "fairly easy to locate in all grades AG-XF; AU coins very scarce and Mint State coins downright rare." The large mintage figure of more than 1.3 million pieces is deceptive. These lighter-silver-weight coins were meant to restore silver coinage to circulation — and circulate they did. The average certified survivor grades shy of XF40. This Gem example shows considerable luster emanating from surfaces that show little post-strike contact amid largely silver-gold patina, with daubs of jade, ochre, and mauve more visible on the reverse. Excellent eye appeal.

Briggs 1-B shows notable die clashing on both sides. Like many examples, the present Gem displays a "halo" effect around many of the devices, an attempt, per Larry Briggs, to reengrave the dies to prolong their life. The obverse die nonetheless appears in an advanced state. Aside from the prominent halo effect on the right-side stars, an extremely bold die clash runs from Liberty's lower curls through the pole and upraised forearm. A couple of wispy die cracks appear elsewhere on that side. The reverse shows the legend heavily recut, with the rays extending through the mintmark. Census: 2 in 65, 2 finer (2/17).

Ex: FUN Signature (Heritage, 1/2010), lot 2512; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98426 (as PCGS MS64); ANA Signature (Heritage, 3/2016), lot 4835. NGC ID# 23U5, PCGS# 5428

15712 1865 MS65 PCGS. Briggs 2-A. Quarter dollar production on the East coast dropped precipitously after the start of the Civil War, as silver and gold ceased to circulate. The Mint struck a paltry 58,000 coins in 1865, the final year of the No Motto design. All 1865 quarters are scarce. Those that come to market are typically in the VF to XF range. Uncirculated representatives are rare. PCGS and NGC report 39 Mint State submissions combined, likely including some duplication. Gems are extremely rare. PCGS shows two examples in this grade and only two pieces finer (2/17). This MS65 quarter could easily be mistaken for a proof. The strike is needle-sharp, and the fields are flashy beneath dusky golden-gray and blue patina. Minimally marked and an underrated rarity in this grade. NGC ID# 23U2, PCGS# 5461

1870-CC Seated Liberty Quarter, VF20
First Year Issue, Elusive in All Grades

15713 1870-CC VF20 PCGS. Briggs 1-A. The famous Carson City Mint began coinage operations in 1870 and a modest mintage of 8,340 Seated Liberty quarters was accomplished. All of the coins were released into circulation at the time of issue and few were saved for numismatic purposes. The 1870-CC is among the rarest Carson City quarters, and only one example has been identified in Mint State. The present coin is a pleasing VF20 specimen, with a strong LIBERTY. All other lettering and the date remain legible. The surfaces are toned in shades of dove-gray and blue-steel and are free of large or distracting abrasions. Population: 4 in 20, 23 finer (1/17).

From The R. Thayer Sheets Yorktown Collection. NGC ID# 23UL, PCGS# 5477

1873 Seated Liberty Quarter, MS65
Open 3, No Arrows Variant

15714 1873 Open 3, No Arrows, MS65 PCGS. CAC. Briggs 1-A.

The Open 3 logotype was introduced early in 1873, because Chief Coiner A. Loudon Snowden thought the Closed 3 in the date looked too much like an 8. Another design change was instituted slightly later, when Congress changed the weight of the subsidiary silver coins and Arrows were placed at the date to signify the new specifications. Between those events, the Philadelphia Mint struck 172,000 Seated Liberty quarters, with the Open 3 in the date and No Arrows. This sharply detailed Gem displays well-preserved, lustrous surfaces, under attractive shades of cerulean-blue and champagne-gold toning. Housed in a green label holder. Population: 6 in 65, 4 finer (2/17). NGC ID# 23UV, PCGS# 5485

1873-CC Arrows Quarter, Good 4
Problem-Free Collector Coin

15715 1873-CC Arrows Good 4 PCGS. Briggs 1-A. Most known 1873-CC quarters are of the With Arrows type, although even these pieces are rare in all grades. From a mintage of only 12,462 pieces, PCGS estimates that about 50 examples survive in all grades. This is low-end circulated coin, but the surfaces are smooth and problem-free aside from an ancient, toned-over scratch in the right obverse field. The coin displays uniform golden-gray toning. The BER in LIBERTY is clear, and the rims are only slightly weak at the upper obverse and lower reverse borders. Population: 3 in 4, 47 finer (2/17).

From The R. Thayer Sheets Yorktown Collection. NGC ID# BZMH, PCGS# 5492

1875-CC Quarter Dollar, MS63
Appealing for the Grade

15716 1875-CC MS63 PCGS. CAC. Briggs 2-B. This is a remarkably appealing example for the grade, showing frosty luster and well-preserved surfaces — grade-limiting abrasions are seen as faint grazes in the obverse fields that appear only at certain angles. The strike is sharp, and each side displays warm champagne and orange-gold toning, with deeper lavender and russet hues around the reverse border. The 1875-CC is rarely available this fine. Population: 6 in 63, 12 finer. CAC: 2 in 63, 10 finer (1/17). NGC ID# 23UY, PCGS# 5499

1890 Quarter, MS67+
Brilliant and Lustrous

15717 1890 MS67+ PCGS. CAC. Briggs 1-A. This high-grade, penultimate-year Seated quarter is essentially brilliant, with a hint of golden patina on each side. The strike is technically full, although lapping of the obverse die diminishes some of the lower-most relief portions of Liberty's gown. Booming cartwheel luster sweeps exceptionally well preserved, frosted surfaces. Plus-graded by PCGS and CAC endorsed, only one piece is reported finer at PCGS. Population: 24 in 67 (4 in 67+), 1 finer. CAC: 6 in 67, 1 finer (2/17). NGC ID# 23VP, PCGS# 5523

PROOF SEATED QUARTERS

1861 Seated Liberty Quarter, PR66
None Finer at PCGS, Gorgeous Patina

15718 1861 PR66 PCGS. Briggs 7-E. Type Two Reverse. More than 60% of the 1,000 proof quarters struck in 1861 were melted as unsold at the close of the year. A recently introduced 13 cent proofing fee reduced demand considerably from the levels reached in 1858 and 1859. This is a truly impressive Premium Gem example with inarguably original surfaces. Each side is richly toned in blue, rose-violet, and peach-gold patina and devoid of major contact marks. The razor-sharp strike, squared-off rims, and flashy fields confirm the proof origin of this lovely Seated Liberty quarter. Population: 6 in 66, 0 finer (2/17). NGC ID# 23WN, PCGS# 5557

1868 Quarter, Richly Toned PR66
Tied for Finest at PCGS

15719 1868 PR66 PCGS. Briggs 2-B. The proof dies with the 1 triple punched. Quarter dollar output declined significantly after the outbreak of the Civil War in 1861. Mintages remained low through the mid-1870s. The year 1868 was typical of the period. Only 29,400 circulation strikes and 600 proofs were manufactured. The former are exceedingly rare in high grades, and collectors frequently turn to proofs instead. This spectacularly toned Premium Gem specimen showcases melded shades of blue, green, violet, and peach-gold with areas of partial brilliant over Liberty and the eagle's right (facing) wing. The eye appeal is unimprovable. Population: 11 in 66, 0 finer (2/17). NGC ID# 23WZ, PCGS# 5567

1878 Seated Quarter, PR65+ Cameo
Finest at PCGS

15720 1878 PR65+ Cameo PCGS. CAC. Briggs 4-D. This is the finest 1878 Seated quarter at PCGS in Cameo proof by virtue of the PCGS Plus designation and CAC endorsement. One other PR65 Cameo piece is its numeric equal at the service, but that coin lacks both the Plus and CAC recognition. Snow-white, frosted central devices float on glassy-mirrored fields, framed by reddish-gold and vibrant blue toning at the margins. The strike is needle-sharp despite the fact that 1878 proofs were not carefully made, showing a fine die crack between stars 3 and 4 and numerous lumps from die rust in and around the reverse shield. Population: 2 in 65 (1 in 65+) Cameo, 0 finer. CAC: 1 in 65, 0 finer (2/17). NGC ID# 23XA, PCGS# 85579

BARBER QUARTERS

1899-S Quarter, Toned MS67
Rare in This Lofty Grade

15721 1899-S MS67 PCGS. This is only the second individual MS67 example of the 1899-S Barber quarter that we have ever offered, with the other one bringing just shy of \$10,000 in its last appearance in June 2015. This piece is boldly struck and displays frosty luster. Each side shows mottled lemon-gold, olive, and lavender-gray toning. Rarely seen this fine and almost uncollectible finer. Population: 4 in 67, 1 finer (2/17). NGC ID# 23YJ, PCGS# 5624

1901-S Barber Quarter, Good 6
Low-Mintage Series Key

15722 1901-S Good 6 PCGS. CAC. The 1901-S Barber quarter claims a memorably low mintage of 72,664 pieces, and relatively few high quality specimens were saved by contemporary collectors. As a result, the 1901-S is a sought-after key to the series and collectors prize examples in all grades and conditions. This well-worn example shows all major design elements complete in outline, with the date, mintmark, and legends still bold. Some letters in the motto are partially effaced and LIBERTY is no longer legible. NGC ID# 23YR, PCGS# 5630

PROOF BARBER QUARTER

1910 Quarter, PR67 Deep Cameo
Top-Grade Coin at PCGS

15723 1910 PR67 Deep Cameo PCGS. CAC. Deep Cameo examples of the proof 1910 Barber quarter are rare, and a handful of Superb Gems are encapsulated by PCGS. This magnificent coin is tied for the finest in a PCGS holder, and it is within the Condition Census of CAC-approved Deep Cameos. Showcasing fully rendered motifs and deep, watery fields, the cameo contrast is exceptional, and the preservation is comparably impressive. A hint of light golden toning is seen around the outer peripheries. It is difficult to imagine a finer proof Barber quarter. Population: 4 in 67 (1 in 67+) Deep Cameo, 0 finer. CAC: 2 in 67, 1 finer (2/17). NGC ID# 242S, PCGS# 95696

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter, AU53
Low-Mintage, First-Year Key

15724 1916 AU53 PCGS. CAC. Almond-gold and silver-gray tints confirm the originality of this briefly circulated introductory-year Standing Liberty quarter. The well-detailed design elements show just a touch of wear. The cartwheel luster is close to complete, and thorough perusal is required to locate even minor marks. A rare and low-mintage date. Certified in a green label holder. NGC ID# 43XR, PCGS# 5704

1916 Standing Liberty Quarter, MS63 Full Head
Rich Luster and Original Toning

15725 1916 MS63 Full Head PCGS. CAC. Dozens of PCGS Registry Sets are being formed for the popular Standing Liberty quarter series, and many of these are either missing the 1916 altogether or at least lack a Mint State Full Head example. Even some of the complete sets lack the first-year key in Mint State. Is the 1916 Standing Liberty quarter really that difficult to acquire? In the absolute sense, no; but the degree of quality that most Registry Set collectors seek does present a challenging pursuit. Unless a collector has the means with which to put down half the price of a small house on this one coin, the 1916 is not easily acquired with attractive features. Lower-end Uncirculated pieces, particularly Full Head examples, frequently come dipped and brightened in an attempt to hide evidence of high-point album friction. Given the typically weak luster of this issue, even one dip to remove amber toning from the high points of the devices can have detrimental effects on the overall eye appeal of the coin. Thus, whether for Registry Set competitors or general collectors, low-to-middle-grade Uncirculated examples like the present represent a scarce opportunity to acquire a moderately affordable 1916 quarter in Mint State Full Head with pleasing aesthetics. This Select Full Head piece offers satin luster with original olive-gold and pale lavender toning over each side. A loupe fails to reveal any major abrasions, and the eye appeal is outstanding. NGC ID# 2AMV, PCGS# 5705

1916 Standing Liberty Quarter, MS64 Full Head
Unquestionably Original Surfaces

15726 1916 MS64 Full Head PCGS. The 1916 Standing Liberty quarter was released into circulation in January 1917 along with the first batch of 1917 Type One quarters. While many examples were snatched from circulation (or included in rolls, to be discovered later), many others circulated to the point that the dates wore off of the coins, a design flaw that went uncorrected until the mid-1920s. Even dateless 1916 Standing Liberty quarters are in demand and can occasionally be cherrypicked from accumulations of common 90% silver coinage. Of course, even with a well-worn reverse, one can tell from the absence of stars below the eagle, the different arrangement of peripheral stars (if any remain), and the feather tips free of the first A in AMERICA that the quarter is a Type One. But the obverse of the 1916 versus the 1917 Type One is the telltale, of course. Even many dateless 1916s show the half-reed cut out in the "bead and reed" border, a concession to make room for the top of Liberty's head that is absent on the 1917 Type Ones. For example, a PCGS Genuine example that we assessed as AG Details, cleaned and damaged, lot 3558 in our Central States Signature (Heritage, 4/2011), shows the half-reed feature clearly, despite the presence of only a suggestion of the lower curve of the 6 in the date and no trace of the other digits.

This is an unquestionably original example of this first-year key. Each side is richly toned, and differing shades are evident on each side. The obverse displays progressively deeper golden-russet toning toward the margin, while the reverse has a significant presence of lilac with gold interspersed. The strike is strong throughout, not just on the head of Liberty, and there are no mentionable abrasions on either side.

Ex: Central States Signature (Heritage, 4/2013), lot 4247. NGC ID# 2AMV, PCGS# 5705

1916 Standing Liberty Quarter
CAC-Approved MS64 Full Head
Impressively Well-Struck

1917 Type Two Quarter, MS67 Full Head
Sharp, Frosty Registry Coin

15727 1916 MS64 Full Head PCGS. CAC. Most 1916 Standing Liberty quarters struck were already in circulation by the end of 1917, although collectors' chances of finding an example were slim. A premium for Uncirculated examples of the date was almost instantaneous after the 1916 was recognized as a low-mintage key. A handful of coin dealers stocked current issues in those days, and Mint State examples of the "New Type" bearing the 1916 date were advertised for as much as a dollar apiece. The retail collector market for the issue continued a rapid climb as the challenge of finding an example of the date in circulation began to sink in with searchers. Circulating examples of the 1916 issue eluded collectors so much that some were still unclaimed as late as the 1940s, turning up in the New York Subway Hoard, which was amassed during that period.

Today, the allure of the 1916 Standing Liberty quarter continues, as does strong demand for Uncirculated representatives. This Choice Full Head example displays traces of light champagne toning over satiny, well-preserved surfaces. The strike is far better than seen on many other Full Head coins — Liberty's head can actually be called sharp, and there is noticeable definition on the breast and gown folds that is missing from most other 1916 Standing Liberty quarters. NGC ID# 2AMV, PCGS# 5705

15728 1917 Type Two MS67 Full Head PCGS. This Superb Gem is among the finest Full Head coins known. The 1917 Type Two quarter is rare this fine, and the present coin produces vibrant, frosty mint luster and is devoid of major abrasions. Hints of delicate lavender and ice-blue accent much of each side, while a blush of olive-gold intrudes upon the lower obverse. The strike is needle-sharp. Population: 15 in 67 (3 in 67+) Full Head, 0 finer (2/17). *From The R. Thayer Sheets Yorktown Collection.* NGC ID# 2434, PCGS# 5715

1918/7-S Quarter, Well-Struck AU55
Only Major Variety in the Series

1919 Quarter, MS67 Full Head
Registry-Grade Beauty

15729 1918/7-S FS-101 AU55 PCGS. Although some collectors consider the 1918/7-S to be unnecessary for a complete Standing Liberty quarter collection, its prominent placement among the series in the *Guide Book* and decades-long history as one of the most challenging acquisitions in the date and mintmark set make its inclusion essential in the minds of most series enthusiasts. The variety was first recognized publicly in the late 1930s, when a Mint State example was offered in a Barney Bluestone auction and realized a then-remarkable price of \$26,25. Since then, numerous circulated pieces have come to light, but Uncirculated coins and even high-end AU representatives have remained scarce and highly sought-after.

This Choice AU representative displays above-average definition of the shield and head, although neither are full. Satiny fields illuminate light golden and pale multicolor toning on each side, while high-point wear on the devices defines the grade. This is an unusually attractive overdate quarter, particularly for this grade level. NGC ID# 243A, PCGS# 395949 Base PCGS# 5726

15730 1919 MS67 Full Head PCGS. This beautifully preserved Superb Gem displays sharp head, shield, and date definition, with no distracting abrasions. Traces of delicate champagne toning attest to the originality of the surfaces. The 1919 is rare in MS67 Full Head, but it is more collectible in this grade than most other pre-1925 Type Two issues. Finer coins are extremely rare, and their price points reflect this. Population: 29 in 67 (1 in 67+) Full Head, 2 finer (2/17). NGC ID# 243B, PCGS# 5729

1919-D Quarter, MS65 Full Head
Major Rarity in This Condition

15731 1919-D MS65 Full Head NGC. A 1919-D is Gem Full Head is a rarity that most Standing Liberty quarter collectors will never see in person, let alone own. The only dates offered at auction less frequently in this condition are the 1927-S, 1920-S, and 1918/7-S, the last of which does not actually exist this fine in Full Head. We rank the 1919-D as one of the foremost keys in the series in MS65 Full Head and finer.

This example displays the usual satin luster and near-brilliant appearance with hints of light champagne toning. Expected weakness occurs on the shield rivets, central gown folds, and the top of the date numerals. But Liberty's head is sharp, and there are no distracting abrasions. An excellent Registry Set acquisition. Census: 6 in 65 Full Head, 3 finer (2/17). NGC ID# 243C, PCGS# 5731

1919-S Quarter, MS64 Full Head
Sharp Shield, A Rarity This Fine

15732 1919-S MS64 Full Head NGC. Full Head examples of the 1919-S quarter dollar are scarce in all grades, but they become major rarities at the Gem level. This attractive near-Gem represents a more accessible option for the collector seeking a high-grade Full Head example of this conditional key. The shield lines and rivets are bold, and Liberty's head displays pleasing detail. The eagle's feathers are sharply defined. This coin is brilliant with satin luster and no major distractions. The 1919-S has long been recognized as a rarity with the Full Head designation, and it is even more difficult to locate than the certified population reports suggest. Census: 19 in 64 Full Head, 12 finer (2/17). NGC ID# 243D, PCGS# 5733

1920-S Quarter, MS64 Full Head
Underrated in Full Head

15733 1920-S MS64 Full Head PCGS. Ex: Walser. The 1920-S is conditionally scarce and difficult to find with a sharp strike. In Gem Full Head it is among the rarest issues in the series. This is a radiant and highly lustrous near-Gem example that shows a light, even layer of rose toning over each side. The surfaces present brilliant satin mint luster and are remarkably well-preserved for the grade with no truly distracting abrasions. This rare date ranks as one of the three or four most important strike rarities in the entire Standing Liberty quarter series. Population: 37 in 64 (1 in 64+) Full Head, 26 finer (2/17).

Ex: FUN Signature (Heritage, 1/2004), lot 6226; FUN Signature (Heritage, 1/2007), lot 4185; Dallas Signature (Heritage, 10/2008), lot 755. NGC ID# 243G, PCGS# 5739

1921 Quarter, MS65 Full Head
Sharp Head, Shield, and Eagle

15734 1921 MS65 Full Head PCGS. Only 1.9 million pieces were struck of the 1921 quarter dollar, and it is estimated that less than 5% of those survive today in all grades. PCGS and NGC combined have seen less than 0.2% of the original mintage, including resubmissions, and of these coins, Full Head pieces are in the distinct minority. Gem Full Head coins are rare. This is a splendid, no-questions Gem that is fully brilliant and well-detailed throughout with strong definition also on Liberty's shield and the eagle's plumage. A couple of minor contact marks are noted on the reverse. The appearance of this piece should generate considerable interest among specialists.

Ex: FUN Signature (Heritage, 1/2004), lot 6229. NGC ID# 243H, PCGS# 5741

1923-S Quarter, MS66 Full Head
Remarkable Sharpness and Quality
Ex: John Jay Pittman

15735 1923-S MS66 Full Head NGC. Ex: Pittman. Described in the Pittman catalog as "A sharply struck, highly lustrous specimen with just a trace of golden toning," although such words hardly do this piece justice. Liberty's head is razor-sharp, and the shield rivets and eagle feathers are bold. A loupe fails to reveal any of the usual light slide marks over the high points of Liberty's figure, and truly the only abrasions that keep this piece from a Superb Gem grade are a tiny tick on Liberty's shin and a graze on the eagle's breast. Metal flowlines produce a vibrant cartwheel effect in the fields beneath the delicate, original toning. Struck from unclashed and unlapped dies with maximum relief of the design. This is a 1923-S that will please even the most discerning Standing Liberty quarter specialist. Census: 27 in 66 (1 in 66+) Full Head, 6 finer (2/17).

Ex: John Jay Pittman Collection, Part II (Akers, 5/1998), lot 1419, which realized \$4,125. NGC ID# 243K, PCGS# 5745

1926-D Quarter, MS64 Full Head Key Date in Full Head

15736 1926-D MS64 Full Head PCGS. The 1926-D is notorious for having a flat head, weak shield rivets, and ill-defined stars along the right reverse border and on either side of the date. Some coins are found with better definition in one or two of these areas, but never in all. This Choice Full Head coin is sharp on Liberty's head and above-average on the shield, but the stars remain weak. Light golden toning graces satiny luster. The difficulty of finding a Full Head 1926-D in any grade should promote strong bidding on this example, housed in an older blue label holder. Population: 36 in 64 Full Head, 34 finer (2/17). NGC ID# 243S, PCGS# 5757

1927-S Quarter, Satiny AU58 Elusive in This Grade

15737 1927-S AU58 PCGS. Near-Mint examples of the key-date 1927-S Standing Liberty quarter are seldom offered. This satiny example displays mostly silver-white luster with daubs of russet and olive toning in the margins. Liberty's head, the shield, and the eagle show the usual strike weakness, although Liberty's toes are well-defined. Wear is almost unnoticed over the highest points of the design. NGC ID# 243W, PCGS# 5764

1930-S Quarter, MS67 Full Head Uniquely Toned Registry Coin

15738 1930-S MS67 Full Head PCGS. CAC. An exceptionally well-preserved, boldly struck example of this final Standing Liberty quarter issue. The surfaces yield frosty luster beneath an array of toning; the obverse is champagne-tinted overall with a thick blanket of olive-gold over much of the left-hand side, and the reverse is toned light golden with hints of pastel rainbow hues. The 1930-S is rarely offered this fine. Population: 28 in 67 (1 in 67+) Full Head, 1 finer. CAC: 19 in 67, 0 finer (1/17). NGC ID# 2446, PCGS# 5781

WASHINGTON QUARTERS

1932-D Washington Quarter, MS65 Important First-Year Key

15739 1932-D MS65 PCGS. An original Gem specimen of this low-mintage, first-year issue, with sharply detailed design elements and satiny mint luster, under medium-intensity shades of golden-tan and lavender-gray toning. The 1932-D is the acknowledged key to the Washington quarter series and examples in high grade are especially elusive. Population: 90 in 65 (3 in 65+), 2 finer (2/17). NGC ID# 2448, PCGS# 5791

1943 Quarter, Satiny AU58 Doubled Die Obverse

15740 1943 Doubled Die Obverse, FS-103, AU58 PCGS. This *Guide Book*-listed variety is the most prominent doubled die known for the 1943 quarter dollar. Examples are rare in high grade, and this near-Mint coin retains ample satin luster in the fields beneath dusky golden toning. A few small, scattered marks accompany slight high-point friction. Population of FS-103: 1 in 58, 3 finer (2/17). NGC ID# 2455, PCGS# 145620 Base PCGS# 95820

1950-D/S Quarter, Rare MS66 Popular *Guide Book* Variety

15741 1950-D/S FS-601 MS66 PCGS. CAC. The underlying S is plainly evident at the top and left borders of the primary D mintmark. This *Guide Book* variety is scarce in Gem or better condition. The present CAC-endorsed Premium Gem displays a bold strike with a prominent die crack that runs along the bottom of the neck truncation. Satiny luster displays mainly light champagne toning, while deeper olive-gold hues appear around the obverse margins. Population: 14 in 66 (1 in 66+), 2 finer. CAC: 9 in 66, 1 finer (1/17). NGC ID# 245T, PCGS# 145638 Base PCGS# 5843

PROOF WASHINGTON QUARTER

1939 Washington Quarter, PR68
Pastel Toning, None Finer at PCGS

15742 1939 PR68 PCGS. The year 1939 represented the fourth issuance of proofs after the resumption of proof coinage in 1936. The Mint boosted production to 8,795 Washington quarter specimens that year. The 1939 is accessible through PR67 and only becomes a major rarity in this unsurpassed grade. Pastel gold, green, blue, and violet patina covers the majority of this Superb Gem proof. A contact mark or two short of perfection. Population: 5 in 68, 0 finer (2/17). NGC ID# 27HS, PCGS# 5978

EARLY HALF DOLLARS

1794 Half Dollar, Lavender-Gray Fine 12
O-101a, T-7, Desirable First-Year Issue

15743 1794 O-101a, T-7, High R.3, Fine 12 PCGS. Tompkins Die Stages 1/4. The usually seen variety is attributed by star 1 through the lowest curl, star 9 away from the Y, and the leaf tip between OF. Die cracks extend from the rim through (O)F to the leaves below, and from the rim left of S(TATES) to the leaf. This is an ideal opportunity to obtain a problem-free, first-year half dollar bearing the famous 1794 date. Each side is lavender-gray with clear outlines of Liberty and the eagle. Partial hair and feather detail remains. The stars and legends are clearly readable, and the centering is good. A small, horizontal mark is noted over the ear. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-101a, T-7 Half Dollar, Fine 12
First Year of Silver Coinage

15744 1794 O-101a, T-7, High R.3, Fine 12 PCGS. Tompkins Die Stage 1/2. Flowing Hair half dollars were only coined in two years, 1794 and 1795. Examples of the latter date are found with little difficulty, but the 1794 is rare, and eagerly pursued in all grades. This example has bold legends and well-outlined stars. Partial hair and feather detail is evident. The lavender, navy-blue, and olive-green surfaces are attractive, although a lens reveals occasional thin marks consistent with the grade. Struck during the first year of silver coinage at the First Philadelphia Mint, and a collectible, nicely defined representative of this important issue. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-105 Flowing Hair Half, Fine 12
Problem-Free Collector Grade

15745 1794 O-105, T-3, R.5, Fine 12 PCGS Secure. Tompkins Die State 1/2. A pleasing example of the first-year Flowing Hair design with a reported mintage of 23,464 pieces. Remarkably, the Mint required 11 die pairs to strike the such a small number of coins. The O-105 die marriage is the second-most available variety for the year, yet it is still scarce, as are all 1794 halves. This attractive coin shows sharp obverse definition for the grade, with only slight loss of detail at TA of STATES where the reverse die cracked. Later strikes show considerable sinking of the die at the upper reverse. The warm-gray patina deepens at the margins, while marks are limited to a few light abrasions. There are no visible adjustment marks on either side. NGC ID# 24E6, PCGS# 39206 Base PCGS# 6051

1795 2 Leaves Half Dollar, VF35
O-113a, T-14, A Over E, Ex: Reiver

15746 1795 2 Leaves, A Over E in STATES, O-113a, T-14, R.4, VF35 NGC. Ex: Jules Reiver Collection. Tompkins Die Stage 5/2. The blundered reverse die, with the A in STATES cut over an E, is unique among the reverse dies of 1795 half dollars. It is equally as desirable as the similar E over A variety of 1814 half dollars, and the S over D in STATES variety of 1795 half eagles. The obverse die is also quickly attributed by Overton's "rough broken patch" between the 5 in the date and the final star. This later die state shows a faint die crack connecting the tops of LIBERTY and a series of shallow die defects from stars 12 to 15. The light cream-gray surfaces have surprisingly few marks, although the reverse field exhibits trivial verdigris.

Ex: Jules Reiver Collection (Heritage, 1/06), lot 22494; FUN Signature (Heritage, 1/2008), lot 1423. NGC ID# 24E7, PCGS# 39254 Base PCGS# 39252

1802 Half Dollar, O-101, XF45
Challenging in High Grade

15747 1802 O-101, T-1, R.3, XF45 PCGS. A single die pair struck 29,890 half dollars in 1802, and most survivors are well-circulated, grading no finer than VF. This Choice XF representative is scarce. The strike is bold and well-centered, and neither side exhibits significant wear. Olive-gold toning warms the gray surfaces, while deeper color appears in the protected peripheral regions. Population: 17 in 45, 28 finer (2/17). NGC ID# 24EE, PCGS# 39269 Base PCGS# 6065

1803 Draped Bust Half Dollar, AU58
O-104, Scarce Small 3 Variant

15748 1803 Small 3, Large Reverse Stars, O-104, T-4, R.3, AU58 PCGS. CAC. Tompkins Die State 2/2. The O-104 (T-4) variety is the sole representative of the Small 3 date logotype, identified more easily by the lack of a vertical serif on the crossbar of 3 than by the size of the digit. This example shows just the suggestion of wear and a sharp strike, with stronger-than-normal field stars and only slight weakness at the eagle's head from metal flow into the shoulder of Liberty. Attractive olive-gray toning shows glimmers of golden luster. The Tompkins reference indicates one other AU58 at the low end of the Condition Census. Awarded a CAC endorsement. Reported population of O-104 at PCGS: 3 in 58, 2 finer (2/17). NGC ID# 24EF, PCGS# 39274 Base PCGS# 6067

BUST HALF DOLLARS

1807 'Bearded Goddess' Half Dollar
O-111b, About Uncirculated, Luster Remains

15749 1807 Capped Bust, Bearded Goddess, O-111b, R.5, AU50 PCGS Secure. Ex: Link. An unchallenged "demand rarity" of the early Capped Bust series — and a star of the entire Lettered Edge half dollar series. The Bearded Goddess ranks high on the wantlists of innumerable Bust half and die anomaly enthusiasts. The 1807 O-111 variety is remarkable in many ways, not the least of which is its rarity in both the very early and very late die stages. The early die state is undoubtedly rarer, but the late-state Bearded Goddess wins the popularity contest hands down.

Less notable but equally important, the denomination is blundered on the reverse, ostensibly a 5 over a mispunched 2, yet the real drawing card of this About Uncirculated coin is the long die crack that runs, Rasputin-like, between the chin and chest. Here, it is equally strong from the headband all the way toward the bottom rim, ending left of 1 in the date. A parallel crack curves through the left-hand stars. Mint luster remains in protected areas on both sides of this smoothly worn, silver-gray example, where it gleams at the margins and among the crevices of the central motifs. The devices are well-struck for the variety, visibly so on the wing with only occasional high point incompleteness elsewhere. Rare this nice, among the top half-dozen or so Bearded Goddess examples in the advanced die stage. NGC ID# 24EN, PCGS# 39358 Base PCGS# 39357

1810 Half Dollar, MS63
Golden-Gray Patina, O-106a

15750 1810 O-106a, R.3, MS63 PCGS. A die line through the right shield corner and the wing, and areas of flatness around the borders easily confirm the Overton-106a attribution. Frosty luster percolates through a blanket of golden-gray patina. The centers exhibit bold detail, while the margins are considerably softer. Few detracting marks appear on either side. NGC ID# 24ET, PCGS# 39413 Base PCGS# 6095

1813 O-105 Half Dollar, MS64+
Condition Census Quality, CAC-Approved

15751 1813 O-105, R.1, MS64+ PCGS. CAC. This impressive Choice specimen shows coarse dentilation and dramatic clash marks on both sides. The A and T in STATES are close at the base, and the dentil under the 3 in the date is double the regular size. These attributes help identify the O-105 variety. The design elements are sharply detailed, and the well-preserved surfaces radiate vibrant mint luster under shades of champagne-gold and lavender-gray toning. Although this is a plentiful die marriage, examples are conditionally rare at this grade level. In fact, this piece qualifies for the low end of the Condition Census. Population (all 1813 varieties): 22 in 64 (2 in 64+), 4 finer. CAC: 5 in 64, 5 finer (2/17). NGC ID# 24EZ, PCGS# 39463 Base PCGS# 6103

1814 O-103 Half Dollar, Choice XF
Struck 5% Off-Center
Impressive Mint Error

15752 1814 O-103, R.1 — 5% Off-Center — XF45 PCGS. Close examination shows three separate strikes. A row of dentils from the first strike is apparent near the top of Liberty's cap, and the upper obverse dentils are doubled. The first strike was off center toward 6:30, and the next two strikes were off center toward 5:30. This is the distinctive Overton-103 variety with a vertical "bar" between the scroll and left (facing) wing. Sea-green and chestnut-gold toning visits lightly abraded surfaces. NGC ID# 24F3, PCGS# 39477 Base PCGS# 6105

1820/19 O-101 Half Dollar, Irreproachable MS65
Top-of-the-Census Pedigree

15753 1820/19 Square Base 2, O-101, R.2, MS65 PCGS Secure. Ex: Eliasberg/Kaufman/Link. The 1820 mintage of 751,122 pieces is lower than that of all other Capped Bust, Lettered Edge issues, with the exception of the 1807 (750,500 pieces struck) and the very scarce 1815/2 (just 47,150 pieces). This example is the exceptional Eliasberg/Kaufman/Link specimen, lightly toned in translucent slate-gray and vibrant gold hues. Attractive steel-blue accents at the borders join amazing cartwheel mint luster that flashes across the smooth and frosted surfaces.

As always in the Bust half series, it is the overdates that attract most of the attention from collectors. Of the two 1820/19 varieties, the Square Base 2 O-101 is the scarcer type overall, yet it offers more high-grade Mint State examples. Leading the way are two Gem Uncirculated coins that historically vie for finest-known of the variety.

The current piece competes at the top of the O-101 Condition Census with the former Suros/Pogue coin, which sold for \$47,000 in Part II of The D. Brent Pogue Collection (Stack's Bowers — Sotheby's, 9/2015). Both coins at one time resided in MS66 NGC holders, and were subsequently reholdered by PCGS — the more deeply toned Pogue specimen as MS65+ PCGS, and this lightly toned coin as MS65 PCGS Secure. Struck from a slightly later die state with a fine crack through the lower pair of olive leaves, we suggest the present example is arguably the better-struck of the two pieces. Razor-sharp definition exists on the obverse motifs and on the eagle's plumage and talons. A few minor ticks and light lines are visible under a loupe. Population (for the O-101 variety): 2 in 65 (1 in 65+), 0 finer (2/17). NGC ID# 24FE, PCGS# 39572 Base PCGS# 6125

1825 Half Dollar, O-115, Toned Gem
Tied at the Top of the Census

15754 1825 O-115, R.3, MS65 NGC. A small bar to the right of 1 in the date is one pick-up point, and the left-leaning 5 in the date is another. Dappled golden-gray toning forms an overall rich patina on both sides of this Gem with strong silver luster shining through. Liberty's portrait is sharply struck, while the eagle's talons are less-sharp along with the obverse stars, which lack central details. A pleasing, obviously original Bust half with great natural eye appeal. This moderately scarce variety does not exceed the MS65 level in any of the references, although several equally graded pieces exist to make up the entire Condition Census at that grade (2/17). NGC ID# 24FL, PCGS# 39662 Base PCGS# 6142

1834 O-101 Half Dollar, MS65
Late Die State

15755 1834 Large Date, Large Letters, O-101, R.1, MS65 PCGS. Only three varieties combine the Large Date obverse and the Large Letters reverse, and the joined forecurl immediately identifies the O-101 die marriage. Despite the lack of die cracks, and minimal clash marks, this piece represents a later die state with the stars drawn toward the border dentils. A lovely Gem, this piece has natural gray-gold toning over frosty mint luster. PCGS has only certified two finer examples of the Large Date, Large Letters type, and just nine finer examples of the date (2/17). NGC ID# 24FY, PCGS# 39905 Base PCGS# 6164

1836 O-110 Half Dollar, MS65
Lettered Edge, Sharp Strike

15756 1836 Lettered Edge, O-110, R.1, MS65 PCGS. The O-110 is impossible to find with a full strike, since the letters RTY are always weak for the variety. Likewise, a few of the star centers are incomplete including star 7, which shows an extra point (or spike) adjacent to the primary outside point. Otherwise, the definition is razor-sharp on this coin. Satinlike surfaces are smooth and supremely lustrous with iridescent toning throughout both sides. Caramel-gold, lavender, and lilac shades vary with the viewing angle. Both the Parsley and Herrman Condition Census listings show a single MS65 followed by a pair of MS64 coins. This Gem is in a new PCGS holder. Population: 18 in 65 (1 in 65+), 6 finer (2/17). NGC ID# 24G2, PCGS# 39946 Base PCGS# 6169

REEDED EDGE HALF DOLLAR

1836 GR-1 Half Dollar, AU50
Reeded Edge

15757 1836 Reeded Edge, GR-1, R.2, AU50 PCGS. The tiny *Guide Book* mintage of 1,200+ pieces is a beacon call to collectors to accumulate examples of the 1838 Reeded Edge half, and many have done so over the years. This is a partly lustrous gunmetal-gray half dollar that has impressive sharpness and only a solitary consequential mark, to the left of the date.
Ex: *Central States Signature* (Heritage, 4/2008), lot 1098. NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

SEATED HALF DOLLARS

1839 No Drapery Half Dollar, MS64+
Important Design Type, Few Are Finer

15758 1839 No Drapery, WB-101, MS64+ NGC. CAC. The No Drapery portrait of Liberty was the initial Christian Gobrecht design. Early 1839 saw its introduction on the half dollar denomination, although the basic design had been used on other silver denominations earlier. The half dollar did not undergo the additional modifications that were implemented on the other Seated Liberty denominations, and it is the only denomination of the type that retained at least most of Gobrecht's original portrait until the series' end in 1891. Later in the 19th century, first-year types were saved in large numbers, but the scarcity of Uncirculated No Drapery halves indicates that relatively few coins were set aside at the time of issue.

At the near-Gem level, No Drapery halves become major condition rarities; coins that transcend their general unavailability for type purposes and take on the mantle of one of the major condition rarities in the Seated half series. This example displays bright, frosted mint luster that glows beneath the layers of blue-lilac and rose-yellow toning seen over each side. The strike details are strong on the obverse, with just a bit of softness noted on the eagle's left (facing) wing and leg on the reverse. At the MS64+ level, only four pieces have been certified by NGC and a mere three pieces are finer (7/16). None of the higher-graded pieces display the CAC endorsement seen on this high-end, Choice coin. Census: 4 in 64+, 3 finer (2/17). NGC ID# 24GK, PCGS# 572000 Base PCGS# 6230

1851 Seated Half Dollar, MS65
WB-101, Condition Census Example

15759 1851 WB-101, Die Pair 6, R.4, MS65 PCGS. Normal Date. A 2001 article by Dick Osburn greatly increased the awareness of the 1851 issue, which was struck in the volatile time following an influx of gold from California, upsetting the ratio of silver to gold. Many 1851 halves were melted when the intrinsic silver content of a half dollar exceeded fifty cents in value. This is a bright, highly lustrous Gem that is struck from an early state of the dies and is fully defined in all areas. Originally toned, the obverse retains much brilliance with scattered patches of aquamarine-blue, olive, russet, and umber-gray toning around the margins, while the reverse displays pleasing hues of reddish-gold. Only the most minor, tiny ticks are seen with a glass, while bright mint luster swirls across the satin-smooth fields and lightly frosted motifs. Population (all varieties): 2 in 65, 1 finer (2/17). NGC ID# 24HJ, PCGS# 572078 Base PCGS# 6266

1863 Seated Liberty Half Dollar, MS65
Heavily Exported Wartime Issue

15760 1863 WB-101 MS65 PCGS. The 1863 Seated Liberty half dollar claims a modest mintage of 503,660 pieces. Like all Civil War era precious-metal issues, the 1863 was widely hoarded and melted for bullion value, both during and after the war. In addition, many 1853 half dollars were exported to Guatemala. Accordingly, the issue is very rare in MS65 condition today. This delightful Gem offers sharply detailed design elements throughout and the well-preserved, lustrous surfaces show a few subtle hints of pale gold and lavender toning. Eye appeal is terrific. Population: 10 in 65 (1 in 65+), 5 finer (2/17). PCGS# 572155 Base PCGS# 6309

1868 WB-101 Seated Half Dollar
Rare in Gem Mint State

15761 1868 WB-101 MS65 PCGS. All Seated Liberty halves from the 1860s are notably rare in Gem Mint State condition regardless of date or mint. This unquestionably original example is immersed in gunmetal blue, rose-gold, and slate-gray toning throughout both sides with soft mint luster held in reserve beneath the thick patina. The fields and devices are free of marks or problems of any kind, and the strike is quite sharp. Perhaps as few as 50 Mint State examples of the Philadelphia issue survive in all grades despite the mintage of 417,600 pieces. Population: 6 in 65, 2 finer (2/17). PCGS# 572182 Base PCGS# 6323

1878-CC Half Dollar, Choice XF
Low-Mintage Carson City Issue

15763 1878-CC WB-101, Die Pair 1, R.4, XF45 PCGS. A small mintage of 62,000 coins ensures the high-grade scarcity of the 1878-CC half dollar. This Choice XF example is among the best pieces that budget-conscious collectors will be able to acquire. The design elements are boldly detailed, and no major abrasions distract from the eye appeal. The interiors display silvery lavender color surrounded by deeper russet and olive-green border toning. Population: 6 in 45, 33 finer (2/17).
From The R. Thayer Sheets Yorktown Collection. NGC ID# 24KP, PCGS# 572257 Base PCGS# 6359

1874-CC Arrows Half Dollar, XF40
Challenging Carson City Issue

15762 1874-CC Arrows, WB-101, Die Pair 3, R.4, XF40 PCGS. The 1874-CC is a scarce date, coming from a mintage of only 59,000 pieces. Uncirculated examples are rare, and high-end circulated coins are usually the finest that most collectors can acquire. This XF coin displays excellent detail with faint hints of luster in the protected regions of the fields. The internal obverse and most of the reverse are brilliant, but the obverse border shows bold olive-gold, sea-green, and lavender-gray toning. Population: 13 in 40, 43 finer (2/17).
From The R. Thayer Sheets Yorktown Collection. NGC ID# 24LB, PCGS# 572221 Base PCGS# 6347

PROOF SEATED HALF DOLLAR

1889 Seated Liberty Half, PR66+ Cameo
Vivid Toning and Contrast

15764 1889 PR66+ Cameo PCGS. CAC. WB-101. Only 711 proof Seated Liberty half dollars were struck in 1889, to accompany a modest business-strike production of 12,000 pieces. As might be expected, high-grade regular-issue examples are rare, putting additional pressure on the small supply of proofs from date collectors. This Plus-graded Premium Gem exhibits sharply detailed, frosty design elements that contrast boldly with the deeply reflective fields. Spectacular shades of cerulean-blue and pale gold toning blanket the impeccably preserved surfaces and eye appeal is terrific. Population: 4 in 66 (1 in 66+) Cameo, 1 finer. CAC: 1 in 66, 0 finer (2/17). NGC ID# 27UR, PCGS# 86450

BARBER HALF DOLLARS

1896-S Barber Half, MS66+
Scarcer Date, Especially in Such a High Grade

15765 1896-S MS66+ NGC. Just a hint of delicate sun-gold toning is seen over the otherwise brilliant surfaces, enriching this fully struck and highly lustrous Premium Gem. The fields are immaculate and the cheek has only faint indications of contact. The 1896-S is a better date in all grades and a major rarity in this lofty condition. When a Mint State '96-S is found, it invariably is high quality, such as seen here. The one variable are striations sometimes encountered (but not here), caused by worn out roller fingers during planchet stock preparation. Census: 6 in 66 (1 in 66+), 0 finer (2/17). NGC ID# 24LX, PCGS# 6476

1898-O Half Dollar, MS65
Wonderfully Toned, Seldom Finer

15766 1898-O MS65 PCGS. CAC. Ex: Friend. The low-mintage of 874,000 pieces and a scarcity of coins in all grades qualify the 1898-O as a key series issue, although it is not as highly regarded as it perhaps should be. This beautifully toned example was once in the Friend Collection. It displays coruscating mint luster with vibrant shades of peach-gold, robin's egg blue, and lilac-gray, perfectly matched one side to the other. The strike is uneven — reasonably bold on the obverse, but less-so on the reverse, where the eagle's neck, shield corner, wing junction and leg all show the light strike that typifies this New Orleans issue. The date is recut, most visibly at the ball of the 9. Population: 8 in 65, 5 finer. CAC: 3 in 65, 3 finer (2/17). NGC ID# 24M4, PCGS# 6481

1901-S Half Dollar, Brilliant MS63
Popular S-Mint Semikey

15767 1901-S MS63 PCGS. The stars, right shield corner, and fletchings are fully defined on this brilliant and lustrous Select half dollar. There are a couple of prominent marks on the cheek and shield, and a few planchet flakes occur near the tip of the bust and above the R in DOLLAR. The 1901-S is a better date in the series, in part because of its famous quarter dollar counterpart, but also because of its relatively low mintage of 847,044 coins. Mint State examples are among the scarcest Barber halves. Population: 9 in 63, 20 finer (2/17). NGC ID# 5EPB, PCGS# 6491

1903-O Barber Half Dollar, MS66+
Single-Finest Certified at NGC

15768 1903-O MS66+ NGC. CAC. From a mintage of 2.1 million pieces, the 1903-O Barber half dollar is not difficult to locate in circulated grades, and lower Mint State examples can be found with a little patience, but the issue is quite elusive at the MS65 grade level, and finer coins are extremely rare. Almost all examples seen are lightly struck on the right side of the reverse to some degree.

The present coin is a delightful Plus-graded Premium Gem, with impeccably preserved surfaces and vibrant mint luster, under attractive shades of jade-gold, silver-gray, powder-blue, and lavender toning. The design elements are sharply detailed in most areas, with just a touch of the usual softness on the shield point and adjacent area of the eagle's wing. An interesting die crack runs from the 3 in the date through the point of the bust. Eye appeal is outstanding. Census: 5 in 66 (1 in 66+), 0 finer. CAC: 3 in 66, 0 finer (2/17). NGC ID# 24MK, PCGS# 6496

WALKING LIBERTY HALF DOLLARS

1916-S Half Dollar, Frosty MS65
First S-Mint Representative

15769 1916-S MS65 PCGS. The inaugural-date status of the 1916-S combined with its small mintage of 508,000 coins (fourth-lowest total in the series) explain its perennial popularity. Each side is typically frosty, though the level of preservation is anything but usual. This strongly defined Gem is conditionally scarce, and finer representatives are exceedingly rare. Bright with translucent lilac-gray accents. PCGS reports 14 finer submissions (2/17). NGC ID# 24PN, PCGS# 6568

1917-D Half Dollar, MS64+
Scarcer Reverse Mintmark Type

15770 1917-D Reverse MS64+ PCGS. CAC. The 1917-D Reverse Mintmark is scarcer than its Obverse Mintmark counterpart in the upper levels of Mint State even though its mintage is significantly higher. Apparently the novelty of the mintmark on the obverse and its being dropped midway through 1917 caused many to set aside those coins. Magnification brings out occasional wisps of russet on both sides of this near-Gem Walker, and an bold strike leaves strong definition on the design features. A few light obverse marks prevents Gem status. NGC ID# 24PS, PCGS# 6571

1918-D Half Dollar, MS64
Mottled Toning, Shimmering Luster

15771 1918-D MS64 PCGS. CAC. Mottled champagne-gold and gunmetal patina allows for significant mint brilliant and satin luster to shine through. Marks are well-concealed, and the strike is crisp on Liberty's branch hand. The 1918-D ranks in the top quartile of Walking Liberty half dollars in Uncirculated condition. Near-Gems are about the finest collectors can target for acquisition. PCGS lists 31 finer submissions. CAC: 18 in 64, 8 finer (2/17). NGC ID# 24PW, PCGS# 6575

**1921 Walking Liberty Half Dollar, MS64+
Low-Mintage Series Key**

15772 1921 MS64+ PCGS. CAC. The Mint concentrated most of its resources on silver dollar production in 1921, and only 246,000 Walking Liberty half dollars were struck at the Philadelphia facility that year. Accordingly, the 1921 is an elusive issue in all grades, although not quite as scarce as its Denver Mint counterpart, which had an even lower mintage. However, the 1921 Philadelphia half dollar was an extremely well-made issue, with uniformly sharp striking details and better luster than the 1921-D. Both issues are sought-after series keys today.

The coin offered here is a Plus-graded Choice example with sharply detailed design elements that show full separation between Liberty's thumb and fingers on the wreath hand. The lightly marked surfaces are blanketed in attractive shades of lavender-gray, russet, and amber toning, with vibrant mint luster underneath. PCGS has graded 64 numerically finer examples (2/17). NGC ID# 24R6, PCGS# 6583

**1927-S Walker Half Dollar, MS64+
Recognized for Quality Within the Grade**

15773 1927-S MS64+ PCGS. CAC. Choice Uncirculated condition represents the optimal collecting grade level for the 1927-S Walking Liberty half dollar, particularly when combined with added recognition from PCGS and CAC, as here. This mostly brilliant near-Gem enjoys daubs of crimson, russet, and cobalt-blue patina around the rims, while softly frosted luster issues from each side. Incompletely defined over the centers with myriad die polishing lines evident in the fields. NGC ID# 24RA, PCGS# 6587

**1928-S Walking Liberty Half, MS65
Remarkably Strong Strike for the Issue**

15774 1928-S MS65 PCGS. The 1928-S is both an absolute rarity with only 1.9 million pieces struck as well as a strike rarity. This unquestioned Gem shows most of the definition on the skirt lines of Liberty and good detail on the eagle's feathers. The mint luster is bright and frosted with just a hint of pale golden patina present. Population: 61 in 65 (1 in 65+), 7 finer (2/17). NGC ID# 24RB, PCGS# 6588

**1929-S Half Dollar, MS66
One Finer Example at PCGS**

15775 1929-S MS66 PCGS. Perhaps the coin was once purchased at face value from the Treasury Department, a commonplace occurrence into the early 1930s. Today, it is conditionally scarce in Gem condition and downright rare in MS66. This is a vibrantly lustrous and sharp example with brilliant centers. Complementary lilac and amber-gold shades appear at the margins. The strike is impressive for the San Francisco issue. Population: 54 in 66 (1 in 66+), 1 finer (2/17). NGC ID# 24RD, PCGS# 6590

**1933-S Half Dollar, MS66+
Few Available Finer**

15776 1933-S MS66+ PCGS. CAC. The 1933-S is scarce in Premium Gem condition and rare finer. This Plus-graded CAC coin displays incredibly sharp definition of Liberty's head and branch hand, as well as the eagle's trailing leg. Warm golden toning blankets each side, and frosty original luster shines through. There are no major abrasions. PCGS reports only 15 finer submissions (2/17). NGC ID# 24RE, PCGS# 6591

**1946-D Half Dollar, MS67+
Vivid Border Toning
Tied for Finest Known**

15777 1946-D MS67+ PCGS. The 1946-D Walker is seldom seen in Superb Gem condition, and the typical piece displays brilliant or nearly brilliant coloration. This Plus-graded Registry coin showcases vivid crimson, forest-green, sun-orange, and amber toning in the margins around silvery centers. The strike is bold, and a small mark on the eagle's trailing leg is the only abrasion of note. Only a few MS67 coins are Plus-graded, and no finer examples are known. Population: 87 in 67 (4 in 67+), 0 finer (1/17). NGC ID# 24SK, PCGS# 6628

**1946-D Half Dollar, MS67+ CAC
Beautiful Registry Coin**

15778 1946-D MS67+ PCGS. CAC. The 1946-D Walking Liberty half dollar is scarce in Superb Gem condition, and this Plus-designated coin is tied for the finest known. Frosty, glowing mint luster illuminates beautifully preserved surfaces, showing wisps of lavender and ice-blue across the interiors with lemon-gold border toning. The eye appeal is immense. The Registry Set potential is unsurpassed. Population: 89 in 67 (4 in 67+), 0 finer. CAC: 50 in 67, 0 finer (2/17). NGC ID# 24SK, PCGS# 6628

**1947-D Half Dollar, MS67
Original Album Toning**

15779 1947-D MS67 PCGS. CAC. The final Walking Liberty half dollar from the Denver Mint is plentiful in most Uncirculated grades, but Superb Gems are scarce and are rarely seen with a CAC endorsement. This example is among the finest at PCGS. Satiny luster displays silvery mint-green interior toning on the obverse surrounded by a russet, crimson, and olive-green border. The reverse is primarily mottled golden-brown. Partial thumb separation is visible on Liberty's branch hand. Population: 43 in 67 (3 in 67+), 0 finer. CAC: 18 in 67, 0 finer (2/17). NGC ID# 5ESK, PCGS# 6631

**PROOF WALKING LIBERTY
HALF DOLLARS**

**1936 Walking Liberty Half, PR67
Intense Silver Surfaces, Pinpoint Sharp**

15780 1936 PR67 NGC. The quicksilver, glassy-mirrored surfaces of this Superb Gem proof show no trace of color beyond silver-white. There are simply no mentionable signs of contact, and the eye appeal is top-notch for an example of this first-year Walking Liberty proof. Census: 88 in 67 (1 in 67+, 5 in 67★), 0 finer (2/17). Ex: Central States Signature (Heritage, 4/2013), lot 2780. NGC ID# 27V4, PCGS# 6636

1942 Half Dollar, PR68 ★
Final Proof Issue in the Series

15781 1942 PR68 ★ NGC. There are merely seven Walking Liberty half dollar dates struck in proof format, and the 1942 is the final and most collectible among them. The Mint manufactured 21,120 proof specimens for collectors in 1942, and they remain accessible through this outstanding level of preservation, but finer coins are very rare. This PR68 ★ representative is brilliant with blushes of powder-blue color. Reflective fields, fully struck design elements, and the lack of contact marks explain the tremendous visual quality. NGC has graded eight numerically finer examples (2/17). NGC ID# 282G, PCGS# 6642

1942 Walking Liberty Half, PR69
Among the Finest Certified

15782 1942 PR69 NGC. For the entire seven-year series and across both certification services, only 11 proof Walking Liberty half dollars have achieved the unsurpassed PR69 grade — nine of these are in the 1942 issue. For type collectors of proof coinage and Registry Set competitors, this remarkable, near-perfect 1942 proof Walker is unsurpassable in both quality and eye appeal. Vivid shades of emerald-green and lavender toning visit the deeply reflective surfaces, but the centers remain essentially brilliant. The design elements are fully struck, and no mentionable distractions are evident. Eye appeal is terrific. The record price realized for this issue belongs to the PR69 PCGS specimen in lot 4138 of the Long Beach Signature (Heritage, 2/2005), which realized \$46,000. The present coin is equally attractive and important. Census: 8 in 69 (1 in 69★), 0 finer (2/17). NGC ID# 282G, PCGS# 6642

FRANKLIN HALF DOLLARS

1948 Franklin Half, MS67 Full Bell Lines
Vividly Toned Registry Grade Specimen

15783 1948 MS67 Full Bell Lines PCGS. Vivid shades of magenta, sea-green, and amber toning blanket the obverse of this magnificent Superb Gem, while the reverse shows only light champagne patina. The surfaces are impeccably preserved and lustrous, with sharply detailed design elements, including full definition on the bell lines. Population: 15 in 67 (1 in 67+) Full Bell Lines, 0 finer (2/17). NGC ID# 24SR, PCGS# 86651

1949 Half Dollar, MS67 Full Bell Lines
Major Condition and Strike Rarity
Only the Second Example We Have Seen

15784 1949 MS67 Full Bell Lines PCGS. The PCGS CoinFacts plate coin. The second-year 1949 Franklin half dollar was not hoarded to nearly the same extent as the 1948. In *A Guide Book of Franklin and Kennedy Half Dollars* (2011), Rick Tomaska wrote this of Superb Gem examples with or without Full Bell Lines: "Extremely rare. Only one example has been certified in MS67 to date, graded by NGC. The rarity of the 1949-P in this condition is not a surprise to any experienced Franklin collector, and is further evidence of the tremendous rarity of high-grade Mint State Franklin halves in general." The NGC coin the author refers to was sold as lot 699 in our 2008 ANA Signature sale, where it realized \$14,950. No other example has appeared at auction since that time, according to our records. PCGS now reports two submissions in MS67 Full Bell Lines (2/17).

The obverse features a uniform overlay of blended crimson, reddish-violet, and orange patina, while the reverse mixes similar hues with areas of brilliance. Fully struck design elements include complete delineation of the bell lines — a trait rarely found on coins of this issue. The underlying surfaces appear virtually pristine. A spectacular opportunity for the dedicated specialist. NGC ID# 24ST, PCGS# 86653 Base PCGS# 86653

**1961 Franklin Half Dollar, MS66
Elusive Full Bell Lines Example**

15785 1961 MS66 Full Bell Lines PCGS. The 1961 Franklin half dollar is a rare issue in MS66 condition, with the Full Bell Lines designation. This sharply detailed Premium Gem offers impeccably preserved, lustrous surfaces, with a few highlights of pale gold toning. Eye appeal is exceptional. Housed in a new 30th Anniversary green label holder. Population: 15 in 66 (2 in 66+) Full Bell Lines, 0 finer (2/17). NGC ID# 24TN, PCGS# 86680

**1961 Half Dollar, MS66 Full Bell Lines
High-End Registry Coin**

15786 1961 MS66 Full Bell Lines PCGS. This Premium Gem 1961 Franklin half is conditionally rare and is among the finest Full Bell Lines examples certified. The strike is bold, and each side displays satiny mint luster with delicate champagne and lavender-blue toning. Additional hues of sea-green and russet appear near portions of the peripheries. Population: 15 in 66 (2 in 66+) Full Bell Lines, 0 finer (2/17). NGC ID# 24TN, PCGS# 86680

PROOF FRANKLIN HALF DOLLAR

1959 Franklin Half, PR66 Deep Cameo

15787 1959 PR66 Deep Cameo PCGS. The sharply detailed design elements of this spectacular Premium Gem display a rich coat of mint frost that creates intense cameo contrast with the deeply mirrored fields. The essentially brilliant surfaces are impeccably preserved, with just the faintest hint of pale gold toning. Eye appeal is extraordinary. Population: 8 in 66 (1 in 66+) Deep Cameo, 9 finer (2/17). NGC ID# 4JAC, PCGS# 96700

SMS KENNEDY HALF DOLLAR

**1966 SMS Kennedy Half, SP68 Deep Cameo
Top-Grade Registry Coin**

15788 1966 SMS SP68 Deep Cameo PCGS. There are no 1966 Special Mint Set half dollars certified finer than the PR68 numeric level at PCGS, and Deep Cameos are rare in this grade. The present coin is fully struck and brilliant with dramatic white-on-black contrast. There are no distracting blemishes. A magnificent Registry Set acquisition. Population: 6 in 68 Deep Cameo, 0 finer (2/17). NGC ID# 24WH, PCGS# 96846

PROOF KENNEDY HALF DOLLAR

1964 Kennedy Half, PR68 Deep Cameo
Beautiful White-on-Black Registry Coin
Accented Hair Variety

15789 1964 Accented Hair, FS-401, PR68 Deep Cameo PCGS. The *Cherrypickers'* reference calls the Accented Hair proof "somewhat common in variety terms," although we would add that Deep Cameo examples are genuinely scarce regardless of grade. In Superb Gem condition, Deep Cameo Accented Hair Kennedy halves are rare. Such is the importance of this Registry candidate. The coin is almost flawlessly preserved and yields liquidlike reflectivity in the fields. The devices are fully struck and frost-white. A 1964 proof type coin in this condition would be a major interest to Kennedy half collectors, and the Accented Hair variety only boosts this coin's appeal. Population: 13 in 68 Deep Cameo, 1 finer (2/17). NGC ID# 24WG, PCGS# 145627 Base PCGS# 96801

EARLY DOLLARS

1795 Three Leaves Flowing Hair Dollar, VF25
B-5, BB-27

15790 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, VF25 NGC. Bowers-Borckardt Die State II. This charming Flowing Hair dollar is richly defined for the grade, particularly on the eagle's left (facing) wing. The obverse rim has minor nicks at 2 and 7 o'clock, and the lilac-gray surfaces are faintly hairlined.
Ex: ANA Signature (Heritage, 8/2007), lot 909.
From *The Pellegrini Collection, Part IV*. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1795 Off-Center Draped Bust Dollar, VF30
B-14, BB-51

15791 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, VF30 ANACS. The highest of Liberty's hair curls is located directly beneath the B in LIBERTY. This example is generally well-detailed for the grade, although the shallow reverse die leaves a typically flat impression of the eagle. The obviously original toning varies from charcoal-gray in the fields and centers to purple near the peripheries. Both sides display faint hairlines and a few trivial marks. A vertical pinscratch bisects the eagle from neck to tail feathers.
Ex: Houston Signature (Heritage, 11/2007), lot 60726.
From *The Pellegrini Collection, Part IV*. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

1795 Draped Bust Dollar, AU Sharpness
B-14, BB-51, Off-Center Bust

15792 1795 Draped Bust, Off-Center, B-14, BB-51, R.2 — Cleaning — PCGS Genuine. AU Details. Bowers Die State II. This is a late die state example of the Mint's initial implementation of the Draped Bust design, paired with a newly styled Small Eagle reverse. The portrait was set too far left in the die for BB-51, which was soon corrected on the Centered Bust BB-52 variety. Faint die clash lines are visible around OF on the reverse to confirm the late die stage. The present example was once cleaned, resulting in areas of deep, umber-gray that alternate with patches of light, silver-gray color. Small nicks and light lines suggest brief circulation on this sharply defined example.

1795 Draped Bust Dollar, Pleasing XF40
Centered Bust, B-15, BB-52

15793 1795 Draped Bust, Centered, B-15, BB-52, R.2, XF40 PCGS. Bowers Die State IV. Tempering of the steel dies at the early Mint was not an exact science, and the BB-52 variety with its re-centered Draped Bust portrait cracked early on in its use. A triangular die crack in Liberty's hair above the ribbon is an unusual location for a die crack and oddly shaped. The reverse die fared no better, also developing cracks and die flaws in the legend and especially in the area near OF. This XF example is from a middle state of the dies with sharply struck obverse motifs. The reverse is less sharp, with remnants of adjustment marks visible with a glass at the margins and angling up through the eagle's tail and right (facing) wing. Pleasing olive-gray surfaces retain traces of luster and show few non-Mint related marks.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 24X2, PCGS# 39995 Base PCGS# 6858

1796 B-4, BB-61 Dollar, VF30
Small Date, Large Letters Variety

15794 1796 Small Date, Large Letters, B-4, BB-61, R.3, VF30 PCGS. Bowers Die State I. Liberty's foremost curls include three arcs. This variety features TE in STATES closely spaced, and one leaf under the D in UNITED. Most examples of this accessible variety are found in VF condition. This high-end VF representative would make an example choice for a date set. Olive-green patina colors the obverse legends. The remaining areas are light silver-gray, showing bold design detail despite time spent in circulation. This is a pleasing, problem-free Small Eagle dollar with overtly distracting marks. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

1796 Draped Bust Dollar, VF35
Small Date, Large Letters, B-4, BB-61

15795 1796 Small Date, Large Letters, B-4, BB-61, R.3, VF35 NGC. Bowers-Borckardt Die State I. The raised dot die flaw above the 1 in the date and Large Letters reverse identify the popular BB-61 variety. This pleasing Choice VF specimen shows the left side of the drapery worn smooth in places, but much interior design detail remains intact. The only mark of note is a thin scratch at Liberty's neck and into the field.

From The Martin Peterson Collection. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

1796 B-5, BB-65 Dollar, XF40
Large Date, Small Letters

15796 1796 Large Date, Small Letters, B-5, BB-65, R.2, XF40 PCGS. Bowers Die State II. The BB-65 is best known for a diagnostic die lump between I and C in AMERICA — an internal die break that grows to indicate progressively later states of the die. In this relatively early stage, the lump does not touch the adjacent C. Pleasing bluish-gray overtones grace the golden-gray surfaces of this collector-grade coin. Moderate wear appears as light-gray accents on the high points. A sharply defined example, with a small planchet void near star 4 but only minor marks elsewhere. No adjustment marks are seen. NGC ID# 24X3, PCGS# 40002 Base PCGS# 6861

1797 B-3, BB-71 Dollar, Choice AU
Large Letters, 10x6 Stars

- 15797** 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, AU55 PCGS. Bowers Die State III. Deep gunmetal-gray toning encompasses the fields and devices of this desirable Small Eagle dollar. Autumn-brown and forest-green borders complete the toning pattern. The eagle's breast and leg feathers exhibit light wear, but the wings and hair are richly defined and glimmer with luster. Refreshingly devoid of evident abrasions. All three 1797 die varieties have 16 stars, but only Bolender-3 exhibits them in a 10x6 arrangement. At PCGS, the median grade for B-3 is VF30. The present Choice AU example is just outside the Condition Census, but the quality is decidedly superior for the variety.
From The Pellegrini Collection, Part IV. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

1797 9x7 Stars, Small Letters Dollar
B-2, BB-72, AU Details

- 15798** 1797 9x7 Stars, Small Letters, B-2, BB-72, R.4 — Improperly Cleaned — NGC Details. AU The very scarce pairing mates a Small Letters reverse with the berry under the A in STATES with the popular 9x7 Stars obverse. This is the most elusive of the three varieties known for 1797, and as the rarest die marriage for the year and a popular *Guide Book* variety, the BB-72 is forever in demand from astute collectors, particularly in grades above XF. Sophisticated collectors will look beyond this coin's long-ago cleaning and appreciate its pinkish-gray toning and wealth of pleasing detail. Bowers calls the BB-72 "the best known die variety of the 1796-1797 years combined. Indeed, it may well be the most famous variety after 1794 and before 1804."
From The Pellegrini Collection, Part IV.

1797 B-1, BB-73 Dollar, VF30
9x7 Stars, Large Letters

- 15799** 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3, VF30 PCGS. Bowers Die State III with intersecting cracks through the hair ribbon. Rich tobacco-brown toning is comprehensive, although hints of sea-green emerge when the coin is rotated beneath a light. Marks are relatively few, and without significance. Liberty's shoulder displays moderate wear, but hints of luster linger in design crevices, such as the curls near star 1.
From The Pellegrini Collection, Part IV. NGC ID# 24X4, PCGS# 40003 Base PCGS# 6863

1797 Dollar, Choice VF
B-1, BB-73, 9x7 Stars Obverse

- 15800** 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3, VF35 PCGS. Bowers Die State I. BB-73 is a fairly plentiful variety in the absolute sense, but high-grade examples are scarce. This Choice VF coin displays a bold, even strike with complete rims. No adjustment marks are seen, and the central devices are boldly detailed. Both sides display mottled gold and russet-brown toning. NGC ID# 24X4, PCGS# 40003 Base PCGS# 6863

1798 Dollar, Small Eagle, VF25
B-2, BB-81, 15 Stars Obverse

15801 1798 Small Eagle, 15 Stars, B-2, BB-81, R.3, VF25 PCGS. Bowers Die State II. Attractive golden-gray toning deepens at the margins with a pleasing ring of gunmetal-blue at the border to give this solid VF25 example excellent eye appeal. A few light obverse adjustment marks and small marks are visible under a loupe, but they are largely muted by wear and undetectable in-hand without magnification. The BB-81 15-Stars obverse is somewhat scarcer than its 13-Stars counterpart (BB-82), the sole Small Eagle varieties for 1798. The obverse die was likely made prior to June, 1796 during the only period when 15 Stars were standard for the design. Population: 19 in 25, 62 finer (2/17). NGC ID# 24X5, PCGS# 40007 Base PCGS# 6868

1798 Dollar, B-1, BB-82, XF40
13 Stars Obverse, Small Eagle Reverse

15802 1798 Small Eagle, 13 Stars, B-1, BB-82, R.3, XF40 PCGS. Bowers Die State III. Although BB-82 is frequently available in the absolute sense, we have only handled a few high-grade coins in recent years and none in Mint State. Even AU examples are genuinely rare. This XF coin is in the finest grade that is usually available. The strike is even and well-centered, and the devices retain strong detail. Nonetheless, deep adjustment marks crisscross the obverse portrait — a characteristic more often seen near the borders on this variety. BB-82 is one of only two 1798 die pairings with the Small Eagle reverse, being widely popular as such. BB-82 is the more common of the two varieties overall by a small margin, but in high grade it is the scarcer. NGC ID# 24X5, PCGS# 40006 Base PCGS# 6867

1798 B-23, BB-105 Dollar, AU55
Large Eagle, Pointed 9, Wide Date

15803 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, AU55 PCGS Secure. Bowers Die State III. The hair curls near star 1 are lapped, as is cloud 3. In the revised 2013 edition of his *Silver Dollar Encyclopedia*, Bowers explains that this variety is rare in AU and Mint State grades, listing an AU55 coin among the notable specimens. Hallmarks of this Choice AU dollar include a razor-sharp strike everywhere except the eagle's breast, and lovely original toning in shades of gold, gunmetal-blue, and antique-gray. A single pedigree mark occurs below the R in LIBERTY. NGC ID# 24X6, PCGS# 40022 Base PCGS# 40018

1798 Large Eagle Dollar, AU53
B-24, BB-124, Early Die State

15804 1798 Large Eagle, Pointed 9, B-24, BB-124, R.2, AU53 PCGS. Bowers Die State I. A rare early die state. The obverse does not show lapping on the stars or at Liberty's top curl, and the reverse features a fully sharp leaf beneath C in AMERICA. Light adjustment marks angle through the date area across the portrait, best seen with a lens. Attractive, medium silver-gray toning deepens at the borders with traces of golden luster shining through the natural patina. The strike varies — sharp in most areas, but weak at the bust point and at the corresponding reverse at OF. BB-124 has blundered field stars, where the Line Star Pattern is placed too high and the star tips run into the clouds. NGC ID# 24X6, PCGS# 40041 Base PCGS# 40018

1799 Bust Dollar, B-23, BB-159, AU50
Popular 8x5 Stars *Guide Book* Variety

15805 1799 8x5 Stars, B-23, BB-159, R.3, AU50 NGC. Bowers-Borckardt Die State I. The popular BB-159 variety is easily identified by the distinctive 8x5 star arrangement on the obverse. This impressive AU example shows a slight trace of wear on the bust shoulder and hair to the left of the forehead, but most interior design detail remains intact. Shades of golden-brown, blue-steel, and slate-gray toning blanket the lightly abraded surfaces. NGC ID# 24X7, PCGS# 40063 Base PCGS# 6881

1799 Bust Dollar, Sharp AU53
B-8a, BB-165, 7x6 Stars
Green Label Holder

15806 1799 7x6 Stars, B-8a, BB-165, R.3, AU53 PCGS. Bowers Die State II. The 1 in the date is distant from the curl and Liberty's mouth is open, both useful identifiers for BB-165. A die crack from the inner two points of star 7 through LIB of LIBERTY confirms the obverse used, only to strike this variety. Likewise, the reverse die is unique to BB-165, with evidence of the N in UNITED originally cut upside down, then corrected, leaving a wayward serif between N and I. Shades of umber and blue enrich the borders, ceding to steel-gray with tan-gold undertones on this sharply struck early dollar. Marks are few and far between — none of consequence — with traces of mint luster beneath the rich patina. Housed in a previous generation green label holder.

From The Martin Peterson Collection. NGC ID# 24X7, PCGS# 40056 Base PCGS# 6878

1800 Dollar, XF45
B-10, BB-190, Wide Date, Low 8

15807 1800 Wide Date, Low 8, B-10, BB-190, R.3, XF45 PCGS. Bowers Die State VI. Sharply defined for the XF grade, this high-end example is struck from the latest state of the dies with multiple reverse die cracks. Autumn-gold luster glows from protected areas across smooth, minimally marked surfaces. Lovely brownish-gray toning with tan accents covers both sides, enriched by blue overtones. Although readily available in lower circulated grades, the Wide Date BB-190 is elusive in About Uncirculated or finer conditions, making this Choice XF an attractive alternative.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 24X9, PCGS# 40076 Base PCGS# 6888

1800 B-10, BB-190 Dollar, AU53
Wide Date, Low 8 Variety

15808 1800 Wide Date, Low 8, B-10, BB-190, R.3, AU53 NGC. Bowers Die State VI. The latest state of the dies, with die cracks between the arrows and left (facing) wing, and two parallel cracks through the ME in AMERICA among several others including a bold crack through U in UNITED into the arrows. The pearl-gray surfaces show remaining luster across the eagle's wingtips and other peripheral elements. A small planchet flaw is noted at 11 o'clock on the reverse, and faint thin marks are present beneath UNUM. Light abrasions are scattered across both sides, with moderate wear from the brief circulation. NGC ID# 24X9, PCGS# 40076 Base PCGS# 6888

1800 B-13, BB-193 Dollar, AU55
Smooth, Appealing Surfaces

15809 1800 B-13, BB-193, R.3, AU55 ANACS. Bowers Die State III. The obverse and reverse dies are unique to BB-193. This example is struck from clashed dies, although the obverse has yet to develop a pair of semicircular die cracks that invade the left and right fields from the stars in the later die states. The current coin is richly toned in autumn-gold and brownish-gray shades with occasional blue accents. Golden mint luster remains in protected areas. Housed in an early generation small ANACS holder, this properly graded Choice About Uncirculated example is sharply defined with smooth surfaces and plentiful eye appeal.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 24X9, PCGS# 40077 Base PCGS# 6887

1801 B-1, BB-211 Dollar, XF40
Partial Luster, Moderate Wear

15810 1801 B-1, BB-211, R.3, XF40 PCGS. Bowers Die State IV-V. The field is buckled near the E in AMERICA but the letter remains distinct. A moderately abraded almond-gold and stone-gray representative with scattered minuscule ebony spots. Luster illuminates the borders, wings, and Liberty's hair. NGC ID# 24XA, PCGS# 40083 Base PCGS# 6893

1801 B-4, BB-214 Silver Dollar, XF45
Late Die State

15811 1801 B-4, BB-214, R.4, XF45 PCGS. Bowers Die State III, late, with the die crack from the reverse border over Cloud 6 nearly reaching that cloud. This piece also has obverse clash marks at the date, unmentioned in the Bowers reference. Both sides exhibit light wear and scattered marks beneath lilac-gray and steel-blue toning. An important study piece for the specialist. NGC ID# 24XA, PCGS# 40086 Base PCGS# 6893

1801 B-4, BB-214 Dollar, Choice AU
Light Golden Toning

15812 1801 B-4, BB-214, R.4, AU55 NGC. Ex: Durango Collection. Bowers Die State III. This sharp example displays bright luster throughout the borders and motifs. Light butter-gold toning visits both sides. Smooth save for a trio of thin vertical field lines east of the tail feathers. This is an important example of B-4, the scarcest regular issue 1801 variety.
Ex: ANA Signature (Heritage, 8/2016), lot 5094. NGC ID# 24XA, PCGS# 40086 Base PCGS# 6893

1802 B-6, BB-241 Dollar, XF45
Bold, Even Strike

15813 1802 Narrow Date, B-6, BB-241, R.1, XF45 PCGS. Bowers Die State III, as usual, with the obverse lapped. A few faint adjustment mark remnants appear around the peripheries, but the border dentils are yet complete. The central devices exhibit sharp detail. This Choice XF BB-241 dollar displays mottled gold, lavender-gray, and gunmetal-blue toning over each side. A few marks on Liberty's cheek are not out of line for the grade. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

1802 B-6, BB-241 Dollar, AU53
Narrow Date, Much Luster Remains

15814 1802 Narrow Date, B-6, BB-241, R.1, AU53 PCGS. Bowers Die State III. Narrow Date. The date is less widely spaced than other 1802 varieties, although the gap between 8 and 0 remains wider than the space between the other digits. An available variety, with more survivors than all the other 1802 dollars combined, and therefore one of the most frequently sought varieties of the entire Draped Bust series by date and type collectors. This lightly toned example retains substantial luster for the AU53 level, with faint pinkish-gold toning over sharply struck, attractive silver surfaces. A few light marks and modest wear do not limit the eye appeal in the least.

From *The R. Thayer Sheets Yorktown Collection*. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

1803 B-6, BB-255 Dollar, XF45
Large 3, Lightly Toned

15815 1803 Large 3, B-6, BB-255, R.2, XF45 PCGS. Bowers Die State III. A faint, hairline die crack connects the right-hand obverse stars to confirm the late die state. The ball of the 3 in the date is repunched. Always a popular choice for the Large 3 type, BB-255 is more available than any other 1803 variety. This example displays light champagne-gold toning with traces of mint luster at the borders. Scattered light lines and marks visit both sides of this sharply defined, Choice XF early dollar. Population (all Large 3 varieties): 37 in 45, 47 finer (3/16). NGC ID# 24XD, PCGS# 40101 Base PCGS# 6901

SEATED DOLLARS

1846-O Silver Dollar, MS61
Low-Mintage Branch Issue

15816 1846-O MS61 NGC. OC-1, R.2. Osburn-Cushing Die State a/a. An important Mint State example of this low-mintage issue, the first of the series from the New Orleans Mint. The satiny surfaces are essentially brilliant and display fewer marks than anticipated for the grade. All 59,000 pieces were coined from the same pair of dies. Census: 5 in 61, 11 finer (1/17).

Ex: *Long Beach Signature* (Heritage, 6/2006), lot 2060; *Long Beach Signature* (Heritage, 9/2011), lot 4092; *Houston Signature* (Heritage, 11/2012), lot 3830; *FUN Signature* (Heritage, 1/2016), lot 4316; *ANA Signature* (Heritage, 8/2016), lot 5107. NGC ID# 26GG, PCGS# 6933

1861 Seated Dollar, MS63
Elusive in Mint Condition

15817 1861 MS63 PCGS. CAC. The 1861 Seated dollar is a slightly scarcer issue, as are many dates from the Civil War period, and is especially elusive in Mint State. This Select example is undeniably original with rich luster shining through deep olive-gold and russet-amber toning on the obverse and a light champagne hue on the reverse. The strike is bold, and a few trivial abrasions are hidden beneath the patina. Population: 14 in 63, 30 finer. CAC: 3 in 63, 6 finer (2/17). NGC ID# 24Z4, PCGS# 6951

1863 Seated Liberty Dollar, MS65
Low-Mintage Wartime Issue

15818 1863 MS65 PCGS. OC-1. Silver and gold hoarding during the Civil War forced the government to suspend specie payments, and the only silver dollars minted, 27,200 in 1863, were struck on account of private depositors of silver bullion. Banks, bullion dealers, and merchants purchased coins at a premium for use in foreign trade, mostly to Latin American and East Indian ports. The result of the low mintage and high exportation was a minuscule supply that were available for numismatic purposes, and most of those that were preserved were proof examples from the 460 such pieces minted.

Perhaps as many as 75 Mint State 1863 Seated dollars survive from the 27,200-coin mintage. That is an extremely low survival rate, and among those that do survive, the typical example grades MS63 or MS64. PCGS and NGC, combined, have certified 108 submissions in the various Mint State grades, including an unknown number of resubmissions. A total of 69 of those are in the two aforementioned grades and only 13 are in higher grades through MS67 (2/17).

This impressive Gem features a bold strike with every detail impressively rendered. The head details, skirt lines, and stars on the obverse are fully defined. All of the eagle's feathers, claws, the shield, and the leaves are crisply detailed. Both sides exhibit satin surfaces with full cartwheel luster beneath splendid toning. The pewter-gray obverse displays splashes of gold and steel-blue, while the reverse has vibrant gold, blue, and violet toning. An extraordinary piece for the advanced specialist. Population: 3 in 65, 5 finer (2/17). NGC ID# 24Z6, PCGS# 6953

1869 Seated Liberty Dollar, MS63
Underrated Issue

15819 1869 MS63 PCGS. OC-1, R.4.. This date is seldom encountered in any Mint State grade, and business strikes in general are far scarcer than the substantial mintage of 423,700 pieces would indicate. This example shows a bold strike on both sides, with gray-gold surfaces that show a bit of field haze, slightly diminishing the luster. Some doubling is evident in the motto. A small bit of struck-in grease, as made, is noted on the lower reverse. Nonetheless, this is an attractive and rare coin. Population: 11 in 63, 10 finer (2/17). Ex: Long Beach Signature (Heritage, 5/2007), 1358; ANA Signature (Heritage, 8/2007), lot 968. NGC ID# 24ZC, PCGS# 6962

1870-CC Seated Dollar, Toned AU50
Scarce Semikey

15820 1870-CC AU50 PCGS. OC-5. This deeply toned 1870-CC dollar shows consuming olive-gray patina over each side, which masks a few scattered abrasions. There is some strike weakness along the upper edge of the eagle's left (facing) wing, but the obverse is better rendered. There is only light evidence of wear. The 1870-CC is the most plentiful Seated Liberty dollar from this mint, although it is still scarce in high grade. This piece would make an excellent inclusion in a Carson City type or date set.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 24ZE, PCGS# 6964

1870-CC Silver Dollar, AU58
Prooflike Fields

15821 1870-CC AU58 PCGS. OC-7, R.5. Designated a near-Mint coin due to trivial high-point friction on Liberty's breast and knee, this 1870-CC Seated dollar shows no other characteristics that would prevent a Mint State designation. The fields are prooflike, and the devices are boldly struck. There are few light handling marks in the obverse fields, but none are individually distracting. Both sides display a light golden hue. The 1870-CC silver dollar is scarce in all grades, but high-end AU coins with the degree of eye appeal shown by this piece are decidedly rare. Despite the small mintage for this date of 11,758 pieces, the Osburn-Cushing website, Seateddollarvarieties.com, lists nine different die marriages, composed of four obverses and six reverses. This die pair is distinctive for its closely spaced mintmark and left-positioned date. *From The R. Thayer Sheets Yorktown Collection.* NGC ID# 24ZE, PCGS# 6964

1871-CC Silver Dollar, VF35
Challenging Carson City Issue

15823 1871-CC VF35 PCGS. OC-1, High R.4. At just 1,376 pieces, the mintage of the 1871-CC dollar is the lowest of all four Carson City issues in the Seated dollar series. This date is scarce in all grades, but Mint State and AU coins are nothing short of rare. Eye appeal is also hard to come by on the 1871-CC, and this makes even a lower-grade coin challenging to locate. Problem-free pieces are rare regardless of grade. This Choice VF representative shows bold detail, including on the word LIBERTY, which is often indistinct on the BER in this condition. Wear is light. Both sides display deep olive-brown toning and no distracting marks. A loupe reveals a few tiny, scattered planchet laminations upon careful scrutiny of the surfaces. NGC ID# 24ZH, PCGS# 6967

1870-CC Seated Dollar, Unc Details
Challenging Date in High Grade

15822 1870-CC — Cleaning — PCGS Genuine. Unc Details. OC-8, High R.4. No die rotation. This issue is rare in Mint State, usually seen only in middle or lower circulated grades. The present coin is unworn and shows no major abrasions, although hairlines beneath the dusky golden toning betray a light cleaning. This piece is sharply struck and has hints of reflectivity in the fields. An excellent opportunity for the budget-conscious collector to acquire a coin with Mint State-level detail.

1871-CC Seated Dollar, MS61
Rare in Mint Condition

15824 1871-CC MS61 ANACS. An 1871 Carson City dollar in any condition is the centerpoint of any silver dollar offering. With so few Uncirculated 1871-CC dollars known, the appearance of this MS61 ANACS dollar has to be considered an extraordinary event. The coin is unmentioned in any of the customary rosters of Carson City Seated dollars, and, as such, deserves to be recorded and duly noted for posterity. Few others are destined to join this illustrious list.

The Carson City Mint produced just 1,376 silver dollars in 1871, making it the lowest mintage of any CC silver dollar. Most entered general circulation and found significant use, judging by the relatively large number of circulated examples vs. the paucity of Uncirculated pieces. Total survivors are estimated at 175 pieces or so in all grades — a tiny number for collectors of this increasingly popular series. Only the 1873-CC silver dollar is slightly rarer (despite its larger mintage, since it was a date that saw significant melting).

This MS61 example is, like most, semiprooflike and well-struck with the exception of some weakness at the head and star 8. The rough ride at the Carson City Mint and points west left a few abrasions that account for the numeric grade assigned by ANACS. Subdued silver-gray and reddish-lilac surfaces with underlying mint luster give the coin an original, old silver appeal. As with apparently all high-grade examples of the date, the diagnostic remnant of a misplaced “1” appears on the dentils below the stem of the 7 in the date. Dollar enthusiasts searching for an exceptional 1871-CC silver dollar will take note of this opportunity to acquire an extremely rare BU example of the date as the highlight of their Seated dollar collection.

From The Pellegrini Collection, Part IV. NGC ID# 24ZH, PCGS# 6967

PROOF SEATED DOLLARS

1863 Seated Dollar, PR66
Elegant Visual Appeal
Ex: Gardner

15825 1863 PR66 PCGS. CAC. OC-P1. As paper money became devalued during the Civil War, the Mint charged significant premiums for proof sets purchased with greenbacks. In 1864, the New York collector Samuel Wetmore purchased a proof set (including gold) for \$101.25 in currency, as documented in the Chapman correspondence at the American Numismatic Society. Only 460 Seated dollar proofs were produced in 1863, down significantly from earlier totals in the decade. Osburn and Cushing report two known die pairs, this one showing an extension of the first horizontal shield line into the left border.

Scattered russet patina covers the lower portion of the obverse, while shades of sea-green evenly grace the portrait. Uniform almond-brown color blankets the reverse with pleasing tones of fire-orange and blue seen about the lower lettering as the coin is tilted. The strike shows full definition throughout. Population: 10 in 66 (1 in 66+), 0 finer. CAC: 4 in 66, 1 finer (2/17).

Ex: Pinnacle Rareties to Gene Gardner (6/2007); Eugene H. Gardner Collection, Part III (Heritage, 5/2015, as PR66 NGC), lot 98582. NGC ID# 23BS, PCGS# 7006

1866 Seated Liberty Dollar, PR64
First Year With Motto

15826 1866 Motto PR64 PCGS. CAC. OC-P2. Osburn-Cushing Die State a/a. Vivid shades of cobalt-blue and golden-brown toning blanket the well-preserved surfaces of this attractive Choice proof, with deeply mirrored fields and sharply detailed design elements underneath. From a mintage of 725 pieces, eye appeal is terrific. Population: 67 in 64 (1 in 64+), 10 finer. CAC: 9 in 64, 6 finer (2/17). NGC ID# 5GDV, PCGS# 7014

1867 Seated Liberty Dollar, PR64
625 Examples Struck

15827 1867 PR64 PCGS. OC-P1, R.3. Only 625 proof Seated Liberty dollars were struck in 1867 and the Osburn-Cushing website shows a single die variety for the issue. The hardy reverse die was used to strike proofs from 1866, when the motto was added, through 1870. This coin is an attractive Choice example with sharply detailed design elements and hazy, reflective fields. The lightly marked surfaces display shades of golden-tan and lavender-gray toning. Population: 64 in 64 (2 in 64+), 17 finer (2/17). NGC ID# 252N, PCGS# 7015

1869 Seated Dollar, PR65
Magnificent Color and Sharpness

15828 1869 PR65 PCGS. OC-P4, R.4. Proof silver dollars of 1869 are scarce in Gem condition, and fine examples are even rarer. High-end Choice coins are usually the best that collectors can acquire. We only handle a Gem example once or twice a year at best. Both sides of this representative display lovely multicolor toning that comes alive in the mirrored fields when tilted against a light. The strike is razor-sharp, and the only things preventing an even finer numeric grade are a few light hairlines that are well-hidden beneath the patina. An eye-appealing and conditionally rare proof. Population: 17 in 65, 7 finer (2/17). NGC ID# 252R, PCGS# 7017

TRADE DOLLARS

1873-S Trade Dollar, Bright MS64
Scarce Early Issue

15829 1873-S MS64 PCGS. A bright and flashy example, with loads of thick luster and a nearly full strike. Although 703,000 pieces were struck of the 1873-S Trade dollar, considerably fewer examples are known today as a large number were shipped to the Orient. In fact, the 1873-S is one of the two rarest issues in the series in Uncirculated condition and Gem examples are rare indeed. Population: 32 in 64 (1 in 64+), 4 finer (2/17).
Ex: *FUN Signature* (Heritage, 1/2008), lot 1889.
From *The Pellegrini Collection, Part IV*. NGC ID# 252Y, PCGS# 7033

The 2nd San Francisco Mint
under construction, circa 1870.

1873-S Trade Dollar, MS65
Only One Finer Coin at NGC

15830 1873-S MS65 NGC. Ex: Rev. Dr. James G. K. McClure. Trade dollars were struck for the first time in 1873 and the San Francisco Mint was the primary coining facility for the denomination throughout its short life as a business-strike issue (1873-1878). Struck to act as an acceptable medium of exchange in trade with the Far East, the 1873-S claims a nominal mintage of 703,000 pieces. The great majority of the coins fulfilled their intended purpose and were later melted in China and India. Probably none were saved by contemporary collectors and the survival of a few high-grade specimens, like the present coin, was just a matter of chance.

This attractive MS65 example exhibits well-detailed design elements, with just a touch of the usual softness on Liberty's head. The well-preserved surfaces display satiny mint luster and blushes of lavender, gray, and champagne-gold toning. Only a handful of survivors can match the quality of this remarkable first-year Gem. Census: 3 in 65, 1 finer (2/17). NGC ID# 252Y, PCGS# 7033

1875-CC Trade Dollar, MS64
Type One Reverse

15831 1875-CC Type One Reverse MS64 PCGS. Type One Reverse. Nearly 90% of all auction appearances are this variety, according to the cataloger's 2014 study of 1875 and 1876 Trade dollars. The actual study across all grades revealed 342 Type One and 45 Type Two examples of the 1875-CC Trade dollar. This Choice Mint State piece exhibits rich golden-brown toning over frosty luster with a single small mark in the upper obverse field. NGC ID# 2535, PCGS# 40108 Base PCGS# 7038

1875-S/CC Trade Dollar, MS63+
Popular Guide Book Variety

15832 1875-S/CC FS-501 MS63+ PCGS. Type One Reverse, Large S. The remnants of a previously punched CC are visible beneath and to the right of the primary mintmark, identifying this well-known *Guide Book* and *Cherrypickers* variety. FS-501 is the more dramatic of the two overmintmark varieties of this date and is seen more often than the FS-502. Since the Carson City Mint was an active facility in 1875, it is hard to understand why two reverse dies intended for use there ended up striking coins in San Francisco, with over-punched mintmarks. Perhaps the dies were still unused when the Carson City Mint switched from the Type One Reverse to the Type Two that year. Records indicate nearly 4.5 million Trade dollars were struck at the San Francisco Mint in 1875. It is certainly possible that facility needed more than their allotted number of dies later in the year, to accomplish that huge mintage. Perhaps Mint officials felt it was more efficient to send the unused reverse dies from Carson City to San Francisco for use late in 1875, rather than preparing new dies in Philadelphia for shipment all the way across the continent. No documentary evidence has been found on this subject, but this scenario seems convincing.

This Plus-graded Select specimen exhibits sharply detailed design elements in most areas, with just the slightest softness on the eagle's right (facing) claw. From a late state of the dies, an extensive network of peripheral die cracks is evident through the letters in the reverse legend. Low-intensity shades of lavender and pale gold toning blanket the lightly marked surfaces, with satiny mint luster underneath. Population (for the variety): 10 in 63 (1 in 63+), 9 finer (2/17). NGC ID# 2536, PCGS# 145813 Base PCGS# 7040

1878-CC Trade Dollar, MS61
Key Issue in This Short Series

15833 1878-CC MS61 NGC. The 1878-CC is the most popular rarity among business strike Trade dollars, largely due to its mintage, which by far is the lowest of the series (97,000 pieces). Moreover, according to mint records, 44,148 undistributed Trade dollars were melted on July 19, 1878. If all these were dated 1878-CC, as is generally assumed, a net mintage of 52,852 was available for distribution.

Paul Green, in a July 12, 2005 *Numismatic News* article entitled "1878-CC Trade Dollar Was Heavily Melted," brings in an additional factor to help explain the issue's rarity, saying "... the Trade dollar was unpopular and over the next few years, it is likely that a large number of that (net) mintage was destroyed, potentially making it even tougher than the already low mintage."

The MS61 survivor offered in this lot exhibits satiny surfaces that yield a pleasing cameo effect on both sides, with wisps of reddish-tan and sky-blue color at the peripheries, and occasional blushes of light tan-gold in the fields. The design elements are uniformly well-struck, with only portions of Liberty's hair revealing minor softness. Some light handling marks are visible under magnification, slightly more so on the obverse, but none are pronounced enough to detract from the coin's overall eye appeal. Census: 7 in 61, 18 finer (2/17).

Ex: *Houston Signature* (Heritage, 11/2007), lot 60790.

From *The Pellegrini Collection, Part IV*. NGC ID# 253M, PCGS# 7047

PROOF TRADE DOLLARS

1874 Trade Dollar, Toned PR66
Surprisingly Rare in High Grade

15834 1874 PR66 NGC. Proof output climbed to 700 specimens in the second year of the Trade dollar series. For reasons unknown, examples are typically found in PR61 to PR64 with an average assessment of 62.5. Gem proofs are rare, while Premium Gems are extremely so. Mixed golden-gray, lavender, blue, and olive patina blankets this flashy, broad-rimmed proof. Some examples come incompletely defined, but this piece is fully struck throughout. Census: 7 in 66, 2 finer (2/17). NGC ID# 27YK, PCGS# 7054

1878 Trade Dollar, PR65+ Cameo
First Philadelphia Proof-Only Issue

15835 1878 PR65+ Cameo PCGS. CAC. Although regular-issue Trade dollars were produced by the Carson City and San Francisco Mints in 1878, the Philadelphia Mint struck only proofs. A mere 900 pieces were issued, and the present coin is one of the better examples extant. Magnificent rainbow toning envelops the surfaces with violet, blue, red, and green toning on both sides with a circular window of pale russet on the obverse and lemon-yellow shades around the Liberty's portrait.

The sharply struck devices display delightful cameo contrast against the watery fields, which is duly recognized by the Cameo designation as well as the Plus designation. This well-preserved, high-end Gem has great eye appeal and would make a wonderful addition to any proof or Trade dollar collection. Population: 5 in 65 (2 in 65+) Cameo, 9 finer. CAC: 5 in 65, 2 finer (2/17). NGC ID# 27YP, PCGS# 87058

MORGAN DOLLARS

1878-CC Dollar, Well-Struck MS66+
Decidedly Rare Any Finer

15836 1878-CC MS66+ PCGS. CAC. The 1878-CC dollar enjoys great popularity among collectors due to it being a first-year-of-issue date and the CC mintmark. Moreover, examples are rarely seen above the MS66 grade level. The lustrous surfaces of this high-end Premium Gem exhibit well-struck design elements, including the hair above Liberty's ear. Even the eagle's breast, an area that is usually flat on most examples, shows remarkable feather detail. Both sides possess exceptional eye appeal, aptly recognized by CAC. PCGS reports 42 Plus-graded coins at the MS66 numeric level and a half-dozen MS67 coins finer (2/17).

Ex: *Houston Signature* (Heritage, 12/2013), lot 3715.

From *The Oklahoma Morgan Collection PCGS Registry Set*.
NGC ID# 253M, PCGS# 7080

1879-CC Morgan Dollar, MS60
Key Carson City Issue

15837 1879-CC MS60 PCGS. This semiprooflike dollar displays excellent luster and a good strike. The portrait is peppered with tiny marks, and the eagle's breast shows a vertical shallow graze. Light golden toning contributes to the eye appeal. The 1879-CC is the key to the Carson City Morgan dollars during their first era of production (1878 to 1885).

Ex: *Dallas Signature* (Heritage, 11/2007), lot 1014.

From *The Oklahoma Morgan Collection PCGS Registry Set*.
NGC ID# 253U, PCGS# 7086

1879-CC Morgan Dollar, MS62
Lustrous and Appealing

15838 1879-CC MS62 PCGS. Normal Mintmark. This Mint State 1879-CC Morgan dollar displays the typical Carson City dollar look: brilliant, frosty, and well-struck. Scattered abrasions limit the grade, although such are an expected sight on this better date, which is scarce in high grade. No abrasions are individually bothersome. The Normal Mintmark variant of the 1879-CC is arguably scarcer than the Capped Die variety.

From *The R. Thayer Sheets Yorktown Collection*. NGC ID# 253U, PCGS# 7086

1879-CC Morgan Dollar, MS62
Deep Mirror Prooflike Example

15839 1879-CC MS62 Deep Mirror Prooflike PCGS. The deeply reflective fields and sharply-detailed frosty devices create intense cameo contrast, while highlights of light golden toning visit the peripheries of this attractive Morgan dollar. The 1879-CC is a low-mintage, sought-after issue, prized for its charismatic mintmark. Population: 19 in 62 Deep Mirror Prooflike, 40 finer (2/17).

Ex: *Chicago Signature* (Heritage, 8/2011), lot 4444.

From *The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars*. NGC ID# 253T, PCGS# 97087

1879-CC Morgan Dollar, MS62
Popular Capped Die Variety, VAM-3

15840 1879-CC Capped Die, VAM-3, MS62 NGC. A Top 100 Variety. The surfaces of this lustrous Mint State dollar are covered in light gold toning that deepens near the borders. Both sides have sharp design features and the remnants of a smaller, partially effaced CC are evident beneath the primary mintmark. The obverse has slightly reflective fields around frosty devices while the reverse has frosty luster throughout.

Ex: FUN Signature (Heritage, 1/2007), lot 6880.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1879-CC Morgan Dollar, MS64
Capped Die, VAM-3, Two-Sided Reflectivity

15841 1879-CC Capped Die, VAM-3, MS64 PCGS. A Top 100 Variety. A large CC mintmark was struck over the remains of a smaller CC, after the first mintmark was partially effaced, creating the popular VAM-3 variety. This attractive Choice specimen offers well-detailed, frosty design elements and lightly marked surfaces that show much prooflike reflectivity in the fields. PCGS has graded 13 numerically finer examples of this variety (2/17).

From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1880-S Morgan Dollar, MS68+
Brilliant and Fully Struck Type Coin

15842 1880-S MS68+ NGC. The 1880-S is one of the premier Morgan dollar issues for type representation, as coins can be located with ease through MS68. Comparably graded examples with a Plus designation are rare, however, and only a handful of MS69 dollars are known. This is an incredible, mark-free offering with fully brilliant surfaces, cartwheel luster, and complete strike characteristics. NGC shows five finer submissions (2/17). NGC ID# 2544, PCGS# 7118

1881 Dollar, MS65 Deep Prooflike
No Numerically Finer NGC or PCGS Examples

15843 1881 MS65 Deep Prooflike NGC. Save for a slight amount of field chatter that is scarcely visible, this coin at first glance could be mistaken for a true proof. The silver-white surfaces are completely untuned, except for a thin ring of gold around the extreme rim. Liberty's cheek is mostly pristine, save for a couple of small abrasions noted under a loupe. Census: 13 in 65 Deep Prooflike, 0 finer (2/17).

Ex: M.L. Moser Collection, #1 NGC Morgan Dollar Set.

Ex: Long Beach Signature (Heritage, 2/2007), lot 5433; FUN Signature (Heritage, 1/2013), lot 6086.

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 3RG7, PCGS# 97125

1881-CC Dollar, Bold MS67+ CAC
Radiant Mint Luster

15844 1881-CC MS67+ PCGS. CAC. Both 8s show die fill within the upper loops. The 1881-CC issue has an excellent reputation for sharp strikes, and this Superb Gem representative does not disappoint. The devices are fully struck, and each side displays radiant mint frost over entirely brilliant surfaces. This Registry-quality piece is free of any mentionable impairments and claims a low mintage of only 296,000 coins. Nearly impossible to find any finer, and even in this grade CAC-approved coins are elusive. PCGS has graded four numerically finer examples. CAC: 50 in 67, 1 finer (2/17). NGC ID# 2549, PCGS# 7126

1881-O Silver Dollar, MS66
Colorfully Toned, Conditionally Rare

15845 1881-O MS66 PCGS. Available in lower grades, the 1881-O Morgan dollar becomes conditionally rare in MS66, and no Superb Gems are reported by either leading service. This vibrantly lustrous Premium Gem displays an uncommonly bold strike and radiant cartwheel luster. But the chief visual appeal comes from the beautiful rainbow toning that swirls across each side; the colors are more intense on the obverse, but the patina is undeniably two-sided. Population: 37 in 66 (3 in 66+), 0 finer (2/17). NGC ID# 2548, PCGS# 7128

1881-S Dollar, MS68+
A Single Coin Finer at NGC

15846 1881-S MS68+ NGC. The 1881-S is famously available in high grades with a couple of MS69 coins extant, but that does not in any way diminish the amazing quality of this MS68+ Morgan dollar. Aside from a blush of peach-gold and cobalt-blue toning at the upper-right reverse border, the surfaces of this practically flawless Superb Gem are brilliant. Frosty luster and full strike detail are additional attributes. This is one of five MS68+ examples at NGC, and there is a single coin graded higher (2/17). NGC ID# 2549, PCGS# 7130

1882-O Morgan, MS66 Prooflike
Tied for Finest in Prooflike

15847 1882-O MS66 Prooflike PCGS. Premium Gem 1882-O Morgan dollars are scarce; Prooflike Premium Gems are extremely rare. This brilliant, modestly contrasted example is tied for the finest Prooflike coin at PCGS, and there are no numerically comparable Prooflike pieces at NGC (2/17). The strike is sharp, and Liberty's cheek is clean. Eye appeal surpasses expectations for this New Orleans issue. Population: 3 in 66 Prooflike, 0 finer (2/17). NGC ID# 254C, PCGS# 7137

1883 Morgan Dollar, MS66
Rare Deep Mirror Prooflike Example

15848 1883 MS66 Deep Mirror Prooflike PCGS. The 1883 Morgan dollar is a challenging issue in the Deep Mirror Prooflike category, particularly in high grade. Premium Gems are rare. Moreover, no Prooflike or DMPL coins are certified finer than the Premium Gem level at either service (2/17). This top-grade coin is brilliant and displays considerable cameo contrast on each side. The strike is sharp, and only a few trivial marks are discernible on each side, as is normal for Morgan dollars with highly reflective fields. This is a Registry-grade rarity that seldom appears at auction. Population: 14 in 66 (2 in 66+) Deep Mirror Prooflike, 0 finer (1/17). NGC ID# 254G, PCGS# 97143

1883-CC Silver Dollar, MS67+
None Finer at NGC

15849 1883-CC MS67+ NGC. VAM-8A. "Doubled Date, Bar Below Second 8, CC Set Right, Clashed Obverse n" — The VAMworld.com headline of this scarce variety is extensive. Other than the "clashed n" characteristic, the chief appeal of this variety is likely the recutting inside the upper loop of the first 8 in the date. As a date, the 1883-CC Morgan is occasionally available in MS67 but almost never finer. This Plus-designated coin offers brilliant, frosty mint luster and a bold strike. A few faint roller marks (mint-made) are visible on Liberty's jaw with a loupe. None are finer at NGC (2/17). NGC ID# 254J, PCGS# 7144

**1883-CC Morgan Dollar, MS67+
None Numerically Finer at NGC**

15850 1883-CC MS67+ NGC. VAM-3A. This scarce Carson City VAM displays a clashed n (from In) near Liberty's neck. A mere hint of almond-gold toning adorns this thoroughly lustrous and boldly struck high grade example. Nearly pristine save for a concealed thin mark on the left (facing) wing. A gorgeous Morgan. Census: 4 in 67+, 5 in 67★, 1 in 67+★, 0 finer (2/17).
Ex: Stamford Coinfest Signature (Heritage, 10/2010), lot 4230, Long Beach Signature (Heritage, 9/2013), lot 5662. NGC ID# 254J, PCGS# 7144

**1883-CC Silver Dollar, MS67 Prooflike
Among the Finest Prooflike Coins Certified**

15851 1883-CC MS67 Prooflike NGC. Prooflike examples of the 1883-CC Morgan dollar become scarce in Premium Gem condition and are rare at the Superb Gem level. This brilliant, reflective example is tied with one other as the finest at NGC (2/17). The strike is bold, and neither side exhibits mentionable abrasions. An outstanding Registry Set candidate. NGC ID# 254H, PCGS# 7145

**1886 Silver Dollar, MS67 Prooflike
Doubled Arrows, VAM-17, Top 100**

15852 1886 Doubled Arrows, VAM-17, MS67 Prooflike PCGS. A Top 100 Variety. Although undesignated as such on the PCGS insert, this is the well-known variety that shows die doubling to the south on the shaft and fletchings of the lowest arrowhead. As of (3/17), PCGS has certified two examples as MS67, and one as MS67+, but none above the MS65 level as either Prooflike or Deep Mirror Prooflike. Light to medium peach patina graces the borders of this lustrous and essentially immaculate Superb Gem. The strike is intricate, although the reverse field has a slightly dimpled appearance, as struck on a planchet that was textured on one side. NGC ID# 254V, PCGS# 42726 Base PCGS# 7167

**1887-S/S VAM-2 Silver Dollar
MS64 Deep Mirror Prooflike**

15853 1887-S/S VAM-2 MS64 Deep Mirror Prooflike PCGS. A Top 100 Variety. Undesignated as such on the PCGS holder, but the serif and lower curve of an errant mintmark impression reside within the mintmark. This is the early die state with normal denticles beneath the date. Brilliant and flashy with a good strike. Uncirculated 1887-S dollars are fairly easy to secure, but Deep Mirror Prooflike pieces are very scarce. PCGS has certified five DMPL examples as VAM-2, with the single finest at the MS64 level (3/17).
From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. PCGS# 42941 Base PCGS# 97181

**1888-O VAM-4 Dollar, MS61
Conditionally Rare 'Hot Lips' Variety**

15854 1888-O Hot Lips, Doubled Die Obverse, VAM-4, Top 100, MS61 PCGS. A Top 100 Variety. VAMWorld.com explains: "Exciting doubled die with two clearly defined set of lips, chins and noses. A faint second eyelid can also be seen. Very hard to find in high grade AU and ultra rare in MS." Characteristically defined, this Uncirculated 1888-O offers a combination of mint brilliance and softly frosted luster that is exceedingly difficult to locate for the variety. Scattered abrasions limit the grade. Population: 2 in 61, 1 finer (2/17). NGC ID# 2556, PCGS# 133919 Base PCGS# 7308

**1889-CC Morgan Dollar, AU50
Most Elusive Carson City Morgan**

15855 1889-CC AU50 PCGS. From a low mintage of 350,000 pieces, all struck after the Carson City Mint reopened for coinage operations in October, the 1889-CC is the rarest CC-mint Morgan dollar. This attractive AU specimen shows slight wear on the hair above the ear and the eagle's breast, but the lightly abraded surfaces retain a few traces of original mint luster. Hints of sea-green and turquoise toning visit the reverse. NGC ID# 2559, PCGS# 7190

1889-CC Silver Dollar, AU58
Most Elusive Carson City Morgan

15856 1889-CC AU58 PCGS. The Carson City Mint was used as an assay and storage facility during the 1886-1888 time period. The Mint was scheduled to resume coinage operations in 1889, but extensive repairs were needed and key personnel had to be hired before the re-opening could be accomplished. As a result, no coins were struck until October, and only 350,000 Morgan dollars were produced before year's end. In addition to the low mintage, Rusty Goe notes many examples of the 1889-CC that were held in government storage were later melted, further reducing the supply of collectible specimens. Only one single example of the 1889-CC was offered in the famous GSA sales of the 1970's. Today, the 1889-CC is the rarest Morgan dollar from the Carson City Mint and an important key to the series.

This impressive near-Mint specimen offers sharply detailed design elements, with just a trace of wear on the devices. The surfaces are lightly abraded and show a few hints of greenish-gold toning. Vibrant mint luster adds to the considerable eye appeal.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 2559, PCGS# 7190

1889-CC Silver Dollar, Unc Details
Semireflective Fields

15857 1889-CC — Improperly Cleaned — NGC Details. Unc. The rarest Carson City Morgan dollar is often represented by a low-grade coin in budget-restricted collections, while most other dates will be Uncirculated. For the sake of continuity, the collector may wish to acquire the present coin to fill the key date hole in a Mint State Carson City set. This piece is unworn and satiny with lustrous fields. Scattered hairlines that prevent a numeric grade are only visible with a loupe, and they serve well to keep this piece within the grasp of a budget.

1889-CC Morgan Dollar
Uncirculated Details

15858 1889-CC — Improperly Cleaned — NGC Details. Unc. The typical key date 1889-CC dollar grades Very Fine, but the present minimally marked piece is free from wear, and displays unbroken cartwheel luster. Liberty's cheek and neck are minutely granular, and the butter-gold surfaces are slightly subdued. Nonetheless, an important opportunity to obtain a fully defined example for an affordable price.

From The Pellegrini Collection, Part IV.

1889-CC Dollar, MS63 Deep Prooflike
Strong Cameo Contrast

1890-O Dollar, MS65 Deep Mirror Prooflike
Very Rare With This Depth of Mirrors

15859 1889-CC MS63 Deep Prooflike NGC. The 1889-CC is the key date of the Carson City Morgan dollar series, and is usually encountered in circulated grades. The typical example is a cleaned VF. Uncirculated pieces are rare, and when found, often exhibit field reflectivity. The present brilliant example, though, is remarkably mirrored, and since the motifs are frosty, the cameo effect is unmistakable. A sharp strike further ensures the eye appeal. Marks are minor for the Select level, particularly on Liberty's cheek and neck. A memorable representative of this coveted Old West issue. Census: 32 in 63 Deep Prooflike, 12 finer (2/17).

Ex: Long Beach Signature (Heritage, 2/2012), lot 4235.

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 2559, PCGS# 97191

15860 1890-O MS65 Deep Mirror Prooflike PCGS. Even though the 1890-O had a large mintage of 1.7 million pieces, a very small percentage were struck on polished or heavily polished planchets. Such pieces are worth significant premiums when encountered. This is an all-brilliant example with deeply reflective fields and noticeably frosted devices. The central strike details are somewhat stronger than the typical 1890-O dollar. Population: 21 in 65 Deep Mirror Prooflike, 1 finer (2/17). NGC ID# 255E, PCGS# 97201

**1891 Silver Dollar, MS65+
Beautifully Toned Condition Rarity**

15861 1891 MS65+ PCGS. CAC. Ex: Simpson. The 1891 Morgan is available through MS64, but the population makes a plunge at the Gem grade level, and finer coins are extremely rare. This high-end, CAC-approved Gem is a Registry-grade condition rarity, set above its peers by the Plus designation. It is also among the finest coins endorsed by CAC, a distinction that makes it uniquely appealing. Frosty mint luster is mostly unabraded, and both sides display vivid aquamarine, lavender, and lemon-gold border toning around soft amber-gold interiors. Minor strike weakness on the eagle's breast is normal for the issue. PCGS and NGC each list only three finer coins (2/17). NGC ID# 255G, PCGS# 7204

**1891-CC Silver Dollar, MS65+
Few Seen Finer**

15862 1891-CC MS65+ PCGS. The 1891-CC is available in Gem condition but rare any finer. This Plus-designated MS65 coin strikes a balance between rarity and cost without compromising quality. The strike is bold, and frosty mint luster illuminates tan-gold toning on each side. A loupe reveals only trivial signs of contact. PCGS has seen 36 finer representatives (2/17). NGC ID# 255H, PCGS# 7206

**1892-CC Silver Dollar, MS65
Semiprooflike Fields**

15863 1892-CC MS65 PCGS. Prooflike 1892-CC dollars are rare in high grade. Although not designated Prooflike by PCGS, this Gem displays noticeably reflective fields with subtle cameo contrast on each side. Traces of golden toning attest to the originality of the surfaces. The strike is sharp, and there are no major abrasions. PCGS reports only 31 numerically finer examples (2/17). NGC ID# 255M, PCGS# 7214

**1892-O Morgan Dollar
MS64 Prooflike**

15864 1892-O MS64 Prooflike PCGS. Typical strike weakness appears at the central obverse and reverse, including the hair over Liberty's ear, and the eagle's breast feathers. The obverse exhibits a high degree of mint brilliance and the reverse has a trace of champagne toning. This is an extremely important and highly attractive example. Population: 4 in 64 Prooflike, 1 finer (2/17). *From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars.* NGC ID# 255N, PCGS# 7217

1892-S Morgan Dollar, MS63
Notable Condition Rarity, Seldom Available

15865 1892-S MS63 NGC. A check of auction records going back a dozen years reveals remarkably few sales of this key date in Select Uncirculated or finer conditions. Oddly, it is more unusual to see a coin offered at the MS63 level (such as the present coin) than it is at higher Mint State 64 or 65 grades. David Bowers noted the same anomaly when writing his 1993 *Encyclopedia*, with higher-grade coins appearing more frequently seen than their mid-grade, Uncirculated counterparts. He suggested only 25 to 50 coins exist in Select Uncirculated condition, an estimate that seems accurate (or even a bit overstated) based on today's population reports. Given the large price differences between grades, it is a trend worth noting when assembling a Select-or-better set.

Apparently, almost all 1892-S dollars entered circulation shortly after production, and today the mintage is most often represented by coins in circulated grades. Almost no Uncirculated examples emerged from the final Treasury releases or GSA sales, and sliders were widely sold as Uncirculated coins before third-party grading evolved to help put an end to the practice. For many years, the 1892-S had a "bad reputation" of being overgraded and overvalued. The irony is those price levels seem unbelievably generous in today's market.

This untoned, silver-white example is wonderfully unabraded for the grade, with exceptional smoothness to the fields and Liberty's cheek. Soft, satiny luster is abundant over the semiprooflike surfaces. A touch of weakness over the ear does not detract from the otherwise-bold devices. Census: 7 in 63, 12 finer (2/17).

Ex: M L Moser Collection/Central States Signature (Heritage, 4/2014), lot 5306.

From The Pellegrini Collection, Part IV. NGC ID# 255P, PCGS# 7218

1893 Morgan Dollar, MS62
Rare Deep Mirror Prooflike Example

15866 1893 MS62 Deep Mirror Prooflike ANACS. The 1893 Morgan dollar is an elusive date in the context of the series, due to the small mintage of 378,000 pieces. Production totals were down at all the U.S. mints in 1893, and the coins were not well-produced as a general rule. The 1893 is known for weak strikes and excessive bagmarks, and the issue is particularly rare with prooflike surfaces.

The present coin is a welcome exception to the rule, as the design elements are well-detailed and the surfaces show a scattering of minor contact marks, all consistent with the grade. The fields are deeply reflective, in contrast to the frosty devices, and display hints of champagne-gold and lavender toning.

Ex: FUN Signature (Heritage, 1/2013), lot 6238.

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 57AM, PCGS# 97221

1893-CC Morgan Dollar, MS62
Final CC-Mint Issue

15867 1893-CC MS62 PCGS. A touch of burnt-orange toning near the rims surrounds the brilliant, frosted surfaces of this 1893-CC dollar, from the final year of operation at the Carson City Mint. This is a worthy representative of the event since it received a stronger strike than many of this issue and has nice, silvery appeal. Just 677,000 pieces were produced.

From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, MS62
Scarce Carson City Issue

15868 1893-CC MS62 PCGS. Blazing cartwheel luster confirms the Mint State status of this scarce Carson City Mint product. Most of the design elements are sharply struck, except for the hair detail just above Liberty's ear. The obverse has a slightly scuffy appearance, but the reverse is nicely preserved.

Ex: Dallas Signature (Heritage, 4/2007), lot 1198.

From The Pellegrini Collection, Part IV. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar
MS62 Prooflike
Last of the Carson City Coinage

15869 1893-CC MS62 Prooflike PCGS. The Carson City Mint ceased coinage operations in 1893 after a limited production of silver dollars and gold coins. This elusive Prooflike Mint State example has extremely brilliant surfaces with trivial marks. The central obverse and reverse devices are weakly impressed as usual. Population: 63 in 62 Prooflike, 25 finer (2/17).

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 255S, PCGS# 7223

1893-O Morgan, Lustrous MS62
Much Better O-Mint Issue

15870 1893-O MS62 PCGS. The low mintage of 300,000 pieces is a sufficient drawing card with most collectors for the 1893-O, but the real challenge is finding a coin with few bagmarks and a reasonably sharp strike. This brilliant and lustrous MS62 coin has both positive attributes, although we do note that the central strike is a trifle weak over the ear. The fields and Liberty's cheek are remarkably free of marks. The eye appeal especially strong for the issue. NGC ID# 255T, PCGS# 7224

1893-O Morgan Dollar, MS62
Low-Mintage, Branch Mint Issue

15871 1893-O MS62 PCGS. The 1893-O has the lowest production of any New Orleans Morgan (300,000 pieces). This MS62 example displays some semiprooflike characteristics, especially on the reverse. The design features exhibit better definition than usually seen, including the hair over Liberty's ear and the eagle's breast feathers. Small marks on Liberty's cheek limit the grade. Nevertheless, a nice-looking coin both for the designated grade and the issue.

From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 255T, PCGS# 7224

1893-O Silver Dollar, MS62+
Better New Orleans Issue

15872 1893-O MS62+ PCGS. The 1893-O is a better date, boasting a mintage of only 300,000 coins — very low in the realm of Morgan dollars. This lightly abraded example is a cut above the typical MS62 coin, showing a better-than-usual strike and brilliant, vibrant luster. A few minor grazes on the cheek prevent a full Select grade. NGC ID# 255T, PCGS# 7224

1893-O Dollar, Untoned MS64
Uncollectible Any Finer

15873 1893-O MS64 PCGS. CAC. From a mintage of 300,000 coins, the 1893-O is the lowest-production New Orleans issue in the entire Morgan dollar series. Like all dollars struck across the four mints in 1893, examples of the 1893-O are always in demand. Circulated coins are available, while lower Mint State examples (MS60 to MS63) are scarce. Choice Uncirculated dollars are very scarce, often the target of those for whom an MS65 is beyond reach. There are probably no more than 10 Gems extant.

This fully brilliant near-Gem is characteristically defined with incomplete detail over Liberty's ear and the eagle's breast feathers. There is minor chatter around Liberty's neck and above IN GOD WE TRUST, but the remaining areas are remarkably clean. Population: 89 in 64 (3 in 64+), 6 finer. CAC: 18 in 64, 0 finer (2/17). NGC ID# 255T, PCGS# 7224

1893-O Morgan Dollar
MS62 Deep Mirror Prooflike

15874 1893-O MS62 Deep Mirror Prooflike PCGS. Prooflike and Deep Mirror Prooflike 1893-O Morgan dollars are extremely rare, regardless of the numerical level, and when they are encountered, quality is generally lacking. This piece has brilliant silver surfaces. The fields exhibit full mirroring and the devices display satin luster. A typical strike shows weakness above Liberty's ear, but all other design elements are well defined. Close examination reveals a few faint splashes of champagne toning on each side. Population: 8 in 62 Deep Mirror Prooflike, 6 finer (2/17).

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 255T, PCGS# 97225

1893-S Morgan Dollar, VF30
Pleasingly Toned Collector Grade Example

15875 1893-S VF30 PCGS. The 1893-S is a legendary rarity in the Morgan dollar series, from a minuscule business-strike mintage of 100,000 pieces. This pleasing VF30 specimen shows Liberty's ear well-defined and two thirds of the hair lines from the top of the forehead to the ear remain intact. Attractive shades of golden-brown and lavender-gray toning visit the lightly abraded surfaces. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, VF35
Pleasingly Toned Series Key

15876 1893-S VF35 PCGS. From a series-low business-strike mintage of 100,000 pieces, the 1893-S Morgan dollar is the sought-after key to the entire series. This impressive Choice XF specimen shows light wear on the hair above the ear and eagle's breast, but the ear is bold and the wing feathers are all plain. The lightly marked surfaces are toned in pleasing shades of lavender-gray and greenish-gold. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, XF40
Business-Strike Key Issue

15877 1893-S XF40 ANACS. Only 100,000 Morgan dollars were struck at the San Francisco Mint in 1893 and few examples were saved by contemporary collectors. Today, the 1893-S is the rarest business-strike Morgan dollar and collectors prize examples in all grades and conditions. This lightly worn specimen shows most hair lines and Liberty's ear bold, with some wear showing on the eagle's breast and wing tips. The pleasing surfaces are lightly abraded. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, XF45
Low-Mintage Series Key

15878 1893-S XF45 PCGS. This is an extremely attractive Choice XF example of the perennially popular 1893-S Morgan, nicely toned silver-gray with light glints of gold. Contact marks are minimal throughout both sides, but this piece has top-notch eye appeal and an overall appearance that most series specialists should well appreciate.

From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 255U, PCGS# 7226

1893-S Dollar, AU53

Key Issue With Significant Remaining Luster

15879 1893-S AU53 PCGS. Nearly full luster is visible on each side of this example, complementing the attractive light gray and gold surfaces. Both sides have the usual quota of small surface marks that are expected at this grade level. This is a splendid piece with excellent eye appeal. A number of key-date coins have recently enjoyed exceptional demand in all grades, including this 1893-S silver dollar. As the supply of these coins has remained stationary, the increased demand has forced prices higher, a basic rule of economics. An additional factor in the price structure of these coins is the popularity of this issue in all AU grades. With Mint State pieces priced at extremely high levels, many collectors are entirely satisfied with a nice AU piece, such as this example.

Ex: National Money Show Auction (Heritage, 3/2007), lot 1351, where it brought \$21,850.

From The Pellegrini Collection, Part IV. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, AU53

Remarkably Clean Example of This Key Issue

15880 1893-S AU53 NGC. The 1893-S is one of the most desirable and popular issues in the Morgan dollar series. David Bowers, in his 2005 second edition *Guide Book of Morgan Silver Dollars*, makes some interesting comments about this important key date: "The majority of known pieces, into the thousands, are in the single grade category of Very Fine. Not G or VG, not EF or AU, but VF. Most such pieces circulated in the American West, and for an appropriate but apparently restricted time, to bring them to this grade. Mint State coins exist. However, among the great Treasury release coins of 1962 through 1964, no bag or even small group was found, although many stray pieces were identified, nearly all in the aforementioned VF grade."

The collector who desires to acquire a high-grade 1893-S for her/his collection will want to give serious consideration to the AU53 example in this lot. As Bowers implied above, Mint State specimens are not seen in quantity. NGC and PCGS combined have graded only 63 Uncirculated coins, and a number of them are likely resubmissions (2/17). This specimen contains a fair amount of luster in the recessed areas, and is essentially untoned. Sharp definition is apparent on the design elements, though light wear is visible in portions of Liberty's hair and on the eagle's breast. A few wispy circulation marks on each side do not detract.

Ex: Central States Signature (Heritage, 5/2007), lot 2180, where it realized \$20,700.

From The Pellegrini Collection, Part IV. NGC ID# 255U, PCGS# 7226

1893-S Dollar, Attractive AU53
Slight Toning

- 15881** 1893-S AU53 NGC. David Bowers writes in *Silver Dollars and Trade Dollars of the United States* that: "It may have been that tens of thousands of 1893-S dollars were melted under terms of the 1918 Pittman Act. Still many thousands were released into circulation." This lightly circulated example retains a decent amount of luster and whispers of light tan color around the borders. Partially prooflike fields establish mild contrast with the well-defined motifs. A few minute marks on the cheek, neck, and left obverse field are consistent with the grade and do not detract.
Ex: FUN Signature (Heritage, 1/2007), lot 1117; National Money Show Auction (Heritage, 4/2007), lot 1350; FUN Signature (Heritage, 1/2009), lot 5020, where it brought \$24,150.
From *The Pellegrini Collection, Part IV*. NGC ID# 255U, PCGS# 7226

1894 Morgan Dollar, MS63
Low-Mintage Philadelphia Issue

- 15882** 1894 MS63 PCGS. Bright luster emanates from this impressive Select Morgan dollar. Both sides are essentially untoned and exhibit sharply struck design elements, including good detail in the hair above Liberty's ear and the eagle's breast feathers. Some minute marks scattered about are in concert with the designated grade. From a low mintage of 110,000 pieces.
From *The Oklahoma Morgan Collection PCGS Registry Set*. NGC ID# 255V, PCGS# 7228

1894 Morgan Dollar, MS63
Popular, Low-Mintage Issue

- 15883** 1894 MS63 PCGS. Bright and lustrous, with most of the mint appeal intact. One minor scuff in the field before Liberty's forehead from a higher grade. A scarce date and one that is always popular with collectors because of its low mintage of 110,972 pieces. This particular coin is loaded with appeal.
Ex: Long Beach Signature (Heritage, 9/2005), lot 6047.
From *The Pellegrini Collection, Part IV*. NGC ID# 255V, PCGS# 7228

1894-O Morgan Dollar
MS61 Deep Prooflike
Only Three Certified at NGC in All Grades

- 15884** 1894-O MS61 Deep Prooflike NGC. NGC has only certified three Deep Prooflike 1894-O Morgan dollars, graded AU55, AU58, and MS61. PCGS adds three more to the census, all three graded MS62 Deep Mirror Prooflike, suggesting the possibility of resubmissions. This piece has an adequate strike, showing typical weakness over Liberty's ear but strong design elements elsewhere.
From *The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars*. NGC ID# 255W, PCGS# 97231

1895-S Morgan Dollar, MS63
Lustrous and Lightly Toned

15885 1895-S MS63 PCGS. CAC. Known as a heavily bagmarked issue, surviving 1895-S Morgan dollars are often relegated to the lower Mint State grades, with coins in MS63 and finer considered appealing. A Select example, this specimen displays flashy lustrous surfaces, with areas of light golden-brown toning at the peripheries. A small spot appears near the second S in STATES. *From The Oklahoma Morgan Collection PCGS Registry Set.* NGC ID# 255Z, PCGS# 7238

1895-S Silver Dollar, MS65
Conditionally Rare

15886 1895-S MS65 PCGS. 30th Anniversary Green Label Holder. With a mintage of only 400,000 coins, the 1895-S Morgan dollar is a semikey date in all grades and is particularly challenging in Mint State. However, it is a stand-out rarity in Gem condition and extremely rare any finer. This MS65 coin displays semiprooflike fields and above-average strike definition. The interiors are uniformly light golden, while the obverse border displays irregular russet toning and the reverse has a delicate rainbow periphery. A few faint grazes on Liberty's cheek define the grade. Population: 42 in 65 (3 in 65+), 3 finer (2/17). NGC ID# 255Z, PCGS# 7238

1895-S Over Horizontal S Dollar
MS64 Deep Mirror Prooflike
VAM-4, Top 100

15887 1895-S S Over Horizontal S, VAM-4, MS64 Deep Mirror Prooflike PCGS. A Top 100 Variety. The PCGS insert does not mention the variety, but this is the S Over Horizontal S VAM-4, popularized by Jeff Oxman and Michael S. Fey in their popular VAM Keys reference. Light caramel-gold toning graces this flashy and nicely struck better date dollar. A small ebony freckle is on the seam of the left (facing) wing. Minor marks on the left obverse field account for the grade. The 1895-S is rare in Deep Mirror Prooflike format, and PCGS has certified only one such piece as VAM-4, at the MS62 level (3/17).

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 255Z, PCGS# 43808 Base PCGS# 97239

1896-O Morgan Dollar
MS62 Prooflike

15888 1896-O MS62 Prooflike NGC. Delicate gold toning clings to the peripheries of this lovely Prooflike Mint State 1896-O Morgan silver dollar, an elusive issue with mirrored surfaces. This piece is a wonderful exception to the rule that prooflike 1896-O dollars have dull, unattractive surfaces. A lovely example with brilliant and highly attractive surfaces. Census: 3 in 62 Prooflike, 0 finer (2/17). *From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars.* NGC ID# 2563, PCGS# 7243

1896-O Morgan Dollar
MS60 Deep Mirror Prooflike

15889 1896-O MS60 Deep Mirror Prooflike PCGS. Only seven Deep Mirror Prooflike examples of the 1896-O have been certified by PCGS, grading AU58, MS60, MS61 (2), and MS62 (3) (2/17). A typical strike is noted on this extraordinary piece that exhibits deeply mirrored fields and fully lustrous devices. *From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars.* NGC ID# 27ZU, PCGS# 97243

1898-O Dollar, MS67 Prooflike
All-Brilliant, Among the Finest Certified

15890 1898-O MS67 Prooflike PCGS. Dollars struck at the New Orleans Mint in 1898 can be found with prooflike surfaces through MS66 without too much searching, but Superb Gems only appear on the market every few years on average. This gorgeous MS67 Prooflike dollar is fully brilliant and strongly defined at the centers. Vibrant luster cartwheels over exceptionally clean surfaces. A mark above the eagle's right (facing) leg is the only blemish. Population: 3 in 67 Prooflike, 0 finer (2/17). NGC ID# 2569, PCGS# 7255

1900-O/CC Morgan Dollar, MS66
Beautifully Toned, A Top 100 Variety

15891 1900-O/CC VAM-8A MS66 PCGS. A Top 100 Variety. Rust spots appear around the mintmark on VAM-8A. This is one of the scarcer die pairs that make up the 1900-O/CC *Guide Book* variety. All die pairs included, this issue is scarce in MS66 and extremely rare any finer, where PCGS records only two coins (2/17). This example is vividly toned on the obverse with lemon-yellow, pine-green, violet, and orange-gold, while the reverse displays more tradition rainbow peripheral toning around a brilliant interior. The usual strike weakness appears on the central high points. NGC ID# 256G, PCGS# 133961 Base PCGS# 7268

1901 Dollar, Lustrous MS62

15892 1901 MS62 PCGS. The fields of this Uncirculated 1901 Morgan are highly lustrous, while the devices show grade-limiting marks. Some strike weakness occurs on the central high points as is typical of the issue. Varying shades of lavender toning paint the margins, leaving the interiors with a warm champagne glow. NGC ID# 256J, PCGS# 7272

1901 Silver Dollar, MS62
Lustrous and Pleasing for the Grade

15893 1901 MS62 PCGS. An affordable Uncirculated example of this conditionally elusive semikey. Light, scattered abrasions limit the grade but are outweighed by the scarcity of the 1901 dollar in Mint State. Satiny luster sports a light golden hue with deeper amber and russet toning around the obverse borders. The strike is well-executed. NGC ID# 256J, PCGS# 7272

1901 Morgan, MS61
Rare Prooflike Example

15894 1901 MS61 Prooflike NGC. Highly sought-after in any Mint State grade, the 1901 Morgan is furthermore remarkably rare with prooflike fields; NGC and PCGS combined have awarded Prooflike status to just 11 coins in all grades (one in Deep Mirror Prooflike). This well-struck representative displays moderate mirroring in the fields, with faint lavender-gray patina over both sides. Light, scattered abrasions define the grade, but are not overly detracting. A pleasing example of this conditionally rare issue. Census: 2 in 61 Prooflike, 1 finer (2/17).

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 256J, PCGS# 7273

1901 Morgan Dollar, AU58
VAM-3, The 'Shifted Eagle' Variety

15895 1901 Doubled Die Reverse, VAM-3, AU58 PCGS. CAC. A Top 100 Variety. The popular "Shifted Eagle" variety, exhibiting bold die doubling on most reverse elements. The appeal of this *Guide Book* variety is heightened by the fact that it is seen here on a nearly Uncirculated coin. The 1901 Morgan dollar is well-known as one of the most conditionally challenging dates in the series overall, and thus virtually all known examples of this elusive VAM are in the mid to lower circulated grades; high-end AU pieces are rare, and Mint State coins are prohibitively so. This representative retains substantial mint luster amid a blush of light golden color. Slight friction over the extreme centers precludes a Mint State grade but leaves this coin with ample eye appeal. Population: 14 in 58, 3 finer. CAC: 4 in 58, 2 finer (2/17).

From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 256J, PCGS# 133965 Base PCGS# 7302

1903-S Silver Dollar, MS63
Old 'Rattler' Holder

15896 1903-S MS63 PCGS. Early 20th century Morgan dollars usually have a New Orleans mintmark. Aside from the 1901, the two conditional rarities from that decade are both from the San Francisco Mint: the 1903-S and 1904-S. The present 1903-S dollar displays light wheat-gold toning and potent cartwheel luster. The reverse is well preserved, and the left obverse shows only moderate contact. Certified in a first-generation "rattler" holder.
From The Pellegrini Collection, Part IV. NGC ID# 256T, PCGS# 7288

1904-S Morgan Dollar, MS64
Late Series Better Date

15898 1904-S MS64 PCGS. The 1904-S Morgan dollar is more difficult to locate than its mintage of 2.3 million pieces would suggest. This attractive Choice specimen exhibits well-detailed design elements, with just a touch of softness on the hair above the ear. The pleasing surfaces are lightly marked and show partially prooflike reflectivity in the fields.
From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 256W, PCGS# 7294

1903-S Dollar, MS63 Prooflike
Deep Blue Toning

15897 1903-S MS63 Prooflike NGC. The 1903-S is rare with a Prooflike designation. This vibrantly toned specimen displays teal, cobalt-blue, rose, and gray toning throughout the surfaces. Several tiny abrasions blend well with the deep patina. One would think the depth of toning seen over the surfaces of this piece would subdue any prooflikeness. Not so. The mirrored finish flashes brightly through the layers of color, confirming the Prooflike designation. The strike is bold throughout. Census: 1 in 63 Prooflike, 5 finer (2/17).
Ex: Long Beach Signature (Heritage, 9/2009), lot 1180.
From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 256T, PCGS# 7289

Mint Engraver George T. Morgan

PROOF MORGAN DOLLARS

1878 8TF Morgan Dollar, PR66
Doubled Reverse, VAM-14.3

15899 1878 8TF Doubled Bow, VAM-14.3, PR66 PCGS. CAC. Doubling on the bow and at lowest olive leaves readily identifies the VAM-14.3 variety. Regardless of variety, the first-year proofs in the Morgan series are unexpectedly elusive in high grades. Just one proof is certified numerically finer at PCGS in the regular proof category from a mintage of 500 1878 8TF proofs. Among VAM-14.3 coins, this Premium Gem is likely the sole finest (although the variety is undesignated on the previous generation PCGS holder).

Mirrored fields are glassy-smooth and the lightly frosted devices are razor-sharp. Dappled reddish-gold, cerulean-blue, and pale caramel-gold hues imbue the nearly unblemished original proof surfaces. The strike is pinpoint sharp throughout and the eye appeal is impressive, confirmed by the CAC endorsement. Population (all 1878 8TF proof varieties): 8 in 66, 1 finer. CAC: 2 in 66, 0 finer (2/17). NGC ID# 2572, PCGS# 134107 Base PCGS# 7311

1894 Dollar, PR67 Deep Cameo
Condition Census Proof Rarity

15900 1894 PR67 Deep Cameo PCGS. PCGS has seen only nine Deep Cameo proof 1894 Morgan dollars, including three in this grade and one finer; NGC lists eight Ultra Cameos with one in PR67+ and none finer (2/17). The rarity of this issue for top-grade Registry collectors is impressive. The present Condition Census proof displays a bold strike and deeply reflective fields cast in a delicate champagne hue. There are no contact marks, and the fields are beautifully preserved. We have previously handled only two Deep Cameos in this remarkable condition, the most recent being in lot 7369 of our August 2011 Chicago Signature sale, which realized \$37,375. The present piece is worthy of an equally strong bid. NGC ID# 2577, PCGS# 97329

1895 Morgan Dollar, PR63 Cameo
Incomparable and Famous Series Rarity

15901 1895 PR63 Cameo NGC. The silver dollars that bore the Morgan design were authorized by the Act of February 28, 1878, better known as the Bland-Allison act after its sponsors. The Act amounted to a subsidy for silver miners, as millions of unwanted silver dollars piled up in Treasury vaults. The Act of July 14, 1890, more than doubled the per-month silver subsidy, and within three years, the nation's financial reserves were in peril.

The Act of November 1, 1893, brought sanity back, cutting off the silver miners' windfall. Without the constant flow of domestic silver into the various mints, silver dollar production plunged. Philadelphia had struck more than 1 million silver dollars in 1892, but the numbers tell the tale: 378,000 pieces in 1893, 110,000 coins in 1894, and just 12,000 business strikes were reported for 1895. The emphasis, of course, is on *reported*, since no business strike survivors dated 1895 are known today. Instead, generations of collectors have turned to proof 1895 dollars to fill the space.

The 1895 proof Morgan dollars belong to a sequence of "well-made" years in the series. They often show strong detail and contrast. Both elements are rewarding on this Select specimen, thanks to generous frost on well-defined devices. The fields are strongly mirrored beneath gold-gray patina, and arcs and dots of blue and deep amber appear along the rims. The fields are lightly hairlined, but this is a thoroughly pleasing example for the grade. Census: 8 in 63 Cameo, 89 finer (2/17).

Ex: ANA Signature (8/2010), lot 3367; Central States Signature (Heritage, 4/2016), lot 4742. NGC ID# 27ZR, PCGS# 87330

PEACE DOLLARS

1928 Peace Dollar, MS65+
Conditionally Rare in Finer Grades

15902 1928 MS65+ PCGS. CAC. Although a few other Peace dollar issues are rarer in Gem condition, the 1928 is the classic key-date in the series, and enjoys great demand in all grades. This lovely Gem has satiny silver luster beneath delicate champagne toning. The design elements are sharply detailed and the surfaces are well-preserved. PCGS has only certified 18 finer examples (2/17). NGC ID# 257V, PCGS# 7373

1934-S Peace Dollar, MS64
Impressive Series Key

15903 1934-S MS64 PCGS. The 1934-S Peace dollar is even more elusive than its mintage of just over 1 million pieces would suggest. It is actually the key to the series in grades up through MS64. This attractive Choice specimen is sharply detailed, with vibrant mint luster and a few hints of golden-tan toning. Housed in a green label holder. NGC ID# 257Z, PCGS# 7377

1934-S Silver Dollar, MS64
Low High-Grade Population

15904 1934-S MS64 PCGS. Frosty, brilliant mint luster adorns mostly unabraded surfaces on this near-Gem 1934-S Peace dollar. The strike is bold, and eye appeal excels for the grade. The 1934-S boasts a mintage of barely more than 1 million coins, and it is the scarcest date in the series in Uncirculated condition. NGC ID# 257Z, PCGS# 7377

CERTIFIED MODERN PROOF SETS

1936 Proof Set, PR65-PR67
A High-Grade NGC Set

15905 Five-Piece 1936 Proof Set, PR65-PR67 NGC. This is a well-matched, high-grade example of this popular proof set. Included are:

Cent — Brilliant Finish — PR66 Red. A beautiful copper-orange, carbon-free proof with hints of lighter golden color near the rims.

Nickel — Brilliant Finish — PR67. The strike is fully rendered, and the fields are deeply reflective. Both sides display a hint of ice-blue and lavender toning.

Dime PR66. A razor-sharp example of the scarcest proof issue in the Mercury dime series, boasting satiny surfaces and a hint of champagne tinting.

Quarter PR65. The “weak link” in the set as far as numeric grade goes, the Washington quarter proof lacks nothing in eye appeal. Both sides glimmer with a light golden hue.

Half Dollar PR66. A needle-sharp Premium Gem proof that shows mostly brilliant mirroring but with a few hints of light gold throughout. (Total: 5 coins)

GOLD DOLLARS

1849 Closed Wreath Gold Dollar, MS66
None Numerically Finer at PCGS

15906 1849 Closed Wreath MS66 PCGS. A substantial mintage of 688,567 gold dollars was accomplished at the Philadelphia Mint in 1849, split between the Open Wreath and Closed Wreath varieties. The Closed Wreath motif is much scarcer than its Open Wreath counterpart today, suggesting it accounted for a smaller portion of the reported mintage. This was the first year of the denomination, so it seems likely contemporary collectors saved the Open Wreath coins, which were struck first, for their novelty value. By the time the Closed Wreath coins were produced, the fascination had worn off and few were preserved.

The present coin is a spectacular Premium Gem, with sharply detailed design elements throughout. Both obverse and reverse show interesting clash marks and the lustrous orange-gold surfaces are impeccably preserved. Eye appeal is extraordinary. Population: 5 in 66 (1 in 66+), 0 finer (2/17). NGC ID# 25BA, PCGS# 7503

**1851 Gold Dollar, Frosty MS66+
Rare High-End Type Coin**

15907 1851 MS66+ PCGS. Few Type One gold dollar issues are as suitable for type purposes as the 1851, although even this date becomes scarce in high grade. The present high-end Premium Gem is a conditional rarity. Frosty orange-gold and peach-tinged luster illuminates a sharp strike and shows no major abrasions. Eye appeal excels. Finer coins are rare. Population: 35 in 66 (2 in 66+), 11 finer (2/17). NGC ID# 25BK, PCGS# 7513

**1855-C Gold Dollar, AU55
Singular Type Two Charlotte Issue**

15908 1855-C AU55 PCGS. CAC. Variety 1, the rarer of the two 1855-C gold dollar varieties, showing the 8 in the date and the LL in DOLLAR softly struck. On this Choice AU example, the soft central strike is transferred to the obverse portrait, although little wear is present on either side. The coin displays smooth olive-gold surfaces with remnants of luster in the protected peripheral regions of the fields. Population: 12 in 55, 11 finer. CAC: 3 in 55, 3 finer (1/17). NGC ID# 25C5, PCGS# 7533

**1883 Gold Dollar, MS67+
Glittering Mint Frost**

15909 1883 MS67+ PCGS. Gold dollars generally did not see circulation in the waning years of the series, which came to a end in 1889. Instead, they were struck for collectors and those who gave them out as gifts. The Mint produced 10,800 gold dollars in 1883, and examples are accessible through MS66. The date becomes very scarce in MS67. Glittering mint frost enlivens near-flawless, rose-gold surfaces. The curls, cotton bolls, and wreath elements display razor-sharp definition. There are 16 higher-graded entries at PCGS (2/17). NGC ID# 25DM, PCGS# 7584

1888 Gold Dollar, Immaculate MS67+

15910 1888 MS67+ PCGS. CAC. Coruscating mint luster flows over immaculate peach-gold surfaces. A razor-sharp strike includes complete definition on the cotton bolls, denomination, and wreath elements. Small coppery alloy spots appear sporadically over the reverse. This was the widely saved penultimate issue in the gold dollar series from a mintage of 15,501 coins. Population: 58 in 67 (6 in 67+), 5 finer. CAC: 20 in 67, 4 finer (2/17). NGC ID# 25DT, PCGS# 7589

EARLY QUARTER EAGLE

1807 Capped Bust Right Quarter Eagle, AU55
Final Date of Design, BD-1

15911 1807 BD-1, R.3, AU55 PCGS. Bass-Dannreuther Die State a/b. The Capped Bust Right design was retired partway through the year in 1807, but not before 6,812 quarter eagles of the old design were struck at the Philadelphia Mint. Only one set of dies was used to strike the entire mintage. This was the only use of the obverse die, but the Large Stars reverse die was the one used to strike all quarter eagles of 1805, 1806, and 1807. The 1807 Capped Bust Right, Large Eagle quarter eagle is the most available year of the type, with a surviving population of 250-350 examples in all grades.

The present coin is an impressive Choice AU specimen, with just a trace of wear on the well-detailed design elements and some faint planchet adjustment marks on the bust and the obverse rim, above LIBERTY. The reverse shows a little softness on the shield and arrows. The pleasing orange-gold surfaces are lightly abraded and retain significant amounts of original mint luster. The overall presentation is most attractive. Population: 22 in 55, 52 finer (2/17). NGC ID# BFVY, PCGS# 45514 Base PCGS# 7656

CLASSIC QUARTER EAGLE

1839 Classic Quarter Eagle, AU58
Breen-6148, Variety 21

15912 1839 AU58 PCGS. Breen-6148, Variety 21, R.3. These are the only known dies for the 1839 Classic Head quarter eagle with a total production of 27,021 coins. Survivors are elusive in high grades, with only 23 Mint State pieces certified by PCGS and NGC combined. Exhibiting satiny yellow surfaces and a trace of high-point rub, this piece offers all the advantages of a Mint State example at a lower market price. Both sides exhibit scattered marks and faint hairlines that are consistent with the grade. Population: 17 in 58, 8 finer (2/17). NGC ID# 25G3, PCGS# 7698

LIBERTY QUARTER EAGLES

1841-C Quarter Eagle, Razor-Sharp AU58
Extremely Rare in Mint Condition

15913 1841-C AU58 NGC. Variety 1. "The 1841-C is among the rarest Charlotte quarter eagles. It is especially difficult to locate in higher grades. Its rarity is compounded by the fact that it is a poorly produced issue," according to Doug Winter. It is believed that only four or five examples survive in mint condition. This must have been one of the first of 10,281 quarter eagles struck in Charlotte in 1841. The rims are broad, the motifs needle-sharp, and the fields decidedly semireflective. A handful of wispy marks and a trace of cabinet friction are the only imperfections. A remarkable survivor. Census: 26 in 58 (1 in 58★), 6 finer (2/17). NGC ID# 54TU, PCGS# 7721

1856-S Two and a Half, MS61
Rare in Mint State

15914 1856-S MS61 PCGS. Although more than 72,000 quarter eagles were struck at San Francisco in 1856, this issue was heavily circulated in commerce. Mint State survivors are rare in any grade. This accessible MS61 coin displays a sharp strike and satiny yellow-gold luster with minor field chatter that limits the grade. Thin rim cud is developing along the upper-left obverse border, and a small planchet defect appears below the eagle's left (facing) wing. Population: 7 in 61, 15 finer (2/17). NGC ID# 25KL, PCGS# 7781

1858-C Two and a Half, AU58
Charlotte Type Coin

15915 1858-C AU58 PCGS. Variety 1. The 1858-C quarter eagle is usually available for type purposes, although high-grade examples remain elusive; Mint State pieces are particularly scarce. This near-Mint coin displays the usual strike weakness on the central reverse but is otherwise well-defined. The surfaces have original olive-gold toning, and scattered handling marks are not bothersome. Population: 12 in 58, 27 finer (2/17). NGC ID# 25JH, PCGS# 7787

1862 Quarter Eagle, MS64+
Finest Certified at Both Services

15916 1862 MS64+ PCGS. CAC. Although the 1862 quarter eagle has a mintage that tops 98,000 coins — one of the higher production totals of the period — Mint State examples are still rare in all grades. Most such pieces are heavily bagmarked, and few grade finer than MS62. The finest known are three NGC MS64 coins and four PCGS MS64, including this piece, the sole MS64+ example (2/17). The present coin is a true near-Gem and easily among the most eye-appealing top-grade pieces known. The strike is razor-sharp, and vibrant orange-gold mint luster attractively blends with mild reflectivity in the fields. A few trivial grazes in the fields limit the grade, while Liberty's cheek is pleasantly clean. An outstanding example of this conditionally rare Philadelphia issue. Population: 4 in 64 (1 in 64+), 0 finer (2/17). NGC ID# 25JZ, PCGS# 7796

PROOF LIBERTY QUARTER EAGLES

1893 Two and a Half, PR65 Deep Cameo
Starkly Contrasted Rarity

15917 1893 PR65 Deep Cameo PCGS. The 1893 proof quarter eagle had a moderate mintage for the period of 106 coins, although as little as half of that may survive to present day. PCGS and NGC combined report 81 grading events, although this almost certainly includes a number of resubmissions and crossovers. Since the early 1990s, we have handled only 20 examples of this issue, with just 11 Deep Cameos. The present Gem displays needle-sharp detail and frosty, brilliant devices. The fields are incredibly deeply mirrored and devoid of mentionable marks or hairlines. This is a rare opportunity to acquire a 19th century proof gold issue that is underappreciated at current levels. Population: 6 in 65 (1 in 65+) Deep Cameo, 5 finer (1/17). NGC ID# 288G, PCGS# 97919

1900 Quarter Eagle, PR67 Deep Cameo
Among an Elite Group of Survivors
Only 205 Proofs Struck

15918 1900 PR67 Deep Cameo PCGS. The 1900 Liberty Head quarter eagle proofs were made to the highest possible standards and in greater numbers than any other year in the series, save for the 1901. That is not to say examples are plentiful. The Mint struck 205 specimens for collectors — a significant number within the context of the series, but a paltry sum in absolute terms. A small group of elite examples survive in this high grade with Deep Cameo contrast.

The fields appear jet-black, showing pronounced reflectivity that contributes to the stark contrast seen on both sides. Another factor is the thick layer of frost that covers fully impressed design elements. Rich, orange-gold surfaces are essentially free of contact. This is a delightful specimen worthy of serious consideration. Population: 8 in 67 (2 in 67+) Deep Cameo, 4 finer (2/17). NGC ID# 288P, PCGS# 97926

1902 Quarter Eagle, PR64
Just 193 Proofs Struck

15919 1902 PR64 NGC. The Mint struck 193 quarter eagle proofs in 1902, the same year it implemented a new all-brilliant finish to replace the long-standing contrasted finish it had used for decades. Specimens are very scarce in any grade and appear at auction infrequently. This Choice representative features deep orange-gold coloration and a full impression expected of a proof. The fields are moderately reflective, but contrast is minimal. A few light marks define the grade. Census: 23 in 64, 23 finer (2/17). NGC ID# 288S, PCGS# 7928

INDIAN QUARTER EAGLES

1911-D Indian Quarter Eagle, MS63
Strong D Mintmark

15920 1911-D MS63 PCGS. Strong D. From a series-low mintage of 55,680 pieces, the 1911-D is the first of only three mintmarked issues in the Indian quarter eagle series. As might be expected, the 1911-D is the rarest Indian quarter eagle in today's market and the acknowledged key to the series. Some examples exhibit extreme softness on the all-important mintmark and both grading services certify these coins with a "Weak D" designation. "Strong D" specimens sell for a significant premium over their "Weak D" counterparts.

The present coin is an impressive Select specimen, with sharply detailed design elements throughout, including a "Strong D" mintmark. The vivid orange-gold surfaces radiate vibrant mint luster on both sides, with only minor signs of contact. Overall eye appeal is outstanding. NGC ID# 7KR7, PCGS# 7943

1914 Quarter Eagle, MS64+ Outstanding Visual Appeal

15921 1914 MS64+ PCGS. CAC. The 1914 Indian quarter eagle claims a smallish mintage of 240,000 pieces, and the issue becomes very scarce in grades above MS64. This high-end Choice example displays lustrous orange-gold surfaces and sharply detailed design elements, producing outstanding visual appeal. PCGS has graded 64 finer examples (2/17). NGC ID# 7KRA, PCGS# 7946

1914 Two and a Half, MS65 Smooth, Attractive Surfaces

15922 1914 MS65 PCGS. A semikey date in the series, just 240,000 pieces were struck at the Philadelphia Mint in 1914 — second lowest mintage in the series, only bested by the 1911-D. Although near-Gem pieces are moderately available, Gems are definitely scarce. This example displays medium-gold coloration with a greenish tinge. The high fields are smooth and attractive, while the reduced relief is sharply rendered. The normally seen abrasions common to this design type are virtually non-existent on this lovely piece. PCGS reports just three numerically finer examples (2/17). NGC ID# 7KRA, PCGS# 7946

THREE DOLLAR GOLD PIECES

1854 Gold Three Dollar Choice, Near-Gem Surfaces

15923 1854 MS64 PCGS. CAC. The highest mintage of the long-running series fools some collectors, who view the 1854 as readily available in all grades, but they soon realize that Choice, high-grade Mint State coins are deceptively challenging to find. This is one of the “nice” ones — sharply struck, with few abrasions and copious mint luster. Gleaming yellow-gold surfaces approach the Gem level in both eye appeal and technical quality, suitably CAC-endorsed. PCGS reports just 39 finer examples (2/17). NGC ID# 25M3, PCGS# 7969

1864 Three Dollar Gold, AU58 Elusive Issue in all Grades

15924 1864 AU58 PCGS. The 1864 three dollar gold piece claims a small wartime mintage of 2,630 pieces, and few examples were saved for numismatic purposes. Instead, the issue was widely hoarded, and either melted for bullion value or exported. This attractive near-Mint specimen shows just a trace of wear on the high points of the sharply impressed design elements, and the pleasing orange-gold surfaces are lightly marked, with traces of original mint luster. Population: 22 in 58, 40 finer (2/17). *From The R. Thayer Sheets Yorktown Collection.* NGC ID# 7HSK, PCGS# 7985

1878 Three Dollar, MS64+
Thickly Frosted

15925 1878 MS64+ PCGS. The Mint bumped three dollar gold production to 82,304 coins in 1878, anticipating heightened demand for gold as the yellow metal reached parity with paper currency. Demand never materialized, and the coins remained in storage, accounting for the survival rate of the 1878. This thickly frosted near-Gem shows a strong strike and appealing rose-gold color. Free of clashing with a few scattered ticks. NGC ID# 25MZ, PCGS# 8000

1882 Three Dollar Gold, MS63
Popular Low-Mintage Issue

15926 1882 Repunched Date, FS-301, MS63 PCGS. All of the business strikes of this date have the 2 in the date first punched much too high, then mostly effaced, with the second 2 in normal position. Despite the Breen-6395 listing in his *Encyclopedia*, there is no "perfect date" business strike. This is an issue that, despite its stingy emission of 1,576 pieces, was saved in sufficient quantities to ensure a small but adequate supply of Mint State examples. This appealing piece shows a two-toned copper-gold and hazel-gray obverse, with an amber-gold reverse and a few scattered, light abrasions that help define the grade. Housed in a green label holder. Population: 42 in 63, 35 finer (2/17).

Ex: *Denver Signature* (Heritage, 8/2006), lot 5460. NGC ID# 4DXC, PCGS# 145710 Base PCGS# 8004

EARLY HALF EAGLES

1802/1 Half Eagle, AU58
BD-4, Centered Overdate
Rare Die Pair

15927 1802/1 BD-4, R.7, AU58 NGC. Bass-Dannreuther Die State c/b. A very rare die marriage with two pick-up points. A leaf tip points between the RI in AMERICA, and the 1 underdigit is centered within the 2. The date is double clashed within STATES, and the left obverse border is slightly buckled. Probably no more than 10-12 examples of the BD-4 remain extant in all grades. This is a generally lustrous straw-gold half eagle with a strong strike and only a hint of friction, limited to the forehead and cloud centers. Despite the 2006 publication of the well-done Bass-Dannreuther reference, collecting early half eagles by die pairing remains the province of a few elite specialists. Nonetheless, varieties of the greatest rarity have enormous market potential, and the present piece should be the subject of enthusiastic bidding.

Ex: *Long Beach Signature* (Heritage, 9/2008), lot 3580; *Long Beach Signature* (Heritage, 2/2013), lot 3949. NGC ID# 25NX, PCGS# 45599 Base PCGS# 8083

1802/1 Half Eagle, BD-8, AU53
Appealing Early Type, High Overdate

15928 1802/1 BD-8, R.4, AU53 NGC. Bass-Dannreuther Die State b/a. Faint "waves" at the top of the date indicate die clashing, while the stars appear bolder and closer together than the Bass-Dannreuther plate coin, suggesting an unlapped die. The BD-8 variety features a high 1802/1 overdate, and it is somewhat more-available than any of the other 1802/1 varieties — yet an estimated 150 to 200 known survivors confirm it is not readily found. This About Uncirculated example displays medium-gold patina that deepens at the borders to an orange-gold color. All of the motifs are sharply rendered, while traces of mint luster remain in the recesses. Abrasions are of minor severity, with surfaces that seem to approach Choice in all regards. NGC ID# 25NX, PCGS# 519889 Base PCGS# 8083

1813 Half Eagle, BD-1, MS62
Elusive Mint State Type Coin

15929 1813 BD-1, R.2, MS62 PCGS. Bass-Dannreuther Die State b/b. BD-1 is the more plentiful of the two 1813 half eagle varieties, and it is also an ideal choice to represent this elusive type. Most later dates in the series were heavily melted as the bullion value of the coins surpassed the face value. The present coin is a scarce Mint State example, showing a bold strike throughout the central devices and the border stars. The dentils are complete around each. Light handling marks on each side determine the grade in the absence of individually significant abrasions. The luster in the fields is original. NGC ID# 25PM, PCGS# 519907 Base PCGS# 8116

1813 Half Eagle, BD-1, MS62
Frosty, Original Surfaces
CAC-Approved

15930 1813 BD-1, R.2, MS62 PCGS. CAC. Bass-Dannreuther Die State b/b. The 1813 half eagle is by far the most heavily collected issue in the 1813 to 1829 Capped Bust type, if only because it is the only date therein that is readily collectible. It therefore serves as an ideal type candidate. Examples of this issue, particularly the more available BD-1 variety (here represented), are encountered with mild frequency and can be had for a price. Yet, most examples have one distinct fault: surface impairments. A collector may look at dozens of 1813 half eagles before coming across an example in any grade that showcases unequivocally original luster and pleasing eye appeal. This Mint State coin combines these rare qualities with bold design definition and remarkably few abrasions for the grade. The frosty surfaces are aglow in lovely green-gold luster, and the luminous appearance is eye-catching. This piece embodies the combination of technical and aesthetic merit that many early gold collectors hope to find, but seldom do. NGC ID# 25PM, PCGS# 519907 Base PCGS# 8116

CLASSIC HALF EAGLE

1838 Half Eagle, MS62
A Pleasing Example for the Grade

15931 1838 MS62 PCGS. Breen-6514, McCloskey 1-A, R.2. The 1838 is one of the scarcer Philadelphia issues in the short-lived Classic Head half eagle series, particularly elusive in Mint State. This piece displays bold detail and satiny yellow-gold luster. Grade-limiting abrasions are surprisingly low-impact, giving the coin better-than-average visual merit for the MS62 level. Population: 14 in 62, 45 finer (2/17). NGC ID# 25S4, PCGS# 8176

LIBERTY HALF EAGLES

1842-O Half Eagle, XF45
Underappreciated New Orleans Issue

15932 1842-O XF45 PCGS. Variety 1. Specialists in mintmarked Liberty Head gold find a challenge when it comes to the 1842-O five dollar issue. As one of several unsung rarities among the early Liberty fives, this New Orleans issue is scarcer than some of its Charlotte and Dahlonega counterparts — although not always recognized as such. PCGS estimates less than 100 pieces are known in all grades, putting it on a par with the 1842-C Small Date and the 1842-D Large Date. This is a Choice example with still-lustrous antique-gold patina and only pinprick marks. The portrait is reasonably sharp, while the coin shows high point incompleteness on the eagle's neck, leg, and arrow fletchings, a combination of wear and weak strike. Population: 15 in 45, 11 finer (1/17). NGC ID# 25SZ, PCGS# 8212

1847 Half Eagle, MS64
None Numerically Finer at NGC

15933 1847 MS64 NGC. If the reflective reverse looked like the obverse, this piece would have received a Prooflike designation from NGC. This boldly defined Choice Mint State half eagle exhibits full mirrors on the obverse with excellent field-to-device contrast on both sides. Faint hairlines keep this light yellow-gold beauty from a finer grade. Census: 16 in 64 (3 in 64+, 1 in 64+★), 0 finer (2/17). NGC ID# 25TL, PCGS# 8231

1848-C Liberty Half Eagle, AU58
Underrated Branch Mint Issue

15934 1848-C AU58 PCGS Secure. Variety 1. The 1848-C Liberty half eagle is much more difficult to locate than its mintage of 64,472 pieces would suggest, and high-grade specimens are very rare. This attractive near-Mint specimen shows just a trace of actual wear, along with a touch of the usual softness on the mintmark and arrow fletchings on the reverse. The lightly abraded orange-gold surfaces retain much original mint luster. Population: 8 in 58, 5 finer (2/17). NGC ID# 25TT, PCGS# 8237

1853-D Five Dollar, AU58
Ideal Dahlonega Type Coin

15935 1853-D AU58 NGC. Variety 35-X. The mintmark is mostly over the V in FIVE and the date is reasonably well-centered top-to-bottom beneath the bust to confirm the scarce variety. Most collectors will be thrilled to locate this Dahlonega issue in near-Mint condition regardless of the die marriage. The surfaces are smooth and sharply defined for the issue, with only minor weakness at the arrow fletchings. Medium green-gold surfaces retain much of their original mint luster. Census: 79 in 58, 42 finer (2/17). **From The Martin Peterson Collection.** NGC ID# 25UF, PCGS# 8255

1854 No Motto Five, MS63
Fully Struck and Frosty

15936 1854 MS63 PCGS. This is a collectible No Motto date in circulated condition, but Mint State examples qualify as rare. They are usually found in MS61 and MS62, while Select Uncirculated 1854 half eagles are very seldom seen. We last offered a comparable example in 2010, and have only seen four finer MS64 coins in the past six years. Each side is light yellow-gold with frosty luster and a full strike. Scattered grazes are of little import. Population: 6 in 63, 5 finer (2/17). NGC ID# 25UG, PCGS# 8256

1860-C Half Eagle, AU53
Low-Mintage North Carolina Issue

15937 1860-C AU53 PCGS. Variety 1. It is believed 450 of the 14,813 half eagles struck at the North Carolina mint in 1860 survive, mostly in VF and XF condition. Incompleteness on the eagle is the result of an improperly annealed die. This AU53 five dollar gold piece features bold obverse detail and little blending. Reddish-gold surfaces house numerous marks. Population: 11 in 53, 40 finer (2/17). NGC ID# B2AC, PCGS# 8285

**1862 Liberty Half Eagle, AU58
Underrated, Low-Mintage Issue**

15938 1862 AU58 PCGS. As a result of widespread hoarding of precious-metal coinage during the early days of the Civil War, the government suspended specie payments late in 1861. Mintages of all gold coins dropped accordingly in 1862, when only 4,430 business-strike Liberty half eagles were struck at the Philadelphia Mint. As might be expected, the 1862 half eagle is an elusive issue in all grades today and high-grade specimens are particularly difficult to locate.

Heritage Auctions has handled only two Mint State examples of the 1862 in the last decade, making the appearance of this attractive near-Mint specimen an important opportunity for series specialists. Only the slightest trace of friction is evident on the high points of the strongly impressed design elements and the lightly abraded orange-gold surfaces radiate vibrant mint luster throughout. Eye appeal is quite strong for the grade. We expect intense competition from series enthusiasts and Civil War era collectors when this lot is called. Population: 8 in 58 (2 in 58+), 4 finer (2/17). NGC ID# 25VP, PCGS# 8292

**1868 Half Eagle, AU58+
Reflective Fields
Rarely Seen This Fine**

15939 1868 AU58+ NGC. Coming from a mintage of only 5,000 coins, the 1868 half eagle is rare in the upper AU grades and is extremely so in Mint State. This Plus-graded near-Mint coin is highly appealing. Reflective fields frame sharp design elements amid warm rose-gold patina. There is no obvious high-point wear, although scattered abrasions certainly contribute to the grade. Census: 14 in 58 (1 in 58+), 2 finer (1/17). NGC ID# 25W5, PCGS# 8315

**1870-CC Liberty Half Eagle, AU53
Low-Mintage, First-Year Issue**

15940 1870-CC AU53 PCGS. Variety 1-A. The 1870-CC Liberty half eagle represents the first year of coinage operations at the famous Carson City Mint. From a small mintage of 7,675 pieces, most of the coins circulated heavily in the regional economy at the time of issue and few were saved for numismatic purposes. Accordingly, the 1870-CC is one of the most challenging issues of the series in terms of both absolute and condition rarity. The present coin exhibits just a touch of actual wear on the well-detailed design elements and the strike is above average for the issue. This coin is an early die state, with strongly impressed central devices. The attractive orange-gold surfaces are lightly abraded and overall visual appeal is strong. Population: 4 in 53, 6 finer (1/17).

From The R. Thayer Sheets Yorktown Collection. NGC ID# 25WA, PCGS# 8320

1871-CC Half Eagle, Choice XF
An Exceptional Coin for the Grade

15941 1871-CC XF45 PCGS. Variety 1-A, as usual. Half eagle coinage at the Carson City Mint in 1871 totaled only 20,770 coins, almost all of which experienced heavy circulation as one of the first gold issues of this popular denomination that was introduced to the mining community around the Comstock Lode. Most survivors of the date grade VF or lower, and Uncirculated pieces are prohibitively rare.

This Choice XF example is high-end for the issue but remains more collectible than an AU coin. There is little actual wear, although the eagle's neck does show some minor strike weakness. The obverse stars and portrait are bold. Each side displays partially lustrous straw-gold fields with original patina, and contact marks are at a minimum. This 1871-CC five is far more appealing than the typical piece in this grade. Population: 15 in 45, 29 finer (2/17).

From The R. Thayer Sheets Yorktown Collection. NGC ID# 26AB, PCGS# 8323

1873-CC Half Eagle, XF40
Scarce in All Grades

15942 1873-CC XF40 PCGS. Variety 2-B. Fewer than 100 1873-CC half eagles are believed to survive from a mintage of only 7,416 pieces. Mint State coins are extremely rare. This XF example displays grade-consistent high-point wear with smooth, problem-free olive-gold surfaces. Eye appeal is outstanding for Carson City half eagle in this grade. Collectors will be hard-pressed to locate another example in this grade with similar eye appeal, let alone better. We rarely have an opportunity to offer a numerically finer example of the 1873-CC five. Extremely Fine is the optimal collecting grade for this issue. Population: 8 in 40, 21 finer (2/17).

From The R. Thayer Sheets Yorktown Collection. NGC ID# 25WL, PCGS# 8331

1874-CC Half Eagle, VF35
Low Survivorship

15943 1874-CC VF35 PCGS. Variety 1-C. The 7 is centered over a dentil and the mintmark is even. This reddish-gold Carson City five dollar displays clear motif outlines, but much of Liberty's hair and the eagle's neck feathers and fletchings show merging. Myriad marks are present on each side. The 1874-CC is a scarce issue with a small mintage of 21,198 coins. NGC ID# 25WP, PCGS# 8334

Deposit Melting Room, Carson City Mint, 1870.
(Nevada State Museum)

1876-CC Five Dollar, AU55
Rare This Fine
Partially Prooflike Fields

15944 1876-CC AU55 PCGS. Variety 1-A. Coming from a small mintage of 6,887 coins, the 1876-CC half eagle is scarce in all grades and underappreciated in rare AU condition. Only two Mint State examples are known, both well out of reach for the average collector. Garrett and Guth write in their gold coin *Encyclopedia*: "Like most of the early Carson City half eagles of the 1870s, this issue was heavily circulated in the West and most of the surviving examples are heavily worn or damaged."

This Choice AU representative displays bold detail with prooflike mirroring in the protected regions of the fields. Scattered light handling marks are not bothersome considering the grade. This piece is undeniably high-end for the issue. Population: 7 in 55, 4 finer (2/17).

From *The R. Thayer Sheets Yorktown Collection*. NGC ID# B5SN, PCGS# 8340

**1880 Half Eagle, CAC-Approved MS66
Unseen in Higher Grades**

15945 1880 MS66 PCGS. CAC. The PCGS CoinFacts plate coin. David Akers once wrote, "The 1880 is common in all grades and is readily obtainable even in Choice Uncirculated condition." While it is true that Choice representatives are obtainable, Gems are exceedingly rare. Premium Gems like the one offered here are of the utmost rarity. The PCGS *Population Report* shows four MS66 submissions, while the NGC *Census* lists two more in that grade. CAC has approved two examples at his unsurpassed level (2/17). We last offered a PCGS example in MS66 as part of our 2015 New York Signature Sale. That coin, lot 3528, realized \$10,575 without CAC approval.

Shimmering rose-gold surfaces radiate vibrant frost. Greenish elements appear on each side, adding to the eye appeal and confirming the originality of this marvelous Registry-grade half eagle. The devices are sharply struck with inconsequential softness on the central curls and the eagle's talons. An alloy spot below the I in UNITED will identify the coin in future appearances. NGC ID# 25XA, PCGS# 8351

**1881/0 Liberty Half Eagle, MS64
Rare Guide Book Variety**

15946 1881/0 FS-301 MS64 PCGS. According to *Cherrypickers*, "The 1881 date is clearly punched over an 1880 date" on this rare variety. The 1881 Liberty half eagle claims a large mintage of 5.7 million pieces, but only a small portion of the surviving population shows the overdate feature. This impressive Choice example is one of the finest certified of the variety, with well-detailed design elements and lustrous orange-gold surfaces that exhibit few signs of contact. Population: 3 in 64, 0 finer (2/17). NGC ID# 25XD, PCGS# 145714 Base PCGS# 8355

**1883-S Liberty Half Eagle, MS64
Registry Grade Example**

15947 1883-S MS64 PCGS. From a mintage of 83,200 pieces, the 1883-S Liberty half eagle is an underrated issue that is seldom encountered in today's market. The present coin is one of the finest known examples, with sharply detailed design elements and lustrous orange-gold surfaces that show only minor signs of contact. We expect intense competition from Registry Set enthusiasts when this lot is called. Population: 4 in 64, 0 finer (2/17). NGC ID# 25XM, PCGS# 8363

**1890-CC Five Dollar, MS63
Original, Frosty Surfaces**

15948 1890-CC MS63 PCGS. Variety 1-A. The 1890-CC is a challenging acquisition in Mint State, although not as scarce as the Philadelphia issues of this and the prior year. Other than trivial softness on the horizontal shield lines, this Select example offers an excellent appearance for the grade. Frosty orange-gold luster displays scattered light marks that complement the originality of the surfaces. Finer examples are rarely offered. Population: 43 in 63 (3 in 63+), 33 finer (2/17). NGC ID# C5XF, PCGS# 8376

1906 Half Eagle, Superb Gem
None Certified Finer

15949 1906 MS67 PCGS. CAC. NGC and PCGS combined have certified approximately 5,000 1906 half eagles, predominantly in AU58 through MS64 grades. Most Uncirculated pieces were set aside as bullion reserves, and were indifferently handled by non-collectors. As a result, Gems are very scarce, Premium Gems are rare, and Superb Gems are very rare. This lustrous and crisply struck Liberty five is among the finest survivors of the issue, since the sea-green and apricot-gold surfaces show only wispy contact. Population: 5 in 67, 0 finer. CAC: 5 in 67, 0 finer (1/17). NGC ID# 2529, PCGS# 8413

1908 Half Eagle, Crisp MS67+
Exceptional End-of-Series Example

15950 1908 MS67+ PCGS. CAC. A transitional issue, struck before the Mint made way for the new Indian Head design. Few pieces compare in quality to this Plus-graded Superb Gem, with pristine, frosted surfaces and a razor-sharp strike. A scattering of tiny ticks from the chin to beneath the hair bun is visible with a glass, the only marks to mention anywhere on the coin. Few examples are finer at either service. We have previously handled only six Superb Gem representatives, and never a Plus-graded MS67 coin with CAC approval. This is only the third PCGS-graded Superb Gem that we have offered. Population: 7 in 67 (1 in 67+), 2 finer. CAC: 4 in 67, 2 finer (1/17). NGC ID# 25ZE, PCGS# 8418

INDIAN HALF EAGLES

1909-O Half Eagle, AU58+
Sole O-Mint Indian Five, Borderline Mint State

15951 1909-O AU58+ NGC. The 1909-O is the rarest Indian five in Mint State, making this Plus-graded near-Mint coin an attractive candidate to fill an open slot in either a high-end circulated set, or fit seamlessly into a mid-grade Uncirculated collection. It is unquestionably the series key issue in grades MS60 to MS63, surpassing both the 1911-D and the 1929 for honors at those collector-favored levels.

The eye appeal and surface quality of this high-end About Uncirculated coin will rival most fully Mint State examples. Warm, honey-gold overtones add interest to the smooth and attractive khaki-gold coloration. Abrasions are minor and the mintmark is suitably bold. Soft mint luster remains prominent throughout the sharply defined motifs. Census: 7 in 58+, 142 finer (1/17). NGC ID# 25ZK, PCGS# 8515

1911 Indian Half Eagle, MS65
Only One Numerically Finer at PCGS

15952 1911 MS65 PCGS. The 1911 Indian quarter eagle claims a substantial mintage of 915,000 pieces, but the issue is quite elusive at the MS65 grade level, and finer examples are virtually unobtainable. This impressive Gem offers well-preserved orange-gold surfaces that radiate satiny mint luster throughout. The design elements are sharply detailed and eye appeal is outstanding. Population: 72 in 65 (3 in 65+), 1 finer (2/17). NGC ID# 28DP, PCGS# 8520

1911-D Five Dollar, AU58+
Denver Semikey

15953 1911-D AU58+ NGC. Like its lower-denomination brother, the 1911-D half eagle is an in-demand key, although not quite to the same extent. Only 72,500 pieces were struck, and the issue is very scarce in Mint State. Varying shades of pale yellow and khaki-gold and partial remaining luster appear throughout. Minimal friction over well-detailed motifs barely precludes a full Uncirculated assessment. A thin pinscratch extends from the back of the eagle's head. NGC ID# 28DR, PCGS# 8521

1913-S Half Eagle, MS63
Scarce This Fine

15954 1913-S MS63 PCGS. The 1913-S is a somewhat overlooked date in high grade, as its mintage of 408,000 pieces and availability in lower grades are deceptive. Most Uncirculated examples are heavily abraded and grade no better than MS61 or MS62. This Select representative is scarce, and finer pieces are rare. The coin is typically struck with weak peripheral definition, although the mintmark is discernible. The central devices show pleasing detail. Satiny straw-gold luster reveals scattered abrasions consistent with the grade, although eye appeal remains pleasing. Population: 52 in 63 (1 in 63+), 18 finer (2/17). NGC ID# 25ZP, PCGS# 8526

1916-S Indian Head Five, MS63
Beautiful Coloration

15955 1916-S MS63 PCGS. A remarkably attractive, original example of this final San Francisco half eagle. Light, scattered abrasions are easily forgotten in the shadow of deep violet, mint, olive, and apricot-gold hues, which are illuminated by frosty mint luster. The 1916-S is the final Indian half eagle issue that experienced any significant circulation, as the 1929 remained largely in storage vaults until the gold confiscation of the mid-1930s. The 1916-S is infrequently seen finer than MS63, and Gems are rare. This exceptionally attractive Select representative should not be passed by.
Ex: *Houston Money Show (Heritage, 12/2015)*, lot 3367. NGC ID# 28DY, PCGS# 8532

1916-S Five Dollar, MS64
Better San Francisco Issue

15956 1916-S MS64 PCGS. Most Uncirculated 1916-S half eagles are in the MS62 to MS64 grade range, with anything finer being rare and far out of reach for most collectors. The date is also in high demand as the only issue of the year from any mint. This near-Gem displays a bold strike and satiny yellow-gold luster with a few light marks. PCGS reports 15 numerically finer submissions (2/17). NGC ID# 28DY, PCGS# 8532

1916-S Five Dollar, MS64
Prohibitive in Better Grades

15957 1916-S MS64 PCGS. San Francisco Mint personnel manufactured 240,000 half eagles in 1916, the last year five dollar gold pieces were struck at that facility. Choice Uncirculated examples are very scarce. Those searching for a Gem should expect to pay roughly twice as much as this lovely MS64. A typically strong strike, frosty luster, and blended orange and rose-gold hues grace each side. Microscopic ticks fail to detract. PCGS has only seen 15 finer submissions (2/17). NGC ID# 28DY, PCGS# 8532

LIBERTY EAGLES

1839/8 Large Letters Eagle, AU50
Very Scarce Two-Year Type

15958 1839/8 Large Letters AU50 NGC. This is a second-year example of the two-year hair-over-ear type that was first employed for Christian Gobrecht's Liberty Head eagle in 1838. The design was modified part-way through 1839, with the new coins featuring a slightly different portrait and Small Letters. All examples of the 1839 Large Letters ten are exceedingly scarce. This AU representative is expectedly abraded with rich olive-gold coloration. Central definition is bold, but the stars are soft. NGC ID# 54XF, PCGS# 8576

1839/8 Liberty Eagle, AU55
Ornate Obverse of 1838

15959 1839/8 Large Letters AU55 PCGS. The first issue of this two-year type is far too rare in AU condition for most type collecting pursuits, as only 80 to 100 examples of that date are known. However, the 1839/8, Type of 1838, gold eagle is a more comfortable acquisition in this high of a grade. About Uncirculated coins are still scarce, though, and collectors will have limited opportunities to acquire high-end examples. This Choice AU representative is sharply detailed on the central devices but a trifle weak on several peripheral stars. The bright yellow-gold surfaces exhibit light, scattered abrasions consistent with the grade. Population: 8 in 55, 19 finer (2/17). NGC ID# 54XF, PCGS# 8576

1868 Ten Dollar, MS61
A Top-Graded Example at NGC

15960 1868 MS61 NGC. All Liberty Head eagles from the 1860s are very scarce, especially in high grades. The 1868 is no exception, with only 10,630 coins struck. Although Garrett and Guth wrote in their 2006 *Gold Encyclopedia*, "Besides the 1861 eagle, the 1868 is easily the most common date of the 1860s, having enjoyed a high survival rate," probably no more than 200 pieces are believed extant. Uncirculated representatives are major condition rarities. NGC has seen two coins in this grade and none finer, while PCGS lists three MS61 submissions and a single MS62 finer (2/17).

Softly frosted luster accompanies dominant peach-gold color, with accents of rose and green appearing throughout. Full radials and centers are present on the stars, and the eagle's wing feathers and claws are similarly bold. A touch of strike softness occurs on the forecurls, bun, and olive leaves. Each side is expectedly abraded. NGC ID# 264N, PCGS# 8653

1870-CC Ten Dollar, XF Details
Rare and Important Carson City Gold

15961 1870-CC — Cleaning — PCGS Genuine. XF Details. Trailing only the 1870-CC double eagle as the rarest gold issue from the Carson City Mint (and only slightly more available than that famous rarity), the 1870-CC eagle is extremely challenging in any circulated grade. It is unknown in Uncirculated condition. Doug Winter estimates about 50 pieces are extant, while PCGS CoinFacts suggests 40 to 60 examples remain in all grades. Just 5,908 pieces were struck.

This coin displays XF sharpness with strong definition despite moderate wear and a light cleaning. Faint hairlines run vertically across the surfaces, visible under strong light with a loupe. Otherwise, the coin shows only a couple of small reeding marks and minimal field chatter. Traces of golden luster remain around the stars and legends, illuminated by glimpses its former prooflike fields. The 1870-CC is always challenging for Liberty ten collectors as well as for Carson City specialists. This is a satisfying example for the assigned grade.

From The R. Thayer Sheets Yorktown Collection.

1871 Ten Dollar, AU53
Only 60 to 75 Pieces Believed Known

15962 1871 AU53 NGC. The mintage of only 1,790 coins pretty well explains the rarity of the 1871 gold eagle, although this issue remains somewhat underappreciated by the general collecting public. About Uncirculated examples are rare, and Mint State pieces are prohibitively so. It is unlikely that more than 75 examples of the date survive in all grades. This AU piece displays sharp detail and reflective fields where light circulation has not dulled the mirroring. Straw-gold patina exhibits an expected amount of light contact marks. NGC ID# 264W, PCGS# 8660

1871-CC Half Eagle, VF30
Deep Original Coloration

15963 1871-CC VF30 PCGS. Variety 1-A. Only about 100 1871-CC gold eagles are believed extant from a mintage of just 8,085. High-grade examples are out of reach for many collectors, although this upper-end VF coin is still accessible. The devices show light, even wear, and each side has original olive-gold toning with deeper coppery hues in the border recesses. Scattered abrasions are as expected for the grade and issue. Population: 8 in 30, 62 finer (2/17).

From The R. Thayer Sheets Yorktown Collection. NGC ID# 264X, PCGS# 8661

1871-CC Liberty Eagle, AU50
Semikey Carson City Issue

15964 1871-CC AU50 PCGS. Variety 1-A. Like its double eagle counterpart, the 1871-CC ten is a scarce date in all grades with only about 100 pieces known. Uncirculated coins are prohibitively rare, and AU examples are infrequently offered. This issue comes from a mintage of only 8,085 pieces, and it is scarcer overall than the double eagle of the same date. Nonetheless, there is room for appreciation of the 1871-CC ten in AU and better condition.

The present coin displays sharp detail and rich orange-gold coloration. Portions of the fields retain subtle luster and semiprooflike reflectivity. Scattered abrasions are light for the grade, and high-point wear is equally minimal. This is an attractive AU coin for the Carson City gold collector. Population: 11 in 50, 14 finer (2/17).

From The R. Thayer Sheets Yorktown Collection. NGC ID# 264X, PCGS# 8661

1872 Liberty Eagle, XF45
Rare, Low-Mintage Date

15965 1872 XF45 PCGS Secure. The 1872 Liberty eagle is a well-known, low-mintage rarity, from a meager production of 1,620 pieces. This lightly worn Choice XF specimen shows slight wear on the top of Liberty's hair and below the B in LIBERTY, but most interior design detail remains intact. Light chatter is evident in the fields on both sides, but only minor abrasions are present. Traces of prooflike reflectivity cling to the devices in some areas. Population: 8 in 45, 19 finer (2/17). NGC ID# 264Z, PCGS# 8663

1873-CC Liberty Eagle, AU Details
Unknown in Mint State

15966 1873-CC — Cleaning — PCGS Genuine. AU Details. Variety 2-B. This is the rarer reverse, showing the mintmark below the tip of the fletching. The 1873-CC ten is rare in all grades and unknown in Mint State. Only 4,543 pieces were struck, and PCGS estimates that fewer than 80 examples survive in any condition. This AU-level coin is hairlined from a light cleaning, but the sharp devices and bright luster are still attractive draws due to the rarity of the issue in this condition. A small mint-made planchet flaw appears in the field near star 4.

From The R. Thayer Sheets Yorktown Collection.

1877-CC Liberty Ten, AU53
Elusive Issue in Any Grade

15967 1877-CC AU53 PCGS. Variety 1-A. From a minuscule mintage of 3,332 pieces, the 1877-CC Liberty eagle is an elusive issue in all grades. The coins circulated heavily at the time of issue, few were saved by contemporary collectors, and few have surfaced in European holdings. PCGS estimates the surviving population at 60-75 examples in all grades and none have been certified in Mint State at either of the leading grading services.

This impressive AU53 specimen is lightly worn, with well-detailed design elements that show a touch of the usual softness on the hair above the ear and the arrow fletching. An interesting clash mark is evident above the eagle's right (facing) wing. The pleasing orange-gold surfaces exhibit a moderate number of minor abrasions and retain traces of original mint luster. Population: 7 in 53, 4 finer (1/17).

From The R. Thayer Sheets Yorktown Collection. NGC ID# 265G, PCGS# 8678

1879-CC Liberty Eagle, XF40
Lowest Mintage of the Series

15968 1879-CC XF40 PCGS. Variety 1-A. The 1879-CC Liberty eagle claims the lowest mintage of any gold coin ever issued by the Carson City Mint. As might be expected, the 1879-CC is scarce-to-rare in all grades, though its elusive nature has been exaggerated by some numismatists in the past. PCGS CoinFacts estimates the surviving population at 45-60 examples in all grades. This impressive XF40 specimen shows some light wear on the well-detailed design elements, with a diagnostic die scratch through BER in LIBERTY and some incompleteness on the banner, due to die polishing. The pleasing orange-gold surfaces are lightly abraded and the overall presentation is most attractive. Population: 6 in 40, 27 finer (1/17).

From The R. Thayer Sheets Yorktown Collection. NGC ID# 265N, PCGS# 8684

1880-O Liberty Eagle, AU50
Underrated Low-Mintage Issue

15969 1880-O AU50 PCGS. From a low mintage of 9,200 pieces, the 1880-O Liberty eagle is an elusive, underrated issue, especially in high grade. This attractive AU specimen shows light wear on the well-detailed design elements and the lightly abraded surfaces retain traces of original mint luster. Population: 37 in 50, 73 finer (2/17). NGC ID# 265U, PCGS# 8689

1882-CC Ten Dollar, XF45
Low-Mintage Date

15970 1882-CC XF45 PCGS. Variety 2-A. The appeal of the 1882-CC ten comes from its mintage of only 6,764 pieces, and the date is scarce in high grade. This Choice XF example is accessible and yet retains bold detail and some luster. Some faint hairlines are seen on each side at certain angles with a loupe, but there are no heavy bagmarks. Eye appeal is pleasing for the issue and grade. *From The R. Thayer Sheets Yorktown Collection.* NGC ID# 2663, PCGS# 8696

1883-CC Ten Dollar, AU55
Partially Prooflike

15971 1883-CC AU55 PCGS. Variety 1-B. The 1883-CC ten boasts a mintage of only 12,000 pieces and is scarce in all grades. Mint State coins are extremely rare. This Choice AU representative matches the grade of the Smithsonian coin (graded by Garrett and Guth). The strike is sharp, and both sides show only slight high-point friction with minor handling marks in the fields. The protected portions of the fields display prooflike mirroring. This attractive condition rarity exhibits warm straw-gold patina. Population: 15 in 55, 17 finer (2/17). *From The R. Thayer Sheets Yorktown Collection.* NGC ID# 2667, PCGS# 8700

1883-CC Ten Dollar, AU58
Rare So Fine
Reflective Fields Dominate

15972 1883-CC AU58 PCGS. Variety 1-A. The 1883-CC is a challenging date in all grades, but it is particularly scarce in the upper AU range, with Mint State pieces being genuinely rare. The Carson City mint struck only 12,000 gold eagles in 1883, continuing a trend of low annual mintage figures for the denomination at the Nevada branch mint. Most coins were dispersed into circulation, with the few high-grade coins known today surviving merely by chance. The present near-Mint example is sharply detailed and might have garnered a Mint State designation were it not for slight dulling of the reflective fields by minor rub. Each side displays bright yellow-gold patina with ample luster remaining. An old reed mark below the mintmark on the reverse is the only singular abrasion. Population: 13 in 58 (1 in 58+), 4 finer (1/17). NGC ID# 2667, PCGS# 8700

1884-CC Ten Dollar, AU53
Challenging in High Grade

15973 1884-CC AU53 PCGS. Variety 1-A. A small mintage of 9,925 pieces assures the scarcity of the 1884-CC Liberty eagle in all grades, although AU coins are particularly elusive, and Mint State pieces are decidedly rare. This collectible About Uncirculated example displays bold detail with remnants of luster in the protected regions of the fields. Scattered light marks are consistent with the grade. Population: 22 in 53, 49 finer (2/17).

From The R. Thayer Sheets Yorktown Collection. NGC ID# 266B, PCGS# 8704

1887-S Eagle, MS64+
Finest at PCGS and CAC

15974 1887-S MS64+ PCGS. CAC. Here is a major condition rarity for advanced series specialists. Although the San Francisco Mint produced 817,000 ten dollar gold coins in 1887, Choice Uncirculated representatives are very rare. A single Gem is known, certified by NGC, and that coin brought \$25,850 in Stack's Bowers' February 2015 Americana sale. This is one of five MS64 submissions at PCGS and the only one with a Plus designation. It is also the sole finest example endorsed by CAC (3/17). Consequently, we expect strong bidding from serious Registry builders for this fantastic rose-gold near-Gem. Fully struck and beautifully frosted with intermittent green-gold accents over marvelously preserved surfaces. NGC ID# 5552, PCGS# 8711

1891-CC/CC Liberty Eagle, MS63
Repunched Mintmark

15975 1891-CC/CC FS-501 MS63 PCGS. Variety 4-C. This *Cherry-pickers'* variety shows the mintmark repunched, most easily seen inside and to the right of the right-hand C. PCGS has not attributed a single example of the variety above MS63, and any Mint State coin is scarce. Even apart from the variety, the present Select 1891-CC ten is conditionally scarce, and finer pieces are rare. The strike is sharp, and each side displays vibrant, frosty mint luster. A few light surface marks do not detract. Population (all varieties included): 88 in 63 (3 in 63+), 4 finer (2/17).

From The R. Thayer Sheets Yorktown Collection. NGC ID# 266U, PCGS# 145728 Base PCGS# 8720

1895-O Ten Dollar, MS63
Rare Top-Grade Coin at PCGS

15976 1895-O MS63 PCGS. Variety 2. The 1895-O is usually an available date in the context of New Orleans eagles, although its mintage of only 98,000 pieces restricts its survival in high grade. This Select representative is conditionally rare, and only one finer coin is known, residing in an NGC holder (2/17). Sharp detail characterizes the relief elements, while the fields display softly frosted yellow-gold mint luster. Light chatter on the obverse limits the grade but poses little distraction. Population: 25 in 63, 0 finer (2/17). NGC ID# 2679, PCGS# 8733

1901-O Ten Dollar, MS64
Conditionally Rare

15977 1901-O MS64 PCGS. Variety 3. The New Orleans Mint re-opened in 1879 with a primary mission of striking silver dollars. Small quantities of gold eagles were coined there each year through 1883, then intermittently (but with somewhat larger mintages) beginning in 1888. Survivors of those issues tend to be in AU55 to MS62 grades, bagmarked from indifferent shipment and storage. But this lustrous apricot-gold near-Gem is smooth aside from moderate contact on the left obverse field. Population: 20 in 64 (3 in 64+), 1 finer (2/17). NGC ID# 267R, PCGS# 8748

1901-S Liberty Eagle, MS66
Smooth Type Representative

15978 1901-S MS66 NGC. There is no shortage of 1901-S ten dollar gold pieces in today's market. The leading grading services have seen tens of thousands of examples through MS65. However, this San Francisco issue does become challenging in this high grade. Aside for a couple of microscopic ticks near Liberty's nose, rose and sun-gold surfaces are void of post-striking distractions. Lustrous, smooth, and well-detailed. Housed in a former generation holder. NGC reports only 20 higher-graded submissions (2/17). NGC ID# 267S, PCGS# 8749

1901-S Ten Dollar, MS66+
Attractive Luster and Surfaces
Few Known Finer

15979 1901-S MS66+ PCGS. CAC. This universally recognized common date finally becomes elusive in Premium Gem condition and is notably rare any finer. The present coins boasts the coveted combination of a Plus designation and a CAC green label. The strike is sharp, and the preservation is exceptional. Both sides display warm, shimmering straw-gold luster. PCGS reports two Superb Gems finer. CAC: 40 in 66, 1 finer (1/17). NGC ID# 267S, PCGS# 8749

1901-S Ten Dollar, MS67 ★
Top-Grade Type Coin

15980 1901-S MS67 ★ NGC. A monumental example of this plentiful date in the finest condition yet seen by the two major grading services. Note the textured luster in the fields and the superb quality of the devices and fields where virtually no signs of handling are found. Close examination with a loupe will locate a trivial tick or two, but this coin is seen to the left of the bridge of Liberty's nose, a couple more are under each of the eagle's wings. This is the only 1901-S eagle graded MS67 ★ by NGC, with none finer at either service (2/17).
Ex: Long Beach Signature (Heritage, 6/2006), lot 3582. NGC ID# 267S, PCGS# 8749

1904 Ten Dollar, MS65
Extremely Rare so Well-Preserved

15981 1904 MS65 PCGS. This lively orange-gold Gem enjoys cartwheel luster and a pinpoint strike. Only a touch of softness appears on the lower stars and the hair curls above Liberty's ear. The obverse shows a few scattered flecks, while the other side is void of overt distractions. The 1904 ten dollar, unlike the double eagles struck that year, is extremely rare in MS65. Population: 2 in 65 (1 in 65+), 2 finer (2/17). NGC ID# 267Y, PCGS# 8755

PROOF LIBERTY EAGLE

1901 Ten Dollar, PR64 Deep Cameo
Only 85 Proofs Struck

15982 1901 PR64 Deep Cameo PCGS. CAC. Although the 1901 is common in business strike format, proofs are rare. Only 85 pieces were struck, some of which may have been spent by heirs, or even by turn-of-the-century dealers, since proof gold type coins commanded little premium over face until after 1933. This is a fully struck lemon-gold near-Gem that has a hint of repunching on the bases of the 19 in the date. A small planchet flake on the field above the eagle's neck serves as an identifier. The radiant devices provide noticeable contrast with the glass-like fields. Population: 3 in 64 (1 in 64+) Deep Cameo, 4 finer. CAC: 1 in 64, 2 finer (2/17).
Ex: West Palm Beach Signature (Heritage, 6/2008), lot 2197; Dallas Signature (Heritage, 10/2016), lot 3330. NGC ID# 28G8, PCGS# 98841

INDIAN EAGLES

1907 Ten Dollar, MS65+
No Motto, No Periods

15983 1907 No Motto MS65+ NGC. Glistening straw-gold luster adorns the beautifully preserved fields on this high-end Gem, while a small mark on Liberty's cheek is all that denies a full MS66 grade. The strike is bold, and eye appeal is excellent. The 1907 No Periods issue is the most plentiful No Motto Indian ten in the series, ideal for type representation in high grade. NGC ID# 28GF, PCGS# 8852

1907 Ten Dollar, MS66
Eye-Appealing No Motto Coin

15984 1907 No Motto MS66 PCGS. This is a boldly struck and exceptionally well-preserved No Motto Indian ten, showing luminous yellow-gold surfaces that reveal no bothersome abrasions. A radiant cartwheel effect illuminates both sides. The 1907 Indian eagle is elusive this fine, and PCGS reports only a dozen numerically finer representatives (2/17). NGC ID# 28GF, PCGS# 8852

1908-D No Motto Ten, MS64+
Exceedingly Rare in This Quality

15985 1908-D No Motto MS64+ PCGS. CAC. The Denver Mint struck more than 1 million Indian Head ten dollar gold coins in 1908, but only 20% of them (210,000 pieces) were produced prior to July 1. Up to that point, the reverse lacked the motto IN GOD WE TRUST, which was later reinstated after complaints from various newspapers and religious organizations. President Roosevelt himself believed the sacred motto had no place on our coinage, but the public was of a different opinion. Examples of the 1908-D are generally seen in MS61 to MS63 when found in mint condition. Near-Gems are very scarce, while those with the added Plus designation are rare. Couple that with a CAC endorsement for quality within the grade, and this coin undoubtedly approaches the finest known survivors of the issue.

The 1908-D is almost invariably softly defined and lackluster. This Choice Uncirculated representative features a typical strike with high-point incompleteness. Slightly satiny surfaces display a tinge of rose color that accents dominant hues of pale yellow-gold. Each side has a notable lack of marks for the assigned grade. There is a single tick on Liberty's cheek and superficial chatter near the motto. Population: 57 in 64 (6 in 64+), 8 finer. CAC: 8 in 64, 4 finer (2/17). NGC ID# 28GH, PCGS# 8854

1908 Motto Ten Dollar, MS66+
Amazing Technical and Aesthetic Quality

15986 1908 Motto MS66+ PCGS. The 1908 Motto ten is generally an available issue and a popular first-year type coin with IN GOD WE TRUST featured prominently in the field left of the eagle. Its restoration on July 1, 1908 was the result of a public outcry after the new series' introduction in 1907. The coins were well-saved and rank among the more obtainable dates in MS65 or finer, but that is relative. Saint-Gaudens Indian Head eagles are notoriously elusive in Gem condition or finer, save for the 1926 and 1932. Premium Gem examples of the 1908 Motto are very scarce. This is the only MS66+ at PCGS (37 others qualify for MS66), and there are just 10 finer submissions at that service (2/17).

Both sides appear unmarked to the unaided eye, and this piece could just as well pass for a Premium Gem, hence the Plus designation. A microscopic tick on the cheek and two others left of the date probably explain the assessment. The surfaces are awash in coruscating frost and feature light shades of rose-gold. The obverse is fully struck, and just a touch of incompleteness occurs on the eagle's wing tip. NGC ID# 28GJ, PCGS# 8859

1908-D With Motto Ten Dollar, MS64
Rare This Well-Preserved

15987 1908-D Motto MS64 PCGS. Perhaps surprising to many collectors is the rarity of the 1908-D With Motto Indian ten in Choice and Gem condition, an issue that boasts a mintage in excess of 836,000 coins. In fact, all Mint State examples of this issue are scarcer than expected. Near-Gems are rare enough to attract significant attention at auction. This piece displays bold detail and satiny yellow-gold mint luster. A few light marks on Liberty's cheek prevent a Gem designation, although these are not bothersome to the naked eye. A finer 1908-D With Motto ten will be far out of reach for most enthusiasts. Population: 24 in 64, 22 finer (2/17). NGC ID# 28GK, PCGS# 8860

1909-D Ten Dollar, Rare MS66
 Few Known So Fine
 Ex: Morse, O'Neal

15988 1909-D MS66 PCGS. Ex: O'Neal. The 1909-D is one of the scarcer issues among early ten dollar Indians and is much more challenging than its mintage of 121,540 pieces would seem to indicate. David Akers contends in *A Handbook of 20th-Century United States Gold Coins* that it is one of the most underrated issues in the series and is actually one of the rarest in an absolute sense. "Even in MS60 this issue is very rare and in MS63 or MS64 condition, it can be located only with great difficulty," says Akers.

In Gem and better condition the 1909-D is extremely rare. PCGS and NGC combined have certified only nine examples in MS65. Another seven coins have earned the Premium Gem level of preservation, and a mere three pieces are classified as MS67 or MS67+. Neither service has certified any specimen finer. Moreover, our records indicate that the '09-D in these higher Mint State grades has appeared in major auction sales fewer than 30 times within the past 15 to 20 years.

In his May 1998 catalog of the Thaine Price Collection, Akers writes that a number of 1909-D ten dollar coins that were not previously known to the numismatic community have come onto the market in recent years. He goes on to say that most of these are of minimal Uncirculated quality, with only a few even reaching the Choice level.

The current MS66 coin has a satiny appearance and yields pleasing, glowing luster and evenly distributed honey-gold color. The design elements are sharply impressed, with resultant excellent definition in the feathers on the headdress and on the eagle. The mintmark is located opposite the arrow points and is broad. The surfaces on both sides are well preserved and display just a couple of minute marks — on the Indian's cheek and another in the right (facing) reverse field. A small planchet void is located below and to the right of IN GOD WE TRUST, and will serve, along with the previously mentioned unobtrusive contact marks, as a pedigree identifier. Population: 4 in 66, 2 finer (2/17).

Ex: Phillip H. Morse Collection of Saint-Gaudens Coinage (Heritage Auction Galleries, 11/2005), lot 6506; The Jim O'Neal Collection of Saint-Gaudens Eagles (Heritage, 1/2009), lot 3509; FUN Signature (Heritage, 1/2010), lot 2236. NGC ID# 28GN, PCGS# 8863

1910 Ten Dollar, MS65
Scarce, High-End Example

15989 1910 MS65 PCGS. A challenging date in MS65, the 1910 Indian eagle becomes genuinely rare any finer. This piece is well-struck and frosty, with just minor luster grazes on the high points of the design limiting the grade. Consistent wheat-gold color encompasses each side, delivering warm appeal. Population: 70 in 65 (4 in 65+), 29 finer (2/17).

Ex: *Long Beach Signature (Heritage, 1/2015)*, lot 3308. NGC ID# 28GR, PCGS# 8865

1910-S Indian Eagle, MS63
Better Date in High Grade

15990 1910-S MS63 PCGS. Despite the mintage of 811,000 pieces, the 1910-S Indian eagle is an elusive issue in Mint State grades. This impressive Select specimen offers well-detailed design elements, with just a touch of the usual softness on the eagle's shoulder. The lightly marked orange-gold surfaces radiate vibrant mint luster, with outstanding eye appeal. PCGS has graded 39 numerically finer examples (2/17). NGC ID# 268D, PCGS# 8867

1911-D Ten Dollar, AU58
Semikey Denver Mint Issue

15991 1911-D AU58 NGC. The low mintage of 30,100 pieces confirms the scarcity of this Denver date among other Indian ten issues. A trace of rub on the eagle's shoulder accounts for the near-Mint State grade, yet the surfaces retain much of the mint luster and the strike is strong. Shades of lilac embrace the light, orange-gold patina. NGC ID# 28GU, PCGS# 8869

1912-S Ten Dollar, MS63
Scarce at This Level

15992 1912-S MS63 PCGS. Not one of the San Francisco Mint's better efforts, the 1912-S eagle is an understandably formidable challenge to find in Select Uncirculated or finer conditions. This example displays nice luster across the finely granular surfaces, which are well-struck for the issue. The hair strands around Liberty's face are almost never bold, but they are reasonably defined on the present coin. Abrasions are small and grade-consistent. Pale-orange accents add eye appeal to the greenish-gold surfaces. Population: 85 in 63 (3 in 63+), 95 finer (2/17). NGC ID# 269G, PCGS# 8872

1913-S Indian Ten Dollar, MS61

15993 1913-S MS61 PCGS. An important Indian eagle issue, the 1913-S had a mintage of only 66,000 coins. That was the sixth lowest of the series, or the eight lowest including the With Periods rarities. While several dozen Mint State pieces survive, the average certified grade of this issue is just AU55. This piece has pleasing straw-gold luster with scattered but trivial contact marks on each side. NGC ID# 28GZ, PCGS# 8874

1914-S Ten Dollar, MS63+
Challenging San Francisco Issue

15994 1914-S MS63+ PCGS. This S-mint issue can be located with little trouble in the lower levels of Mint State, that is through MS63. Finer examples, including this Plus-designated Select Uncirculated offering, are very scarce. Liberty's hair and lower headdress feathers are well-struck, though the eagle's shoulder is moderately soft. Green and rose-gold colors surfaces that radiate frosty luster and house minor marks. NGC ID# 28H4, PCGS# 8877

1914-S Ten Dollar, Near-Gem
Much Better Date in High Grades

15995 1914-S MS64 PCGS. Serious collectors of Indian gold recognize the 1914-S eagle as one of the most conditionally challenging issues in the entire ten dollar series. While blessed with an abundance of eye appeal and a customary sharp strike, the grade-limiting factors are abrasions and bagmarks. This near-Gem example is vibrantly lustrous with razor-sharp definition and fantastic, coppery-orange color. Rich lilac overtones add a distinctive flair. Marks are limited to a few tiny ticks on the eagle and a short, microscopic nick on the chin. A finer grade may be in the offing. Population: 66 in 64 (3 in 64+), 13 finer (2/17). NGC ID# 28H4, PCGS# 8877

1916-S Indian Eagle, MS64+
Nice Color and Luster

15996 1916-S MS64+ PCGS. While the 1916-S is relatively available in About Uncirculated to low Mint State grades, it becomes increasingly scarce at the Select Uncirculated level and very scarce any finer. We seldom have the opportunity to offer near-Gem or Gem specimens. No ten dollar gold pieces were struck at the other Mints for the year, putting the 1916-S under considerable pressure from date collectors.

Frosty yellow-gold luster blankets both sides of this high-end Choice ten. Surface abrasions are limited to a few tiny ticks — one on the 9 in the date, and a light abrasion to the right of the eagle's head. Pleasing reddish-orange accents embellish the well-defined headdress, and the strike is sharp throughout. The present coin is just one of three earning the PCGS Plus designation at the MS64 level. Population: 42 in 64 (3 in 64+), 23 finer (2/17). NGC ID# 28H7, PCGS# 8880

LIBERTY DOUBLE EAGLES

1851 Twenty Dollar, Lustrous MS61
Second-Year Type Offering

15997 1851 MS61 PCGS. The second-year 1851 had a generous mintage of 2 million coins, and while examples are fairly accessible in circulated grades, Doug Winter estimates only 100 to 150 Mint State survivors exist. This MS61 Type One double eagle emits vibrant frost from surprisingly clean straw-gold surfaces. Strike detail on the hair and feathers is crisp. Type specialists ought to consider this attractive offering. NGC ID# 268H, PCGS# 8904

1852-O Twenty Dollar, AU55
Collectible New Orleans Issue

15998 1852-O AU55 PCGS. Variety 1. Struck from polished dies, this Choice AU 1852-O double eagle displays considerable reflectivity in the protected regions of the fields, while the open areas exhibit scattered light marks and friction consistent with the grade. The devices are sharp and have little high-point wear. Each side displays bright straw-gold patina. The 1852-O is among the more plentiful New Orleans double eagles, although no O-mint twenty is truly common in the upper AU grades. The 1852-O is collectible in AU55 and seldom offered finer. This piece is ideal for the collector seeking a single coin from this challenging mint. NGC ID# 268L, PCGS# 8907

1854 Twenty Dollar, AU58
Small Date

15999 1854 Small Date AU58 PCGS. CAC. The more frequently seen Small Date variety, although still scarce in AU58 and finer condition. This CAC-endorsed near-Mint coin displays bold design elements and partially lustrous fields. The bright yellow-gold surfaces are lightly abraded, as expected for the grade. Population: 55 in 58 (1 in 58+), 29 finer. CAC: 23 in 58, 7 finer (1/17). NGC ID# 268R, PCGS# 8911

1860 Twenty Dollar, AU58
Lustrous Fields

16000 1860 AU58 PCGS. The scarcity of the 1860 double eagle in Mint State makes high-end AU coins an attractive alternative for the budget-conscious collector. This near-Mint piece displays substantial luster in the fields and boldly detailed design elements. Light, scattered handling marks in the fields are a familiar sight for the grade. NGC ID# 269D, PCGS# 8929

1860 Twenty Dollar, AU58+
Prooflike Fields

16001 1860 AU58+ PCGS. The 1860 double eagle is elusive in Mint State, making this high-end near-Mint coin highly appealing to the budget-conscious collector. One of only two Plus-graded AU coins at PCGS (both AU58+), it displays nearly untouched high-points and deeply reflective fields. Scattered handling marks are typical of the issue. This piece offers bright yellow-gold patina and substantial visual appeal. NGC ID# 269D, PCGS# 8929

1861 Double Eagle, MS62
Cleaner Than the Grade Suggests

16002 1861 MS62 PCGS. A mintage of nearly 3 million coins, unsurpassed in scale until 1904, explains the relative prevalence of 1861 Liberty Head twenty dollar gold pieces. That said, Uncirculated survivors are scarce. The hair strands are remarkably well-detailed for a No Motto double eagle, and frosty mint luster washes over each side. Yellow-gold color dominates at first glance, but close inspection reveals rose and green-gold shadings. Bagmarks in the left obverse field limit the grade. NGC ID# 269G, PCGS# 8932

1863-S Twenty Dollar, MS61
Scarce in Uncirculated Grades

16003 1863-S MS61 PCGS. Breen-7217. Small S. The double eagle was, in practice, the unit of account in the West Coast economy. The coins were struck in considerable number by the San Francisco Mint, but all went into commerce, and none were saved for numismatic purposes until decades later. The 1863-S is known in Mint State, since some emerged from the *S.S. Republic* shipwreck, and other pieces were likely early arrivals in the burgeoning foreign bank holdings of U.S. gold coins. U.S. paper money was held in little regard overseas during the Civil War, and imports had to be purchased with gold coin. Nonetheless, examples such as the present piece with ample luster, original apricot color, and relatively few bagmarks, are very scarce and in demand. Population: 31 in 61, 24 finer (2/17). NGC ID# 269R, PCGS# 8940

1863-S Twenty Dollar, MS61
Smooth Original Surfaces

16004 1863-S MS61 PCGS. Small S. Although not as rare as its Philadelphia counterpart, the 1863-S double eagle is still a challenging acquisition in Mint State. Coins grading finer than MS62 are major rarities. Nonetheless, this MS61 coin certainly stands out from its peers, as it does not show the heavy abrasions that are typically associated with this grade. Instead, a loupe reveals only light handling marks on Liberty's cheek and on the high points of the eagle. Luminous wheat-gold luster emerges from the fields when rotated beneath a light. Eye appeal surpasses expectations for the grade. Population: 31 in 61, 24 finer (2/17). NGC ID# 269R, PCGS# 8940

1864 Liberty Twenty, XF45
Gleaming Yellow-Gold Surfaces

16005 1864 XF45 PCGS Secure. Scarce in all grades, the 1864 twenties were soon absorbed by trade and commerce without thought of numismatic preservation. Some 42 coins were recovered from the *S.S. Republic*, which make up the majority of high-grade pieces known today. This Choice XF example is housed in a PCGS Secure holder, with bright, butter-gold surfaces and a scattering of tiny marks. The high points of Liberty's curls show moderate wear. Flashy yellow luster remains around the obverse stars and across the lightly abraded reverse. NGC ID# 269S, PCGS# 8941

1866 Double Eagle, MS61
Debut With Motto Issue

16006 1866 Motto MS61 PCGS. All double eagles struck at Philadelphia in 1866 bear the motto IN GOD WE TRUST amid the stars above the eagle. The motto was added to various denominations after the Civil War largely in response to the tragic bloodshed with which the four-year war between the states had oppressed society. However, legislation *mandating* its usage on United States coins was not passed until 1907, when President Roosevelt had the motto omitted from Saint-Gaudens' eagle and double eagle designs, feeling that it was sacrilege to have such an inscription on a monetary item that would widely be used for secular purposes.

The 1866 is the more available of the two With Motto double eagles of this date, although Mint State coins are still scarce in all grades. This MS61 example displays bold detail and thoroughly lustrous fields. Scattered abrasions determine the grade. Population: 41 in 61, 9 finer (2/17). NGC ID# 269X, PCGS# 8949

1867-S Twenty Dollar, MS60
A Rarity in Mint State

16007 1867-S MS60 PCGS. The 1867-S is often overlooked as a common date in circulated condition, but in Mint State it is a genuinely rare issue. No Uncirculated pieces grade finer than MS62 at PCGS, and the majority grade MS60 or MS61. In more than two decades, we have handled a Mint State 1867-S double eagle on only 16 occasions. For its grade, the present coin is quite appealing. Each side displays original olive-gold patina atop frosty yellow-gold luster. The strike is bold. In the absence of singularly obtrusive abrasions, each side exhibits scattered surface chatter that defines the grade. Population: 14 in 60, 12 finer (1/17). NGC ID# 26A2, PCGS# 8952

1867-S Double Eagle, MS60
Rarely Encountered in Mint State

16008 1867-S MS60 PCGS. Most double eagle issues of the 1860s are scarce or rare in Mint State, regardless of mintage. In the case of the 1867-S, more than 920,000 pieces were struck, but the number of Uncirculated examples remaining today number only a few dozen. In their gold *Encyclopedia* (2008), Garrett and Guth write: "Nearly all of the coins offered at auction over the last 15 years have been in About Uncirculated condition, mostly on the low end of that scale. Mint State pieces are very rare."

This Uncirculated coin is heavily abraded, as the grade suggests, but there are no individually bothersome marks. The strike is bold, and the green-gold surfaces feature original mint luster. Population: 14 in 60, 12 finer (2/17). NGC ID# 26A2, PCGS# 8952

1869-S Liberty Twenty, MS61
Surprisingly Smooth Surfaces

16009 1869-S MS61 PCGS. 30th Anniversary Green Label Holder. The 1869-S is scarce in Mint State and genuinely rare above MS61. This collectible MS61 coin displays sharp detail and smooth, lustrous surfaces with remarkably few abrasions. Light handling marks on the cheek appear to be what limited PCGS' assessment of this truly attractive 1869-S double eagle. The honey-gold coloration is original. Population: 39 in 61, 16 finer (2/17). NGC ID# 26A6, PCGS# 8956

1871-CC Double Eagle, AU Details
Partially Reflective Fields

16010 1871-CC — Repaired — PCGS Genuine. AU Details. Variety 1-A. The 1871-CC is often referred to as "the other Carson City key" in the Liberty double eagle series, behind of course the legendary 1870-CC. Garrett and Guth write in their gold *Encyclopedia*: "The mintage is small, and most of the production was destined for circulation in Nevada and the surrounding areas. ... most of the coins found of this issue are well worn and heavily bagmarked." Even the certified population figures plummet in the AU grades, and the date is extremely rare in Uncirculated condition.

This AU-level coin shows some repair work in the fields, but scattered abrasions make it well-hidden. Bright yellow-gold luster retains some reflectivity in the protected regions of the borders, and the devices are boldly detailed. This piece will fit in well with an AU-level Carson City double eagle collection.

From The R. Thayer Sheets Yorktown Collection.

1871-S Twenty Dollar, MS62+
CAC-Approved and Radiantly Lustrous

16011 1871-S MS62+ PCGS. CAC. The 1871-S double eagle is scarce in Mint State, and coins grading finer than MS62 are extremely rare. This CAC-endorsed example is the only Plus-graded Uncirculated coin at PCGS, making it arguably the most important 1871-S known below the MS63 grade level, above which the price of this date quickly accelerates beyond most collectors' pocket books. This piece displays intensely frosted, vibrant mint luster with a radiant cartwheel effect. Scattered abrasions determine the grade, although there is no doubt that the eye appeal makes this coin excel within the MS62 numeric level. This is a rare opportunity for the collector of high-end Type Two double eagles. Population: 31 in 62 (1 in 62+), 2 finer. CAC: 7 in 62, 1 finer (1/17). NGC ID# 26ND, PCGS# 8962

1872 Liberty Twenty, MS61
Underrated Type Two Philadelphia Issue

16012 1872 MS61 PCGS. From a mintage of 251,850 pieces, the 1872 Liberty double eagle is an underrated issue that is seldom encountered in Mint State grades. This attractive MS61 specimen offers sharply detailed design elements and pleasing orange-gold surfaces that show the expected number of minor contact marks for the grade. Vibrant mint luster adds to the outstanding eye appeal. Population: 58 in 61, 11 finer (2/17). NGC ID# 26AD, PCGS# 8963

1872-CC Twenty Dollar, AU50
Lustrous Fields

16013 1872-CC AU50 PCGS. Variety 1-B. The mintmark is more widely spaced on this variety than the other two 1872-CC die pairings. The three die pairs struck only 26,900 coins combined, making the 1872-CC a scarce and sought-after Carson City issue. In their gold *Encyclopedia*, Garrett and Guth write: "The population data for About Uncirculated condition are greatly inflated by resubmissions." Indeed, the frequency with which AU-level coins appear at auction falls far behind what would be expected if the population reports were accurate.

This About Uncirculated example displays bold design elements amid vibrantly lustrous yellow-gold fields. Scattered abrasions accompany the grade, as expected, and a brush of high-point wear blends some of Liberty's hair curls. Nonetheless, visual appeal is pleasing with regards to the issue's reputation for having unsightly bagmarks and wear.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 26AE, PCGS# 8964

1872-CC Liberty Twenty, AU50
Better Early Date

16014 1872-CC AU50 PCGS. **Variety 1-A.** The 1872-CC is not as rare in AU as the two earlier issues from this mint, although the number of coins extant is not that high compared to demand for early Carson City double eagles. These are challenging dates in the popular CC-mint short set. The present 1872-CC is boldly detailed with yellow-gold patina that shows remnants of luster in the protected regions of the fields. Scattered abrasions and handling marks accompany the grade, although high-point wear is minimal. The 1872-CC is particularly scarce in high grade when sought in a PCGS holder.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 26AE, PCGS# 8964

1873 Liberty Double Eagle, MS63
Popular Open 3 Variant

16015 1873 Open 3 MS63 PCGS. **CAC.** The Open 3 in the date was the creation of Chief Coiner A. Loudon Snowden, who believed the earlier Closed 3 numeral punch looked too much like an 8. This well-detailed Select specimen offers lustrous, lightly marked orange-gold surfaces with outstanding eye appeal. PCGS has graded 11 finer examples (3/17). NGC ID# 26AL, PCGS# 8967

1873 Open 3 Double Eagle, Frosty MS63
Doubled Die Obverse

16016 1873 Open 3, Doubled Die Obverse, FS-101, MS63 NGC. LIBERTY is plainly die doubled on this scarce Open 3 variety. The present Select representative is among the finest attributed by either grading service. The strike is sharp, and each side offers frosty original luster with glowing wheat-gold hues. Light, scattered grazes are a minor infiltration of the eye appeal. NGC ID# 26AH, PCGS# 148749 Base PCGS# 8967

1873-CC Double Eagle, AU53
Lustrous and Appealing

16017 1873-CC AU53 PCGS. **Variety 1-A.** The 1873-CC is the last of the scarce early dates in the Carson City double eagle set, although the rarity of CC-mint twenties in Mint State persists through the 1874 issue. Specialists in branch mint gold will recognize the scarcity of the 1873-CC in AU condition with any amount of eye appeal. This piece has scattered abrasions, but the severity of the contact marks fails to meet expected norms — the overall appearance is far above average. The devices are sharp, and luminous yellow-gold luster remains in the fields. The coin would be a noteworthy addition to an AU-level Carson City double eagle collection.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 26AJ, PCGS# 8968

1873-CC Liberty Double Eagle, MS61
 Elusive Branch Mint Twenty
 Only One Finer Coin at NGC

16018 1873-CC MS61 NGC. Variety 1-A. The 1873-CC Liberty double eagle claims a modest mintage of 22,410 pieces and precious few were saved for numismatic purposes. It would be another 20 years before Augustus Heaton's work on mintmarked varieties would spark an interest in branch mint issues in general, and 60 years before President Roosevelt's 1933 Gold Recall would motivate astute numismatists to form systematic collections of high denomination gold coins, like double eagles. Before the 1930's, collectors were put off by the high face value of each coin in the double eagle series, where an example of even the most common issue represented a significant amount of spending power. Only the most well-heeled early 20th century collectors could afford to stockpile extensive date/mintmark runs of double eagles, and few were inclined to speculate on such a venture until Roosevelt's Presidential Order made collecting gold coins one of the few legal avenues for American citizens to invest in gold of any sort.

As both a branch mint issue and a large denomination gold coin, the 1873-CC twenty had two strikes against it from the start. The entire mintage was released into circulation in the hard money economy of the American West, where the coins fulfilled their intended purpose admirably, suffering the normal attrition along the way. By the time collectors recognized the rarity and desirability of the 1873-CC, most of the surviving coins had experienced extensive wear on the devices, and almost every specimen showed excessive surface abrasions, with subdued mint luster. Although a few previously unknown examples surfaced in small hoards in the 1990's, the 1873-CC remains a scarce issue in all grades, and is particularly rare in Mint State.

The present coin is a happy exception to the rule, an attractive MS61 specimen that shows only the minimum number of minor contact marks for the grade. A small, linear grease strike-through runs through a few letters in the motto. Fortunately, the 1873-CC was a well-made issue, and this coin exhibits the generally sharp definition typical of most Mint State survivors. The pleasing orange-gold surfaces radiate vibrant mint luster, with outstanding eye appeal. Census: 6 in 61, 1 finer (2/17). NGC ID# 26AJ, PCGS# 8968

1874-CC Double Eagle, AU50+

16019 1874-CC AU50+ NGC. *Variety 1-A*. Natural and still-lustrous yellow surfaces exhibit deep blue patina on the high points of this lovely Carson City double eagle. Traces of orange toning in the protected areas around the design elements enhance the eye appeal of this important Nevada gold piece. NGC ID# 26AP, PCGS# 8971

1874-CC Double Eagle, AU53

16020 1874-CC AU53 NGC. *Variety 1-A*. Apparently a plentiful die marriage, one of six documented varieties produced from a combination of five obverse dies and two reverse dies. This lovely AU53 example has brilliant yellow surfaces. Faint orange and delicate blue toning accompanies the frosty mint luster of this pleasing Carson City double eagle. NGC ID# 26AP, PCGS# 8971

1874-CC Liberty Twenty Dollar, AU53
CAC-Approved in a Green Label Holder

16021 1874-CC AU53 PCGS. CAC. *Variety 2-A*. Given the typical quality of 1874-CC double eagles in the lower AU grades, this CAC-endorsed example stands out as visually superior. Strong detail and significant luster remain on each side, and the straw-gold coloration is original. Scattered abrasions are typical of the issue and grade. Housed in a green label holder. CAC: 11 in 53, 23 finer (2/17). NGC ID# 26AP, PCGS# 8971

1874-CC Double Eagle, AU55
Original Patina

16022 1874-CC AU55 NGC. *Variety 1-A*. Although collectible in AU condition, the 1874-CC double eagle is rare in Mint State. This Choice AU representative displays bold detail and rich straw-gold coloration. Partial luster remains in the fields, while both sides exhibit moderate abrasions, as is typical of the grade level. NGC ID# 26AP, PCGS# 8971

1875-CC Double Eagle, AU53
Reflective Fields

16023 1875-CC AU53 PCGS. *Variety 2-A*. This glittering AU Carson City double eagle was struck during an early state of the dies, and the fields retain significant reflectivity from the original die polishing. There is little high-point friction, and the eye appeal surpasses expectations for the AU53 level. There are no major abrasions. *From The R. Thayer Sheets Yorktown Collection.* NGC ID# 26AT, PCGS# 8974

1875-CC Double Eagle, MS61
Radiant, Frosty Mint Luster

16024 1875-CC MS61 PCGS. Variety 1-B. The 1875-CC is often regarded as a common date in the context of Carson City double eagles, although if a Mint State coin from this mint is desired, the 1875-CC represents one of only a few dates within the grasp of many collectors. This MS61 coin is about average for an Uncirculated 1875-CC with regards to numeric grade, but the eye appeal far exceeds expectations. Each side displays vibrant, frosty yellow-gold luster and bold design elements, and grade-limiting abrasions are relatively light and dispersed. The coin stands in stark contrast to the typical low-end Mint State representative, which would show heavy, deep abrasions and areas of faint high-point rub.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 26AT, PCGS# 8974

1875-S Liberty Twenty, MS63
High-Grade Type Two Example

16025 1875-S MS63 PCGS. Like most Type Two Liberty double eagles from the San Francisco Mint, the 1875-S was produced in adequate quantities, but most of the mintage was heavily circulated and few have survived in high grade condition. The present coin is an impressive Select specimen, with sharply detailed design elements and some interesting spidery die cracks through the letters in the reverse legend. The lightly marked orange-gold surfaces radiate vibrant mint luster. Population: 18 in 63 (2 in 63+), 7 finer (2/17). NGC ID# 26AU, PCGS# 8975

1876-CC Liberty Twenty, AU53
Inarguably Original

16026 1876-CC AU53 PCGS. CAC. Variety 2-C. A die lump on Liberty's hair above the R and the second C in the mintmark left of the T confirm the variety. This is an inarguably original Type Two Carson City double eagle that should appeal to those who appreciate the khaki and reddish-gold coloration and partial luster of an untouched twenty dollar gold piece. Abrasions and faint merging are in line with the grade. NGC ID# 26AW, PCGS# 8977

1876-CC Double Eagle, AU58
Partially Reflective Fields

16027 1876-CC AU58 PCGS. CAC. Variety 3-A. This near-Mint example is in an earlier die state than usual, showing semireflective fields; the die crack along the lower reverse is also just beginning to appear. This coin displays bold detail and rich yellow-gold patina. Scattered handling marks are less obtrusive than usual. NGC ID# 26AW, PCGS# 8977

1876-CC Double Eagle, MS61
Pleasing for the Grade

16028 1876-CC MS61 NGC. *Variety 3-D, Wide CC mintmark.* Widely viewed as a common date within the Carson City short set, the 1876-CC double eagle is conditionally scarce in Mint State. This example has scattered abrasions, as the grade suggests, but it stands apart from many of its peers by not showing any obvious signs of high-point friction, which is a common complaint on many Carson City double eagles in this grade. The strike is bold, and each side offers original, frosty mint luster with a radiant cartwheel effect. A hint of olive-gold patina accompanies the more significant abrasions. Finer examples of the 1876-CC twenty are out of reach for most collectors. NGC ID# 26AW, PCGS# 8977

1876-S Double Eagle, MS63
Eye-Catching Cartwheel Luster

16029 1876-S MS63 PCGS. Only moderately available in Select Uncirculated condition and rare any finer, the 1876-S is a challenging Type Two twenty in mid-to-high Mint State grades. This frosted, sharply struck MS63 coin has both the eye appeal and surface quality to approach a finer grade. Abrasions are amazingly few for this often bagmarked S-Mint double eagle. Peach-gold and lime-green accents visit the sun-gold fields and devices, while the smooth and appealing surfaces radiate fresh mint luster. Seldom seen finer. Population: 121 in 63 (3 in 63+), 17 finer (2/17). NGC ID# 26AX, PCGS# 8978

1877-CC Twenty Dollar, AU50
Luminous Original Surfaces

16030 1877-CC AU50 PCGS. *Variety 3-A.* The first Type Three issue in the Carson City double eagle series is challenging to acquire in AU condition and decidedly rare at the Mint State level. This piece displays excellent detail and original orange-gold coloration. Remnants of luster remain in the protected regions of the fields. The surfaces are much smoother than typical for the grade and issue. *From The R. Thayer Sheets Yorktown Collection.* NGC ID# 26AZ, PCGS# 8983

1877-CC Double Eagle, AU55
Nice Eye Appeal, Only Small Marks

16031 1877-CC AU55 NGC. *Variety 1-A.* A mintage of 42,565 pieces comprised the first-year Type Three output of double eagles from the Carson City Mint. The new design did little to attract collectors, and few examples were saved in Uncirculated condition. This Choice About Uncirculated example shows only a moderate amount of the bagmarks that normally accompany the issue. Soft mint luster remains beneath natural yellow-gold color with grayish accents and glimpses of orange around the raised elements. Sharp definition on the motifs exists despite slight wear from circulation. NGC ID# 26AZ, PCGS# 8983

1877-CC Double Eagle, AU55
First Year of the Type Three Design

16032 1877-CC AU55 NGC. *Variety 3-D.* The 1877-CC Double Eagle is an elusive issue from a mintage of 42,565 coins that was accomplished from the combination of three obverse dies and four reverse dies, creating five varieties. This Choice AU example has frosty mint luster and sharp details with brilliant yellow surfaces. NGC ID# 26AZ, PCGS# 8983

1878-CC Liberty Twenty, XF40
Better Type Three Issue

16033 1878-CC XF40 PCGS. *Variety 1-A.* Double eagle coinage at the Carson City Mint declined in 1878 to only 13,180 pieces. The date is scarcer than the previous few CC-mint issues, and high-grade coins are particularly elusive. In XF, the 1878-CC is about as scarce as the 1877-CC is in AU. Uncirculated examples of this date are rare. The present coin displays bright yellow-gold patina and partially lustrous fields. Light chatter over each side is consistent with the grade.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 26B4, PCGS# 8986

1878-CC Double Eagle, XF45
Just 13,180 Pieces Struck

16034 1878-CC XF45 NGC. *Variety 1-A.* A vertical die scratch along Liberty's neck aids in attribution. With a mintage of 13,180 coins, the 1878-CC ranks among the scarcest twenty dollar gold pieces from the Nevada branch mint. Probably 350 to 400 coins survive, typically in VF to XF condition. This is a bright Choice XF double eagle with strong high-point detail. Partially reflective fields display myriad abrasions. NGC ID# 26B4, PCGS# 8986

1879-CC Liberty Double Eagle, XF45
Elusive Branch Mint Twenty

16035 1879-CC XF45 PCGS. *Variety 1-A.* The 1879-CC Liberty double eagle is an elusive issue, from a small mintage of 10,708 pieces. Traditionally, the 1879-CC was thought to be even more elusive than it is today, but a small hoard of examples surfaced in the 1990's, to augment the meager supply. Most of the hoard coins were in the XF-AU grade range, so the issue remains quite rare in Mint State.

The present coin is an impressive Choice AU specimen, with strongly impressed design elements that show no sign of lapping. A small die lump, which is seen on many examples of this issue, is evident below the 9 in the date. Some minor wear shows on the prongs of the crown and hair, but most interior detail remains intact. The pleasing orange-gold surfaces are lightly abraded and retain traces of original mint luster. The overall presentation is most attractive.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 338L, PCGS# 8989

1880 Double Eagle, MS60
Seldom Offered in Mint State

16036 1880 MS60 PCGS. Unlike 1880 double eagles bearing an S mintmark, the twenty dollar gold coins struck at the Philadelphia Mint that year are rarely found in Uncirculated condition. When offered, such coins are usually no higher than MS61. This mint condition double eagle features wheat-gold color with tinges of green. A plethora of abrasions are scattered over each side. Population: 13 in 60, 34 finer (2/17). NGC ID# 26BA, PCGS# 8992

1882-CC Liberty Double Eagle, AU53
Lustrous Obverse, Prooflike Reverse

16037 1882-CC AU53 NGC. **Variety 1-A.** No double eagles were struck at the Carson City Mint in 1880 and 1881. When double eagle coinage resumed in 1882, a nominal total of 39,140 coins was struck, with two die varieties known for the date. This coin shows the first C in the mintmark placed higher than the second, identifying the scarcer Variety 1-A. The lightly abraded orange-gold surfaces of this attractive AU53 example show vibrant mint luster on the obverse and much prooflike reflectivity on the reverse. *From The Martin Peterson Collection.* NGC ID# 26BF, PCGS# 8997

1882-CC Double Eagle, AU55
Variety 1-B

16038 1882-CC AU55 NGC. **Variety 1-B.** This is the usual variety of 1882-CC double eagles. Just two die pairs are known from one obverse die and two reverse dies. Total mintage for both varieties was 39,140 coins. This example has excellent luster with scattered grade-consistent marks. NGC ID# 26BF, PCGS# 8997

1882-CC Double Eagle, AU55
Partially Lustrous Surfaces

16039 1882-CC AU55 PCGS. **Variety 1-B.** The 1882-CC is elusive but still collectible in the upper AU grades, although Mint State pieces are seldom available. This Choice About Uncirculated coin displays a sharp strike and rich straw-gold coloration. Lustrous fields deliver a wealth of eye appeal. Surface chatter is at a minimum. *From The R. Thayer Sheets Yorktown Collection.* NGC ID# 26BF, PCGS# 8997

1883-CC Double Eagle, AU53
Variety 1-B

16040 1883-CC AU53 NGC. **Variety 1-B.** In his Carson City gold reference, Doug Winter describes two varieties that he identified as 1-A and 2-A, but the reverse of this example is different, so we designate the variety as 1-B. Apparently variety 1-A is quite scarce, 1-B is scarce, and 2-A is plentiful. This piece has pleasing yellow surfaces and slight reflectivity in the protected areas, with traces of dark patina. NGC ID# 26BH, PCGS# 8999

1883-CC Double Eagle, AU55
Still-Lustrous, Honey-Gold Example

16041 1883-CC AU55 PCGS. **Variety 1-A.** High-end AU examples of the low-mintage 1883-CC double eagle (59,962 coins) survive in sufficient numbers to satisfy the bulk of collector demand, but anything finer becomes exceedingly scarce. Razor-sharp motifs include a touch of blending over the hair curls and cheek, but mint luster remains vibrant over semireflective honey-gold surfaces. NGC ID# 26BH, PCGS# 8999

1883-CC Double Eagle, AU55
Well-Detailed Motifs

16042 1883-CC AU55 PCGS. **Variety 2-A.** This is a thoroughly lustrous Choice AU example of this collectible Type Three Carson City double eagle. The strike is sharp, and both sides display bright yellow-gold coloration. Surface chatter is at a minimum. The 1883-CC comes from a mintage of 59,962 pieces, of which many coins survived in overseas hoards before coming back to American collectors in recent decades.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 26BH, PCGS# 8999

1883-CC Twenty Dollar, AU58
Smooth and Luminous

16043 1883-CC AU58 NGC. **CAC. Variety 2-A.** This is a boldly struck, partially lustrous near-Mint Carson City double eagle with original, luminous surfaces that are remarkably smooth for the grade. There is no loss of detail from slight high-point friction on the devices. The 1883-CC double eagle is plentiful in AU grades, although the present coin stands apart with its exceptional eye appeal. NGC ID# 26BH, PCGS# 8999

1884-CC Double Eagle, AU55
Variety 1-A, The Only Dies

16044 1884-CC AU55 NGC. **Variety 1-A.** Only one documented die variety is known for the 1884-CC double eagles, but others might exist given the 81,139-coin mintage. This lovely piece has excellent frosty luster with scattered grade-consistent marks and exceptional eye appeal. This plentiful Type Three issue is ideal for a Carson City type set. NGC ID# 26BK, PCGS# 9001

1884-CC Liberty Head Twenty, AU55
Smooth Surfaces, CAC Approval

16045 1884-CC AU55 NGC. **CAC. Variety 1-A.** Original luster remains in the protected regions of the fields amid otherwise olive-gold patina. The design elements are bold, and both sides display uncommonly smooth surfaces. The 1884-CC twenty is plentiful in AU, but this CAC-endorsed Choice AU coin is much more visually appealing than usual. NGC ID# 26BK, PCGS# 9001

1884-CC Double Eagle, AU58
Substantial Luster Remains

16046 1884-CC AU58 PCGS. **Variety 1-A.** Near-Mint Carson City double eagles are widely popular, even for the more commonly seen dates in the series. The 1884-CC is a suitable issue for the collector seeking a single, high-grade CC-mint twenty at a reasonable price. This example displays a sharp strike and lustrous straw-gold fields. A brush of rub on Liberty's cheek is all that prevents a Mint State designation.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 26BK, PCGS# 9001

1884-CC Twenty Dollar, AU58
Glowing Original Luster

16047 1884-CC AU58 PCGS. **CAC. Variety 1-A.** An original AU58 representative of the 1884-CC double eagle is a reasonable objective for those looking to acquire a nice example of this Carson City issue. Although it ranks among the more collectible emissions from the facility, Uncirculated examples of the 1884-CC remain scarce and command strong prices. Abundant luster glows from eye-catching olive and orange-gold surfaces. Reeding marks between stars 8 and 9 are the only blemishes worth mentioning. NGC ID# 26BK, PCGS# 9001

1884-CC Twenty Dollar, AU58
Attractive Carson City Type

16048 1884-CC AU58 PCGS. CAC. Variety 1-A. This eye-appealing near-Mint twenty would make an excellent representative of the Carson City type. It enjoys significant remaining luster and attractive khaki-gold coloration. The strike, too, is impressive with fully raised stars, boldly defined curls, and crisp feathers. A nearly indistinguishable trace of friction occurs over the highest points. Lightly abraded. NGC ID# 26BK, PCGS# 9001

1889-CC Liberty Double Eagle, AU58
Smooth, Partially Lustrous Surfaces

16050 1889-CC AU58 NGC. Variety 1-A. The early die state without cracks at the base of the date. This near-Mint 1889-CC double eagle comes from a mintage of only 30,945 coins, and finer pieces are scarce. The strike is sharp, and high-point wear is at a strict minimum. Luster remains in the fields amid original olive-gold patina. A hidden mark on Liberty's throat is the only mentionable abrasion. NGC ID# 26BV, PCGS# 9011

1885-CC Liberty Twenty, AU55
Elusive, Low-Mintage Issue

16049 1885-CC AU55 PCGS. Variety 1-A. A meager mintage of 9,450 Liberty double eagles was accomplished at the Carson City Mint in 1885. The coins were released into circulation at the time of issue and few (if any) were saved by contemporary collectors, as there was little interest in collecting double eagles or branch mint issues at the time. Most survivors have been recovered from European holdings over the years. Accordingly, the 1885-CC is the most elusive CC-mint twenty of the decade. This Choice AU specimen shows just a touch of wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain much original mint luster. Overall visual appeal is quite strong. Population: 34 in 55, 58 finer (1/17).

From The R. Thayer Sheets Yorktown Collection. NGC ID# 26BN, PCGS# 9004

1889-CC Double Eagle, AU58
Elusive in Finer Condition

16051 1889-CC AU58 PCGS. Variety 1-A. The 1889-CC is a better late date in the Carson City short set, boasting a small mintage of 30,945 pieces. Mint State examples are particularly scarce. This near-Mint coin possesses nearly as much luster as an Uncirculated coin but at a more affordable grade level. The strike is sharp, and each side offers lightly abraded yellow-gold mint luster.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 26BV, PCGS# 9011

1889-CC Twenty Dollar, MS60
Strong Impression, Frosty Luster

16052 1889-CC MS60 NGC. Variety 1-A. Coining operations at the Carson City Mint resumed on October 1, 1889, having been on hiatus since March 1885. During the final three months of the year, the facility managed a production of 30,945 double eagles. In 2003, Rusty Goe estimated a general survivorship of 3.5% to 4% of the original mintage, including 175 to 195 examples in Uncirculated condition. Nearly a decade and a half later, that estimate still seems about right based on the certification totals at NGC and PCGS.

The stars are nearly fully brought-up and the hair strands are crisply rendered. Design detail on the eagle's feathers is similarly bold. This green-gold Mint State double eagle offers frosty luster over surfaces that show a predictable number of abrasions, including a prominent mark that runs down Liberty's cheek. Census: 25 in 60 (1 in 60+), 42 finer (2/17). NGC ID# 26BV, PCGS# 9011

1890-CC Double Eagle, AU55
Original Coloration

16053 1890-CC AU55 NGC. Variety 1-A. The advanced die state of this Choice AU 1890-CC twenty shows lapping on the eagle's tailfeathers as well as a peripheral die crack that nearly circumnavigates the reverse. Luster remains in the protected regions of the fields, while the lightly worn areas have medium olive-gold patina. Scattered abrasions are consistent with the grade. NGC ID# 26BY, PCGS# 9014

1890-CC Double Eagle, AU55
Variety 1-A

16054 1890-CC AU55 NGC. Variety 1-A. Here is a remarkable situation where a high mintage, in this case 91,209, fails to correlate with the number of varieties known, just one currently identified. Others may be located with additional study. This pleasing Choice AU example has pleasing light yellow surfaces with faint hairlines and trivial marks. An excellent example for the grade. NGC ID# 26BY, PCGS# 9014

1890-CC Variety 1-A Twenty, AU55
Cracked Reverse Die

16055 1890-CC AU55 NGC. Variety 1-A. The reverse die has a peripheral die crack that joins that tops of all the legend letters, reaching the rim below RS in the denomination. This lovely Choice AU Carson City double eagle is an exceptional type coin with pleasing light yellow surfaces and frosty mint luster. NGC ID# 26BY, PCGS# 9014

1890-CC Twenty Dollar, AU55
Collectible Carson City Gold

16056 1890-CC AU55 PCGS. *Variety 1-A*. Lapped tailfeathers suggest a late state of the dies, confirmed by fine die cracks that encircle the top of the reverse legend. Mint luster remains in protected areas throughout both sides of this moderately abraded, Choice About Uncirculated twenty. Faint reddish-gold accents visit the yellow-gold surfaces, which display sharp definition on the motifs. NGC ID# 26BY, PCGS# 9014

1890-CC Twenty Dollar, AU58
Rich Original Color

16057 1890-CC AU58 NGC. *Variety 1-A*. This near-Mint coin has a die crack around much of the reverse periphery atop the border legends, but the eagle's tailfeathers are not yet heavily lapped. Rich orange-gold coloration shows some deeper coppery patches at the reverse border. The fields are lustrous, and there are no major abrasions. NGC ID# 26BY, PCGS# 9014

1890-CC Liberty Double Eagle, MS61
Popular Branch Mint Type Coin

16058 1890-CC MS61 PCGS. *Variety 1-A*. The 1890-CC Liberty double eagle is one of the more available issues of the Carson City Mint series, from a fairly substantial mintage of 91,209 pieces. A number of coins were used to settle accounts in foreign trade and many examples have been recovered from European sources over the years. A small hoard surfaced in the mid-1990's to further augment the supply of collectible specimens. All these factors make the 1890-CC a favorite choice of branch mint type collectors.

The present coin is an impressive Mint State specimen, with vibrant mint luster and pleasing orange-gold surfaces that are lightly marked for the grade. The design elements are sharply detailed in most areas, but the eagle's tail feathers on the left were shallowly impressed on the die, making this area weak on all examples seen. Overall eye appeal is quite strong.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 26BY, PCGS# 9014

1891 Twenty Dollar, AU58
Fewer Than 100 Pieces Believed Known
Major Philadelphia Rarity

16059 1891 AU58 PCGS Secure. The 1891 is among the greatest Philadelphia Mint rarities in the Liberty double eagle series. It boasts the seventh-lowest mintage of any mint from 1850 to 1907, with all six lower-mintage dates being the rare or nonexistent Philadelphia issues of the 1880s. The 1891 was struck to the limited extent of 1,390 coins and is one of the final very low-mintage dates in the series.

Only about 100 examples of this date survive in all grades, and Mint State examples are extremely rare. In their gold *Encyclopedia*, Garrett and Guth write: "Many of the important collections of previous generations did not have a circulation-strike example of the 1891 double eagle." Since 1993, we have handled an 1891 double eagle on only 38 occasions, including some coins that were offered multiple times.

A common characteristic of the 1891 twenty, whether circulated or Mint State, is moderate to heavy surface abrasions. Most examples of the issue known today survived by chance rather than via numismatic collections, resulting in the coins showing the abuse of circulation. The present example, a near-Mint coin with sharp motifs and satiny straw-gold luster, is an exception; no heavy abrasions are observed, and only light, scattered hairlines appear beneath a loupe to accompany trivial high-point friction. The fields offer a hint of reflectivity when tilted beneath a light.

The last PCGS coin that we handled in this grade was lot 5734 in our August 2014 ANA Signature sale, which realized \$52,875. The present coin is visually finer, and at least worthy of an equally strong bid. An excellent opportunity for the patient collector to acquire this rare and challenging Philadelphia issue. Population: 9 in 58, 6 finer (2/17). NGC ID# 26C2, PCGS# 9016

1891-CC Double Eagle, AU Details
Only 5,000 Pieces Struck

- 16060** 1891-CC — Cleaning — PCGS Genuine. AU Details. Variety 1-A. The 1891-CC is a better date in the Carson City short set, boasting a mintage of only 5,000 coins — only the rare 1870-CC has a smaller mintage. Many 1891-CC coins were shipped overseas in the foreign trade and stored for decades in bank vaults, and these pieces account for the bulk of the surviving population today. The present coin is sharply struck and displays some luster. Lightly hairlined surfaces denote a light cleaning that makes this piece more affordable than an AU-level coin otherwise would be. *From The R. Thayer Sheets Yorktown Collection.*

1892-CC Twenty, AU58
Variety 1-A

- 16063** 1892-CC AU58 NGC. Variety 1-A. This single die pair was used to produce 27,265 Carson City Mint double eagles in 1892, a mintage quantity that is consistent with just one known variety. This sharply defined example has frosty yellow mint luster with scattered marks as expected at the grade level. NGC ID# 26C6, PCGS# 9020

1892-CC Double Eagle, AU58
Wholly Original

- 16064** 1892-CC AU58 PCGS. CAC. Variety 1-A. The average certified 1892-CC twenty dollar gold piece grades fractionally higher than AU53, confirming that most of the 27,265 coins struck were dispersed into Western circulation. This wholly original, olive-gold representative shows the slightest trace of friction when examined closely. The stars, curls, and feathers exhibit crisp definition, and the eye appeal is terrific. NGC ID# 26C6, PCGS# 9020

1892-CC Twenty Dollar, AU55
Reflective Fields

- 16061** 1892-CC AU55 PCGS. Variety 1-A. The 1892-CC is a slightly better date with a mintage of only 27,265 pieces, and high-grade examples are scarce. This Choice AU representative displays bold design elements and deeply mirrored fields that are slightly mellowed by light rub, consistent with the grade. There are no major abrasions, and the overall eye appeal is outstanding. *From The R. Thayer Sheets Yorktown Collection.* NGC ID# 26C6, PCGS# 9020

1892-CC Twenty Dollar, AU55
Scarce in High Grades With Original Color

- 16062** 1892-CC AU55 PCGS. CAC. Variety 1-A. Glimmers of mint luster emerge from the recesses of this attractive khaki-gold Carson City dollar. Stars 1 through 7 are flat, but the other stars, curls, and feathers are well-struck with slight blending. This late-date issue was manufactured to the extent of 27,265 coins. The vast majority either circulated stateside or were exported overseas. High-grade survivors are scarce, especially with original surfaces. CAC: 5 in 55, 26 finer (2/17). NGC ID# 26C6, PCGS# 9020

1892-CC Double Eagle, MS61
Lustrous and Pleasing for the Grade

16065 1892-CC MS61 PCGS. Variety 1-A. As one of the later Carson City issues that was exported in the foreign trade, the 1892-CC double eagle is more collectible in high grade than its small mintage of 27,265 pieces suggests. Nonetheless, Uncirculated coins are elusive, and those grading finer than MS61 are particularly scarce. This piece displays a sharp strike with vibrant cartwheel luster and frosty fields. Hints of greenish color appear throughout each side. Scattered abrasions determine the grade, although individually significant marks are at a minimum. Quite an appealing 1892-CC twenty for the grade, particularly if an old-time patina is sought. NGC ID# 26C6, PCGS# 9020

1892-CC Twenty Dollar, MS61
Scarce Late-Date CC Example

16066 1892-CC MS61 PCGS. Variety 1-A. Few 1892-CC double eagles (27,265 coins minted) survive in Uncirculated condition. Estimates vary from 180 pieces to 250 coins in MS60 or higher. Those that avoided domestic circulation were likely exported abroad from San Francisco or set aside after August G. Heaton published his treatise on mintmarks the following year, stimulating interest in that area of collecting.

This lustrous MS61 twenty dollar gold piece displays a good strike, particularly over the centers. Several obverse stars exhibit a touch of inconsequential softness. A greenish cast complements orange and rose-gold surfaces. Lightly scattered bagmarks appear throughout. NGC ID# 26C6, PCGS# 9020

1892-CC Liberty Twenty, MS61
Vivid Color, Vibrant Luster

16067 1892-CC MS61 NGC. **Variety 1-A.** From a mintage of 27,265 pieces, the 1892-CC Liberty double eagle is a surprisingly available issue, with a surviving population of 800-900 examples in all grades. A number of specimens surfaced in several small hoards in the late 1990's, augmenting the previously meager supply. The 1892-CC is seen most often in the XF-AU grade range and Mint State examples are scarce.

The present coin is an impressive MS61 specimen, with sharply detailed design elements on both sides. The pleasing orange-gold surfaces show a few highlights of green, with a mix of vibrant mint luster and some prooflike reflectivity in sheltered areas. The expected number of grade-consistent, minor contact marks are evident and eye appeal is strong for the grade. Census: 85 in 61 (1 in 61★), 47 finer (2/17). NGC ID# 26C6, PCGS# 9020

1893-CC Double Eagle, AU53
Partially Lustrous Orange-Gold Surfaces

16068 1893-CC AU53 NGC. CAC. **Variety 2-A.** Despite the small mintage of 18,402 coins, the 1893-CC double eagle was struck with two different obverse dies, creating two varieties for the issue. This AU coin shows the date further left than on Variety 1-A. Luster remains in the fields amid rich orange-gold patina, and the devices are well-defined. The surfaces are smoother than expected for the grade. NGC ID# 26C9, PCGS# 9023

1893-CC Double Eagle, Khaki-Gold AU53

16069 1893-CC AU53 PCGS. CAC. **Variety 1-A.** The 8 is centered below the B in JBL. This is an early die state example without the usual cracks through the date and (S)TAT(ES). The 1893-CC is sought-after as the final emission from the Nevada branch mint. Only 18,402 double eagles were struck before the facility shut down on June 1, 1893. This minimally circulated twenty boasts readily appealing khaki-gold coloration with partial luster remaining. Sharply struck and devoid of obtrusive abrasions. NGC ID# 26C9, PCGS# 9023

1893-CC Liberty Double Eagle, MS61
Final-Year Branch Mint Type Coin

16070 1893-CC MS61 PCGS. CAC. Variety 2-A. A small mintage of 18,402 Liberty double eagles was accomplished at the Carson City Mint in 1893, the last year of coinage operations at the famous Western facility. Fortunately, the 1893-CC is much easier to locate than this small production total suggests, and the issue is surprisingly available in Mint State. Accordingly, the 1893-CC is a popular choice of branch mint type collectors seeking an example of the Type Three design.

The present coin is an attractive MS61 example, with sharply detailed design elements and vivid orange-gold surfaces that show a few hints of crimson and the expected number of minor contact marks for the grade. Vibrant mint luster adds to the considerable visual appeal. NGC ID# 26C9, PCGS# 9023

1893-CC Twenty Dollar, MS62
Vibrant Mint Luster

16071 1893-CC MS62 PCGS. Variety 2-A. Radiant cartwheel luster characterizes this undeniably Mint State 1893-CC double eagle. The strike is sharp, and a few small coppery alloy spots on the obverse portrait attest to the originality of the surfaces. Scattered abrasions on the obverse limit the grade, although none are individually bothersome. In fact, eye appeal exceeds expectations for the MS62 level. The 1893-CC is the final Carson City issue of this denomination, and attractive Uncirculated examples are in high demand. PCGS reports 23 representatives that are numerically finer than the present (2/17), although even in MS62 the 1893-CC is a scarce issue.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 26C9, PCGS# 9023

1895-S Twenty Dollar, MS64+
Remarkably Clean Orange-Gold Surfaces

16072 1895-S MS64+ PCGS. The 1895-S Liberty Head double eagle is collectible in MS64 and conditionally rare in MS65. This MS64+ offering straddles that line, presenting the discerning, budget-aware collector with an opportunity to obtain one of the finer known examples of this issue at a reasonable cost. Each side undoubtedly has the look of a Gem, with remarkably few ticks for a large gold coin. The strike is strong over the centers, but the stars are moderately soft. PCGS has seen nine finer submissions (2/17). NGC ID# 26CE, PCGS# 9028

1897-S Double Eagle, MS65
Rarely Seen So Fine

16073 1897-S MS65 PCGS. The 1897-S double eagle is an available date through MS64, but at the Gem level it becomes a major condition rarity. PCGS has seen only a dozen submissions in Gem condition, and only three finer coins are reported by PCGS and NGC combined (2/17). This is the sort of coin that collectors of high-end double eagles will only encounter once or twice a year at auction. Since 1993, we have handled just 16 Gem-graded examples and none finer. The strike is sharp, and each side displays vibrant, frosty yellow-gold mint luster with no major abrasions — a few marks on Liberty's cheek are all that limit this coin's potential. Population: 12 in 65 (1 in 65+), 2 finer (2/17). NGC ID# 26CJ, PCGS# 9032

1905 Double Eagle, MS64
Extremely Rare So Fine
Only One Coin Known Finer

16074 1905 MS64 PCGS. 30th Anniversary Green Label Holder. Boasting a mintage of only 58,919 pieces, the 1905 double eagle is among the scarcer 20th century issues in the series in high grade. In fact, the issue is a major rarity above MS63 and is nearly unknown in Gem condition. Since 1993, we have offered only three 1905 twenties in MS64, the last in December 2014, where a Plus-graded NGC coin garnered nearly \$25,000. The price record for this issue is held by the lone MS65, an NGC coin that realized more than \$57,000 when we auctioned it in 2008. It has not been seen at auction since, and the present PCGS example is only the third near-Gem that has been offered in the past nine years. The rarity of the 1905 double eagle in this condition cannot be overemphasized.

This coin displays frosty yellow-gold luster and exceptional surface preservation. Were it not for a few faint lines on Liberty's cheek, a Gem designation might have been achieved. Even so, the quality and eye appeal of this coin make it one of the highlights of this sale. The surfaces display luminous mint luster that the viewer's eye finds pleasing to look upon. As stated, there are none finer at PCGS and only one at NGC (2/17). NGC ID# 26D2, PCGS# 9047

1906-S Double Eagle, MS64+
Extremely Rare in Better Condition

16075 1906-S MS64+ PCGS. CAC. The San Francisco branch mint coined more than 2 million double eagles the same year the city was ravaged by a devastating earthquake. Examples of the 1906-S are readily accessible through MS63 and even MS64, but that's where the issue's collectibility stops. Gems are extremely rare. This clean, pinpoint-sharp twenty approaches that level of quality. Frosty, honey-gold surfaces are eminently appealing. There are five finer pieces at PCGS (2/17). NGC ID# 26F6, PCGS# 9051

HIGH RELIEF DOUBLE EAGLES

1907 High Relief Double Eagle, AU53 Details

16076 1907 High Relief, Wire Rim — Tooled, Polished — ANACS. AU53 Details. Some noticeable repair has occurred near the base of the reverse and the coin exhibits a brightly polished appearance. It was probably a jewelry piece for some time. Still, an affordable example of this ever-popular issue.

Ex: *Dallas Signature Auction (Heritage, 12/2005)*, lot 1881. NGC ID# 26F2, PCGS# 9135

1907 High Relief, Wire Rim Twenty, MS62
Reddish Tinted Surfaces

16077 1907 High Relief, Wire Rim MS62 PCGS. CAC. Irrespective of grade, the three-dimensionality of the High Relief twenty is evident in all grades, even VF and XF. The sculptural quality is certainly unaffected at the MS62 level. The only difference between this coin and a much higher graded piece is the presence of a few randomly placed abrasions in the dished fields and raised devices. The most noticeable one is a vertical scrape in the right obverse field. Otherwise, the strike is full throughout and the wire rim is complete around the reverse and almost so on the obverse. Rich reddish patina is seen over both sides. NGC ID# 26F2, PCGS# 9135

1907 Saint-Gaudens Double Eagle, AU58
High Relief, Flat Rim

16078 1907 High Relief, Flat Rim, AU58 PCGS. Augustus Saint-Gaudens' MCMVII High Relief double eagle is justly regarded as the most beautiful regular-issue U.S. coin. This iconic issue claims a limited mintage of 12,367 pieces, and about 70% of those coins were of the Wire Rim variety, with a thin fin of metal around the edge of the coin. This feature, caused by the extrusion of metal through the tiny gap between the collar and the die when the coin was struck, was considered undesirable at the time. Mint personnel worked hard to eliminate it by making slight changes in the dimensions of the planchet and modifying the upset angle slightly. By mid-December, the technicians had perfected their technique and the offending fin of metal was eliminated. Flat Rim High Reliefs were struck during the last few weeks of the year.

A trace of wear on the high points of Liberty's knee and breast, and on the top edge of the eagle's front wing, are sufficient to keep this specimen just barely out of the Mint State category. This pleasing near-Mint piece shows the sharply detailed design elements expected of a High Relief, with the scarcer Flat Rim of the coins struck after December 16. A fine scratch is visible in the left obverse field. Still an attractive example with pleasing satin yellow surfaces.

Ex: John Stimson, Sr. Collection, Part One (Heritage, 1/2008), lot 4977, which realized \$12,650.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 26F2, PCGS# 9136

MCMVII Flat Rim High Relief Twenty, MS64

16079 1907 High Relief, Flat Rim, MS64 PCGS. No American gold type is as internationally celebrated as the High Relief. Only the iron will of President Theodore Roosevelt could have been behind such an impractical issue. But before any bankers could complain that the coins would not stack, speculators removed most of the mintage of 12,367 pieces from commerce. However, most are not as nice as the present near-Gem, which has comprehensive satin luster and an unabraded appearance. The strike is complete and the eye appeal is magnificent. A highlight of nearly any gold type collection.
Ex: Baltimore Signature (Heritage, 3/2009), lot 3359. NGC ID# 26F2, PCGS# 9136

SAINT-GAUDENS DOUBLE EAGLES

1907 Saint-Gaudens Twenty, MS66
 Arabic Numerals, Vivid Coloration

16080 1907 Arabic Numerals MS66 PCGS. The smooth surfaces of this satiny Premium Gem radiate a stunning display of colors ranging from lemon-gold to fire-orange with nuances of lilac for impressive eye appeal. Minted in large quantity using Charles Barber's "low relief" Saint-Gaudens design, the 1907 Arabic Numerals twenty is always in demand for its high-quality strike and first-year No Motto status. PCGS reports just 18 pieces in a finer numeric grade. NGC ID# 26F5, PCGS# 9141

1908-D Twenty Dollar, MS65+
 With Motto Variant

16081 1908-D Motto MS65+ PCGS. Long Rays. All With Motto 1908-D twenties were struck from the Long Rays hub. This is a softly frosted example that exhibits even yellow-tinted gold color and shows very few abrasions. The strike details are strong overall. Of special note is the detail on the window panes of the Capitol building. The only area of softness is on the nose of Liberty. A high-end example of this briefly minted variant from the second year of production. NGC ID# 26F9, PCGS# 9148

1908-S Saint-Gaudens Double Eagle, MS66 Low-Mintage Condition Rarity

16082 1908-S MS66 NGC. The 22,000-piece mintage of the 1908-S is one of the lowest in the entire Saint-Gaudens double eagle series, trailing only the Ultra High Relief and High Relief. It is the lowest mintage of any With Motto Saint-Gaudens double eagle. As with many San Francisco dates, a surprisingly large number of coins entered the channels of commerce. Of the 1,050 or so pieces certified by NGC and PCGS, the vast majority (66%) are in circulated grades.

While the 1908-S is challenging in terms of the absolute numbers available, a fair number are seen in Mint State, especially the lower levels thereof. Approximately 225 pieces have been certified in the MS60 to MS62 grade range, and even Select and near-Gem specimens total about 90 coins. Gem-quality examples (MS65 to MS67), however, account for just 43 coins among the certified population (2/17). Of course, a number of these figures may represent resubmitted coins.

High-end Mint State examples of this issue are popular among gold collectors because of their strong visual appeal. The 1908-S is generally known to have especially thick mint frost and rich coloration. The current Premium Gem offering fits this profile perfectly. Its frosted surfaces yield pleasing luster and honey-gold patina tinted with subtle mint-green, rose, and apricot. In addition, a well-executed strike leaves virtually complete delineation on the design elements.

Crispness shows on the panes of the Capitol building, for example, as well as on Liberty's facial features, fingers, toes, and gown lines, and on the eagle's plumage. A couple of faint marks on Liberty's breast and one in the upper part of the eagle's left wing are mentioned solely for identification purposes, as they do not detract in the least from the impeccably preserved surfaces. It may be some time before one might again encounter a 1908-S twenty with the technical quality and aesthetic appeal of this Premium Gem specimen. Census: 5 in 66, 1 finer (2/17).

Ex: Long Beach Signature (Heritage, 5/2009), lot 2011. NGC ID# 26FA, PCGS# 9149

1909 Twenty Dollar, MS64
Rare Any Finer

16083 1909 MS64 PCGS. The strike is crisp on the Capitol, torch hand, and the eagle's breast and talons. Swirling frost over pale wheat-gold surfaces generates terrific eye appeal, enhanced by the lack of overt distractions in the fields. The 1909 is a somewhat challenging early date in the Saint-Gaudens double eagle series. PCGS lists 29 finer submissions (3/17). NGC ID# 26FC, PCGS# 9150

1909 Twenty Dollar, MS64
Elusive Early Date in the Series

16084 1909 MS64 PCGS. The 1909 is a moderately better date in Uncirculated grades. Collectors will have significant difficulty locating and acquiring an example finer than the Choice representative offered here. Minimally marked, wheat-gold surfaces emit vibrant, frosty luster. The fingers on the torch hand and columns on the Capitol building are boldly delineated. PCGS reports 29 finer grading events (2/17). NGC ID# 26FC, PCGS# 9150

1909-D Saint-Gaudens Twenty, MS64
Scarce Early Mintmarked Issue

16085 1909-D MS64 PCGS. With a mintage of 52,500 coins, the 1909-D ranks 4th in production and 14th in survival among the Saint-Gaudens double eagles according to Roger Burdette's recent research. Just 1,200 pieces are thought to survive in all grades — a small number for the legions of collectors attracted to the series and its mintmarked scarcities. This example displays a repunched mintmark — apparently, not as scarce as once thought, but interesting nonetheless. The present near-Gem coin is a sharply struck with lustrous and satiny mellow-gold surfaces interrupted by remarkably few marks and minor abrasions. There are only 24 numerically finer pieces recorded by PCGS (2/17).
Ex: *Palm Beach Signature* (Heritage, 11/2004), lot 9008. NGC ID# 26FD, PCGS# 9152

1909-D Saint-Gaudens Twenty, MS64
Low-Mintage Issue

16086 1909-D MS64 PCGS. Repunched mintmark. Only the 1908-S, 1913-S, and the High Relief have a lower mintage than the 1909-D. Just 52,500 pieces were struck, and virtually all of the mintage was exported to either Central and South America or to European holdings. At least two mint-sealed bags returned from South America, yielding most of the Mint State survivors known today. This near-Gem example shows a few light marks from transport, yet the coin retains its frosty Mint-fresh luster and gleaming rich-gold color. A sharp strike covers both sides. PCGS reports just 24 numerically finer examples (2/17). NGC ID# 26FD, PCGS# 9152

1910-S Double Eagle
Impressive Gem

16087 1910-S MS65 PCGS. A lustrous apricot-gold Gem with beautifully undisturbed fields and devices. Nicely struck, although not every pane of the Capitol building is brought up by the dies. The 1910-S is generally found in bagmarked AU and low-end Mint State grades. MS65 examples without significant marks and an above-average strike are few and far between. PCGS lists just nine coins in a numerically finer grade (2/17).
Ex: *Dallas Signature* (Heritage, 12/2005), lot 1932. NGC ID# 26FH, PCGS# 9156

1911 Saint-Gaudens Twenty, MS64+
Smooth, Frosted Surfaces

16088 1911 MS64+ PCGS. It is entirely possible, likely even, that this marvelously preserved near-Gem was exported overseas to Europe or South America, and later repatriated. Smooth, frosted surfaces show the absolute minimal number of marks for the grade. Rose-gold hues color each side, and the devices are nearly fully struck. The 1911 is very scarce in higher grades, and this MS64+ would fit well into any Gem set. NGC ID# 26FK, PCGS# 9157

1911-S Twenty Dollar, MS66
Very Scarce in High Grades

16089 1911-S MS66 PCGS. Most of the mintage of 757,580 pieces of 1911-S twenties were struck in February and March 1911, with lesser quantities produced in September and December. From this mintage, approximately 450,000 coins were shipped to Europe and 250,000 went to Central America (some say El Salvador). In spite of the large numbers exported and later repatriated, the 1911-S is very scarce in MS66, indicating the hoard coins were roughly handled while abroad. This is an exceptionally pleasing example with smooth, virtually unabraded surfaces. The mint luster is frosted and both sides exhibit rich orange-gold color and a complete strike. Population: 42 in 66 (2 in 66+), 1 finer (2/17). NGC ID# 26FL, PCGS# 9159

1913-S Twenty Dollar, MS64
Rarely Seen Finer

16090 1913-S MS64 PCGS. The 1913-S is always a popular collector issue because of its impressively low mintage of only 34,000 pieces. For a coin with such a limited production run, it is surprisingly available in the lower grades of Mint State; however, near-Gems such as this piece are infrequently offered. Sharply defined throughout, the current coin is more satiny than frosty with only a few light abrasions. Smooth luster reveals variegated toning ranging from rich, apricot-gold coloration to whispers of light green with bright-orange accents. The design elements are generally well struck, although the Capitol Building exhibits a drooping dome. PCGS reports a mere 24 numerically finer specimens (2/17). Ex: ANA Signature (Heritage, 7/2005), lot 7837. NGC ID# 26FR, PCGS# 9163

1914 Double Eagle, MS64+
Rare Any Finer

16091 1914 MS64+ PCGS. A 91% drop in the number of coins certified at PCGS from MS64 to MS65 speaks to the conditional rarity of the 1914 in full Gem condition. This MS64+ Saint-Gaudens double eagle approaches that rarified level, falling just short with scattered marks hidden within the confines of Liberty's drapery. A well-struck, honey-gold example with clean fields. PCGS reports 43 finer representatives (2/17). NGC ID# 26FS, PCGS# 9164

1915 Double Eagle, High-End MS64+

16092 1915 MS64+ PCGS. CAC. This is an optimal example for the collector concerned with quality and affordability, as full Gems regularly achieve five-figure sums at auction. This high-end MS64+ has a few too many well-concealed ticks for an MS65 assessment, though it definitely has the look of a better-graded coin. The strike is sharp, and rose-gold centers are surrounded by deeper shades of honey-gold around the borders. Frosty and attractive. NGC ID# 26FV, PCGS# 9167

1915-S Twenty Dollar, MS66
None Finer at PCGS

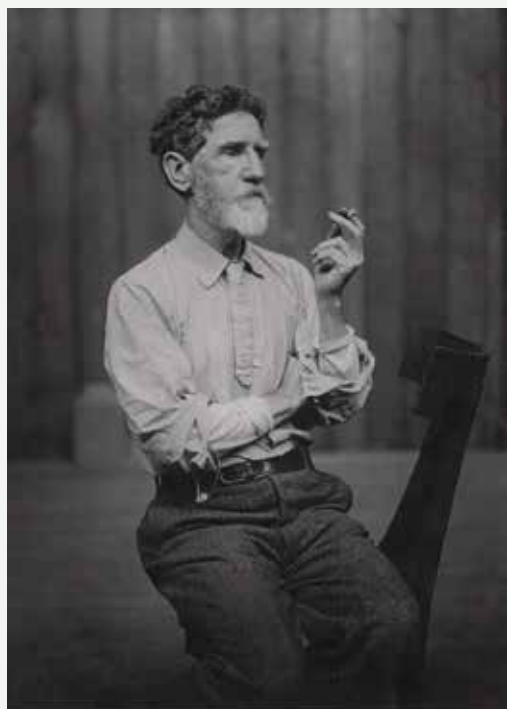

16093 1915-S MS66 PCGS. This is a remarkably well-preserved example, showing satiny rose-gold luster with clean fields and no major marks on the devices — a contact point on Liberty's forehead is the only mentionable fault. Eye appeal excels. The 1915-S Saint is occasionally seen in this grade, but none are numerically finer at PCGS (2/17). NGC ID# 26FW, PCGS# 9168

1922 Saint-Gaudens Twenty, MS65+
Condition Rarity in Finer Grades

16094 1922 MS65+ PCGS. Most surviving 1922 Saint-Gaudens double eagles were shipped overseas and show the effects of transfer and rough storage. The issue is very rare above the MS65 grade level. This Plus-Graded Gem exhibits well-detailed design elements and virtually pristine orange-gold surfaces, with satiny mint luster on both sides. Overall eye appeal is quite strong. PCGS has graded eight numerically finer examples (2/17). NGC ID# 26G3, PCGS# 9173

1922 Twenty Dollar, MS65+
Exceptional Eye Appeal

16095 1922 MS65+ PCGS. CAC. Ex: Cherny Collection. Variegated toning alternates between lilac, lemon-gold, and rich orange-gold shades, producing the tremendous eye appeal seen throughout this Gem Saint. The surfaces show few marks of any kind, while the strike is uniformly sharp. Only slight flattening of the torch bands is noted. CAC endorsed for quality and eye appeal. The 1922 is scarce this nice and rare any finer despite a mintage of more than 1.3 million pieces. PCGS reports just eight finer coins (2/17). NGC ID# 26G3, PCGS# 9173

1922-S Double Eagle, MS64
Storied Melt Rarity

16096 1922-S MS64 PCGS. This frosty, sharply struck example adequately illustrates why the 1922-S is among the more attractive Saint-Gaudens Double Eagles from the 1920s. It displays vibrant rich-gold coloration with a golden-rose sheen that enhances the already impressive eye appeal. This is a minimally abraded survivor of an issue that was once ranked among the rarest 20th century double eagles when nearly the entire 2.6 million-piece mintage was melted in the 1930s. That was before several hoards were discovered in Europe and Central America from the 1950s through the early 1980s. Roger Burdette estimates 2,100 pieces now survive, although most are in lesser Mint State grades. The 1922-S remains scarce as a near-Gem and definitively rare any finer. PCGS has certified just 20 pieces in a finer numeric grade (2/17). Ex: Long Beach Signature (Heritage, 2/2003), lot 8638. NGC ID# 26G4, PCGS# 9174

**1923-D Saint-Gaudens Twenty, MS66+
Exceptional Visual Appeal**

16097 1923-D MS66+ PCGS. CAC. Known for its often outstanding visual appeal, the 1923-D Saint-Gaudens double eagle is a favorite among type collectors. This Plus-designated, CAC-approved Premium Gem yields radiant, unblemished wheat-gold luster and boldly rendered design elements. The fields are virtually pristine, and a few light contact marks on Liberty's raised knee appear to be all that limit the grade. Finer 1923-D double eagles are scarce. NGC ID# 26G6, PCGS# 9176

**1924 Saint-Gaudens Twenty, MS67
Superb Representative of the Type**

16098 1924 MS67 PCGS. Imbued with frosty radiance and virtually free of marks, this Superb Gem twenty will be the centerpiece of any high-grade double eagle or type collection. Mint luster pours over the sharply struck, honey-gold surfaces. The Superb Gem category is reserved for only the most exceptional examples of the Saint-Gaudens double eagles, and although the 1924 is the most-available date in the series, the MS67 level is rarely achieved. PCGS and NGC combined report more than 611,000 grading events for the issue, with only 290 pieces that grade MS67 or finer. PCGS has seen only one numerically finer piece. PCGS population: 100 in 67 (2 in 67+), 1 finer (2/17). NGC ID# 26G7, PCGS# 9177

**1924-D Saint-Gaudens Twenty, MS64
Rarely Seen in Finer Grades**

16099 1924-D MS64 PCGS. From a substantial mintage of more than three million pieces, the 1924-D Saint-Gaudens double eagle has always been an elusive issue. Most of the coins were held in Mint vaults or Federal Reserve Banks until the Gold Recall of 1933, and subsequently melted into gold bars for storage at Fort Knox. Some coins were sent to the New York Assay Office and used for international payments. Comparatively few reached circulation in this country and the issue was believed to be quite rare in the 1940s. Fortunately, some of the exported coins were returned to this country, beginning about 1950, and the supply has been considerably augmented since then. The 1924-D is still scarce in MS64 condition, and very rare in finer grades.

The coin offered here is an attractive Choice specimen, with sharply detailed design elements and vibrant mint luster throughout. The well-preserved orange-gold surfaces display some highlights of red, with no flaws that merit individual mention. Eye appeal is terrific. PCGS has graded 11 numerically finer examples (2/17). NGC ID# 34VF, PCGS# 9178

1924-S Saint-Gaudens Double Eagle, MS64
Seldom Encountered Any Finer

16100 1924-S MS64 PCGS. Despite the large mintage of 2.9 million pieces, the 1924-S Saint-Gaudens double eagle is an elusive issue in today's market, and it was once one of the most challenging dates of the series. Roger W. Burdette notes only about 250,000 examples were ever released to Federal Reserve Banks, and a much smaller number actually reached circulation in this country. Fortunately, some coins were used to settle accounts in foreign exchange and a small number have been repatriated from foreign holdings over the years. Most examples seen are in circulated or lower Mint State grades and the issue is very rare above the MS64 grade level.

The present coin is an attractive Choice example, with well-detailed design elements and well-preserved orange-gold surfaces that show only minor signs of contact. Vibrant mint luster adds to the outstanding visual appeal. PCGS has graded only six numerically finer examples (2/17). NGC ID# 26G9, PCGS# 9179

1924-S Double Eagle
Important Near-Gem Representative

16101 1924-S MS64 PCGS. Ex: Park Avenue Collection. This piece is sharply struck and fully lustrous with rich, honey-gold color that is highlighted by blaze-orange centers plus light-olive and lilac accents near the borders. The surfaces exhibit a few tiny marks that are consistent with the grade.

Today, survival estimates suggest only 1,100 or so coins exist, although at one time this date was considered to be an impossible rarity. In fact, B. Max Mehl once claimed that only three pieces were known. Walter Breen wrote that almost all known survivors were imported from French banks in the mid-1950s. Such "imports" continued in the last few decades to rank the 1924-S 13th in scarcity among the 43 series dates. It remains scarce in near-Gem condition and rare any finer. Population: 127 in 64 (8 in 64+), 6 finer (2/17).

Ex: Long Beach Signature (Heritage, 2/2007), lot 5280. NGC ID# 26G9, PCGS# 9179

**1925-D Double Eagle, MS63
Heavily Melted Issue**

16102 1925-D MS63 PCGS. The 1925-D was a victim of the mid-1930s gold melts, and many of the Mint State pieces known today can trace their origin to long-held European bank hoards. The issue is most often seen in MS63 and lower grades, with finer pieces being scarce. Soft rose and honey-gold luster blankets each side of this frosty representative, while the design elements exhibit overall sharp definition.
Ex: *PNG Invitational (Heritage, 10/2014)*, lot 5137. NGC ID# 26GB, PCGS# 9181

**1925-S Double Eagle, MS61
Branch Mint Melt Rarity**

16103 1925-S MS61 NGC. In a soon-to-be-published book on the series, Roger Burdette suggests a survival rate of 1,500 1925-S twenties, 1,200 of which survive in circulated condition to MS62. Nearly the entire production was melted, and finer Mint State coins are very scarce. Frosty S-mint luster swirls over this rose and wheat-gold twenty. Incompletely defined on the highest points. Marks are peppered over each side. NGC ID# 26GC, PCGS# 9182

**1925-S Double Eagle, MS61
Nice Color and Luster**

16104 1925-S MS61 PCGS. The 1925-S Saint-Gaudens double eagle claims a deceptively large mintage of nearly 3.8 million pieces. The great majority of this high-production issue was melted after the Gold Recall of the 1930s, and the 1925-S is scarce to rare in all grades today. Experts estimate a surviving population of 275-330 coins in all Mint State grades, with a like number extant in circulated condition. The present Mint State coin is well-struck but shows a touch of softness on the Capitol building. The pleasing greenish-gold surfaces are lightly abraded for the grade, with vibrant mint luster.
Ex: *Central States Signature (Heritage, 4/2011)*, lot 5527. NGC ID# 26GC, PCGS# 9182

**1926-D Double Eagle, MS61
Scarce in Any Mint State**

16105 1926-D MS61 NGC. Mintages of double eagles at Denver peaked in 1924 and 1925, when about 3 million pieces were coined for each of the two dates. Production was much lower in 1926, since only 481,000 twenties were struck. Most of the mintage for all three issues remained in Federal vaults, although bags of 1923-D double eagles were paid out. Prior to 1933, anyone who wanted a 1926-D could have obtained one for close to face value from the Treasury. But few numismatists could afford to collect the series, and it was only after the gold recall that interest in the denomination increased. By then, the 1926-D had proved to be among several late-date issues primarily melted by the Treasury.

Over the years, a couple of hundred pieces emerged from foreign bank holdings. Most were like the present piece, lustrous and well-struck yet somewhat abraded from bag-stored peers. This example has but few marks merit mention, including a tick on the chin and a few faded scuffs near the branch stem. Census: 14 in 61, 72 finer (2/17).

Ex: *Long Beach Signature (Heritage, 5/2009)*, lot 2068. NGC ID# 26GE, PCGS# 9184

1926-S Twenty
Lustrous, Near-Gem Example

16106 1926-S MS64 PCGS. Jeff Garrett and Ron Guth write of the 1926-S double eagle that: "The rather impressive mintage (of 2,041,500 pieces) was all but obliterated from the public's hands, though a few have turned up in overseas bank hoards." Recent research by Roger Burdette estimates a survival of about 2,000 coins, of which all but 500 pieces or so are from repatriated foreign holdings. The present frosted, near-Gem example displays pleasing greenish-gold color with lustrous olive and tan overtones, along with sharply struck design elements. Some small marks are noted on the upper reverse rim. PCGS lists only 42 examples in a numerically finer grade (2/17).

Ex: Central States Signature (Heritage, 5/2004), lot 10549; Long Beach Signature (Heritage, 2/2007), lot 5288. NGC ID# 26GF, PCGS# 9185

1929 Double Eagle, MS65
Absolute and Condition Rarity

16107 1929 MS65 PCGS. After a series of common Philadelphia Mint issues from 1922 through 1928, the 1929 double eagle begins a final string of rare dates through the end of the series in 1933. As with many of the later double eagle issues, the 1929 is challenging, not because it was a low-mintage issue (just shy of 1.8 million pieces struck), but because it achieved only limited distribution. Nearly every double eagle coined in 1929 and later years was stored in Mint or Treasury vaults until they could be melted after the 1933 gold elimination act.

Two small hoards account for many of the pieces that are on the market today. A group of 40 pieces was discovered in the 1980s in England, while a smaller accumulation of 10 pieces appeared in the early 1990s. For a date with such a low proportion of survivors, either one of these can be considered a significant event. It is not known how many examples of this date still exist today, although estimates range from a low of 60 pieces, a figure that Walter Breen called reasonable in the 1980s, to a high of nearly 1,800 pieces that was cited by Q. David Bowers. Judging by the combined certified population, the latter figure may be off by an order of magnitude; published figures suggest an extant population between 200 and 250 pieces.

This gorgeous Gem is sharply defined with immensely lustrous and frosty yellow-gold surfaces. Splashes of honey-gold on each side enhance its already considerable eye appeal. An excellent example for the grade with no individually mentionable flaws. Population: 28 in 65, 5 finer (2/17).

Ex: Long Beach Signature (Heritage, 2/2007), lot 5316; ANA Signature (Heritage, 7-8/2008), lot 2128. NGC ID# 26GL, PCGS# 9190

COMMEMORATIVE SILVER

1900 Lafayette Dollar, Nicely Toned MS65
Located Today near the Quai de Albert in Paris

16108 1900 Lafayette Dollar MS65 PCGS. DuVall 1-B. This variety is characterized by the left-leaning A in DOLLAR and the position of the leave end between the 1 and the 9 in the date. Funds to erect the statue of the Marquis de Lafayette were raised by the school children of the United States in 1899. After the Second World War the statue was moved from a location near the Tuilleries and the Louvre to the Quai de Albert, near the statue of Simon Bolivar. This is an especially lustrous Gem with much lighter centers than the golden-toned margins. NGC ID# BYKW, PCGS# 9222

1921 Alabama 2x2 Half Dollar, MS67
Very Scarce in This Lofty Grade, None Finer

16109 1921 Alabama 2x2 MS67 PCGS. According to our records we have only offered 15 other MS67 examples of this rare, key issue since 1993. With a total of 14 MS67 coins certified from both services, that suggests we have offered each Superb Gem certified and a couple more than once (like this piece). This fabulous coin appears to have been perfectly preserved over the years. There are none of the distracting blemishes that usually plague most of the survivors of this key issue. Each side is also toned in rich, variegated shades of rose, golden, and lilac, plus the coin is sharply defined in all areas. An exemplary coin and tied with only seven others as finest known.

Ex: New York Signature (Heritage, 7/2002), lot 5042. NGC ID# BYEZ, PCGS# 9225

1946-D Booker T. Washington Half, MS68
Beautiful Glowing Patina

16110 1946-D Booker T. Washington MS68 NGC. CAC. This is an outstanding, Registry-quality Booker T. Washington half with bold forest-green, lilac, and amber-red toning on the obverse and lighter lilac-gray and champagne over much of the reverse. The strike is sharp and a few trivial marks appear on the cheek, as usual. This piece is one of only nine MS68 examples seen by NGC (four MS68 ★, one MS68+), with a single MS69 ★ finer (2/17). NGC ID# BYJT, PCGS# 9405

COMMEMORATIVE GOLD

1905 Lewis and Clark Gold Dollar, MS66
Far Scarcer in High Grades Than the 1904

16111 1905 Lewis and Clark Gold Dollar MS66 PCGS. The 1905-dated Lewis and Clark gold dollars are far scarcer than their 1904 counterparts in high grades, that is MS65 and above. In fact, these coins are more than twice as rare in the finest levels of preservation. This boldly defined Premium Gem displays rich orange-gold coloration and vibrant luster. No single mark merits individual attention. Population: 86 in 66 (3 in 66+), 5 finer (2/17). NGC ID# BYLG, PCGS# 7448

1915-S Round Panama-Pacific Fifty, AU Details Classic Commemorative Key Issue

16112 1915-S Panama-Pacific 50 Dollar Round — Tooled — PCGS Genuine. AU Details The Pan-Pac fifties in round and octagonal variants represent a roadblock for most collectors wishing to complete a classic commemorative type set. The coins had small distributions of only 483 and 645 pieces, respectively, despite a mintage of 1,500 pieces for each format. The round fifties lacked the distinctive shape of the charismatic octagonal coins, and buyers resisted the original purchase price of \$100 apiece at the Panama-Pacific International Exposition in 1915.

Today, the appeal of Robert Aitken's design transcends the Pan-Pac's key-date status in the series, and the round format is highly valued for its scarcity as well as its artistry. Both formats showcase a neoclassical design of the highest merit that is unseen on most other United States coinage — as well as the heft and bulk that only Pan-Pac fifties and Gold Rush-period Assay Office slugs can offer.

The present coin, designated AU Details by PCGS, is among the few round Pan-Pac fifties that can be considered the “affordable” examples of the issue. Faint tool marks and hairlines in the fields accompany unnaturally bright luster, preventing a numeric grade, although the coin is still quite pleasing to the eye. A few tiny ticks on the obverse serve as pedigree markers. The coin retains its luminous, sun-gold color and the rims appear perfect, although the edges are engulfed in the holder. Without question, this is a lot of coin for the assigned grade and an opportunity for the astute bidder.

MODERN BULLION COINS

1987 Half-Ounce Gold Eagle, MS70 Very Seldom Encountered

16113 1987 Half-Ounce Gold Eagle MS70 NGC. A sizeable mintage of 131,255 pieces was struck of the half-ounce Gold Eagles in 1987, but in business strike format there are remarkably few that have achieved an MS70 grade. NGC has only certified 45 pieces in the ultimate grade. This example is everything one would expect, summed up in one word, perfection. Even yellow-gold color with no annoying imperfections of any kind. NGC ID# 26N8, PCGS# 9812

1992 Quarter-Ounce Gold Eagle, MS70 Only 15 Pieces This Fine at PCGS

16114 1992 Quarter-Ounce Gold Eagle MS70 PCGS. With a mintage of 59,546 pieces, the 1992 quarter-ounce Gold Eagle is the first issue in the bullion series produced with Arabic numerals in the date. Fewer than 70 pieces are certified in perfect MS70 condition, and of these, only 15 are PCGS-certified (2/17). This example is fully struck and showcases bright yellow-gold luster. NGC ID# 26M8, PCGS# 9860

1995 Quarter-Ounce Gold Eagle, MS70 Elusive Modern Issue in This Grade

16115 1995 Quarter-Ounce Gold Eagle MS70 NGC. From a mintage of 83,752 pieces, the 1995 quarter-ounce Gold Eagle is surprisingly difficult to locate in MS70 condition. This magnificent specimen exhibits razor-sharp definition on all design elements, doing full justice to Augustus Saint-Gaudens' iconic obverse design and Miley Busick's exceptional reverse. The butter-gold surfaces are technically perfect and radiate vibrant mint luster on both sides, with incredible eye appeal. Census: 41 in 70 (2/17). NGC ID# 26MB, PCGS# 9890

2009 Ultra High Relief Twenty MS70 Prooflike, First Strike

16116 2009 Ultra High Relief, First Strike, MS70 Prooflike PCGS.

The 2009 Ultra High Relief twenty dollar gold piece is frequently available in MS70 Prooflike, although only 93 pieces are so graded in a First Strike holder. The scarcity of the First Strike designation for this grade is highly appealing to collectors of this already popular issue. The present coin displays a full strike with faint die polish lines still visible in the reflective fields. Each side offers glimmering golden surfaces with no blemishes. This issue was a fast sellout at the Mint upon its release, and demand remains strong for high-end examples. NGC ID# 26S4, PCGS# 506614 Base PCGS# 506602

TERRITORIAL GOLD

1860 Clark, Gruber & Co. Five Dollar, MS61
K-2, Outstanding Original Surfaces

16117 1860 Clark, Gruber & Co. Five Dollar MS61 PCGS. CAC. K-2, R.4. Kagin-2 is the only die variety known of the 1860 Clark, Gruber & Co. five dollar gold piece. This example is a trifle soft on the central shield and the corresponding obverse hair curls, as usual, but it is devoid of any discernible friction. Remnants of luster remain in the peripheral portions of the fields, while each side displays lovely olive-gold patina with tinges of amber-orange and peach hues. The surfaces are smooth and attractive. Listed on page 405 of the 2017 Guide Book. Population: 7 in 61, 18 finer. CAC: 2 in 61, 7 finer (2/17). NGC ID# ANJZ, PCGS# 10136

CALIFORNIA FRACTIONAL GOLD

1867 Octagonal Liberty 50 Cents, MS67
Single-Finest Certified BG-905 Specimen

16118 1867 Liberty Octagonal 50 Cents, BG-905, Low R.5, MS67 NGC. Particularly well struck and displaying gorgeous original green-gold color. The surfaces exhibit a dazzling combination of prooflike reflectivity and cartwheel luster, and just a couple of tiny pinscratches that are much too faint to decrease the assigned grade of the piece. Certainly the finest known, to date, and the only example to be graded at MS67 by either of the major services (2/17). NGC ID# 2BVZ, PCGS# 10763

COINS OF HAWAII

1883 Hawaii Half Dollar, MS66
Condition Census Example

16119 1883 Hawaii Half Dollar MS66 PCGS. CAC. Through MS64, the 1883 Hawaii half dollar is usually available, but Gem or finer coins are rare. This Premium Gem CAC coin is well within the Condition Census. The strike is sharp, and the softly frosted surfaces display blatantly original milky-gray toning with tinges of deep russet around the relief elements. There are no mentionable abrasions.

The half dollar and other silver issues of 1883 bear the portrait of King Kalakaua, who was elected to the throne in 1874 and reigned until his death in 1891. The silver coinage of 1883, produced for the Pacific island nation by the San Francisco Mint, are a numismatic window into Kalakaua's efforts to establish a growing kingdom. Rarely is an example of any denomination offered in such fine condition as the present half dollar. Population: 4 in 66 (1 in 66+), 0 finer. CAC: 5 in 66, 0 finer (2/17). NGC ID# 2C5B, PCGS# 10991

1883 Hawaii Dollar, Bold MS62
Flashy, Lightly Toned

16120 1883 Hawaii Dollar MS62 PCGS. Half a million Hawaiian dollars or "dalas" were produced at the San Francisco Mint in 1883. The average certified representative grades between XF45 and AU50. Few are seen in this state of preservation. Flashy fields show a layer of mottled olive-green and golden-orange patina that conceals most major marks. Strike definition is razor-sharp. Population: 22 in 62, 62 finer (2/17). NGC ID# 2TGD, PCGS# 10995

1886 Hawaiian Grove Ranch Token
12 1/2 Cents, Choice XF
Medcalf TE-16

16121 1886 Grove Ranch Plantation 12 1/2 Cent Token XF45 PCGS. Medcalf TE-16. A large sugar cane plantation, the Grove Ranch was located on the island of Maui, a dozen miles east of Wailuku. Rare one-bit tokens were struck in copper in 1886 and 1887, probably onsite by a blacksmith. The present deep mahogany-brown example appears nearly void of contact and carbon. It is clashed through the fraction, and shows minor incompleteness of strike on the date. Shifted double struck, evident on the stars and other elements. Listed on page 421 of the 2017 *Guide Book*. Population: 5 in 45, 9 finer (2/17).

PATTERNS

1882 Judd-1690 Liberty Nickel, PR64
Scarce Transitional Pattern

16122 1882 Liberty Head Five Cents, Judd-1690, Pollock-1892, R.5, PR64 PCGS. A popular precursor to the Liberty nickel. Dated 1882 instead of 1883, and the stars are arranged differently relative to the portrait, particularly star 10. The reverse is identical to the issued 1883 No Cents nickel. Struck in nickel with a plain edge. An intricately struck and mark-free cream-gray specimen. A few tiny flecks are noted near star 1 and the date. NGC ID# 2AKC, PCGS# 62095

1942 Experimental Cent
Brown Plastic, Possibly Mixed With Wood Pulp
Judd-2060, MS60

16123 1942 Cent, Judd-2060, Pollock-4035, Low R.7, MS60 NGC. Part of the World War II effort to divert copper from the U.S. cent, this design was tried in various unusual materials, including red fiber and Bakelite. The obverse Liberty bust right design is based on the KM-198 Columbia two centavos. The wreath and legend reverse is taken from a Baker-155 Washington medalet. Struck in brown plastic with a plain edge. Medallion Turn. Burdette's Third Reverse. The surfaces show extensive swirls over each side, apparently from the mixture of wood pulp with the plastic. At first glance this looks like damage, but closer examination shows these swirls to be a part of the coin. Deep brown patina. NGC ID# 2ANA, PCGS# 12215

INGOTS

1967 New York Assay Office Gold Ingot
Round Hallmark, 5.28 Ounces

16124 1967 New York Assay Office Gold Ingot. 5.28 Ounces. Tooled. Round Hallmark, dated 1967. NYAO silver and gold ingots are the scarcest of all ingots, and little is known about them. It is not possible to correlate the hallmark types seen on silver ingots with those found on gold ingots. No one has made a systematic study of the gold ingots. The NYAO gold ingots do exhibit their own peculiarities, such as the ingot numbering system and melt numbering system. On this piece, the ingot number is TR5550, the melt number is X18328 — quite different from the usually seen San Francisco silver ingots. The weight is seen on the right side: OZS 5.28. Fineness is seen at the top of the back side and is expressed as: FINE / 999.8. This ingot has obviously been tooled over each side, the most noticeable area is seen through NEW YORK, but light tooling is seen throughout. Still, an unusual and rare ingot for the dedicated collector. NGC ID# AL86, PCGS# 661000

1931 New York Assay Office Gold Ingot
Large Size 20.33-Ounce Ingot

16125 1931 New York Assay Office Gold Ingot. 20.33 Ounces. The New York Assay Office was opened in 1854. It is not a coincidence that 1854 was also the same year the mint opened in San Francisco. While it is difficult to imagine today, after gold was discovered in northern California in 1848 there was so much of the yellow metal extracted in the years following that a mint needed to be established in San Francisco and an assay office needed to be opened in New York. The thought behind opening the New York Assay Office was that it would relieve the pressure on the Philadelphia Mint and prepare the bullion for coinage. This was all the result of the massive influx of gold received in New York from the West Coast. A large-scale audit was conducted of the New York Assay Office in 1910. Typewritten books of that audit are known, but very rare, and are extensively illustrated with photographs. A number of the photographs of the various work areas include a rocking chair. The auditor invariably would caption the photo "Work Area With Rocking Chair" or "Storage Area With Rocking Chair." The inference being there were some significant amounts of time in the Assay Office when work was not being done. However, the New York Assay Office stayed open until 1982.

This particular ingot has a firm, round imprint of the Assay Office and is dated 1931. Below that is FINE / 999.8. The ingot number 24546 is on the top (short) side. The weight is located on the right (long) side and is expressed as OZS 20.33. The value is imprinted on the left (long) side as \$420.17. The melt number 17 is on the bottom (short) side. The back side of ingots always show a depressed area from the casting process. On this piece, it is depressed and cracked with a flaked appearance which gives the ingot visual appeal even on the back side. Bright yellow-gold color overall, as one would expect from an ingot of such high purity.

Ex: ANA Signature (Heritage, 7-8/2008), lot 2173, where it brought \$20,700. NGC ID# AL86, PCGS# 661000

WASHINGTONIA

(1790) Washington Before Boston Medal
Bronze, Original Paris Mint Dies
MS62 Brown, Baker-47B

16126 (1790) Washington Before Boston, Bronze, Original, MS62 Brown PCGS Secure. Baker-47B, Betts-542, Julian MI-1b, Musante GW-09-P1. The most famous of all Washington medals, the Washington Before Boston is ranked #2 in the Whitman *100 Greatest American Medals and Tokens* reference. The medal is part of the Comitia Americana series, and celebrates Washington's victory in the Siege of Boston. The British evacuated the major seaboard city on March 17, 1776, following an occupation of nearly a year. The present piece was struck from the original Paris Mint dies, engraved by Pierre Simon Duvivier. They can be identified by an unevenly spaced date and a die lump above the E in ADSERTORI. The obverse shows a bust of Washington, based on the 1785 Jean-Antoine Houdon statue. The reverse depicts Washington directing officers on Dorchester Heights. This chocolate-brown example has a full strike and exceptionally unmarked surfaces. Subtle carbon on the reverse field limits the grade but not the eye appeal.

End of Session Two

SESSION THREE

EARLY DOLLARS

- 16127** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2 — Plugged — Genuine PCGS. Good Details. Plugged near the ER in LIBERTY, and opposite on the tip of the right wreath stem. Those design elements have been carefully re-engraved, and both sides have a cloudy appearance from cleaning. Nonetheless, this powder-blue and almond-gold example will satisfy the budgeted early type collector.

1795 B-1, BB-21 Dollar, Fine 15
Popular Blundered Date Variety

- 16128** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, Fine 15 PCGS Secure. Richly toned golden-brown in the fields and slate-gray on the devices, this blundered date silver dollar exhibits pleasing, problem-free surfaces, save for trivial marks below the left (facing) wing.

From The Pellegrini Collection, Part IV. NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853

- 16129** 1795 Flowing Hair, Three Leaves, B-6, BB-25, R.3 — Plugged — Genuine PCGS. VG Details. Plugged and re-engraved near the RI in AMERICA, and opposite on the obverse near star 12. The obverse field and portrait show signs of smoothing, and faint graffiti is apparent below the LIB in LIBERTY. Nonetheless, this tan-gold and gunmetal-gray example will satisfy many early dollar collectors in need of the scarce B-6 marriage.

From The R. Thayer Sheets Yorktown Collection.

- 16130** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Repaired — Genuine PCGS. Fine Details. Deep sea-green and golden-brown toning encompasses this glossy Flowing Hair type coin. The right obverse field shows subtle signs of repair. No abrasions are of singular consequence.

From The R. Thayer Sheets Yorktown Collection.

- 16131** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Repaired — Genuine PCGS. Fine Details. A Flowing Hair type coin with tan-brown fields and pearl-gray devices. The field near Liberty's chin is carefully smoothed, as is a portion of her neck. Otherwise, the surfaces are evenly granular and display a few moderate marks.

From The R. Thayer Sheets Yorktown Collection.

1795 Flowing Hair Dollar, Choice Fine
Three Leaves, B-5, BB-27

- 16132** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, Fine 15 NGC. Flowing Hair dollars rank among the most popular Early American type coins. They were struck for just two years, and since the 1794 is a costly rarity, collectors typically select a 1795 example. The present Choice Fine piece has pleasing definition, especially on the eagle's left (facing) wing. The lightly granular cream-gray surfaces are surprisingly unabraded save for a small cluster of delicate thin marks on the field above the bust tip. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1795 Draped Bust Dollar, VG10
B-14, BB-51, Off-Center Bust

- 16133** 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, VG10 PCGS. Bowers Die State I. This evenly worn BB-51 example shows stark circulation-cameo surfaces with medium gray relief elements set amid interesting burgundy-brown fields. The central devices are boldly outlined with some interior detail remaining. The obverse exhibits a full rim, although the reverse border is weak from 2 to 6 o'clock. Each side is problem-free with a faint glossy texture. *From The R. Thayer Sheets Yorktown Collection.* NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

1795 Draped Bust Dollar, VF Details
B-15, BB-52, Centered Bust

16134 1795 Draped Bust, Centered, B-15, BB-52, R.2 — Repaired — PCGS Genuine. VF Details. Bowers Die State IV, with a die break in the hair near the ribbons. This is one of two Draped Bust varieties for the 1795 dollar, identified by the centered portrait. Richly toned borders show melded hues of blue and gold that lighten over the centers. Design detail is better than the grade might suggest. Adjustment marks occur over Liberty's hair, and small pock marks occur on each side. An area of smoothing appears in the right obverse field and across the portrait.
From The R. Thayer Sheets Yorktown Collection.

1798 Large Eagle Dollar, XF40
B-6, BB-96, Nice Natural Appeal

16135 1798 Large Eagle, Knob 9, 5 Vertical Lines, 10 Arrows, B-6, BB-96, R.3, XF40 PCGS. Bowers Die State II. A desirable Large Eagle variety with the Knob 9 in the date and 5 vertical lines in each shield stripe. Scarce in grades above VF, the BB-96 shows just 10 arrows with arrowheads plus two sticks. This example is struck from an early die state without visible die cracks, although the obverse was lapped. Original, dusky taupe-gray toning visits both sides with areas of lighter, silver-gray patina. Remarkably few marks exist on the well-defined surfaces — an excellent collector coin. NGC ID# 24X6, PCGS# 40011 Base PCGS# 40008

16136 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, VG10 PCGS. Bowers Die State III. A charming cream-gray example of the popular Wide Date variety. All letters in E PLURIBUS UNUM are at least partially present, and mentionable marks are limited to a thin line east of the date and a minor reverse rim knock at 9:30.

1798 B-23, BB-105 Dollar, VF30
Large Eagle, Pointed 9, Wide Date

16137 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, VF30 PCGS. Bowers Die State III. Cloud 3 and the hair curl near star 1 are lapped. The 8 touching the bust, star 13 close to the bust, and the arrowhead centered under the N are three simple diagnostics for this somewhat available variety. Problem-free, lavender-gray surfaces feature good detail on the motifs, although merging over the most exposed areas is expected. A small dig occurs in the field right below Liberty's lowest ribbon, but this piece is generally smooth. A pleasing representative of the Wide Date, Pointed 9 *Guide Book* variety. NGC ID# 24X6, PCGS# 40022 Base PCGS# 40018

1798 Large Eagle Dollar, XF45
B-23, BB-105

16138 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, XF45 NGC. Bowers-Borckardt Die State III, with a lapped obverse die affecting the first two stars and the curl beneath the E in LIBERTY. Moderate walnut-brown toning cedes to gunmetal-gray on the cheek. Glints of luster brighten protected areas of the design, and the strike is bold on the shield and E PLURIBUS UNUM. Careful inspection cannot locate any remotely mentionable marks. Ex: *Summer FUN Signature (Heritage, 7/2007)*, lot 1160.
From The Pellegrini Collection, Part IV. NGC ID# 24X6, PCGS# 40022 Base PCGS# 40018

**1798 Large Eagle Dollar, Appealing XF40
Pointed 9, 10 Arrows, B-13, BB-108**

- 16139** 1798 Large Eagle, Pointed 9, 10 Arrows, B-13, BB-108, R.2, XF40 PCGS. Bowers Die State IV. Lumplike die flaws between star 13 and the bust drapery identify the BB-108 obverse, while the 10 Arrows reverse helps confirm the attribution. Struck from a late state of the dies, when the reverse was remarried to the BB-108 obverse after an intervening mintage of the scarce BB-109 (cut short by failure of that reverse die). A pale planchet streak runs through star 9 to Liberty's forecurl, yet the eye appeal is strong for this golden-gray early dollar with traces of mint luster still in evidence beneath the attractive, medium patina. Only tiny marks exist on either side. Housed in a green label holder. NGC ID# 24X6, PCGS# 40025 Base PCGS# 40018

**1798 Large Eagle Dollar, AU50
B-13, BB-108, Pointed 9, 10 Arrows**

- 16140** 1798 Large Eagle, Pointed 9, 10 Arrows, B-13, BB-108, R.2, AU50 ANACS. Bowers Die State II. A crack travels from the rim to the right side of the L in LIBERTY. This is a somewhat accessible variety among 1798 dollars. Examples are usually seen through EF, but AU representatives like this one are offered on occasion. The stars are boldly raised, and the shield and feathers are equally well-detailed. Attractive lavender-gray patina covers each side, yielding accents of peach-gold over the highest points. Smooth with softness over UNITED. Steely mint luster remains. Housed in a small-sized holder.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 24X6, PCGS# 40025 Base PCGS# 40018

- 16141** 1798 Large Eagle, Pointed 9, B-10, BB-109, R.5 — Repaired — PCGS Genuine. XF Details. Pointed 9 in date. This is a scarce variety. The present coin shows good detail and an even strike. Both sides are harshly cleaned, and there is extensive tooling in the obverse fields. Bright silvery color yields to deep gray toning in the protected regions.

- 16142** 1798 Large Eagle, Pointed 9, Close Date, B-31, BB-115, R.4 — Cleaning — PCGS Genuine. VF Details. Bowers-Borckardt Die State I. Identified by the Pointed 9 in the date and the position of the star's ray pointing to the right side of B in PLURIBUS, the BB-115 is one of the scarcer varieties of this date. It was unknown to early researchers, like John W. Haseltine and John Colvin Randall. This lightly abraded specimen retains much interior design detail on the major devices, but the left side of the drapery is worn smooth and the surfaces have an unnatural sheen, due to a cleaning in the past.

From The R. Thayer Sheets Yorktown Collection.

- 16143** 1798 Large Eagle, Pointed 9, Close Date, B-25, BB-123, R.4 — Cleaning — Genuine PCGS. XF Details. Bowers Die State III. Light golden-brown toning visits the peripheries of this otherwise stone-gray early dollar. Both sides are slightly bright, and display patches of hairlines beneath a lens. Marks are trivial aside from a single thin diagonal line on the portrait. An interesting curly lint mark (as made) is noted above the M in UNUM.
From The R. Thayer Sheets Yorktown Collection.

**1798 Large Eagle Dollar, XF40
B-25, BB-123, Close Date**

- 16144** 1798 Large Eagle, Pointed 9, Close Date, B-25, BB-123, R.4, XF40 ANACS. Die State II, a rare early die state before the obverse cracks around the periphery but after the reverse cracks from the branch stem to the rim. This piece displays mottled gunmetal and battleship-gray patina with overtones of olive and gold. Well-struck without obvious adjustment marks, and showing light wear over the high points of the devices. NGC ID# 24X6, PCGS# 40040 Base PCGS# 40018

- 16145** 1799 Irregular Date, 13 Stars Reverse, B-13, BB-151, R.5, VF20 PCGS. Bowers Die State II. A much better die variety, readily attributed by the Irregular Date obverse and a number of die lumps within the E in STATES. A cream-gray example with hints of lilac, butter-gold, and forest-green toning. Nicely defined for the VF20 level, and only lightly abraded.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 24X7, PCGS# 40044 Base PCGS# 6880

**1799 Irregular Date Dollar, VF35
B-4, BB-153, Blundered Field Stars Reverse**

- 16146** 1799 Irregular Date, 15 Stars Reverse, B-4, BB-153, R.4, VF35 PCGS. Bowers Die State II. A scarce and popular variety, with 15 field stars entered on the reverse in error, then clouds 1 and 8 enlarged to hide the engraving blunder. On the obverse, the two 9s in the date sit at an awkward angle to each other. Bits of golden-gray toning at the borders accompany traces of mint luster around the stars and letters, with overall silver-gray surfaces that show light lines and scattered, minor abrasions. Struck from a late state of the obverse die — now shattered — with the eagle slightly weak as a result.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 24X7, PCGS# 40062 Base PCGS# 6879

- 16147** 1799 8x5 Stars, B-23, BB-159, R.3 — Improperly Cleaned — NGC Details. Fine. Bowers Die State I. This piece shows even wear and bright, gold-tinted surfaces with an area of deeper amber toning on the upper reverse. Liberty's portrait and the eagle display strong detail for the grade level. A tiny mark on Liberty's neck is the only individually mentionable abrasion.

**1799 B-23, BB-159 8x5 Stars Dollar, VF35
Important Guide Book Variety**

16148 1799 8x5 Stars, B-23, BB-159, R.3, VF35 PCGS. Bowers Die State II. Always in demand as the sole variety with the obverse stars configured eight left, five right, the BB-159 variety was either a Mint experiment or simply a die maker's mistake when an eighth star was punched into the left-hand margin. The precise spacing between each star and the careful curved alignment suggest it was not a mistake. The present Choice VF example displays lovely iridescent patina with shades of sea-green, blue, and reddish-tan toning that grace both sides of this well-centered and sharply defined dollar. A glass reveals a few light lines, but no significant abrasions or marks. Population: 6 in 35, 24 finer (2/17).

From The R. Thayer Sheets Yorktown Collection. NGC ID# 24X7, PCGS# 40063 Base PCGS# 6881

16149 1799 7x6 Stars, B-12, BB-160, R.3, VF20 NGC. Bowers Die State III. Stone-white motifs rise above charcoal-gray fields, creating the pleasant "circulation cameo" effect. Abrasions are minimal, although close inspection reveals minor hairlines. The stars above the M in UNUM exhibit blurry definition. NGC ID# 24X7, PCGS# 40051 Base PCGS# 6878

**1799 Silver Dollar, 7x6 Stars, Pleasing VF35
B-10, BB-163, Some Luster Remains**

16150 1799 7x6 Stars, B-10, BB-163, R.2, VF35 PCGS. Bowers Die State III. Tan-gold toning surrounds the raised devices with reddish-gold luster still present on both sides of this Choice VF dollar. Some light lines and tiny marks define the grade, yet the strike is strong and sharp definition remains for the VF level. The silver-gray interiors display bluish overtones for nice eye appeal. A small rim nick beneath the date involves only a couple of denticles and is inconsequential for the assigned grade.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 24X7, PCGS# 40054 Base PCGS# 6878

16151 1799 7x6 Stars, B-8, BB-165, R.3 — Cleaning — Genuine PCGS. XF Details. Bowers Die State II with a crack through the LI in LIBERTY. This stone-gray Heraldic Eagle dollar has pleasing sharpness and few marks, but the surfaces are moderately glossy from a long-ago cleaning.

From The Pellegrini Collection, Part IV.

16152 1799 7x6 Stars, B-9, BB-166, R.1 — Repaired — Genuine PCGS. XF Details. Bowers Die State IV. The "Apostrophe" variety with a die break northeast of the second S in STATES. A well-defined Heraldic Eagle silver dollar, though the right obverse field is smoothed, and the reverse has a glossy dimpled appearance.

From The R. Thayer Sheets Yorktown Collection.

**1799 B-9, BB-166 Draped Bust Dollar, XF40
Nicely Toned, Luster Remains**

16153 1799 7x6 Stars, B-9, BB-166, R.1, XF40 NGC. Bowers Die State Die State V. Reddish-gold highlights glow beneath slate-blue toning over both sides of this still-lustrous, late die state BB-166 dollar. Perfectly centered, the motifs retain sharp definition in protected areas and the fields are smooth with only a few minor marks. A network of die cracks suggest the impending failure of the obverse die, while the reverse shows a prominent "apostrophe" crack to the right of the final S of STATES plus a similar, less-pronounced crack to the left of that letter as well. Light-to-moderate high point wear accounts for the assigned grade. NGC ID# 24X7, PCGS# 40057 Base PCGS# 6878

16154 1800 B-4, BB-186, R.4, VG10 PCGS. Bowers Die State II. A well-circulated but problem-free example of the scarce B-4 variety. The silver-gray surfaces lack noticeable marks. Repunching below the T in UNITED is an important pick-up point for B-4, along with a radial die crack through the 1 in the date.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 24X9, PCGS# 40072 Base PCGS# 6887

16155 1800 Wide Date, Low 8, B-10, BB-190, R.3 — Improperly Cleaned — NGC Details. VF. Bowers Die State VI. The obverse of B-10 was also employed for the B-11 AMERICA! variety. This B-10 coin is well-detailed for the grade level and shows medium battleship-gray patina with smooth surfaces. An old, thin pinscratch extends from the 8 in the date to the L in LIBERTY. The coin is well-struck with complete rims. Faint hairlines on each side denote a light cleaning.

16156 1800 Wide Date, Low 8, B-10, BB-190, R.3 — Smoothed — Genuine PCGS. XF Details. Bowers Die State III. Pearl-gray, lilac, and chestnut-gold visit this well-defined but whizzed Draped Bust dollar. The obverse margin is olive-green, and the reverse border is aquamarine. Luster glimmers from the curls and wings.

From The R. Thayer Sheets Yorktown Collection.

**1800 Dollar, VF30
B-19, BB-192, AMERICA!**

16157 1800 AMERICA!, B-19, BB-192, R.2, VF30 PCGS. Bowers Die State III. This BB-192 representative is boldly and evenly struck with light wear on the devices. The interiors show light tan-gold patina and smooth surfaces, surrounded by lovely yellow-gold and sky-blue border toning. A few scattered marks are seen over each side, as is consistent with the grade. An excellent midgrade example of this popular Guide Book variety. NGC ID# 24X9, PCGS# 40082 Base PCGS# 6892

16158 1803 Large 3, B-6, BB-255, R.2 — Cleaning — Genuine PCGS. XF Details. Bowers Die State III. Rich sea-green toning encompasses the obverse. The reverse field is cobalt-blue, the eagle is stone-gray, and the border exhibits iridescent golden-brown patina. A minimally marked and partly lustrous early silver type coin.
From The R. Thayer Sheets Yorktown Collection.

SEATED DOLLARS

16159 1840 AU53 PCGS. OC-1, R.1. Osburn-Cushing Die State b/b. A fairly early die state with die lines east of the date and above the IC in AMERICA. An untoned and partly lustrous first-year representative. The fields exhibit minor marks, but none merit singular mention.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 24YA, PCGS# 6926

16160 1840 AU55 NGC. The Seated Liberty dollar design was finalized in 1840, and production totaled 61,005 pieces that year. The date is scarcer in high grade than the immediately following Philadelphia issues. This Choice AU example displays sharp detail and lightly marked surfaces. Lavender-gray patina shows deeper gunmetal-gray toning around the edges of the relief elements. NGC ID# 24YA, PCGS# 6926

16161 1840 AU55 PCGS. OC-1, R.1. Osburn-Cushing Die State c/c. Medium chestnut-gold toning accompanies this briefly circulated introductory-year Seated dollar. A loupe fails to reveal any consequential marks, though a mint-made lamination affects the edge near the 1 in the date. NGC ID# 24YA, PCGS# 6926

1842 Seated Dollar, MS62 Elusive Early Date in the Seated Series

16162 1842 MS62 NGC. Dusky golden-brown and powder-blue embrace this satiny No Motto type coin. The strike is sharp at the borders but shows softness on the eagle's neck and upper left (facing) wing. Smooth aside from a couple of bagmarks on the right obverse field. Housed in a prior generation holder. Census: 27 in 62 (1 in 62★), 32 finer (2/17).

Ex: FUN Signature (Heritage, 1/2009), lot 4321. NGC ID# 24YC, PCGS# 6928

16163 1846 AU55 PCGS. OC-1, R.1. Osburn-Cushing Die State e/d. Light peach-gold toning visits both sides, with a small area of deeper red patina near the ER in AMERICA. Pockets of luster illuminate the stars, legends, and devices. An inoffensively abraded Choice AU example with a glimpse of struck-in grease below the eagle's beak. NGC ID# 24YH, PCGS# 6932

16164 1846 AU55 NGC. CAC. OC-1, R.1. Osburn-Cushing Die State c/f with bold reverse die cracks. A Choice AU Philadelphia No Motto type coin with richly patinated autumn-brown and forest-green surfaces. No marks are of singular relevance, and substantial luster accompanies design elements. NGC ID# 24YH, PCGS# 6932

16165 1846 AU58 NGC. OC-1, R.1. Osburn-Cushing Die State e/b. Just a trace of high-point wear shows on the well-detailed design elements of this popular issue and the lightly abraded surfaces retain traces of original mint luster, under shades of sea-green and lavender-gray toning. NGC ID# 24YH, PCGS# 6932

16166 1846 AU58 PCGS. CAC. OC-1, R.1. Osburn-Cushing Die State c/b. The 1 in the date is lightly repunched north. A pleasing gunmetal-gray Borderline Uncirculated example. Luster fills the legends, drapery, and plumage, and marks are incidental aside from a few thin field lines below star 13. Population: 60 in 58 (1 in 58+), 88 finer. CAC: 14 in 58, 21 finer (2/17). NGC ID# 24YH, PCGS# 6932

1846 Dollar, MS62 Elusive in Mint State

16167 1846 MS62 NGC. OC-1, R.1. Purple-steel color evenly covers the surfaces while vibrant golden toning surrounds the devices and legends. The coin displays well-preserved surfaces for the grade, with some stray light contact marks notable but unobtrusive. Census: 20 in 62, 37 finer (2/17).

Ex: FUN Signature (Heritage, 1/2005), lot 8240. NGC ID# 24YH, PCGS# 6932

16168 1846-O AU55 PCGS. OC-1. Seated dollars were struck in New Orleans on a very limited and sporadic basis. The 1846-O is the debut issue from the Southern facility, and its coinage amounted to only 59,000 pieces. This Choice AU example displays virtually complete detail but with a trace of friction that precludes Mint State status. The surfaces are bright and partially reflective with minimal abrasions. Population: 30 in 55, 43 finer (1/17). NGC ID# 26GG, PCGS# 6933

16169 1847 — Cleaning — Genuine PCGS. AU Details. OC-4, R.4. The borders display glimpses of peach-gold toning, but this slightly bright representative is mostly brilliant. Well struck and nearly without wear, though the upper reverse field displays distributed small marks.

16170 1847 AU58 ANACS. OC-2. This near-Mint 1847 Seated dollar displays semilustrous fields and well-detailed design elements. A blush of light golden toning warms each side, and surface abrasions are minimal. A pleasing example of the issue in a scarce grade. NGC ID# 24YJ, PCGS# 6934

16171 1847 AU58 NGC. OC-2. Osburn-Cushing Die State d/b. Only a trace of actual wear is evident on the well-detailed design elements of this impressive near-Mint specimen, but some loss of detail is apparent, due to die polishing. Shades of lavender-gray and golden-brown toning blanket the lightly abraded surfaces. NGC ID# 24YJ, PCGS# 6934

16172 1850 — Cleaned — ANACS. AU55 Details. OC-1, R.3. This lightly cleaned example shows little high-point wear and retains partial reflectivity in the fields. Dusky champagne toning blankets each side. The design elements are sharply detailed. The 1850 Seated dollar is scarce in high grade.

16173 1853 AU50 PCGS. OC-1, R.2. The "Chin Whiskers" variety, the sole business marriage for the date. A richly patinated representative with cobalt-blue, lavender, and peach-gold surfaces. A loupe fails to locate any mentionable marks.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 24YS, PCGS# 6941

16174 1856 — Cleaned — ANACS. AU55 Details. OC-1, R.2. The champagne-tinged pearl-gray surfaces have significant hairlines and several noteworthy abrasions on the obverse. However, the coin is also well-struck with a splash of gold toning on each side. The 1856 is a better date overall.
Ex: ANA Signature (Heritage, 3/2007), lot 922.

16175 1859-O AU58 PCGS. OC-1. Spindly reverse die cracks allow prompt attribution of this nicely struck and partly lustrous New Orleans type coin. The pearl-white surfaces are lightly to moderately abraded.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 24YY, PCGS# 6947

16176 1859-O AU58 PCGS. OC-1. Osburn-Cushing Die State b/f. Light to medium honey-gold toning adorns this partly lustrous New Orleans type coin. The strike is full except on the upper-right stars. Wispy field marks are noted below Liberty's cap and above the eagle's head. NGC ID# 24YY, PCGS# 6947

16177 1859-O MS62 PCGS. OC-2. Osburn-Cushing Die State c/b. From a large mintage of 360,000 pieces, the 1859-O Seated Liberty dollar is an available issue in the context of the series, and a popular choice of branch mint type collectors. This attractive MS62 example exhibits sharply detailed central devices, with just a touch of softness on some star centers. The brilliant surfaces show a mix of satiny mint luster and prooflike reflectivity, with scattered, minor contact marks on both sides. NGC ID# 24YY, PCGS# 6947

16178 1860 AU53 PCGS. OC-2. Die cracks connect the tops of the ICA in AMERICA, and provide the best pick-up points for the Osburn-Cushing marriage. The obverse is nearly untuned, and the reverse displays glimpses of tan-gold patina. Luster accompanies design recesses, and no marks are of individual consequence. NGC ID# 24Z2, PCGS# 6949

16179 1860-O AU58 PCGS. OC-7, R.2. Osburn-Cushing Die State a/b. The present untuned New Orleans type coin is minimally abraded, without the many bagmarks typically encountered on Uncirculated examples of the issue. The hair above the ear shows only a whisper of wear.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 24Z3, PCGS# 6950

16180 1860-O MS61 NGC. OC-4, Low R.3. Reflective fields complement sharp design elements on this brilliant, radiantly lustrous Mint State Seated dollar type coin. Grade-limiting abrasions are light and evenly scattered. Affordable Seated Liberty dollars are seldom seen with this much appeal. NGC ID# 24Z3, PCGS# 6950

16181 1866 Motto AU58 PCGS. OC-1, R.2. Osburn-Cushing Die State a/a. The 1866 Seated Liberty dollar is a scarce issue that saw the first use of the Motto design. This attractive near-Mint specimen offers well-detailed design elements, with just a touch of wear on the high points. The lightly abraded surfaces show a mix of satiny luster and prooflike reflectivity on both sides. Population: 20 in 58 (1 in 58+), 57 finer (2/17). NGC ID# 24Z9, PCGS# 6959

16182 1867 AU53 ANACS. OC-P1. This attractive 1867 silver dollar is from the proof die pair as described on the Osburn-Cushing website, seateddollarvarieties.com. However, housed in an old white ANACS holder, it is not designated as a proof. The coin does possess some prooflike characteristics in addition to the variety diagnostics, including broad, squared rims and remnants of reflectivity in the fields. Both sides show light wear from brief circulation. Original olive-green, russet, and golden toning blankets each side, giving the coin exceptional visual appeal. NGC ID# 24ZA, PCGS# 6960

1870 Seated Dollar, MS63

Frost-White Motifs

16183 1870 MS63 PCGS. OC-6, Repunched 0, R.2. Osburn-Cushing Die State a/a. Repunching is visible on the inside top loop of 0 in the date. With one of the higher mintages among all Seated dollars, the 1870 is more available than many other Philadelphia issues in the series. This Select Uncirculated example displays strong contrast between the white and frosted central motifs and the surrounding fields, which show forest-green, aqua, and olive-gold shades over silver-gray toning. Cherry-red accents appear at the borders. The coin is sharply struck and visually impressive, with only a few scattered marks that define the grade. Population: 30 in 63 (3 in 63+), 22 finer (2/17).

From The Martin Peterson Collection. NGC ID# 24ZD, PCGS# 6963

16184 1870-CC VF25 PCGS. OC-1, Low R.4. Nine die marriages are known despite a meager mintage of 12,462 pieces. OC-1 and OC-4 appear practically identical in the present grade, and the more available variety is presumed. This lightly abraded first-year example has golden-brown borders and cream-gray fields and devices.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 24ZE, PCGS# 6964

16185 1871 AU58 NGC. OC-13, R.2. Osburn-Cushing Die State a/b. Attractive shades of low-intensity pale gold and lavender toning blanket the lightly abraded surfaces of this pleasing near-Mint specimen, with much prooflike reflectivity underneath. The design elements are strongly impressed, with just a trace of actual wear. NGC ID# 5DNV, PCGS# 6966

1871-CC Seated Dollar, VF Details

Rare Carson City Key Issue

16186 1871-CC — Cleaning — PCGS Genuine. VF Details. OC-1. Seateddollarvarieties.com notes, "1871-CC is a key date in the Liberty Seated Dollar series both because of its extremely low mintage and its status as one of the two rarest products of the Carson City mint." Shades of light and dark gray alternate across surfaces that show moderate porosity and a few areas of dark granularity. Two small reverse rim bumps are noted, yet VF definition remains.

From The R. Thayer Sheets Yorktown Collection.

1871-CC Seated Dollar, XF Details
Lowest-Mintage, Second-Rarest CC Issue

- 16187** 1871-CC — Repaired — PCGS Genuine. XF Details. OC-1. Struck to the extent of 1,376 coins, the 1871-CC Seated dollar is the lowest-mintage and second-rarest issue among the four Carson City emissions in the series. Osburn and Cushing estimate that 100 pieces survive. Although we are uncertain of the exact nature of the noted repair, the surfaces show signs of smoothing, and an area of discoloration occurs above the second S in STATES. Subdued silver surfaces are typically struck. Numerous ticks and flecks are visible, as expected.
From The R. Thayer Sheets Yorktown Collection.

- 16188** 1872 MS62 PCGS. OC-8, R.2. The “Very High Date” variety. Orange-red borders frame brilliant centers. A lustrous Motto type coin with an exceptionally smooth appearance for the designated grade. The strike is good save for blending on the right-side stars.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 24ZJ, PCGS# 6968

1872-CC Dollar, AU Sharpness
Small Production of 3,150 Coins

- 16189** 1872-CC — Repaired — PCGS Genuine. AU Details. The 1872-CC is far more accessible than the Carson City issues that immediately precede and succeed it, but the date remains very scarce with 250 survivors from a small mintage of 3,150 coins. Most examples show signs of extensive circulation, with the average certified grade falling shy of VF35. This steel-gray representative enjoys AU sharpness, although evidence of repairs occur on each side, most notably in the right-hand obverse field.
From The R. Thayer Sheets Yorktown Collection.

1872-CC Dollar, AU Details
Scarce Carson City Issue

- 16190** 1872-CC — Improperly Cleaned — NGC Details. AU. OC-1, High R.3. Osburn-Cushing Die State a/a. There was limited demand for silver dollars in the Nevada territory in the early 1870s, and limited availability of silver bullion as well. This example is sharply defined but shows evidence of cleaning beneath deep, orange-gray patina. Many of the few surviving 1872-CC dollars have problems of one sort or another, and this example with About Uncirculated sharpness remains a desirable representative of the scarce, low-mintage date. Just 3,150 pieces were struck.

- 16191** 1872-S XF40 ANACS. OC-1, Low R.3. With a mintage of only 9,000 coins, the 1872-S Seated dollar is scarce in high grade. This collectible XF example displays bold detail and smooth, original surfaces. Deep gunmetal-blue toning surrounds the relief elements, with lighter lavender-gray color elsewhere. A small mark on the horizontal reverse shield stripes is the only mentionable surface flaw. NGC ID# 24ZL, PCGS# 6970

- 16192** 1872-S XF45 NGC. OC-1, Low R.3. Osburn-Cushing Die State a/a. One of just 9,000 examples struck from a single die marriage, this San Francisco dollar shows modest remaining luster primarily on the reverse. Wear on the raised devices determines the Choice XF grade, along with light to moderate marks on faintly toned stone-gray surfaces. Census: 25 in 45, 50 finer (2/17).
Ex: Long Beach Signature (Heritage, 2/2007), lot 3665. NGC ID# 24ZL, PCGS# 6970

1873-CC Seated Dollar, VF Details
Scarce in All Grades

- 16193** 1873-CC — Plugged — PCGS Genuine. VF Details. OC-1, High R.4. A rather obvious plugged hole nearly eradicates star 8 and the O in DOL., although this coin was mercifully spared from the extensive tooling that typically accompanies such a repair. The coin is evenly worn with pleasing pewter-gray toning and well-detailed motifs. A small rim nick appears at 3 o'clock on the reverse. The BER in LIBERTY is mostly worn away. The 1873-CC is the scarcest Carson City issue of this type, coming from a mintage of only 2,300 coins. Examples in any condition are scarce.
From The R. Thayer Sheets Yorktown Collection.

PROOF SEATED DOLLARS

1867 Seated Dollar, PR63 Sharply Struck Proof

16194 1867 PR63 PCGS. OC-P1, R.3. Gentle tints of gold and ivory-gray toning grace unperturbed mirror fields. An impressive, needle-sharp specimen with the eye appeal of a finer grade. Business strikes of this date are difficult in Mint State, which is not surprising given the low production of 46,900 pieces. Many numismatists select a proof instead, although these are also scarce, since a scant 625 proofs were struck.

Ex: *Denver Signature (Heritage, 8/2006)*, lot 3754; *ANA Signature (Heritage, 3/2007)*, lot 957. NGC ID# 252N, PCGS# 7015

16195 1870 PR58 PCGS. OC-P1, Low R.3. The steel-gray surfaces exhibit golden-brown and ocean-blue shades upon rotation beneath a light. Both sides display hairlines, but no contact marks are apparent. The strike is good, and high point wear is minimal.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 252S, PCGS# 7018

16196 1870 — Questionable Color — Genuine PCGS. Proof, Unc. Details. OC-P1, Low R.3. Deep purple-red and olive-green patina alternates across this glossy and sharply struck silver dollar. No contact marks are present. The obverse field is faintly hairlined. The 1870 proof mintage was 1,000 pieces.

16197 1871 PR62 PCGS. OC-P1, R.2. Although the 1871 is one of two Seated issues with a business mintage of more than 1 million pieces, proofs of that year are very scarce. The present fully impressed specimen exhibits light tan-gold toning. Upon rotation, the fields display delicate hairlines. Housed in a green-label holder.
From The Martin Peterson Collection. NGC ID# 252T, PCGS# 7019

16198 1873 PR58 NGC. OC-P1, R.3. Osburn-Cushing Die State a/a. This impressive PR58 specimen displays sharply detailed design elements with just a trace of high-point wear and evidence of doubling on the reverse. Shades of golden-brown, lavender, and powder-blue toning blanket the lightly abraded surfaces, with partially reflective fields underneath. From a small proof mintage of 600 pieces. NGC ID# 252V, PCGS# 7021

TRADE DOLLARS

16199 1873 MS61 ANACS. Medium to deep gunmetal-gray and straw-gold toning embraces satiny and lightly abraded surfaces. The eagle's right (facing) leg is softly defined, but the remainder of the strike is good. Encapsulated in a small-sized holder.
Ex: *Houston Signature (Heritage, 11/2007)*, lot 60759, which realized \$1,092.50.
From The Pellegrini Collection, Part IV. NGC ID# 252W, PCGS# 7031

16200 1873 MS62 PCGS. CAC. Most 1873-dated Trade dollars were exported, chopmarked, and eventually melted. The present minimally marked piece avoided that fate. The lightly toned almond-gold and rose-red surfaces show incompleteness of strike on Liberty's hair and the eagle's right (facing) leg. NGC ID# 252W, PCGS# 7031

16201 1874 MS62 NGC. Period after FINE. This coruscating Trade dollar is mostly white, though the peripheries display glimpses of sun-gold and ocean-blue toning. The surfaces are unusually unabraded for the MS62 level, but the strike is incomplete on Liberty's hair and the uppermost stars.

Ex: *Houston Signature (Heritage, 11/2007)*, lot 60762, which realized \$1,380.

From The Pellegrini Collection, Part IV. NGC ID# 252Z, PCGS# 7034

1874-CC Trade Dollar, MS60 Minuscule Survival Rate

16202 1874-CC MS60 PCGS. Tall CC. Period after FINE. Rusty Goe puts forth the following estimates in his 2003 opus, *The Mint on Carson Street*: Of the 1.3 million 1874-CC Trade dollars struck, only 27,000 or so remained in that city, the rest being exported. That would have left approximately one coin per resident at the time. He further suggests upwards of 90% of those coins were melted in the following years. PCGS now estimates that 1,000 pieces survive. Mint State representatives are very scarce. This bright Uncirculated Trade dollar lacks the slightest hint of color. The stars, olive leaves, feathers, and talons are bold, while Liberty's head shows minor softness. Myriad abrasions dot the semireflective surfaces.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 2532, PCGS# 7035

1874-CC Trade Dollar, MS61

16203 1874-CC MS61 PCGS. This attractive Carson City Trade dollar exhibits brilliant silver surfaces and frosty luster. The typical strike shows weakness along the top edge of the eagle's left wing. This is a wonderful type candidate among Carson City Trade dollars.

From The Pellegrini Collection, Part IV. NGC ID# 2532, PCGS# 7035

16204 1874-S MS63 PCGS. Large S. Period after FINE. A brilliant and lustrous Select Trade dollar. The strike is bold except on Liberty's hair. Marks are few and inconsequential, and the eye appeal is impressive for the third-party grade.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 2533, PCGS# 7036

16205 1875 Type Two Reverse MS61 NGC. The low-mintage 1875 is notoriously scarce in all grades. This lustrous representative has pale gold toning and only minor incompleteness on the right-side stars and Liberty's hair. The fields have a few wispy grazes, but no marks stand in the way of a higher grade. Census: 14 in 61, 60 finer (2/17).

Ex: *Houston Signature (Heritage, 11/2007)*, lot 60767.

From The Pellegrini Collection, Part IV. PCGS# 40107 Base PCGS# 7037

16206 1875-CC Type One Reverse MS61 ANACS. Period after FINE. Light golden-brown and ice-blue toning accompanies the borders of this coruscating and nicely struck Carson City type coin. The right obverse field displays moderate marks. The lower reverse is strike doubled. In a small-sized holder.
From The Martin Peterson Collection. NGC ID# 2535, PCGS# 40108 Base PCGS# 7038

16207 1875-CC Type One Reverse MS61 NGC. Period after FINE. Hints of almond-gold toning visit this satiny Carson City type coin. Marks are limited to minor contact on the left obverse field. The strike shows moderate blending on Liberty's hair and the eagle's claws.
Ex: Houston Signature (Heritage, 11/2007), lot 60768, which realized \$2,760.
From The Pellegrini Collection, Part IV. NGC ID# 2535, PCGS# 40108 Base PCGS# 7038

16208 1876 Type One Obverse, Type Two Reverse, MS62 PCGS. A lightly toned and lustrous Centennial year Trade dollar. The fields exhibit wispy marks commensurate with the grade. The strike is good aside from softness on the eagle's right (facing) leg.
Ex: FUN Signature (Heritage, 7/2014), lot 4126, which realized \$1,116.25.
From The Pellegrini Collection, Part IV. NGC ID# 2539, PCGS# 40111 Base PCGS# 7041

1876-CC Trade Dollar, AU58 Scarce Issue

16209 1876-CC Type One Reverse AU58 NGC. Tall CC. Boldly struck with deep gray-russet toning across both sides, and strong undertones of rose. Light, even wear occurs over the high points. A few stray pinscratches and hairlines are noted in the fields, but they are well concealed by the patination. This issue is rare in Mint State and near-Mint survivors such as this one are also quite scarce. Census: 33 in 58, 51 finer (2/17).
Ex: FUN Signature (Heritage, 1/2008), lot 1904.
From The Pellegrini Collection, Part IV. NGC ID# 253A, PCGS# 40112 Base PCGS# 7042

16210 1876-CC Type Two Reverse AU55 ANACS. Tall CC. This briefly circulated Carson City Trade dollar is evenly struck with subtle gold-gray toning. The left obverse border is mildly granular. Housed in a small-format ANACS holder.
Ex: Houston Signature (Heritage, 11/2007), lot 60780; FUN Signature (Heritage, 1/2009), lot 4388.
From The Pellegrini Collection, Part IV. NGC ID# 4EML, PCGS# 40113 Base PCGS# 7042

16211 1876-S Type Two Obverse, Type Two Reverse, MS63 NGC. Minute S. Period after FINE. Most '76-S Trade dollars have a Type One obverse, but the present lot shows the obverse scroll ends pointing down, characteristic of the Type Two design. The strike is uncommonly sharp, and the lustrous and moderately marked surfaces exhibit light pearl-gray and chestnut-gold toning.
From The Martin Peterson Collection. NGC ID# 253B, PCGS# 40116 Base PCGS# 7043

16212 1877 MS62 PCGS. A brilliant and lustrous representative. The stars are lightly brought up, but the centers are crisply struck. The fields exhibit scattered unimportant contact. Type Two Obverse and Reverse, as always for post-1876 issues.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 253C, PCGS# 7044

16213 1877-CC — Cleaning — Genuine PCGS. Unc. Details. This Carson City Trade dollar offers substantial luster and is well-defined. Both sides are hairlined, and the right obverse field is microgranular. Lightly toned in sea-green and powder-blue shades.
From The R. Thayer Sheets Yorktown Collection.

PROOF TRADE DOLLARS

1873 Trade Dollar, Richly Toned PR64

16214 1873 PR64 PCGS. Deep smoky-gold and gray covers the obverse and reverse of this Choice proof with deep mirroring beneath the layers of color. The 1873 is the first year of issue and these are always in strong demand by type collectors. All the devices are sharp and the surfaces are clean for the grade, although the depth of toning masks this feature to a degree. A scarce coin in this grade, and much more difficult to obtain finer. Population: 30 in 64, 7 finer (2/17).
Ex: FUN Signature (Heritage, 1/2006), lot 4495.
From The Pellegrini Collection, Part IV. NGC ID# 27YJ, PCGS# 7053

1874 Trade Dollar, PR63 Cameo Moderately Toned

16215 1874 PR63 Cameo PCGS. Medium violet-gray toning has a tendency to lighten over the central motifs, with flashes of sea-green color around the margins. Scarcer second-year-proof issue, and appealing with the Cameo contrast and attractive toning. No surface problems are seen aside from the expected light hairlines, commensurate for the grade. Population: 17 in 63 (1 in 63+) Cameo, 28 finer (2/17).
Ex: Central States Signature (Heritage, 5/2004), lot 8103; FUN Signature (Heritage, 1/2006), lot 4497.
From The Pellegrini Collection, Part IV. NGC ID# 27YK, PCGS# 87054

16216 1875 PR62 Cameo NGC. Type One Reverse. Both reverse types are known for 1875 proofs, with the Type Two (no berry under claw) more often seen. A brilliant specimen with substantial frost throughout the major motifs. The strike is incomplete on the eagle's right (facing) claw. A mere 700 proofs were struck.
Ex: FUN Signature (Heritage, 1/2006), lot 4499, which realized \$2,070.
From The Pellegrini Collection, Part IV. NGC ID# 27YL, PCGS# 87055

16217 1876 PR63 NGC. Type One Obverse, Type Two Reverse. Golden-brown and jade-green toning visits the peripheries. Well struck despite a hint of incompleteness on Liberty's hair. A beautiful Select proof, and not far from a Cameo designation, since the devices demonstrate consistent and substantial frost. Minor die doubling in a southern direction is noted on the lower tips of Liberty's banner, and on nearby drapery folds.

Ex: Jules Reiver Collection (Heritage, 1/2006), lot 21584, which realized \$3,105.

From *The Pellegrini Collection, Part IV*. NGC ID# 27YM, PCGS# 7056

16218 1877 PR61 Cameo NGC. Delicate honey-gold toning visits the borders of this crisply struck and flashy proof type coin. The legends and devices are frosty. The obverse exhibits faint horizontal roller marks, as made, but hairlines are inconsequential for the PR61 level.

Ex: FUN Signature (Heritage, 1/2006), lot 4507, which realized \$1,725.

From *The Pellegrini Collection, Part IV*. NGC ID# 27YN, PCGS# 87057

16219 1878 PR62 Cameo NGC. The first of the proof-only Trade dollars, a series subset that continued until 1885. Collector awareness of the proof-only status was limited in 1878, thus the proof date has a lower mintage (900 pieces) than the 1879 through 1883 emissions. The present fully struck and faintly hairlined specimen has frosty motifs and glassy fields. Toning is limited to golden-brown and aquamarine iridescence near the rims.

Ex: Jules Reiver Collection (Heritage, 1/2006), lot 21595, which realized \$3,335.

From *The Pellegrini Collection, Part IV*. NGC ID# 27YP, PCGS# 87058

16220 1879 PR62 PCGS. Pale gray proof surfaces show a trace of cameo contrast on both sides, with hints of pale lilac and faint gunmetal-blue toning in the fields. Scattered marks and hairlines define the grade.

Ex: FUN Signature (Heritage, 1/2006), lot 4513.

From *The Pellegrini Collection, Part IV*. NGC ID# 27YR, PCGS# 7059

**1879 Trade Dollar, PR63
Thick, Old-Time Patina**

16221 1879 PR63 PCGS. Concealed by a cloak of orange and tan-gold toning, the underlying mirrored surfaces hide their reflectivity until viewed at the proper angle to enliven this inaugural proof-only Trade dollar. Struck for collectors and embraced by speculators, the 1879 issue had an ambitious 1,541-piece mintage. The present Select example shows faint diagonal roller marks and a touch of strike weakness on the peripheral devices beneath the dusky, original toning. NGC ID# 27YR, PCGS# 7059

**1880 Trade Dollar, PR64
Attractive Toning**

16222 1880 PR64 PCGS. Mixed violet and gold patina shrouds surfaces that are clearly high-end for the grade, though incompleteness of strike is noticeable around the peripheral obverse. The fields remain flashy and reflective in spite of the rich patina. The Mint manufactured 1,987 Trade dollars in proof format only in 1880. NGC ID# 27YS, PCGS# 7060

16223 1880 PR60 Cameo NGC. Rich lemon-gold toning adorns the borders of this intricately struck proof-only 1880 Trade dollar. The major devices are frosty, ensuring attractive eye appeal despite field hairlines commensurate with the grade.

Ex: FUN Signature (Heritage, 1/2006), lot 4524.

From *The Pellegrini Collection, Part IV*. NGC ID# 27YS, PCGS# 87060

16224 1881 PR62 PCGS. This lower-end proof is lavishly toned in orange, olive, rose, and sky-blue colors, although glimpses of brilliant reflectivity are found here and there. The surfaces are intricately struck and only lightly marked for the assigned grade.

Ex: FUN Signature (Heritage, 1/2006), lot 4527.

From *The Pellegrini Collection, Part IV*. NGC ID# 27YT, PCGS# 7061

**1881 Trade Dollar, PR64
Low Proof-Only Mintage**

16225 1881 PR64 PCGS. Interest in Trade dollar proofs was on the wane in 1881, and the Mint responded by limiting the mintage to 960 pieces — a large decrease from the previous two years. Natural, variegated patina settles over the mirrored obverse fields and smoothly frosted devices of this Choice example. Golden highlights gleam beneath deep-blue and olive-gray shades, which reveal lively violet and lime-green accents when viewed at an angle. Some delicate swirl lines are seen on the reverse. The strike is needle-sharp throughout both sides, not always seen on the 1881 issue, with sharp star centers and strong definition on Liberty's head. NGC ID# 27YT, PCGS# 7061

16226 1883 PR63 PCGS. A Select rainbow-toned, proof-only Trade Dollar, one of just 979 pieces struck for collectors as the final "official" Trade dollar issue, although some believe the rare 1884 was a legitimate Mint proof issue as well. The glassy-mirrored surfaces display a sea of iridescent yellow, orange, and blue colors. The neonlike, graduated toning is richest on the upper portion of the obverse, and on the corresponding lower area of the reverse. Overall, the strike is sharp but not quite full on the highest obverse points, with a few light lines and small ticks that are easily overlooked thanks to the remarkable toning.

Ex: Long Beach Signature (Heritage, 10/2001), lot 7255.

From *The Martin Peterson Collection*. NGC ID# 5DP8, PCGS# 7063

- 16227 1883 PR63 NGC.** A needle-sharp Select proof-only Trade dollar. The obverse is close to brilliant, while the reverse displays dusky tan-gray toning near AMERICA, along with a small dash of carbon on the lower left (facing) wing. Impressively free from hairlines.
Ex: FUN Signature (Heritage, 1/2006), lot 4532.
From The Pellegrini Collection, Part IV. NGC ID# 5DP8, PCGS# 7063

MORGAN DOLLARS

Elusive 1878 8 Tailfeathers Dollar MS64+ Deep Mirror Prooflike

- 16228 1878 8TF Lines in LIB, VAM-2, MS64+ Deep Mirror Prooflike PCGS.** A small gray stain on the reverse of this near-Gem Morgan dollar is the only distraction on the deeply mirrored fields that frame the lustrous devices. Trivial scattered marks are expected for the grade. This is an important issue that enjoys strong demand. Population: 39 in 64 (3 in 64+) Deep Mirror Prooflike, 4 finer (3/17). NGC ID# 253H, PCGS# 40120 Base PCGS# 97073
- 16229 1878 8TF Pierced Eyelid, VAM-6, MS65 PCGS.** Reflective fields accent this Gem VAM-6 example, bordering on the Prooflike level. The coin is sharp and brilliant with minimal signs of contact. VAM-6 is best known for a vertical die line through Liberty's eyelid, which denotes the "Pierced Eyelid" moniker. Eight Tailfeather Morgans are universally scarce any finer. NGC ID# 76LZ, PCGS# 133789 Base PCGS# 7072
- 16230 1878 8TF Diagonal In 8, VAM-17, MS65 PCGS.** Brilliant save for a dash of charcoal toning on the hair below LIBERTY. Dynamic cartwheel luster, a bold strike, and pleasing preservation ensure exceptional eye appeal. Ideal for those in search of a high-grade example of the briefly coined eight tailfeather subtype. NGC ID# 253H, PCGS# 133818 Base PCGS# 7072
- 16231 1878 8TF Diagonal In 8, VAM-17, MS65 PCGS.** An essentially brilliant Gem that exhibits vibrant, frosted luster and a sharp strike. Marks are chiefly confined to minor contact on the field near the nose. Both sides are die doubled, usual for the First Reverse subtype. Moderate doubling is visible on LIBERTY.
Ex: Long Beach Signature (Heritage, 2/2010), lot 502; ANA Signature (Heritage 2/2014), lot 4707.
From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 253H, PCGS# 133818 Base PCGS# 7072
- 16232 1878 7/8TF Doubled Legs, VAM-33, MS65+ PCGS.** This is a Weak 7/8 Tailfeathers variety, more notable for the dramatically doubled legs on the eagle. Nonetheless, the present coin is upper-end for VAM-33. The strike is sharp, and each side displays brilliant, satiny mint luster. The die gouge at the eagle's neck is no longer visible due to die wear. Population of VAM-33: 17 in 65 (2 in 65+), 4 finer (2/17). NGC ID# 2TY3, PCGS# 134032 Base PCGS# 7074
- 16233 1878 7/8TF 7/4 Strong, VAM-37, MS65 PCGS.** Light tan-gold toning visits the lower reverse periphery. A lustrous Gem with minor obverse field grazes and a good strike save for blending above the ear. The several "doubled tailfeather" VAMs are popular, and frequently collected by die variety. NGC ID# 2TXZ, PCGS# 134034 Base PCGS# 7078

- 16234 1878 7/8TF 7/4 Strong, VAM-37, MS65+ PCGS. CAC.** Orange-red toning graces portions of the borders, more prominently on the reverse. The remainder of this lustrous Gem is stone-white. The fields are smooth and the strike is sharp. Liberty's chin displays delicate marks. NGC ID# 2TXZ, PCGS# 134034 Base PCGS# 7078

- 16235 1878 7/8TF Strong, VAM-38, MS65 PCGS.** Brilliant save for a dash of golden-brown and cobalt-blue near the obverse rim at 5 o'clock. A lustrous and precisely struck Gem. Liberty's cheek is uncommonly free from contact, and the eye appeal is exceptional.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 2TXZ, PCGS# 134035 Base PCGS# 7078

- 16236 1878 7/8TF Strong, VAM-38, MS65 PCGS.** Five tailfeather fragments emerge beneath the seven tailfeathers. Lightly toned pearl-gray aside from glimpses of peach and lavender near the rims. Lustrous with a good strike and exemplary surfaces. Only a single hair-thin line above the chin decides the grade. LIBERTY is widely shifted and the obverse legend and date are strongly doubled on the interesting VAM-38 variety.
Ex: ANA Signature (Heritage, 8/2014), lot 4709. NGC ID# 2TXZ, PCGS# 134035 Base PCGS# 7078

1878 Seven Tailfeathers Dollar, MS66 Reverse of 1878, None Finer at PCGS

- 16237 1878 7TF Reverse of 1878 MS66 PCGS.** This first-year dollar features the modified design with seven tailfeathers. Cartwheel luster and eye-catching mint brilliance are the defining traits of this wonderfully preserved Premium Gem. The hair strands over Liberty's ear, and the eagle's breast feathers and talons are razor-sharp. The cheek and neck are incredibly clean. Population: 50 in 66 (7 in 66+), 0 finer (2/17). NGC ID# 2TY3, PCGS# 7074
- 16238 1878 7TF Reverse of 1878, VAM-100, Type One Obverse MS65 PCGS.** A Top 100 Variety. The tops of E and R in E PLURIBUS UNUM are doubled, and a die scratch appears within the A in DOLLAR. Each side of this Gem first-year dollar retains complete brilliance and an overlay of frosty luster. The fields and exposed areas like Liberty's cheek are noticeably clean, as expected for the grade. Sharply struck. NGC ID# 253K, PCGS# 133832 Base PCGS# 7074
- 16239 1878-CC MS65 PCGS.** This gorgeous Gem 1878-CC Morgan dollar represents the first year of the design with lovely gold and iridescent toning over frosty silver luster and sharp design motifs. Eye appeal is excellent. NGC ID# 253M, PCGS# 7080
- 16240 1878-CC MS65 PCGS.** Always popular with branch mint type collectors and series specialists alike, the 1878-CC Morgan dollar represents the first year of the design. This sharply detailed Gem displays well-preserved, lustrous surfaces, with hints of emerald-green and magenta toning on the reverse. NGC ID# 253M, PCGS# 7080
- 16241 1878-CC MS65 PCGS. VAM-9. CC Tilted Right.** This variety shows distinctive die lines in the lower reverse field but is otherwise merely a candidate for date representation. The present Gem displays frosty, crisp luster and no major abrasions. The strike is sharply executed.
From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 253M, PCGS# 7080

16242 1878-CC MS65+ NGC. A Plus-graded Carson City Gem from the first year of the Morgan design, this coin offers razor-sharp definition on all design elements and the well-preserved surfaces radiate vibrant mint luster on both sides. The 1878-CC becomes scarce in finer grades and the issue is always in demand. NGC ID# 253M, PCGS# 7080

16243 1878-CC Lines in Wing, VAM-11, Top 100, MS65 Prooflike PCGS. A Top 100 Variety. A series of bold die lines in the eagle's wing feathers identifies this popular but elusive variety. The present coin is sharply struck and displays considerable cameo contrast with reflective fields and frosty devices. Traces of gold toning appear around the rims. NGC ID# 48VK, PCGS# 40437 Base PCGS# 7081

16244 1878-CC Lines in Wing, VAM-11, MS63 Deep Mirror Prooflike PCGS. CAC. A Top 100 Variety. The eagle's wings display several bold die lines. This brilliant Carson City Morgan provides excellent contrast between the glassy fields and the frosty motifs. The left obverse field exhibits moderate contact. VAM-11 Population: 9 in 63 Deep Mirror Prooflike, 3 finer (2/17).

Ex: Chicago Signature (Heritage, 8/2011), lot 4432, which realized \$1,955.

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 253M, PCGS# 40438 Base PCGS# 97081

16245 1878-S MS64 Deep Mirror Prooflike PCGS. The strike is needle-sharp on this Choice example, complementing the frosty luster of the devices. Each side displays deeply mirrored fields that produce appreciable cameo contrast. Traces of light golden toning are throughout, and a small mark below Liberty's eye is the only abrasion of note. Population: 82 in 64 (3 in 64+) Deep Mirror Prooflike, 22 finer (2/17). NGC ID# 56ZC, PCGS# 97083

16246 1879 MS64 Deep Mirror Prooflike PCGS. This highly desirable example has deeply mirrored fields on both sides. Crisply struck and untuned with decided contrast, though the small marks that pepper the surfaces are magnified by the mirrors. Population: 70 in 64 (3 in 64+) Deep Mirror Prooflike, 12 finer (2/17).

Ex: FUN Signature (Heritage, 1/2007), lot 6869; ANA Signature (Heritage, 3/2007), lot 1213; Central States Signature (Heritage, 5/2007), lot 4494.

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 56ZE, PCGS# 97085

16247 1879-CC XF45 PCGS. CAC. Normal Mintmark. This Choice XF 1879-CC Morgan dollar displays remnants of luster in the protected regions of the fields with attractive olive-gray toning blanketing each side. Wear is consistent with the grade, and the surfaces are problem-free. NGC ID# 253U, PCGS# 7086

16248 1879-CC AU50 PCGS. Normal Mintmark. Original luster rolls around the protected regions of the fields, while the devices show light, grade-consistent wear. Delicate champagne toning graces each side, and the surfaces have the look of never having been cleaned, unlike those of many other AU-level 1879-CC dollars. NGC ID# 253U, PCGS# 7086

16249 1879-CC AU50 PCGS. A Normal Mintmark example, ideal for the date collector looking to fill in this better Carson City issue for minimal cost. Luster remains in the fields, and traces of light golden toning accent the borders. The central devices show minor high-point wear, and the fields have expected light marks. NGC ID# 253U, PCGS# 7086

1879-CC Morgan Dollar, MS60 Low-Mintage Carson City Issue

16250 1879-CC MS60 PCGS. From a low-mintage of 756,000 pieces, the 1879-CC is the second-rarest Morgan dollar from the Carson City Mint. This attractive Mint State example features well-detailed design elements and lustrous surfaces that show the expected assortment of minor contact marks for the grade. Housed in a green label holder.

From The Pellegrini Collection, Part IV. NGC ID# 253U, PCGS# 7086

16251 1879-CC Capped Die, VAM-3A, AU50 PCGS. A Top 100 Variety. VAM-3A is the scarce late die state of the "Capped Die" VAM-3, identified by a broad die line through the base of the AM in AMERICA. The mintmark exhibits a profusion of minute die chips, characteristic of the *Guide Book* variety. This lightly circulated pearl-gray example lacks relevant abrasions and is certain to please the advanced collector.

From The Pellegrini Collection, Part IV. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1879-O Silver Dollar, MS65+ Two-Sided Border Toning

16252 1879-O MS65+ PCGS. The 1879-O is an elusive issue in eye-appealing MS65, but it experiences increased demand in this grade because of the rarity of finer coins. The present Plus-graded Gem showcases beautiful rainbow toning around the margins with brilliant silver interiors. Vibrant luster exhibits only a few light marks on Liberty's cheek. The strike is better than expected for the issue. There are two dozen finer examples at PCGS (2/17). NGC ID# 253X, PCGS# 7090

16253 1879-S Reverse of 1878, VAM-46, MS64 PCGS. A Top 100 Variety. Reverse of 1878. Broken r in Trust (looks like 'Tiust'). A die line from the nose to the lip and two die chips — one between T and Y of LIBERTY and another at the lower right (facing) wing near the leg confirm the scarce VAM-46 variety. This is a brilliant and frosty near-Gem example with partially prooflike fields and a sharp strike. A faint hint of golden-gray toning joins scattered small marks across the lustrous surfaces.

From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 746T, PCGS# 133865 Base PCGS# 7094

16254 1879-S Reverse of 1878, VAM-46, MS64 PCGS. A Top 100 Variety. There are a surprising number of '79-S Second Reverse VAM varieties, but VAM-46 is relatively easy to attribute. The serif of the R in TRUST is practically absent, and the die line above Liberty's lips is diagnostic. This crisply struck and lustrous near-Gem has a semiprooflike reverse. NGC ID# 746T, PCGS# 133865 Base PCGS# 7094

16255 1879-S MS67+ PCGS. CAC. Vast dispersals of the 1879-S throughout the 20th century explain the issue's high-grade availability. This near-pristine, untoned Gem offers frosty luster and razor-sharp strike characteristics on each side. Void of any singular marks. A perfect branch mint type with outstanding eye appeal. NGC ID# 253X, PCGS# 7092

**1880 Morgan Dollar, MS65 Deep Prooflike
Very Scarce Issue With Mirrored Fields**

16256 1880 MS65 Deep Prooflike NGC. A thin ring of golden-russet and blue surround the the rims of this flashy and nicely struck Gem. The fields and devices are brilliant. Well-preserved, and much rarer in DPL format than its 1880 San Francisco counterpart. Certified in a prior generation holder. Census: 10 in 65 (1 in 65+) Deep Prooflike, 3 finer (2/17).

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 253Y, PCGS# 97097

16257 1880/79-CC Reverse of 1878, VAM-4, Top 100, MS64+ PCGS. A Top 100 Variety, showing a strong overdate feature paired to a Reverse of 1878 tail die. This high-end near-Gem has frosty, sharp motifs and semiprooflike fields. Hints of light golden toning appear over each side. Abrasions are minimal.

From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

16258 1880/79-CC Reverse of 1878, VAM-4, Top 100, MS65 PCGS. A Top 100 Variety. The bold overdate feature is highly desirable on this VAM variety. The present coin displays intensely frosted original mint luster with wisps of light golden toning around the borders. Both sides are largely devoid of even minor surface contact, although a few tiny marks below Liberty's eye deny a finer grade from PCGS. Nonetheless, eye appeal far exceeds that of most other Gem-graded 1880/79-CC dollars known. Housed in a first generation holder. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

16259 1880-CC 8 Over High 7, VAM-5, MS64 Deep Mirror Prooflike PCGS. CAC. A Top 100 Variety. Both sides of this lovely Morgan dollar are fully brilliant with deeply mirrored field and frosty devices. There is no evidence of toning. Usual weakness appears over Liberty's ear. Population: 21 in 64 (1 in 64+) Deep Mirror Prooflike, 7 finer. CAC: 3 in 64, 2 finer (2/17).

Ex: Schaumburg Central States Signature (Heritage, 4/2012), lot 5476, which realized \$2,300.

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 35BG, PCGS# 41134 Base PCGS# 97103

16260 1880-CC 8/7, Reverse of 1878, VAM-7A, MS64+ PCGS. CAC. Hit List 40 Variety. Small CC Mintmark. Plus-graded by PCGS and CAC-endorsed, this brilliant and lustrous Choice Uncirculated VAM-7A variety displays the Reverse of 1878 with a dash below the second 8 in the date. Double diagonal die clashing from Liberty's neck includes a faint partial n. A few light reeding marks on the chin and cheekbone are noted, the only bagmarks of note on the well-struck, blaze-white surfaces.

From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# AP7P, PCGS# 134049 Base PCGS# 7110

16261 1880-CC MS65+ PCGS. VAM-3A. Potent luster and uncommonly smooth surfaces confirm the high quality of this lower mintage Carson City Gem. The strike is good, although the centers retain glimpses of mint-made roller marks. NGC ID# 2542, PCGS# 7100

16262 1880-O MS64 PCGS. From a substantial mintage of 5.3 million pieces, the 1880-O Morgan dollar is still very scarce in grades above the MS64 level. This attractive Choice specimen exhibits sharply detailed design elements and lightly marked, lustrous surfaces, with hints of pale gold toning. PCGS has graded 44 numerically finer examples (2/17). NGC ID# 2543, PCGS# 7114

**1880-O Dollar, MS64+
High-End, Original Surfaces**

16263 1880-O MS64+ PCGS. CAC. Micro O. Less than 10% of the Choice submissions at PCGS have been awarded a Plus designation, and the certified population declines markedly in Gem condition, with those coins out of reach for the average collector. The added CAC sticker makes this piece even more apt for the collector seeking the best quality for the price. This MS64+ dollar is clearly on the verge of a higher grade with smooth, softly frosted surfaces that display speckled blue and gold toning around the margins. The devices are well-struck, and a reeding mark below the mouth is the only singular flaw. PCGS reports 44 finer grading events (2/17). NGC ID# 2543, PCGS# 7114

16264 1880-O MS63 Deep Mirror Prooflike ANACS. Deep Mirror Prooflike examples of the 1880-O Morgan are scarce. This Select coin displays sharp motifs and fully mirrored fields with dramatic cameo contrast. Rose-colored toning around the borders makes light, scattered abrasions over the interiors less noticeable. NGC ID# 2543, PCGS# 97115

16265 1880/79-O Crossbar, VAM-4, MS64 PCGS. CAC. A Top 100 Variety. Raised metal in the upper loop of the second 8 in the date is the crossbar of an underdigit 7 on this overdate variety, paired with a Micro O mintmark reverse. This Choice example displays careful preservation with radiant cartwheel luster and untuned, semireflective surfaces. A few minor marks do not diminish the flashy, brilliant-silver appeal.

Ex: Orlando Signature (Heritage, 7/2013), lot 4210.

From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 2543, PCGS# 133880 Base PCGS# 7116

16266 1880-S MS67+ PCGS. CAC. Intense, frosty mint luster radiates from both sides of this Plus-graded Superb Gem, with impeccably preserved surfaces that display subtle hints of pale gold and lavender toning. The design elements are sharply detailed and eye appeal is tremendous. NGC ID# 2544, PCGS# 7118

16267 1880-S MS66 Deep Prooflike NGC. CAC. Medium S. Frosty devices provide exemplary contrast with glassy fields. Fully struck and magnificently preserved, this brilliant Premium Gem would be a standout within a 19th century silver type set. NGC reports only 20 finer Deep Prooflike examples. CAC: 26 in 66 Deep Prooflike, 3 finer (2/17).

Ex: Sacramento ANA Signature (Heritage, 3/2011), lot 3891; San Francisco Signature (Heritage, 3/2014), lot 10792. NGC ID# 2544, PCGS# 97119

16268 1881 MS66 PCGS. Rich jade-green, fire-red, and dove-gray toning embraces this thoroughly lustrous and well struck Premium Gem. Remarkably smooth aside from moderate contact near the eagle's beak. NGC ID# 2546, PCGS# 7124

16269 1881 MS66 PCGS. This is a well-struck 1881 Morgan with blazing frost-white luster rolling over largely unabraded surfaces. Eye appeal is excellent. The 1881 is occasionally available in this grade for a price, but PCGS has seen only five Superb Gems finer (3/17). NGC ID# 2546, PCGS# 7124

16270 1881-CC MS66 NGC. VAM-4. Delicate golden toning visits this lustrous and nicely struck Premium Gem. The fields are smooth, and the cheek shows only incidental contact. A popular low-mintage Carson City issue, made available courtesy of the GSA auctions of the 1970s.
From The Martin Peterson Collection. NGC ID# 2549, PCGS# 7126

16271 1881-CC MS66+ PCGS. VAM-2. Minor wheat-gold toning visits portions of the central reverse, but this low-mintage Carson City dollar is mostly white. The strike is intricate, and the lustrous fields are remarkably smooth. Only wispy contact on the portrait precludes an even finer grade. NGC ID# 2549, PCGS# 7126

16272 1881-CC MS64 Deep Mirror Prooflike PCGS. CAC. A beautifully contrasted, frost-white Deep Mirror Prooflike Carson City dollar, showing a sharp strike and strong cameo qualities. A few scattered abrasions are in keeping with the grade. This piece is untuned save for a small coppery spot near the O in OF.
From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 2547, PCGS# 97127

1881-CC Morgan Dollar, MS65 Deep Mirror Prooflike Surfaces

16273 1881-CC MS65 Deep Mirror Prooflike PCGS. VAM-2. A band of die chips in the top loop of the second 8 in the date confirms the VAM-2 variety. The frosted and deeply impressed portrait of Liberty sits on deeply mirrored silver fields, frostlike with pale ivory-cream patina. Only minor abrasions visit the crisply struck, Gem Uncirculated surfaces. A well-preserved Carson City example for the Deep Mirror Prooflike collector. NGC ID# 2547, PCGS# 97127

16274 1881-O MS65 PCGS. Exquisite ocean-blue, rose-red, and lemon-gold patina consumes the obverse. The reverse remains brilliant. Crisply struck and highly lustrous with a smooth cheek and pleasing preservation. NGC ID# 2548, PCGS# 7128

16275 1881-O MS65+ PCGS. Despite its availability in lower grades, the 1881-O Morgan dollar is scarce above the MS65 grade level. This Plus-designated coin offers beautiful multicolor toning on the obverse with silvery brilliance across the reverse. The strike is above-average for the issue. PCGS reports 37 finer examples (2/17). NGC ID# 2548, PCGS# 7128

16276 1881-S MS67 NGC. CAC. This frosty, blazing-white Superb Gem displays amazing eye appeal and beautiful surface preservation — an ideal combination for type representation. A sharp strike completes the harmonic visual features. The availability of the 1881-S should not let this stand-out coin be passed by. NGC ID# 2549, PCGS# 7130

16277 1881-S MS67 PCGS. CAC. Beautiful multicolor toning encompasses this Superb Gem Morgan dollar type coin, accentuated by subtle reflectivity in the fields and beautifully preserved satin luster. The strike is sharp, and eye appeal excels. This coin is CAC-approved in a first generation holder. Worthy of a premium bid. NGC ID# 2549, PCGS# 7130

16278 1881-S MS67+ Prooflike NGC. CAC. This brilliant, high-end Superb Gem showcases sharp, satiny devices set amid prooflike fields. There are no distracting abrasions. NGC has seen only seven finer Prooflike representatives (1/17). NGC ID# 26G7, PCGS# 7131

16279 1882 MS66 PCGS. Vivid shades of magenta, violet, golden-tan, and lavender-gray toning blanket the virtually pristine surfaces of this delightful Premium Gem, with sharply detailed design elements and vibrant mint luster underneath. Overall visual appeal is terrific. PCGS has graded 10 numerically finer examples (2/17). NGC ID# 254A, PCGS# 7132

16280 1882 MS66 PCGS. Aquamarine, orange, and rose-red toning dominates the obverse. The reverse displays similar shades, but they are mostly limited to the lower periphery. A lustrous and well-struck silver type coin that exhibits outstanding eye appeal. NGC ID# 254A, PCGS# 7132

16281 1882 MS64 Deep Mirror Prooflike PCGS. The sharply detailed design elements of this attractive Choice specimen display a frosty texture that contrasts boldly with the reflective prooflike fields. Some minor, grade-consistent hairlines and contact marks are evident, mostly on the obverse. Population: 93 in 64 (4 in 64+) Deep Mirror Prooflike, 34 finer (2/17). NGC ID# 254A, PCGS# 97133

16282 1882-CC MS66+ PCGS. Beautiful, frosty mint luster and an impressively clean cheek on Liberty endorse the Plus designation from PCGS. The strike is sharp, and neither side is toned. The 1882-CC is available in MS66 but scarce finer. NGC ID# 254S, PCGS# 7134

1882-CC Morgan Dollar, MS67 Brilliant and Lustrous

16283 1882-CC MS67 NGC. VAM-5. A diagonal die scratch from the T in UNITED, and doubling on the 2 in the date, are the major attribution markers for VAM-5. This stone-white Superb Gem exhibits dazzling luster and a full strike. Marks are marginal, and the eye appeal is undeniable. High grade 1882-CC dollars are collectible due to the GSA distribution to collectors during the 1970s. NGC ID# 254S, PCGS# 7134

16284 1882-CC MS66 Prooflike PCGS. A splendid Premium Gem of this popular Carson City issue showing mirrored fields and satin devices. This boldly struck piece exhibits excellent contrast. Both sides are brilliant and untuned. NGC ID# 254B, PCGS# 7135

16285 1882-O MS65 Deep Mirror Prooflike ANACS. Glimpses of peach-gold patina visit the margins of this thoroughly lustrous New Orleans Gem. The strike is sharp, and the preservation is exemplary. Housed in a small-sized holder.
Ex: Indianapolis Central States Signature (Heritage, 4/2001), lot 6682; Chicago Signature (Heritage, 8/2011), lot 4539, which realized \$2,300.

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 254C, PCGS# 97137

16286 1882-O/S Recessed, VAM-4, MS64 PCGS. A Top 100 Variety. The center shaft of an earlier S is visible within the O mintmark. This Choice dollar is nearly all-brilliant, except for a blush of golden patina over the lower obverse. Satin luster radiates over typically defined motifs. Population: 60 in 64 (3 in 64+), 0 finer (2/17). NGC ID# 254D, PCGS# 133891 Base PCGS# 7138

16287 1882-O/S Recessed, Strong, VAM-4, MS64 PCGS. A Top 100 Variety. The eagle is heavily rusted on this variety, showing the crossbar of an underlying S within the primary O mintmark on the reverse. This is the most plentiful of the O Over S VAMs, but it is still elusive in the finer Mint State grades. This Choice example is lightly toned pale-gold with satiny underlying luster. The hair above Liberty's ear is slightly soft, but the surfaces are unusually clean for the grade.

Ex: *FUN Signature (Heritage, 1/2015)*, lot 5936.

From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 254D, PCGS# 133891 Base PCGS# 7138

16288 1882-S MS67+ PCGS. CAC. This glimmering Superb Gem is both Plus-graded and CAC-endorsed, and with the remarkably clean surfaces and beautiful rainbow border toning, it is not hard to see why. The vibrant colors are primarily on the obverse but do spill over slightly onto the reverse periphery. The strike is sharp, and the cartwheel effect is radiant. Eye appeal exceeds expectations — and expectations are high for an MS67+ CAC coin. NGC ID# 254F, PCGS# 7140

1882-S Dollar, MS68 Unsurpassable Type Coin

16289 1882-S MS68 NGC. VAM-20, R.3. Mintmark Tilted Far Left. Earthy shades of red, blue, and slate-gray surround the raised devices at the margins, while the lustrous and semireflective fields are only lightly toned and the frosted, smooth portrait of Liberty is nearly white. Only a handful of random, minuscule marks can be found with a lens, none of any significance. As is normal for the issue, the strike is just a bit short of full but still resoundingly sharp. While numerous Superb Gem examples of the 1882-S survive, relatively few pieces achieve the MS68 grade and no examples are certified in a higher numeric grade by either service. Census: 122 in 68 (2 in 68+, 8 in 68★), 0 finer (2/17). NGC ID# 254F, PCGS# 7140

16290 1883 MS67 PCGS. Bands of powder-blue, lemon-gold, fire-red, and apple-green alternate across the obverse. The reverse is brilliant save for a narrow arc of dusky olive-gold color across the lower dentils. Lustrous and well struck with nearly immaculate preservation. The motifs exhibit die rust, as made. NGC ID# 254G, PCGS# 7142

16291 1883 MS65 Deep Mirror Prooflike PCGS. The sharply detailed frosty design elements of this delightful Gem contrast boldly with the deeply reflective prooflike fields and the well-preserved surfaces show only minor hairlines and contact marks. PCGS has graded 14 numerically finer examples (2/17). NGC ID# 254G, PCGS# 97143

16292 1883 MS65 Deep Prooflike NGC. An exquisite Gem with captivating watery fields which show modest contrast against the frosty devices. Scattered small marks contribute to the grade as a collective, though none warrant individual mention. Census: 38 in 65 (1 in 65+) Deep Prooflike, 8 finer (2/17). Ex: *Long Beach Signature (Heritage, 9/2008)*, lot 9157; *FUN Signature (Heritage, 7/2009)*, lot 864; *Chicago Signature (Heritage, 8/2011)*, lot 4550, which realized \$1,265.

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 254G, PCGS# 97143

1883-CC Silver Dollar, MS67 VAM-8A, Nearly Pristine

16293 1883-CC MS67 PCGS. VAM-8A. A band of lavender, rose, orange, and blue-green toning visits the upper-left obverse. The remainder of this high-grade Carson City type coin is brilliant. Although the 1883-CC eventually emerged in quantity from the GSA holdings, relatively few such pieces are comparable in quality with the present exceptional Superb Gem. VAM-8A is an interesting variety with a clashed N in IN, a lightly repunched date, and a small dash below the second 8. NGC ID# 254J, PCGS# 7144

16294 1883-CC MS66+ Prooflike PCGS. Ex: California. Graded MS66+ Prooflike and in all aspects deserving of that grade, this high-end 1883-CC Morgan offers brilliant, frosty luster on the devices that produces modest contrast with the reflective fields. The strike is sharp, and the fields show far fewer little grazes and ticks than are often seen on Prooflike dollars in this grade. PCGS reports nine finer Prooflike examples (2/17). NGC ID# 254H, PCGS# 7145

16295 1883-O MS65 Deep Mirror Prooflike PCGS. CAC. The sharply detailed design elements of this spectacular Gem display a rich coat of mint frost that contrasts boldly with the deeply reflective prooflike fields. A few minor signs of contact are evident, but overall eye appeal is outstanding. PCGS has graded 20 numerically finer examples (2/17). NGC ID# 254J, PCGS# 97147

16296 1883-O MS65 Deep Mirror Prooflike PCGS. CAC. VAM-2. Faint olive-green toning visits this reflective and well struck New Orleans Gem. Carefully preserved and attractive. Certified in a green label holder. VAM-2 shows a small dash below the second 8 in the date.

Ex: *FUN Signature (Heritage, 7/2010)*, lot 4118; *Chicago Signature (Heritage, 8/2011)*, lot 4560, which realized \$2,300.

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 254J, PCGS# 97147

16297 1883-S MS61 PCGS. CAC. The 1883-S is a better date in Uncirculated condition. This CAC-approved coin is fully struck and radiantly lustrous. Mostly brilliant interiors cede to rose-gold borders, while the fields emit a hint of reflectivity. Abrasions are minimal, mostly limited to light chatter on Liberty's cheek.

From The Pellegrini Collection, Part IV. NGC ID# 254K, PCGS# 7148

16298 1883-S MS62 NGC. A lustrous and snow-white example that shows the sharp strike usual for San Francisco silver dollars of the era. A line on the cheek and minor field marks near the nose determine the grade. The 1883-S is intermediate in conditional rarity between the common 1882-S and the rare 1884-S. NGC ID# 254K, PCGS# 7148

16299 1883-S MS63 PCGS. The obverse displays a translucent veil of predominantly gold-gray patina, while the reverse is nearly brilliant. A handful of niggling field abrasions contribute to the grade, as do a few small reeding marks, but the strike is reasonably sharp and the eye appeal is plentiful.

From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 254K, PCGS# 7148

1883-S Morgan Dollar, MS64
Underrated, Elusive Issue in High Grade

16300 1883-S MS64 PCGS. The 1883-S Morgan dollar is much more difficult to locate in high grade than its substantial mintage of 6.2 million pieces would suggest. Mint State survivors tend to show excessive bagmarks, indicative of rough storage and transport over the years. This attractive Choice example offers well-detailed design elements and vibrant mint luster throughout. The surfaces are lightly marked, with a few minor marks and luster grazes on the bust, and some subtle accents of greenish-gold toning. PCGS has graded 23 numerically finer examples (2/17). NGC ID# 254K, PCGS# 7148

1883-S Silver Dollar
MS62 Deep Prooflike

16301 1883-S MS62 Deep Prooflike NGC. The better date 1883-S is a great rarity with Deep Prooflike surfaces. This flashy and carefully preserved silver dollar exhibits rich peripheral orange-gold, lilac-red, and forest-green toning. The eye appeal is undeniable. Housed in a prior generation holder. Census: 2 in 62 Deep Prooflike, 1 finer (2/17).
From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 254K, PCGS# 97149

16302 1884 MS66+ PCGS. This delightful Plus-graded Premium Gem exhibits sharply detailed design elements throughout and an interesting network of spidery die cracks through the letters in the reverse legend. Other small cracks run through the bottom of the numerals in the date and through the bust tip to star 1. The well-preserved surfaces radiate vibrant mint luster and eye appeal is terrific. NGC ID# 254L, PCGS# 7150

16303 1884 MS65 Deep Mirror Prooflike ANACS. VAM-2. A dash just below the second 8 in the date attributes the readily recognized VAM variety. This sharply struck Gem has light peach patina across the margins. The fields are prominently mirrored. Housed in a small-sized holder.
Ex: Long Beach Bullet (Heritage, 10/2000), lot 465, which realized \$977.50. NGC ID# 254L, PCGS# 97151

16304 1884 MS65 Deep Mirror Prooflike ANACS. This lustrous Philadelphia Morgan has a good strike and attractive peripheral lilac-red and apple-green toning. Well preserved despite delicate contact on the cheek. Only a tiny percentage of 1884 dollars are certified as DMPL. Housed in a small-sized holder.
Ex: Chicago Signature (Heritage, 8/2011), lot 4568, which realized \$1,380.
From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 254L, PCGS# 97151

1884-CC Silver Dollar, MS67
High Grade Carson City Type Coin

16305 1884-CC MS67 NGC. VAM-2. Orange toning adorns the right obverse field. The left obverse is jade-green, and Liberty's neck curls exhibit lavender-red shades. The reverse displays only light butter-gold toning. A lustrous and well struck Superb Gem with remarkably unblemished surfaces. VAM-2 is interesting for its repunched 1 in the date, along with a series of small die breaks along the bottom of the date digits. NGC ID# 8BBF, PCGS# 7152

16306 1884-CC MS65 Deep Mirror Prooflike PCGS. A sharp, brilliant Gem with frosty devices that starkly contrast with the liquidlike mirroring in the fields. Appreciable cameo contrast appears on each side. Deep Mirror Prooflike examples of the 1884-CC Morgan are elusive in finer grades.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 254M, PCGS# 97153

16307 1884-CC MS65 Deep Mirror Prooflike PCGS. VAM-6. Brilliant, well struck, and prominently mirrored. Although regarded by many as a Carson City type issue, the 1884-CC has many interesting die varieties worthy of specialist attention. VAM-6 exhibits myriad die lines near the tail feathers, and the first C in the mintmark is repunched. Certified in an old green label holder.
From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 254M, PCGS# 97153

16308 1884-CC MS66 Deep Mirror Prooflike PCGS. VAM-4. A brilliant Carson City type coin with dazzling field reflectivity. A clean cheek and generally smooth fields confirm the lofty third-party grade. VAMworld.com describes VAM-4 as "[a] vertical spike from [the] top of the 1." In addition, a broad horizontal die line passes through the E in STATES. NGC ID# 254M, PCGS# 97153

16309 1884-S AU58 NGC. An outstanding near-Mint example of the conditionally rare 1884-S Morgan dollar, this one has lovely silver surfaces. Both sides are essentially untoned, save for faint champagne overtones. This is an important opportunity to save substantially from the five-figure price tag of a full Mint State piece. NGC ID# 254P, PCGS# 7156

16310 1884-S AU58 PCGS Secure. The fields are reflective with slight chatter from brief circulation, yet they retain their brilliant luster and only a glimpse of light-gold patina exists on the rims. Elusive in full Mint State and incrementally much more expensive when Uncirculated, the 1884-S remains in strong demand. This sharply struck near-Mint example is an ideal alternative to a lower-level Mint State coin, housed in a PCGS Secure holder.
From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 254P, PCGS# 7156

16311 1884-S AU58 NGC. A trace of rub appears on the high points of this frosty and lustrous 1884-S Morgan dollar. An important condition rarity, this issue is elusive in higher grades. This piece has delicate reddish-gold toning, primarily on the obverse. NGC ID# 254P, PCGS# 7156

16312 1884-S AU58 NGC. Substantial luster remains on this near-Mint example, with the fields displaying appreciable reflectivity. The strike is sharp, and the surfaces appear undipped with a hint of light golden toning. Eye appeal exceeds that of many other 1884-S dollars in this grade.

From The Pellegrini Collection, Part IV. NGC ID# 254P, PCGS# 7156

16313 1884-S AU58 PCGS. CAC. Both sides retain nearly all of the coin's original luster with very little wear. The surfaces are lightly abraded with small ticks and marks visible with a glass, yet the in-hand silver brilliance and flash are impressive for a near-Mint coin. We note a minor nick in the dentils beneath the date. CAC endorsed for its radiant eye appeal and strong strike. NGC ID# 254P, PCGS# 7156

16314 1884-S AU58 PCGS. CAC. Walnut-tan and powder-blue shades embrace this coruscating and minimally marked Borderline Uncirculated representative. The 1884-S is notorious for its unavailability in Mint State, and most advanced collectors select an example just shy of that level. NGC ID# 254P, PCGS# 7156

16315 1884-S AU58 Prooflike NGC. The 1884-S is known for its formidable rarity in Mint State. Prooflike pieces are even rarer, especially with the lovely peripheral toning of the present Borderline Uncirculated example. Orange-gold, violet-red, and powder-blue patina hugs the borders. Contact is inconsequential aside from a field line near the chin. Encapsulated in a prior generation holder. Census: 19 in 58 Prooflike, 10 finer (2/17).

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 254P, PCGS# 7157

16316 1885 MS67 PCGS. VAM-3. Sea-green and olive-gold bathe this lustrous and well-struck silver dollar. The pattern of lavender toning near the left (facing) wingtip is associated with long-term storage near the fabric of an original bag. The 5 in the date is lightly repunched north. NGC ID# 254R, PCGS# 7158

16317 1885 MS67 PCGS. CAC. 30th Anniversary Green Label Holder. Light golden-brown patina visits the margins of this lustrous and boldly struck Superb Gem. The preservation is exceptional, and the eye appeal is outstanding. NGC ID# 254R, PCGS# 7158

16318 1885 MS67 PCGS. CAC. This magnificent Superb Gem Morgan dollar exhibits razor-sharp definition on all design elements and the impeccably preserved surfaces radiate vibrant mint luster throughout. PCGS has graded three numerically finer examples (2/17). NGC ID# 254R, PCGS# 7158

16319 1885 MS66 Deep Prooflike NGC. Ocean-blue and rose-gold shades grace the borders of this high-grade silver dollar. Nicely struck and lustrous with an essentially pristine obverse field. Housed in a former generation holder. Census: 54 in 66 (2 in 66+ Deep Prooflike, 2 in 66★, 1 in 66+★).

Ex: Chicago Signature (Heritage, 8/2011), lot 4582, which realized \$2,070.

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 45WM, PCGS# 97159

16320 1885-CC MS65 PCGS. CAC. VAM-2. A brilliant Gem that boasts booming luster, a good strike, a clean cheek, and a smooth obverse field. We note a few parallel lines above the ear. Lowest mintage among the Carson City Morgan issues. NGC ID# 254S, PCGS# 7160

16321 1885-CC MS66 PCGS. VAM-3. A lustrous snow-white Premium Gem. The fields are practically pristine, and the cheek shows only incidental contact. The strike is good, although faint mint-made roller marks emerge on the jaw beneath a lens. The low-mintage 1885-CC is a perennial collector favorite. NGC ID# 254S, PCGS# 7160

16322 1885-CC MS66+ PCGS. Radiant luster exudes from the color-free surfaces of this high-end Premium Gem. A few minor grazes are visible on the chin and neck. Finer 1885-CC dollars are scarce.

From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 254S, PCGS# 7160

**1885-CC Dollar, MS66+
Fully Brilliant**

16323 1885-CC MS66+ PCGS. CAC. The GSA release of the 1970s saw the distribution of more than 65% of the original 228,000-coin mintage of 1885-CC dollars. Premiums Gems are readily collectible, but Plus-designated and CAC-approved MS66 representatives provide a greater challenge. This strongly impressed Carson City dollar is fully brilliant and thickly frosted without any major impairments. Light chatter occurs at the upper reverse. NGC ID# 254S, PCGS# 7160

16324 1885-CC MS64 Deep Mirror Prooflike PCGS. VAM-3. Splendid field reflectivity and lightly iced motifs ensure the beauty of this boldly struck Carson City near-Gem. The reverse is impressively unabraded, and the obverse has only faint distributed marks. Housed in a green label holder.

Ex: Long Beach Signature (Heritage, 9/2008), lot 2750; Chicago Signature (Heritage, 8/2011), lot 4596.

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 254S, PCGS# 97161

16325 1885-O MS67 PCGS. VAM-2. Frosted on portrait and eagle with cartwheel luster all around, occasional hints of cloud-white and gold-gray patina visit the shimmering silver surfaces of this Superb Gem New Orleans issue. The flag on 5 in the date is doubled, representative of the VAM-2 variety. PCGS reports just one numerically finer example.

Ex: ANA Signature (Heritage, 2/2014), lot 4798.

From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 254T, PCGS# 7162

**1885-S Dollar, MS64 Prooflike
Sharply Defined, Black-and-White Contrast**

16326 1885-S MS64 Prooflike PCGS. CAC. Bowers estimated in 1993 that 2,000 to 4,000 Prooflike 1885-S dollars survived, while PCGS now pegs the total at 575 coins. Either way, contrasted representatives are many times scarcer than their uncontrasted counterparts, which survive by the tens of thousands. This is an eye-appealing near-Gem dollar with stark black-and-white surfaces. Liberty's hair strands and the eagle's feathers exhibit crisp definition. Population: 56 in 64 (1 in 64+) Prooflike, 13 finer. CAC: 8 in 64, 0 finer (2/17). NGC ID# 254U, PCGS# 7165

16327 1886-O MS62 PCGS. This pleasing New Orleans Morgan dollar exhibits brilliant silver luster and above-average design definition. Scattered marks on each side are consistent with the grade. NGC ID# 254W, PCGS# 7168

16328 1886-O MS62 PCGS. The strike is sharp for this O-Mint issue, with above-average definition over the ear and sharply struck talons on the eagle. Brilliant and frosty, with a few light abrasions that define the grade, yet this coin has Mint-fresh appeal not often present on an 1886-O.

From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 254W, PCGS# 7168

16329 1886-O MS62 PCGS. The high-mintage 1886-O is plentiful in VF, but Uncirculated examples are scarce, and Gems are formidable rarities. This lustrous New Orleans dollar offers light to medium olive-gold toning. The strike shows minor blending at the centers, and marks are minor for the designated grade. NGC ID# 254W, PCGS# 7168

16330 1886-O MS62 PCGS Secure. Lustrous and well struck with essentially brilliant surfaces that reveal a slight degree of golden color on each side. This example shows a few scattered marks, but these are certainly not excessive for the grade. The 1886-O is a slightly scarcer New Orleans issue in Mint State. NGC ID# 254W, PCGS# 7168

16331 1886-O MS63 PCGS. A fairly well-struck, brilliant example of this better New Orleans issue, showing satin luster and minimal abrasions for the grade. The 1886-O is increasingly scarce in finer grades. Among MS63 coins, this piece is quite appealing.

From The Pellegrini Collection, Part IV. NGC ID# 254W, PCGS# 7168

16332 1886-O MS60 Prooflike NGC. The 1886-O has a large mintage but is curiously rare in Mint State. Prooflike pieces are very rare. This unworn New Orleans silver dollar has dusky almond-gold toning and a few unobtrusive marks on the portrait.

Ex: Donald E. Bently Collection (Heritage, 2/2014), lot 4169.

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 254W, PCGS# 7169

1886-O Dollar, MS60 Deep Prooflike Only Eight Total Deep Prooflike Pieces at NGC

16333 1886-O MS60 Deep Prooflike NGC. The 1886-O Morgan is rarely encountered with Deep Prooflike fields and is highly sought-after with such in any grade. Rich blue-green peripheral toning around light golden centers accents the deeply mirrored fields of this well-struck representative. Scattered, faint surface grazes define the grade, though they are collectively unobtrusive. Census: 2 in 60 Deep Prooflike, 6 finer (2/17).

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 254W, PCGS# 97169

16334 1886-S MS63 Deep Prooflike NGC. VAM-1A. The "Lines in 6" variety. The 1886-S is a lower mintage issue, and only a minuscule percentage of examples have been designated as Deep Prooflike. This brilliant and flashy silver dollar has a good strike and a few small left obverse abrasions. Census: 20 in 63 Deep Prooflike, 15 finer (2/17).

Ex: FUN Signature (Heritage, 1/2012), lot 7071, which realized \$1,495.

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 4625, PCGS# 97171

16335 1887 MS67 PCGS. This available date becomes conditionally elusive in Superb Gem condition, and PCGS has seen only a single coin numerically finer than the present (2/17). The strike is well-executed, and each side displays vibrant luster with light golden toning. NGC ID# 27Y3, PCGS# 7172

1887 'Donkey Tail' Dollar, VAM-25A MS61, Mint State Rarity

16336 1887 Donkey Tail, VAM-25A, MS61 PCGS. A Top 100 Variety. The "Donkey Tail" is named after the die break beneath the right base of the D in DOLLAR. Initially designated as VAM-1A, but reclassified after it was proven to be a later die state of VAM-25. VAMworld.com enthuses, "Mint State Donkey Tails are truly ultra rare!" For the variety, the most frequently certified grade at PCGS is XF45. This lustrous and brilliant example is lightly abraded for the grade though the centers are softly brought up and the upper cheek has a shallow mint-made strike-through. Population: 8 in 61, 8 finer (2/17).

Ex: Houston Signature (Heritage, 12/2013), lot 3735, which realized \$3,818.75. NGC ID# 254Y, PCGS# 133907 Base PCGS# 7172

16337 1887/6-O VAM-3 MS63 PCGS. CAC. A Top 100 Variety. Pastel ice-blue and rose-gold shades invigorate the obverse while the reverse remains brilliant. Lustrous and typically struck with a smooth reverse and moderate obverse grazes. CAC endorsed for quality, a Guide Book variety.

Ex: Houston Signature (Heritage, 12/2013), lot 4123.

From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 2552, PCGS# 133912 Base PCGS# 7178

16338 1887-O MS65 PCGS. This satiny Gem shows a clean cheek and well-defined design elements. The 1887-O is challenging in this grade, and PCGS has seen only a dozen numerically finer coins (2/17). This example is essentially brilliant. NGC ID# 2547, PCGS# 7176

1887-O Dollar, MS64 Deep Mirror Prooflike Deeply Reflective and Brilliant

16339 1887-O MS64 Deep Mirror Prooflike PCGS. CAC. This near-Gem is brilliant throughout with bold mirrors and attractively frosted central devices. Horizontal roller marks on Liberty's cheek are a natural part of the coin and do not represent post-striking damage. PCGS has graded just eight numerically finer Deep Mirror Prooflike examples for the issue (3/17).

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 2552, PCGS# 97177

16340 1887-S MS65 PCGS. This blazing frost-white Gem is undipped, and there is a tiny grease streak on Liberty's jaw from the striking process to prove it. A dazzling cartwheel effect illuminates mostly untouched surfaces. The coin must be held at a certain angle to reveal a few minor grazes that deny a finer grade. PCGS has seen only 33 higher-grade submissions (2/17). NGC ID# 2554, PCGS# 7180

16341 1887-S MS65 PCGS. Gem-quality 1887-S dollars are elusive, and finer pieces are genuinely rare. This is an attractive and sharply struck MS65 with delightful lilac and pale gold toning on both sides. The surfaces are exceptional, and the quality is virtually unimprovable. PCGS reports 33 finer coins, NGC just nine (2/17). *Ex: FUN Signature (Heritage, 1/2005), lot 11407.*
From The R. Thayer Sheets Yorktown Collection. NGC ID# 2554, PCGS# 7180

16342 1887-S MS65+ PCGS. CAC. The availability of the 1887-S silver dollar declines somewhat abruptly in MS65, and finer coins are rare. This high-end CAC Gem displays a bold strike and brilliant, frosty mint luster. A few faint surface grazes are all that deny a full MS66 designation. NGC ID# 2554, PCGS# 7180

16343 1887-S Doubled Date, VAM-4, MS65+ PCGS. A Hot 50 Variety. Undesignated by PCGS as VAM-4, but repunching is obvious northwest of the 1 and 7 in the date. Splashes of golden-brown, lavender, and jade-green toning endow the margins of this lustrous and well-preserved Gem. NGC ID# 2554, PCGS# 134004 Base PCGS# 7180

16344 1888 MS66+ PCGS. CAC. This high-end 1888 silver dollar is well-struck and vibrantly lustrous. Liberty's cheek is clean, and a few faint grazes in the left obverse field are hidden by dusky rainbow toning that encompasses much of that side of the coin. The reverse exhibits delicate golden border toning with a brilliant interior. PCGS reports 44 Superb Gems finer (2/17). NGC ID# 26KF, PCGS# 7182

16345 1888 MS65 Deep Prooflike NGC. A ring of golden color encircles this frosty and brilliant 1888 Gem Morgan dollar with Deep Prooflike surfaces. The centers display crisp definition and the eye appeal is excellent. Housed in a former generation holder. Census: 29 in 65 Deep Prooflike, 7 finer (2/17). NGC ID# 2555, PCGS# 97183

16346 1888-O MS66 PCGS. Although not truly scarce in MS66, the 1888-O Morgan dollar is unknown finer at PCGS (2/17). This high-end example offers uncommonly well-struck devices for a New Orleans issue of this period, with hints of champagne toning across softly frosted surfaces. There are no distracting abrasions. NGC ID# 2556, PCGS# 7184

16347 1888-O MS66 PCGS. 30th Anniversary Green Label Holder. A colorful New Orleans type coin. Lime-green, orange-gold, and violet-red patina consumes both sides. The obverse appears immaculate, and the reverse displays only occasional incidental contact. NGC ID# 2556, PCGS# 7184

**1888-O Dollar, VAM-4, AU58
Hot Lips, Doubled Die Obverse**

16348 1888-O Hot Lips, Doubled Die Obverse, VAM-4, AU58 PCGS. CAC. A Top 100 Variety. This collectible and sought-after variety, discovered in 1963, features broad doubling on Liberty's lips, nose, and chin. Brightly lustrous and typically defined for a New Orleans dollar, this near-Mint offering exhibits light marks throughout without a hint of color. Endorsed by CAC for quality within the grade. Population: 8 in 58, 6 finer (2/17). NGC ID# 2556, PCGS# 133919 Base PCGS# 7308

16349 1888-S MS64 PCGS. CAC. Vibrant cartwheel luster sweeps this brilliant and nicely struck Choice silver dollar. Exceptionally free from marks, as confirmed by the CAC seal. The 1888-S is a lower mintage issue that becomes very scarce in better Mint State grades. NGC ID# 2557, PCGS# 7186

16350 1889-CC VF35 PCGS. A Choice VF representative of this popular key Carson City issue. The cream-gray surfaces are mildly glossy, and are refreshingly unabraded save for a small edge knock above the second T in STATES.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 2559, PCGS# 7190

16351 1889-CC VF35 PCGS. A lightly abraded example of the most desirable Carson City Morgan emission. Golden-brown and aquamarine toning visit the borders, but the fields and motifs are stone-gray. Traces of luster accompany design recesses.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 2559, PCGS# 7190

16352 1889-CC VF35 PCGS. Pewter-gray interiors cede to golden-toned borders on this Choice VF 1889-CC silver dollar, attesting to the originality of the patina. Wear is light and consistent with the grade. An excellent, nearly XF example of this key Carson City issue. NGC ID# 2559, PCGS# 7190

16353 1889-CC XF40 ANACS. Hints of luster remain in the protected regions of the fields on this 1889-CC Morgan dollar, while the devices remain unusually sharp for the XF grade level. Dusky champagne toning overall yields to deeper lavender and sea-green hues along the upper obverse and lower reverse borders. NGC ID# 2559, PCGS# 7190

16354 1889-CC XF40 PCGS. Some light wear shows on the high points of the design elements, but this attractive XF specimen retains much of its original design detail and mint luster. A few hints of lime-green and pale gold toning grace the peripheries, while the centers remain mostly brilliant. This lightly abraded key will be a welcome addition to a fine collection of Morgan dollars.
Ex: Long Beach Signature (Heritage, 5/2012), lot 4328.
From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 2559, PCGS# 7190

16355 1889-CC XF40 PCGS. A pleasing XF representative of this important Carson City key, with lightly worn and lightly abraded surfaces that show attractive shades of lavender-gray and golden-tan toning. From a mintage of 350,000 pieces. NGC ID# 2559, PCGS# 7190

16356 1889-CC — Filed Rims — Genuine PCGS. AU Details. VAM-2A. This clashed letter variety was first reported by Mark Kimpton in October 2004. The 1889-CC is the rarest Carson City Morgan dollar, and lightly circulated examples are desirable. The present piece is bright and semiprooflike, and displays subtle rim filing near the N in UNUM and the T in UNITED.
From The R. Thayer Sheets Yorktown Collection.

16357 1889-CC — Damage — Genuine PCGS. AU Details. Extensive tooling appears on the surfaces of this distinctive Carson City Morgan dollar key. The obverse is toned medium gray with peripheral sea-green, while the reverse exhibits cinnamon, maroon, and teal toning.
From The Pellegrini Collection, Part IV.

1889-O Silver Dollar, MS65 Virtually Mark-Free and Brilliant

16358 1889-O MS65 PCGS. A brilliant and dazzling-white 1889-O, entirely untoned if not for a faint blush of gold on Liberty's cheek. The frosted surfaces are exceptionally free of any marks, while Liberty's cheek and neck are undisturbed. A bit of weakness over the ear and at the eagle's legs and talons are the only compromises to a sharp strike, not unexpected for this New Orleans issue that was minted in such large quantity. Few examples survive any finer. PCGS reports just 12 coins at MS66 and none numerically higher (2/17). NGC ID# 255A, PCGS# 7192

1889-O Silver Dollar, MS65 Original Border Toning

16359 1889-O MS65 PCGS. Most Uncirculated 1889-O Morgan dollars grade no better than MS64. This scarce Gem is among the finest that most collectors will be able to acquire, as higher-grade coins are decidedly rare and their prices reflect such. The coin has a clean cheek and frosty, original mint luster. The interiors are mostly brilliant, but the borders yield thin multicolor ribbons of toning. PCGS has seen only a dozen numerically finer submissions (3/17). NGC ID# 255A, PCGS# 7192

16360 1889-O MS63 Deep Prooflike NGC. Very seldom are 1889-O dollars seen with this stark degree of Deep Prooflike contrast. Frosted design elements are boldly impressed and surrounded by watery fields. A brilliant, lightly marked example with great eye appeal. Census: 26 in 63 (1 in 63+) Deep Prooflike, 20 finer (2/17). NGC ID# 45YN, PCGS# 97193

16361 1889-S MS65 PCGS. This is a lustrous Gem 1889-S dollar with mostly brilliant surfaces that show a few wisps of gold on the obverse. Slight strike weakness is seen on the hair above Liberty's ear. The 1889-S is collectible in this grade but will be out of reach for many collectors any finer. NGC ID# 255B, PCGS# 7194

16362 1889-S MS63 Deep Mirror Prooflike PCGS. Ex: Key West Collection. The Deep Mirror Prooflike surfaces of this Select example provide this faintly toned piece with lovely eye appeal. An intricate strike is an additional attribute. A few as-made strike-throughs are present. Dispersed marks and grazes held this lovely piece from a higher grade. Population: 18 in 63 Deep Mirror Prooflike, 25 finer (2/17).

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 255B, PCGS# 97195

16363 1890 MS65 PCGS. A radiant cartwheel effect illuminates brilliant, frosty luster on this Gem 1890 Morgan, while well-struck design elements show only the most trivial signs of surface contact. Available in this grade, the 1890 silver dollar is extremely rare finer, with PCGS reporting only five such pieces, all MS66 (2/17). NGC ID# 255C, PCGS# 7196

16364 1890 MS65+ PCGS. CAC. This Philadelphia dollar exhibits stone-gray devices and dusky orange-gold fields. The borders display glimpses of cobalt-blue toning. Lustrous and virtually pristine aside from a single hair-thin vertical line below the eye. NGC ID# 255C, PCGS# 7196

16365 1890 MS64 Deep Prooflike NGC. Light golden-brown and blue-green toning embraces the margins of this flashy Choice silver dollar. The strike shows slight blending at the centers, but the preservation is outstanding for the designated third-party grade, especially on Liberty's cheek. Census: 36 in 64 (1 in 64★) Deep Prooflike, 2 finer (2/17).

Ex: *Chicago Signature (Heritage, 8/2011), lot 4649, which realized \$1,207.50.*

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 3VX7, PCGS# 97197

16366 1890-CC MS64 PCGS. This Choice 1890-CC dollar is sharply struck, but the chief visual appeal comes from the frosty, glowing mint luster that is untuned across much of each side. Yellow-gold peripheral hues frame the interiors, and grade-limiting abrasions are minimal. NGC ID# 255D, PCGS# 7198

1890-CC Dollar, MS65+ Brilliant Carson City Representative

16367 1890-CC MS65+ PCGS. Carson City officials accomplished a production of 2.3 million Morgan dollars in 1890. Many bags remained on-hand at the Treasury and were released throughout the mid-20th century. Nevertheless, comparable Gems are very scarce. This brilliant MS65+ representative is awash in lively luster, illuminating well-struck motifs with just a touch of incompleteness over the centermost areas. Faint chatter in the fields barely limits the grade. PCGS shows 16 higher grading events (3/17). NGC ID# 255D, PCGS# 7198

16368 1890-CC MS64 Prooflike PCGS Secure. Prooflike 1890-CC Morgan dollars are seldom encountered in grades above MS64. This attractive Choice specimen offers sharply detailed, frosty design elements and deeply reflective fields, with bold contrast. The surfaces show only minor, scattered contact marks, under delicate shades of pale gold patina. PCGS has graded 17 numerically finer examples (2/17). NGC ID# 255D, PCGS# 7199

16369 1890-CC MS64 Prooflike PCGS. This cameo-contrasted near-Gem 1890-CC dollar displays mostly brilliant surfaces but with a halo of golden peripheral toning. Scattered light marks define the grade. Prooflike examples of this date are scarce in high grade, with PCGS having seen only 17 finer than the present (2/17).

From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 255D, PCGS# 7199

16370 1890-CC MS63 Deep Mirror Prooflike PCGS. VAM-3, Repunched Date. The 90 in the date is repunched at the base of the digits. Prooflike mirroring in the fields is so deep as to produce a stark cameo appearance, while the only toning on this coin is light rose-gold color that emerges from the rims. The strike is sharp. Grade-limiting abrasions affect the obverse portrait. NGC ID# 45YV, PCGS# 97199

16371 1890-CC MS63 Deep Mirror Prooflike PCGS. A stone-white Carson City dollar that demonstrates noticeable contrast between the icy devices and flashy fields. Occasional faint marks fail to challenge the grade. Finer Deep Mirror Prooflike 1890-CC dollars are elusive.

Ex: FUN Signature (Heritage, 1/2010), lot 2969; Chicago Signature (Heritage, 8/2011), lot 4659.

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 45YV, PCGS# 97199

16372 1890-CC MS63 Deep Mirror Prooflike PCGS. CAC. Light rose-red toning visits the borders of this primarily brilliant Carson City dollar. Dazzling field reflectivity provides exceptional eye appeal. Lightly marked overall, though we note moderate marks on Liberty's chin and the field above the arrowheads. NGC ID# 45YV, PCGS# 97199

16373 1890-CC Tail Bar, VAM-4, Top 100, MS63 PCGS. A Top 100 Variety. VAM-4 shows a heavy die gouge connecting the eagle's tailfeathers and the fletchings to the wreath left of the bow. Tail Bar coins are scarce above MS63, but this piece remains a highly collectible example. The strike is sharp and the luster frosty. Scattered abrasions on the obverse define the grade. NGC ID# 255D, PCGS# 133934 Base PCGS# 87198

16374 1890-CC Tail Bar, VAM-4, MS63 PCGS. A Top 100 Variety. A Select example displaying the popular tail bar die gouge, this coin exhibits a sharp strike for the issue and virtually untuned surfaces save for areas of faint gold color at portions of the extreme outer edges. Minor marks and grazes, including a few on Liberty's face, may limit this lustrous 1890-CC from a higher grade, yet the eye appeal cannot be denied.

Ex: The Deer Lake Collection/FUN Signature, (Heritage, 1/2014), lot 5822.

From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 255D, PCGS# 133934 Base PCGS# 87198

16375 1890-O MS65 PCGS. VAM-31. An essentially brilliant New Orleans Gem. The strike is bold, and the cartwheel luster is imposing. Contact is chiefly confined to the field near the R in DOLLAR. VAM-31 is noted for minor repunching above the 9 in the date. NGC ID# 255E, PCGS# 7200

16376 1890-O MS65 ★ NGC. VAM-31. The top of the 9 is lightly repunched. A glimpse of golden-brown toning adorns the upper obverse margin, but this thoroughly lustrous Gem is predominantly white. The strike shows slight incompleteness at the centers, but the fields are uncommonly smooth, and the portrait is also unblemished. NGC ID# 255E, PCGS# 7200

16377 1890-O MS64 Deep Mirror Prooflike PCGS. Scarce with deeply mirrored fields, this piece is also noticeably frosted. The strike is soft, as usually seen, with light roller marks over the ear of Liberty. One mark is noted on the lower portion of the eagle's breast.

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 255E, PCGS# 97201

16378 1890-S MS65 Prooflike PCGS. A wisp of gold patina graces the portrait, but this flashy Gem is otherwise brilliant. The strike is exemplary, and marks are limited to minor contact on the upper left obverse field. Seldom seen at this grade level. Population: 17 in 65 Prooflike, 4 finer (2/17).

Ex: Stamford Coinfest Signature (Heritage, 10/2010), lot 4274; Long Beach Signature (Heritage, 9/2011), lot 3684.

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 255F, PCGS# 7203

16379 1890-S MS64 Deep Prooflike NGC. The "S" mintmark on the reverse of this lovely dollar is the only feature that distinguishes this piece from a proof dollar. The strike is razor-sharp, the fields are blatantly mirrored, and marks are trivial aside from field contact below the chin. Census: 31 in 64 (1 in 64+) Deep Prooflike, 7 finer (2/17).

Ex: Chicago Central States Signature (Heritage, 4/2014), lot 4857, which realized \$1,762.50.

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 255F, PCGS# 97203

1891 Silver Dollar, MS65 Rare in Finer Condition

16380 1891 MS65 PCGS. A better date in high grade, the 1891 Morgan dollar is infrequently available in MS65 and extremely rare finer. This Gem offers frosty, brilliant mint luster with only a few trivial surface grazes. The hair above Liberty's ear shows the usual minor strike softness. PCGS and NGC each have seen only three numerically finer submissions (3/17). NGC ID# 255G, PCGS# 7204

16381 1891-CC MS64 PCGS. Softly frosted luster rolls around vibrant surfaces on this Choice 1891-CC Morgan dollar. Wisps of golden toning appear throughout, and abrasions are minor. Strike weakness is seen on the central high points as usual. NGC ID# 255H, PCGS# 7206

16382 1891-CC MS64+ PCGS. This is a well-struck example of this later Carson City Morgan, showing frosty original luster with tinges of golden toning about the borders. A few light marks on Liberty's cheek define the grade, but eye appeal nonetheless surpasses that of most other near-Gems. NGC ID# 255H, PCGS# 7206

16383 1891-CC MS64+ PCGS. This is a well-struck, frosty 1891-CC dollar with mostly untuned surfaces and minimal abrasions for the grade. The Plus designation places this coin near the Gem level. High-end Carson City dollars from the final dates of the series are elusive.

From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 255H, PCGS# 7206

16384 1891-CC MS62 Deep Mirror Prooflike PCGS Secure. An impressive MS62 example of this later Carson City issue, with well-detailed, richly frosted design elements that contrast boldly with the deeply reflective prooflike fields. The surfaces show the expected number of minor contact marks and hairlines for the grade, with a few subtle hints of pale gold toning. NGC ID# 255H, PCGS# 97207

16385 1891-CC MS63 Deep Mirror Prooflike PCGS. A highly appealing, Deep Mirror Prooflike coin, with watery mirrors that reveal great depth of reflectivity around the frosty devices. Numerous small to mid-sized abrasions appear on each side, and the central high points are softly struck. Light golden toning emerges from the borders.

Ex: ANA Signature (Heritage, 7/2005), lot 6893; Long Beach Signature (Heritage, 9/2005), lot 5941; FUN Signature (Heritage, 1/2012), lot 7130.

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 255H, PCGS# 97207

16386 1891-O MS64+ PCGS. CAC. Plentiful in this grade, the 1891-O Morgan dollar is scarce any finer. This piece is Plus-graded and CAC-approved with frosty luster that shows a hint of golden border toning. Minor strike weakness on the eagle's breast and the hair above Liberty's ear is typical of the issue. NGC ID# 255J, PCGS# 7208

1891-O Silver Dollar, MS64 Prooflike No Finer Certified Prooflike Examples

16387 1891-O MS64 Prooflike PCGS. CAC. This piece is tied for the finest prooflike example that either PCGS or NGC has certified. Both sides have fully mirrored fields and attractive field-to-device contrast with above average design definition. Population: 12 in 64 (1 in 64+) Prooflike, 0 finer. CAC: 4 in 64, 0 finer (2/17).

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 4J6A, PCGS# 7209

16388 1891-S MS65 PCGS. Were it not for a few faint grazes on Liberty's cheek, this Gem 1891-S Morgan dollar might have received an even finer grade. The coin is sharp and displays frosty, brilliant luster save for a small russet toning spot near the U in PLURIBUS. Higher-grade examples are elusive. NGC ID# 255K, PCGS# 7210

16389 1891-S MS65 PCGS. This Gem 1891-S Morgan dollar is highly attractive with its frosty cartwheel luster and brilliant surfaces. Only a few light grazes in the left obverse field limit the grade. The 1891-S is a scarce date any finer. Housed in an old green label holder.

From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 255K, PCGS# 7210

1891-S Dollar, MS64 Deep Mirror Prooflike Well-Struck and Appealing

16390 1891-S MS64 Deep Mirror Prooflike PCGS. Ex: Key West Collection. In his *Guide Book of Morgan Dollars*, Bowers says that this issue is usually well-produced and appealing, a "Morgan dollar as a Morgan dollar should be." He also notes that: "Prooflikes are sometimes encountered and are attractive." This is a well-struck example with impressively deep reflectivity in the fields, lovely light toning, and minimal surface marks. Population: 34 in 64 (1 in 64+) Deep Mirror Prooflike, 4 finer (2/17).

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 3VXL, PCGS# 97211

1892 Morgan Dollar, MS64 Deep Mirror Prooflike Rarely Seen Dollar With Reflective Fields

16391 1892 MS64 Deep Mirror Prooflike PCGS. From a smallish mintage of just over 1 million pieces, the 1892 Morgan dollar is seldom encountered with Deep Mirror Prooflike surfaces. This well-detailed Choice example features richly frosted design elements that show a high degree of contrast with the deeply reflective fields. Population: 26 in 64 (1 in 64+) Deep Mirror Prooflike, 6 finer (2/17).

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 255L, PCGS# 97213

16392 1892-CC — Altered Surfaces — Genuine PCGS. Unc. Details. VAM-8. Light rose-gold toning graces the obverse periphery, but this scarcer date Carson City dollar is mostly white. Crisply struck and lustrous with exceptionally unabraded surfaces. The obverse has a slight matte appearance; perhaps the reason for the PCGS designation.

From The R. Thayer Sheets Yorktown Collection.

16393 1892-CC MS61 PCGS. VAM-12A. A WOW! Morgan Variety. Radial die cracks through the F in OF and the A in DOLLAR provide the highlights of this better date Carson City VAM. Brilliant and lustrous with clean fields, a good strike, and the customary number of facial marks.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 255M, PCGS# 7214

16394 1892-CC MS61 PCGS. An undeniably Uncirculated 1892-CC dollar but with abrasions characteristic of the grade. This brilliant, frosty coin displays bold design elements and will appeal to the budget-conscious collector seeking a Mint State example of the date.

From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 255M, PCGS# 7214

16395 1892-CC MS62 PCGS. An unusually sharp example of this late Carson City issue, showing vibrant, frosty luster that is brilliant aside from a hint of gold around the outer periphery. Scattered abrasions are relatively light and unobtrusive for the grade. NGC ID# 255M, PCGS# 7214

16396 1892-CC MS63 PCGS. VAM-4A. A semiprooflike representative of this better Carson City emission. Only a whisper of golden toning accompanies lustrous and minimally marked surfaces. Usual for VAM-4A, the centers are lightly brought up.
Ex: Dallas Signature (Heritage, 12/2005), lot 2510, which realized \$1,955.
From The Pellegrini Collection, Part IV. NGC ID# 255M, PCGS# 7214

1892-CC Morgan Dollar, MS64 Partially Prooflike Surfaces

16397 1892-CC MS64 PCGS. Morgan dollars from the Carson City Mint are always in demand, and this attractive Choice example displays well-detailed design elements and vibrant mint luster throughout, with a few hints of prooflike reflectivity in some areas. Nice contrast exists between the fields and the frosted motifs. The surfaces show only minor signs of contact and eye appeal is outstanding.
Ex: Houston Signature (Heritage, 12/2013), lot 4184.
From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 255M, PCGS# 7214

1892-CC VAM-2 Dollar, MS64

16398 1892-CC MS64 PCGS. CAC. VAM-2. A brilliant and thoroughly lustrous near-Gem. This better date Carson City dollar has well-preserved fields and a relatively smooth cheek. The strike is good, though faint roller marks (as issued) are present near Liberty's ear. The mintmark is entered with an upward slant, and both borders display myriad fine die cracks. NGC ID# 255M, PCGS# 7214

16399 1892-CC MS63 Prooflike PCGS. VAM-8. A hint of butter-gold toning accompanies this nicely mirrored Select Carson City dollar. Marks are relatively few, and the eye appeal is attractive. Absent from the GSA auctions, the 1892-CC is much scarcer in Prooflike format than the Carson City issues from the 1880s.
From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 255M, PCGS# 7215

16400 1892-CC MS63+ Prooflike PCGS. VAM-2. The "CC Tilted Left" VAM. This highly lustrous and virtually brilliant example is well struck, and is smooth aside from moderate marks on the cheek and eagle's beak. A scarcer Carson City issue. NGC ID# 255M, PCGS# 7215

16401 1892-CC MS63 Deep Mirror Prooflike ANACS. VAM-2. Lavender, apricot-gold, and cobalt-blue toning graces the margins of this flashy and fully struck example. The fields are nearly pristine, though the cheekbone displays moderate contact. Certified in a small-sized holder.

Ex: Chicago Central States Signature (Heritage, 4/2014), lot 4888, which realized \$2,467.50.

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 255M, PCGS# 97215

16402 1892-S AU50 PCGS. An above-average example of the elusive semi-key 1892-S Morgan dollar, this piece exhibits light gray surfaces and delicate peripheral gold toning. The well-detailed design elements show just a touch of wear on the high points. NGC ID# 255P, PCGS# 7218

16403 1892-S AU50 PCGS. CAC. From a smallish mintage of 1.2 million pieces, the 1892-S Morgan dollar is an elusive issue in high grade. This impressive AU specimen is lightly worn and lightly abraded, with pleasing champagne patina. Traces of original mint luster cling to sheltered areas around the devices. NGC ID# 255P, PCGS# 7218

16404 1892-S AU53 PCGS. Significant luster remains in the fields of this About Uncirculated 1892-S silver dollar, while the devices show bold detail. Light handling marks are pleasantly unaccompanied by distracting abrasions. Hints of light golden toning appear on each side.
From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 255P, PCGS# 7218

16405 1892-S AU53 PCGS. Although the 1893-S is known as the key to the circulation strike Morgan dollar series, the 1892-S parallels its famous brother. This issue is typically found in lower circulated grades, with an average certified grade of just XF40, and pieces in the AU grade range are elusive. This example has brilliant and untuned silver surfaces, and retains considerable mint luster. An important opportunity for the advanced collector. NGC ID# 255P, PCGS# 7218

16406 1892-S AU53 PCGS. Considerable luster remains on the attractive light gray surfaces of this pleasing AU example. Unlike many similarly graded pieces, this example has no unsightly bagmarks to distract the viewer. A highly appealing example for the assigned grade. NGC ID# 255P, PCGS# 7218

1892-S Morgan Dollar, AU55 Conditionally Elusive Issue

16407 1892-S AU55 PCGS. The 1892-S and 1893-S Morgan dollars are conditionally elusive, meaning they are frequently encountered in lower circulated grades, but hard to locate in better grades, especially so at AU55 or finer levels. This piece has scattered, grade-consistent marks with brilliant silver luster, reflective fields, and light high-point rub.
From The Pellegrini Collection, Part IV. NGC ID# 255P, PCGS# 7218

16408 1893 MS63 PCGS. VAM-2. Delicate sun-gold toning accompanies the borders of this thoroughly lustrous and pleasing scarcer date silver dollar. The fields are refreshingly unmarked, and the cheek shows only incidental grazes.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 255R, PCGS# 7220

16409 1893 MS63 PCGS. VAM-2. Light caramel-gold toning graces the margins of this lustrous and carefully preserved example. The strike is good, though shy of complete at the centers. The 1893 ranks among the lowest mintage Philadelphia issues, and high-end Select examples are elusive.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 255R, PCGS# 7220

16410 1893 MS64 PCGS. VAM-3. The top of the 3 is repunched, and UNITED is lightly die doubled. Lustrous and brilliant with a crisp strike and uncommonly smooth fields and devices. The reverse rim displays small marks between 12 and 1 o'clock.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 255R, PCGS# 7220

16411 1893 MS64 NGC. A lustrous and virtually brilliant near-Gem, not fully brought up by the dies in the centers but otherwise generally crisp and carefully preserved. The 3 in the date is recut north, a feature of several VAMs for this low-mintage issue.

Ex: Central States Signature (Heritage, 5/2005), lot 9802. NGC ID# 255R, PCGS# 7220

16412 1893 MS64 PCGS. VAM-2. Butter-gold and powder-blue toning endows the obverse of this lustrous and carefully preserved Choice silver dollar. The reverse is close to brilliant. A scarce and low mintage Philadelphia issue.

Ex: Dallas Signature (Heritage, 12/2004), lot 7636. NGC ID# 255R, PCGS# 7220

16413 1893 AU58 Prooflike NGC. VAM-2. Stone-white surfaces and partial mint luster add to the visual appeal of this near-Mint example. Minimally abraded. A low mintage Philadelphia issue. Census: 10 in 58 Prooflike, 10 finer (2/17).

Ex: Chicago Central States Signature (Heritage, 4/2013), lot 4904, which realized \$2,350.

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 255R, PCGS# 7221

16414 1893 MS60 Prooflike NGC. VAM-2. Among the scarcest Philadelphia issues, the 1893 is also a rarity with reflective fields. This snow-white representative has a good strike and a flashy appearance. Small marks are scattered but none are of individual consequence.

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 255R, PCGS# 7221

16415 1893-CC XF45 PCGS. Luminance accents the fields of this lightly circulated 1893-CC Morgan dollar, highlighting delicate champagne toning on each side. High-point wear is accentuated by minor strike weakness on the eagle's breast and the hair above Liberty's ear.

From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 255S, PCGS# 7222

16416 1893-CC XF45 PCGS. Carson City dollar collectors need look no further for a nice higher-grade circulated example of the final issue from this mint. Bold definition remains in most design elements, and there are hints of reflectivity in the protected regions of the fields. Light golden toning around the borders fades into steel-gray at the centers. NGC ID# 255S, PCGS# 7222

16417 1893-O AU58 NGC. Morgan dollar mintages were lowered across the board at all four mint facilities in 1893. The New Orleans Mint struck merely 300,000 pieces. This nearly Uncirculated example presents brilliant interiors with colorful blushes of blue, violet, and golden patina around the edges. Slightly soft over the centers, where light friction also occurs. Wispy flecks appear on each side. Challenging any finer. NGC ID# 255T, PCGS# 7224

16418 1893-O AU58 NGC. Luster dominates except on Liberty's cheek. There are a few moderate marks near the date, but the reverse is nearly unabraded. The lowest mintage O-mint Morgan dollar.

From The Pellegrini Collection, Part IV. NGC ID# 255T, PCGS# 7224

16419 1893-O AU58 PCGS. CAC. A faint brush of friction on this near-Mint 1893-O dollar is virtually invisible to the naked eye due to lustrous fields and mottled olive-gold and champagne toning. The strike is also sharper than usual for the issue. This piece would fit in well with an otherwise Mint State collection of toned Morgans. NGC ID# 255T, PCGS# 7224

16420 1893-O AU58 PCGS. CAC. The challenge this New Orleans issue poses in Mint State makes the current near-Mint dollar a reasonable alternative for the collector on a budget. Brilliant, still-lustrous surfaces display traces of gold patina and minimal marks. Well-struck with unimportant merging over the usual areas. NGC ID# 255T, PCGS# 7224

16421 1893-S AG3 PCGS. Rarest among business strike Morgan dollar issues, the 1893-S is desirable in any grade. The present piece has fully readable legends, though the left-side rims reach the tops of E PLU and the UN in UNITED. Marks are minimal aside from light pinscratches below the first S in STATES, and a thin bright line on Liberty's jaw.

From The Pellegrini Collection, Part IV. NGC ID# 255U, PCGS# 7226

16422 1893-S — Filed Rims — PCGS Genuine. VG Details. The 1893-S is the business-strike key to the Morgan dollar series. All legends, date and mintmark remain intact and LIBERTY remains bold on this well-circulated specimen. The lightly abraded surfaces have an unnatural sheen, but the noted rim damage is difficult to detect in this holder.

From The R. Thayer Sheets Yorktown Collection.

1893-S Silver Dollar, VG10 San Francisco Key

16423 1893-S VG10 PCGS. A nice, collectible VG10 example of the Morgan dollar key, showing varying shades of tan-gray toning over smooth surfaces. Faint hairlines appear beneath a loupe at certain angles but do not affect the grade. The 1893-S is difficult for many collectors to acquire in any condition.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 255U, PCGS# 7226

1893-S Dollar, Fine 15 Collector Coin

16424 1893-S Fine 15 PCGS. This midgrade 1893-S Morgan has smooth surfaces with varying shades of light gray and gold toning. The coin is well-detailed for the Fine grade level. Collectors seeking to fill this key hole in their date and mintmark set will appreciate the balance of detail and price that this coin represents.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 255U, PCGS# 7226

**1893-S Dollar, XF Sharpness
Well-Detailed Key Issue**

16425 1893-S — Polished — PCGS Genuine. XF Details. The 1893-S is the key to the most popular series in American numismatics. All examples are in high demand, regardless of condition. This is a well-detailed example, although it was once subjected to polishing. The surfaces are muted silver-gray with olive accents on the reverse. A lightly marked San Francisco dollar from a record-low mintage of 100,000 coins.
From The R. Thayer Sheets Yorktown Collection.

16426 1894 AU55 PCGS. A well-struck example of this scarce issue from the mid-1890s. Most of the original mint luster still remains and there is just a slight overlay of silver-gray color on each side. The 1894 ranks as the most desirable business strike Morgan dollar produced in Philadelphia.
Ex: ANA Signature (Heritage, 7/2005), lot 6929; FUN Signature (Heritage, 1/2009), lot 4724.
From The Pellegrini Collection, Part IV. NGC ID# 255V, PCGS# 7228

16427 1894 AU58 PCGS. Faint friction marks on Liberty's cheek and the hair above the ear prevent a Mint State grade on this nearly Uncirculated 1894 dollar, but there is no loss of detail and the fields are vibrantly lustrous. Orange-gold peripheral toning frames silver-white interiors. This is about as lustrous as an AU-level Morgan dollar gets.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 255V, PCGS# 7228

16428 1894 AU58 PCGS. Designated AU but showing almost no discernible wear, this near-Mint 1894 Morgan dollar displays the eye appeal of a lower-end Mint State coin at a more affordable price level. The coin is virtually untuned, and a few light marks on the cheek are far less than what is normally seen on AU-level Morgans.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 255V, PCGS# 7228

16429 1894 AU58 PCGS. Hints of champagne toning appear on the frosty silver surfaces of this attractive near-Mint 1894 Morgan silver dollar. The surfaces exhibit grade-consistent handling marks and a trace of wear in the usual locations. NGC ID# 255V, PCGS# 7228

16430 1894 AU58 NGC. A few hints of light champagne toning enliven the lightly abraded surfaces of this low-mintage Morgan dollar. The well-detailed design elements show just a trace of wear, and vibrant mint luster radiates from both sides.
Ex: Houston Signature (Heritage, 12/2014), lot 4341. NGC ID# 255V, PCGS# 7228

16431 1894-O MS60 PCGS. Olive-gray toning with light-blue and orange-gold accents cover the lustrous silver surfaces of this scarce O-Mint issue. Typically weak at the centers, the coin is otherwise sharp and only a few small marks visit the frosty surfaces.
Ex: Houston Signature (Heritage, 12/2013), lot 8910.
From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 255W, PCGS# 7230

16432 1894-O MS61 PCGS. VAM-4. The 1 and 4 in the date are nicely repunched. Apparently, the date was initially entered with an upward slant, then corrected. This lustrous better date dollar displays vibrant peach-red patina throughout the margins. The centers lack a full impression, but marks are minor for the MS61 level.
From The Pellegrini Collection, Part IV. NGC ID# 255W, PCGS# 7230

**1894-S Morgan Dollar, MS64+
Lovely Eye Appeal**

16433 1894-S MS64+ PCGS. A high-end near-Gem example, the present coin displays Choice cartwheel luster and semiprooflike, brilliant surfaces. The strike is sharp aside from minor incompleteness at the extreme centers. Light residue is present on the reverse near the right rim. A few scattered marks may hold this attractive piece from an even finer grade, yet the lustrous eye appeal is unrestrained.
Ex: Long Beach Signature (Heritage, 6/2013), lot 5118; FUN Signature (Heritage, 1/2014), lot 5911.
From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 255X, PCGS# 7232

**1894-S Dollar, MS64 Prooflike
Scarcer Prooflike S-Mint**

16434 1894-S MS64 Prooflike PCGS. A well-struck and flashy better date near-Gem dollar. A glimpse of tan-gray denies full brilliance. Only a tiny percentage of Mint State '94-S dollars have received a Prooflike or Deep Mirror Prooflike designation. Certified in a green label holder. Population: 33 in 64 (1 in 64+) Prooflike, 2 finer (2/17).
Ex: Long Beach Signature (Heritage, 10/2000), lot 8419; FUN Signature (Heritage, 1/2008), lot 5598; Chicago Signature (Heritage, 8/2011), lot 4752.
From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 255X, PCGS# 7233

1894-S Dollar, MS64 Prooflike
Seldom Encountered With Prooflike Surfaces

- 16435 1894-S MS64 Prooflike PCGS. CAC.** The reflective fields of this Choice Morgan dollar contrast boldly with the sharply detailed, frosted design elements, and the surfaces show only minor signs of contact. A few wisps of golden-tan toning are evident on both sides. The 1894-S is not rare as a date, but Prooflike examples are elusive. Population: 33 in 64 (1 in 64+) Prooflike, 2 finer. CAC: 9 in 64, 1 finer (2/17).
Ex: ANA Signature (Heritage, 8/2007), lot 2437; Chicago Signature (Heritage, 8/2011), lot 4753.
From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 255X, PCGS# 7233

- 16436 1895-O AU55 PCGS.** Both sides of this lovely Choice AU dollar exhibit brilliant silver luster with intense gold toning on the obverse, and delicate iridescence on the reverse. The 1895-O is an important condition rarity with Mint State examples bringing five- and six-figure prices. NGC ID# 255Y, PCGS# 7236

1895-O Morgan Dollar, Well-Struck AU58
VAM-3A, The Bearded Eagle

- 16437 1895-O AU58 PCGS. VAM-3A.** Just a whisper of high-point wear separates this silver-white and surprisingly well-struck 1895-O Morgan dollar from a Mint State level and a much higher price. This is a great collector-grade example of this semikey issue, showing minimal marks and excellent eye appeal. The fortunate winning bidder will receive a bonus, since this is the interesting VAM-3A "Bearded Eagle" variety, with unkempt splotches below the eagle's jaw that earn the nickname.
Ex: ANA Signature (Heritage, 2/2014), lot 4908.
From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 255Y, PCGS# 7236

1895-O Dollar, AU58
Barely Circulated Example

- 16438 1895-O AU58 NGC.** Scattered light marks appear in the fields and over the cheek of Liberty, but there is scarcely any trace of rub on the high points, and we believe it is more what we would call "field chatter" that prevents a Mint State grade. Soft luster radiates from each side, and the whisper of pinkish-gold color adds further to the strong eye appeal. The 1895-O dollar is quite pricey in Mint State, so this AU58 coin should prove a convincing alternative for many potential bidders.
Ex: Long Beach Signature (Heritage, 2/2013), lot 4465.
From The Pellegrini Collection, Part IV. NGC ID# 255Y, PCGS# 7236

- 16439 1895-O AU53 Prooflike NGC.** The 1895-O is the key New Orleans Morgan issue, and is a formidable rarity with prooflike surfaces. The present brilliant example displays substantial field reflectivity, and relevant marks are confined to Liberty's nose and the nearby field.
Ex: Long Beach Signature (Heritage, 9/2014), lot 4852, which realized \$2,820.
From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 255Y, PCGS# 7237

1895-S Silver Dollar, AU58
Better San Francisco Issue

- 16440 1895-S AU58 PCGS.** Coming from a mintage of only 400,000 pieces, the 1895-S is a better date in the Morgan dollar series in all grades. This near-Mint example displays brilliant, satiny surfaces with some luster remaining in the fields. The strike is well-executed, and scattered abrasions on Liberty's cheek are consistent with the grade. NGC ID# 255Z, PCGS# 7238

**1895-S Dollar, AU58
Lightly Toned and Semiprooflike**

16441 1895-S AU58 NGC. The light high point friction that precludes a Mint State grade also renders this piece a remarkable opportunity for the budget-conscious collector. The highly lustrous fields retain their flash, and the delicate gold and pale green patina that covers each side is original and undisturbed. As usual, the central devices have a touch of softness, but this is a minor concern. Only a few marks are present on the surfaces.

Ex: FUN Signature (Heritage, 1/2007), lot 7347.

From The Pellegrini Collection, Part IV. NGC ID# 255Z, PCGS# 7238

16442 1896-O MS61 PCGS. VAM-7. A lustrous example of the noted New Orleans conditional rarity. The cheek and the reverse are smooth though the obverse field displays several wispy pinscratches. The 9 and 6 of the date are strongly doubled at the bottom and the mintmark leans slightly left, all characteristics of the VAM-7 variety. The date is positioned far to the left, diagnostic of the variety. Housed in an old green label holder.

Ex: Houston Signature (Heritage, 12/2013), lot 4224.

From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 27ZU, PCGS# 7242

16443 1896-S AU58 PCGS. CAC. Due to more substantial cost of Mint State examples, high-end AU representatives of this conditionally challenging San Francisco issue are always in demand. This nearly Uncirculated piece displays radiant, semiprooflike fields with a light golden hue overall. Well-struck, with just trivial friction over the high points of the design.

From The Pellegrini Collection, Part IV. NGC ID# 2564, PCGS# 7244

**1896-S Morgan Dollar, MS63
Elusive San Francisco Issue**

16444 1896-S MS63 PCGS. VAM-5. A Hot 50 Variety. Several hundred 1896-S Morgans were acquired by Reno investor LaVere Redfield many years ago, and eventually they were disbursed to the market through his estate. We can only guess if this MS63 specimen is one of those coins, but if it was, it is among the finest to emerge from that slightly haphazard hoard. We note that the coin is essentially untuned with bright luster with only a few minor abrasions on the cheek and neck. A sharp strike occurs on the motifs, except on the hair over Liberty's ear, which is a touch weak. Variety collectors will note this is the S/S repunched mintmark, the "Hot 50" VAM-5, with clear evidence of the undermark and an unfinished area of the die within the bow.

Ex: Long Beach Signature (Heritage, 2/2006), lot 2273, where it brought \$3,105; ANA Signature (Heritage, 2/2014), lot 4926, where it brought \$4,406.

From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 2564, PCGS# 7244

16445 1897 MS66+ PCGS. This Plus-graded Premium Gem offers sharply detailed design elements throughout and the well-preserved surfaces display vibrant mint luster on both sides. PCGS has graded 37 numerically finer examples (2/17). NGC ID# 27P5, PCGS# 7246

16446 1897 MS66+ PCGS. A heavily frosted, well-struck example of this conditionally elusive Philadelphia issue. No distracting abrasions are present, and just a few faint luster grazes on the cheek preclude a full MS67 grade. PCGS has encapsulated 46 numerically finer representatives (2/17).

From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 27P5, PCGS# 7246

**1897 Silver Dollar, MS66 Prooflike
Top-Grade Coin at PCGS**

16447 1897 MS66 Prooflike PCGS. Prooflike 1897 dollars are much scarcer in high grade than one might expect given the general availability of this date overall through MS65. Nonetheless, Gem Prooflike coins are scarce, and finer examples are rare. Such is the significance of this MS66 example. The reflective fields are unmarked and brilliant, and the satiny devices are boldly rendered. A light graze behind Liberty's eye is the only mentionable abrasion. This piece is among the finest Prooflike coins at PCGS. Population: 18 in 66 (3 in 66+) Prooflike, 0 finer (2/17). NGC ID# 2565, PCGS# 7247

16448 1897 MS65 Deep Prooflike NGC. VAM-4. The flag of the 1 is repunched south, and the 7 is lightly repunched north. This sharply struck Gem is brilliant aside from minor peripheral russet freckles. Both sides are uncommonly devoid of marks. Census: 11 in 65 Deep Prooflike, 0 finer (2/17).

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 2565, PCGS# 97247

16449 1897-O MS61 PCGS. This Mint State 1897-O Morgan shows luminous mint luster cast in a delicate light golden hue. The central high points are softly struck as normal, but grade-limiting abrasions are pleasantly low in their impact. The 1897-O is a better date in high grade. Housed in a green label holder.

From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 2565, PCGS# 7248

16450 1897-O MS61 Prooflike NGC. The 1897-O is not only a better date in Uncirculated grades, but Prooflike coins are downright rare. This example is graded only MS61, but with the Prooflike designation it is a major rarity even at that level. Moreover, there are no major abrasions, only light, scattered handling marks beneath delicate champagne toning. The strike is sharp, and both sides display mild cameo contrast. Census: 8 in 61 Prooflike, 11 finer (2/17).

From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 2566, PCGS# 7249

16451 1897-S MS66 PCGS. CAC. This sharply detailed Premium Gem exhibits mostly brilliant silver luster with splashes of gold and iridescent toning. PCGS has only certified 29 finer examples (2/17). NGC ID# 2567, PCGS# 7250

16452 1898 MS66 Deep Prooflike NGC. A snow-white Premium Gem with reflective fields and a bold strike. Marks are confined to the field near OF. Very rare with prominently mirrored surfaces in the present lofty grade. Census: 4 in 66 Deep Prooflike, 0 finer (2/17).
Ex: Long Beach Signature (Heritage, 2/2012), lot 4320, which realized \$2,415.
From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 2568, PCGS# 97253

1898-S Dollar, MS64 Deep Mirror Prooflike

16453 1898-S MS64 Deep Mirror Prooflike PCGS. The 1898-S Morgan dollar is not as rare as many of the other issues in the series, but DMPL examples are seldom seen. The present lightly toned near-Gem has impressively flashy fields, and the reverse is beautifully preserved. The few minor obverse marks cannot deny the eye appeal. Population: 35 in 64 (2 in 64+) Deep Mirror Prooflike, 7 finer (2/17).
Ex: ANA Signature (Heritage, 7-8/2008), lot 2432; Chicago Signature (Heritage, 8/2011), lot 4787.
From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 256A, PCGS# 97257

16454 1899 MS66 PCGS. Frosty original luster illuminates boldly struck design elements on this high-end 1899 Morgan. The interiors are untuned, but the borders display original sun-gold color. The 1899 is a better date, boasting a small mintage of only 330,000 coins. PCGS has seen just 22 examples finer than the present piece (3/17). NGC ID# 256C, PCGS# 7258

1899 Morgan, MS65+ Deep Prooflike Very Scarce With Reflective Fields

16455 1899 MS65+ Deep Prooflike NGC. Always popular because of the low official mintage, the 1899 is quite the rarity with Deep Mirror fields. This deeply reflective example has chalk-white devices and exceptionally clean surfaces. Fully struck. Census: 17 in 65 (1 in 65+) Deep Prooflike, 8 finer (2/17).
Ex: FUN Signature (Heritage, 1/2012), lot 7241.
From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 256B, PCGS# 97259

16456 1899-O MS65 Deep Mirror Prooflike PCGS. Medium O. Light caramel-gold toning visits this intricately struck and splendidly preserved Gem. The fields are flashy and display cartwheel luster as well. Encapsulated in a first generation holder. Population: 43 in 65 (1 in 65+) Deep Mirror Prooflike, 21 finer (2/17).
Ex: FUN Signature (Heritage, 1/2012), lot 7242, which realized \$1,380.
From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 256C, PCGS# 97261

16457 1899-O Micro O, Wing Lines, VAM-5, AU58+ PCGS. CAC. A Top 100 Variety. VAM-5 is the most interesting among the five 1899-O Micro O die marriages, due to the bold die lines within the right (facing) wing. Overall, the 1899-O is common, but a supermajority of survivors feature a Large O mintmark. Micro O examples are very scarce. This is a lustrous and lightly toned coin with only one apparent mark, beneath the RU in TRUST. Population: 3 in 58+, 7 finer (2/17). NGC ID# 256C, PCGS# 133951 Base PCGS# 87260

1900 Silver Dollar Lustrous, Frosted Superb Gem

16458 1900 MS67 PCGS. Creamy white, smooth and frosty brilliance covers both sides of this Superb Gem dollar, while its MS67 numeric grade is unsurpassed at either PCGS or NGC. More than 8.8 million silver dollars were struck in 1900, and coins were released by the bagful well into the 1960s. Still, Superb Gems are very scarce. Few pieces can match the razor-sharp obverse strike on this example, and the reverse lacks only a bit of definition on the eagle's breast and talons. A tiny tick in the field near star 8 is the sole mark to mention on the vibrantly lustrous and attractive surfaces. Population: 53 in 67 (5 in 67+), 0 finer (2/17). NGC ID# 256F, PCGS# 7264

1900 Morgan Dollar, MS65 Prooflike Very Rare as a Prooflike

16459 1900 MS65 Prooflike PCGS. The well-preserved reflective surfaces of this impressive Gem show a few hints of apple-green and lavender patina, with only minor signs of contact. The design elements are well-detailed and frosty. Housed in a green label holder. Population: 25 in 65 (3 in 65+) Prooflike, 6 finer (2/17).
From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 256E, PCGS# 7265

16460 1900-O MS66 Prooflike PCGS. Well-struck with deep reflectivity in the fields and mildly frosted devices. A few minor grazes on the lower half of Liberty's cheek prevent an even loftier grade assessment for this eye-appealing Gem. Both sides of the coin offer hints of delicate golden toning. Population: 32 in 66 (2 in 66+) Prooflike, 0 finer (2/17).
Ex: Long Beach Signature (Heritage, 2/2005), lot 10570.
From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 256F, PCGS# 7267

16461 1900-O/CC VAM-11 MS65 PCGS. A Top 100 Variety. Faint straw-gold toning visits this thoroughly lustrous Gem. The centers lack an intricate strike, but the surfaces show only incidental contact. VAM-11 is readily attributed by the diagonal die crack through Liberty's shoulder curl.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 256J, PCGS# 133963 Base PCGS# 7268

16462 1900-S MS65+ PCGS. Although usually available in MS65, the 1900-S Morgan dollar is seldom offered finer. This Plus-graded piece displays softly frosted luster with hints of light golden toning around the peripheries. Liberty's cheek is clean but there is slight strike weakness on the hair above the ear. NGC ID# 256H, PCGS# 7270

16463 1900-S MS65 Prooflike PCGS. An important opportunity for the advanced collector. This piece has brilliant silver surfaces and an above average strike with fully mirrored fields and satin luster. A small planchet flaw is located inside the upper obverse border. Population: 21 in 65 Prooflike, 6 finer (2/17).
From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 6MTV, PCGS# 7271

16464 1901 AU58 PCGS. The 1899 has a low mintage but is fairly common in Mint State. Struck at the same facility just two years later, the 1901 has a high mintage and is very scarce in Uncirculated grades. The present piece comes close to that level, since it displays sweeping luster and a paucity of marks. NGC ID# 256J, PCGS# 7272

16465 1901 AU58 PCGS. CAC. The well-detailed design elements of this near-Mint specimen show just a trace of wear and the lightly abraded surfaces retain much original mint luster. A few hints of golden-tan toning accent the reverse, although most observers would call the coin brilliant. CAC endorsed for its quality at the assigned grade. A slider extraordinaire.
Ex: Houston Signature (Heritage, 12/2013), lot 4248.
From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 256J, PCGS# 7272

16466 1901 AU58 PCGS. CAC. Ample luster remains on this near-Mint 1901 dollar, although trivial high-point friction on the devices prevents a Mint State designation. The surfaces are generally smooth and appealing, with silvery interiors and rose-gold border toning.
From The Pellegrini Collection, Part IV. NGC ID# 256J, PCGS# 7272

16467 1901 Doubled Die Reverse, VAM-3, AU50 PCGS. A Top 100 Variety. The VAM-3 "Shifted Eagle" reverse is a popular *Guide Book* variety that shows strong doubling on all eight tailfeathers as well as on the arrows, leaves, and IN GOD WE TRUST. This About Uncirculated example has slight wear at the centers and light abrasions across the pleasing silver-gray surfaces. Plentiful mint luster remains for the assigned grade.
From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 256J, PCGS# 133965 Base PCGS# 7302

16468 1901-O MS66 Prooflike NGC. Prooflike examples of the 1901-O Morgan dollar are relatively accessible through MS65. Premium Gems are condition rarities, tied among the finest certified. This MS66 Prooflike dollar features a bold impression and marked field-motif contrast. Brilliant with a single fleck on the eagle's shoulder. Census: 17 in 66 Prooflike, 0 finer (2/17). NGC ID# 256K, PCGS# 7275

16469 1901-S MS64 PCGS. The design elements are well-defined despite faint roller marks that remain on each side of the coin, not fully struck out of the planchet. This Choice 1901-S Morgan dollar displays satiny luster with traces of light golden toning. A few faint grazes limit the grade but are not distracting.
From The Oklahoma Morgan Collection PCGS Registry Set. NGC ID# 256L, PCGS# 7276

16470 1901-S MS65 NGC. A couple of bags of Uncirculated 1901-S dollars are known to have surfaced in the 1960s, but this date is elusive in Mint condition. Although the centers display a touch of strike softness, each side is readily appealing with frosty, minimally toned interiors that blend with gold, rose-violet, and cobalt-blue shades marginally. Encapsulated in a former generation holder. The NGC Census lists just seven finer submissions (2/17). NGC ID# 256L, PCGS# 7276

16471 1901-S MS65 PCGS. Most Uncirculated 1901-S Morgans grade MS64 or lower. This Gem example is well-struck and brilliant, with vibrant cartwheel luster. Only a few faint grazes on the cheek limit the grade. There are 41 finer representatives at PCGS (2/17). NGC ID# 256L, PCGS# 7276

16472 1902 MS64 Prooflike PCGS. Prooflike 1902 Morgan dollars are scarce in all grades but rare finer than MS64. This Choice example is suitable for most collecting purposes. The strike is sharp, and the fields are deeply reflective. A dusting of milky toning appears on each side. Population: 28 in 64 Prooflike, 23 finer (2/17). NGC ID# 256M, PCGS# 7279

16473 1902 MS64 Prooflike NGC. CAC. Light caramel-gold patina visits the peripheries of this otherwise brilliant near-Gem. Sharply struck and nicely mirrored with remarkably unabraded surfaces for the designated grade. Census: 37 in 64 Prooflike, 18 finer. CAC: 8 in 64, 2 finer (2/17).
Ex: Long Beach Signature (Heritage, 2/2012), lot 4327, which realized \$1,955.
From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 256M, PCGS# 7279

1902-S Silver Dollar, MS64 Prooflike

16474 1902-S MS64 Prooflike PCGS. Prooflike and Deep Mirror Prooflike coins of this issue are elusive, and usually appear in low grades with little eye appeal. This lovely exception to that rule exhibits brilliant silver surfaces and fully mirrored fields. The strike is typical for the issue. Population: 10 in 64 Prooflike, 2 finer (2/17).
From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 256P, PCGS# 7283

16475 1903 MS65 Prooflike PCGS. This well struck silver dollar appears brilliant at first glance, but light gold toning emerges upon close inspection. The fields provide noticeable reflectivity and are well preserved. Minor marks beneath the eye and on the cheek prevents near-perfection. Certified in a green label holder. Population: 36 in 65 Prooflike, 7 finer (2/17).
Ex: Kansas City Bullet (Heritage, 4/1996), lot 384; Dallas Signature (Heritage, 11/2007), lot 1373; Chicago Signature (Heritage, 8/2011), lot 4814, which realized \$1,380.
From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 256R, PCGS# 7285

16476 1903-O MS65 Prooflike PCGS. A conditionally rare Prooflike example of this otherwise plentiful New Orleans issue. The strike is bold, and each side displays modest cameo contrast. A halo of golden peripheral toning embraces the brilliant interiors. Population: 28 in 65 (1 in 65+) Prooflike, 6 finer (2/17).
From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 256S, PCGS# 7287

16477 1903-S AU50 PCGS. Luster remains in the protected regions of the fields on this 20th century semikey Morgan, accentuating tinges of golden toning around the peripheries. The interiors remain mostly brilliant. Light friction over the high points of the devices and in the exposed areas of the fields precludes Mint State classification. NGC ID# 256T, PCGS# 7288

16478 1903-S Micro S, VAM-2, Top 100, XF45 PCGS. A Top 100 Variety. The Top 100 reference calls it a Small S, while PCGS and VAMworld.com refer to the same mintmark size as a Micro S. The undersized mintmark was likely from a punch intended for use on Barber quarters. Only a single reverse has the incorrect mintmark size, though any 1903-S is scarce. Almond-gold and slate-gray visit this moderately circulated and inoffensively abraded example.
Ex: New York Signature (Heritage, 2/2014), lot 4300.
From The Oklahoma Morgan Collection PCGS Registry Set.
 NGC ID# 256T, PCGS# 133967 Base PCGS# 7306

**1904 Dollar, MS64 Prooflike
 Seldom Encountered With Mirrored Fields**

16479 1904 MS64 Prooflike PCGS. A boldly struck Mint State example and highly unusual as it has prooflike fields, like few others of this date. The obverse has blushes of gold toning, while the reverse is stone-white. The devices are lustrous, although little cameo contrast can be seen, as usual for prooflikes from the Philadelphia Mint. An important opportunity for the advanced collector. Population: 16 in 64 Prooflike, 1 finer (2/17).
Ex: Long Beach Signature (Heritage, 6/2006), lot 2757; ANA Signature (Heritage, 8/2007), lot 2502.
From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 256U, PCGS# 7291

1904-S Morgan Dollar, MS62 Prooflike

16480 1904-S MS62 Prooflike PCGS. A dazzling example of this scarce prooflike date with a better-than-average strike for the issue and lightly marked reflective fields. Eye appeal to spare, there are a few facial abrasions that account for the grade. Housed in an old green label holder. Population: 4 in 62 Prooflike, 24 finer (2/17).
From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 256W, PCGS# 7295

16481 1921 MS64 Deep Prooflike NGC. 1921 Morgan dollars are readily available in Mint State, but only a tiny fraction of those pieces possesses deeply reflective fields. The present near-Gem is brilliant and intricately struck with minimal contact. Census: 53 in 64 Deep Prooflike, 6 finer (2/17).
Ex: FUN Signature (Heritage, 1/2012), lot 7282, which realized \$2,300.
From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 256X, PCGS# 97297

16482 1921-D MS66 PCGS. CAC. Die cracks encircle both sides of this Premium Gem Denver dollar. Attractive amber-gold border toning visits both the obverse and reverse, while mint luster coruscates across the frosted surfaces. The strike is not fully brought up on the central high points, yet the coin is exceedingly sharp in other areas and the eye appeal is undeniable, confirmed by the CAC endorsement. PCGS reports just 11 coins in a numerically finer grade (2/17).
Ex: FUN Signature (Heritage, 1/2015), lot 11086.
From The Oklahoma Morgan Collection PCGS Registry Set.
 NGC ID# 256Y, PCGS# 7298

16483 1921-D MS66+ PCGS. CAC. The only Denver issue of the Morgan type, the 1921-D was struck in great numbers, yet becomes very scarce in the present grade. This lustrous and nearly brilliant Premium Gem shows only incidental contact, along with moderate incompleteness on the wreath and the eagle's breast. NGC ID# 256Y, PCGS# 7298

16484 1921-D MS64 Prooflike NGC. The sole Denver issue will never be rare in Mint State, but only a tiny percentage of examples possess prooflike fields. This attractively toned example is lightly abraded and suitably struck. Golden-brown, sea-green, and powder-blue toning illuminates the margins. Certified in a former generation holder.
Ex: Long Beach Signature (Heritage, 2/2012), lot 4336, which realized \$2,530.
From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 256Y, PCGS# 7299

16485 1921-D TRU_T Variety, VAM-1A2, MS65+ PCGS. A Top 100 Variety. The Top 100 reference describes VAM-1A2 as "one of the few spectacular filled die varieties in the Morgan dollar series." The S in TRUST is a mere ghost, though no other letters are affected. Formerly known as VAM-1A, then recognized as a later die state of the former VAM-1AB (now VAM-1A1), which has a horizontal die scratch on the tail feathers. As of (2/17), the present lot is the single-finest certified example. Lustrous, smooth, and brilliant. NGC ID# 256Y, PCGS# 133970 Base PCGS# 7298

16486 1921-S MS65+ PCGS. The final Morgan dollar issue at the San Francisco Mint, this example exhibits delicate greenish-champagne toning over brilliant and frosty silver surfaces. Finer examples are infrequently encountered. NGC ID# 256Z, PCGS# 7300

**1921-S Morgan Dollar
 MS63 Prooflike**

16487 1921-S MS63 Prooflike NGC. Like other 1921-dated Morgan dollar issues, the 1921-S is common in Mint State. But prooflike pieces are very rare, and when one appears at auction, it is an important event for the specialist. This brilliant and minimally marked example has an above average strike for a '21-S, though portions of the wreath are incomplete. Census: 10 in 63 Prooflike, 6 finer (2/17).
Ex: San Francisco ANA Signature (Heritage, 7/2005), lot 6985; Steve Reed Collection (Heritage, 1/2013), lot 6353, which realized \$3,818.75.
From The Pellegrini Collection of Prooflike and Deep Mirror Prooflike Morgan Dollars. NGC ID# 256Z, PCGS# 7301

PROOF MORGAN DOLLARS

1880 Morgan Dollar, PR64 Undesignated Cameo Contrast

16488 1880 PR64 NGC. Riding the coattails of a large Trade dollar proof mintage, the 1880 Morgan dollar proof production of 1,335 pieces was the largest of the entire series. This example is mostly brilliant, with an attractive band of reddish-gold patina that covers the rims and dentils. The motifs are frost-white for strong contrast with the silver-mirrored fields, a characteristic not mentioned on the previous-generation "fatty" NGC holder. This near-Gem proof is only a few delicate field lines away from an even finer grade.
From The Martin Peterson Collection. NGC ID# 27Z4, PCGS# 7315

1884 Morgan Dollar, PR64 Substantial Field/Device Contrast

16489 1884 PR64 NGC. A thin sheen of lemon-gold on the rims does not intrude on the brilliant fields or frosty devices of this near-Gem 1884 proof dollar. The fields are glassy and smooth with just a few light, hair-thin lines visible under a loupe. The strike is sharp throughout. Viewed at an advantageous angle, considerable white-on-black contrast exists between the raised motifs and the surrounding mirrors. Housed in a previous-generation NGC holder. Census: 51 in 64, 49 finer (2/17).
From The Martin Peterson Collection. NGC ID# 27ZB, PCGS# 7319

1886 Morgan Dollar, PR64 Almost Brilliant and Attractive for the Grade

16490 1886 PR64 NGC. While the 1886 (886 pieces produced) is not one of the rarer proofs in the Morgan dollar series, it is a challenging coin to locate at the finer levels of preservation. The plethora of cleaned or otherwise impaired examples in today's market makes the appearance of a certified near-Gem an important occasion for both the auctioneer and potential bidders. This coin is untuned in the centers with halos of pale golden iridescence around the peripheries. The sharp strike and smooth surfaces are equally free of criticism. Both sides are uniformly brilliant in finish with only a few wispy blemishes.

Ex: FUN Signature (Heritage, 1/2003), lot 8284; FUN Signature (Heritage, 1/2005), lot 11956.

From The Pellegrini Collection, Part IV. NGC ID# 27ZF, PCGS# 7321

16491 1886 PR62 Cameo PCGS. VAM-15. The 1 in the date is repunched beneath the flag and base. A fully struck silver dollar with peripheral peach-gold toning. Void of contact marks, though the obverse field is lightly hairlined. The portrait and eagle exhibit undeniable cameo contrast. NGC ID# 27ZF, PCGS# 87321

1886 Dollar, PR63 Cameo 'Dash Beneath Second 8'

16492 1886 PR63 Cameo NGC. The 18 in the date is lightly repunched, and the second 8 has a small dash beneath it. This piece is untuned save for the barest suggestion of gold color around the rims on each side. Perceptible contrast, deeper on the reverse, appears over surfaces that are otherwise untuned and quite appealing for the grade.

Ex: FUN Signature (Heritage, 1/2012), lot 7293.

From The Pellegrini Collection, Part IV. NGC ID# 27ZF, PCGS# 87321

1887 Morgan Dollar, PR64+
Only 710 Pieces Struck

16493 1887 PR64+ PCGS. CAC. From a limited proof mintage of 710 pieces, this Plus-graded Choice Morgan dollar displays razor-sharp definition on all design elements and deeply mirrored fields that provide mild, and unacknowledged, cameo contrast with the frosty devices. The well-preserved surfaces show a few hints of pale gold toning. Population: 69 in 64 (1 in 64+), 48 finer. CAC: 3 in 64, 10 finer (2/17). NGC ID# 27ZG, PCGS# 7322

1888 Morgan Dollar, PR64 CAC
Dappled Golden Toning

16494 1888 PR64 NGC. CAC. Dappled russet, gold, sky-blue, and lavender patina runs over this near-Gem proof, reinforced by splashes of light gold on Liberty's cheek and neck. The design elements are generally well-impressed, though the detail in the centers of both sides is impeded by numerous as-struck minute planchet imperfections. Census: 46 in 64, 41 finer. CAC: 3 in 64, 6 finer (2/17).

Ex: *Central States Signature* (Heritage, 4/2008), lot 2198; *FUN Signature* (Heritage, 1/2010), lot 3098.

From *The Pellegrini Collection, Part IV*. NGC ID# 27ZH, PCGS# 7323

1896 Morgan Dollar, PR64
Choice, Sharply Struck Surfaces

16495 1896 PR64 NGC. Produced in lesser quantity than its predecessor, the famous 1895 Morgan proofs, just 762 examples of the 1896 were struck in proof format. This example is snow-white and untuned save for a hint of pale-gold at the rims, with smooth mirrors surrounding frostlike devices. The strike is razor-sharp throughout. A few faint lines across the obverse fields have limited visual effect but account for the near-Gem grade. Census: 58 in 64, 68 finer (2/17).

From *The Martin Peterson Collection*. NGC ID# 27ZT, PCGS# 7331

1897 Dollar, PR64
Colorful Peripheral Toning

16496 1897 PR64 PCGS. A ring of patina comprises primarily reddish-gold around the obverse border and shades of cobalt-blue and violet around the reverse. The interiors are mostly brilliant, displaying moderate contrast. That is particularly true of the reverse. A complete impression should not surprise those familiar with proofs of this era. They are among the best-produced specimens in the series. Only 731 examples struck. NGC ID# 27ZV, PCGS# 7332

1902 Morgan Dollar, PR64
Patinated, Uncontrasted Surfaces

16497 1902 PR64 NGC. CAC. The present near-Gem proof 1902 Morgan dollar is a creation of the "all-brilliant" era of proof coinage that began in this year, and an ample demonstration it is, as there is little contrast on the obverse and just a touch on the reverse. Pale peach tones deepen to amber-gold and aqua near the rims, but the chromelike reflectivity is blatant. CAC: 10 in 64, 19 finer (2/17).

Ex: *Long Beach Signature* (Heritage, 9/2011), lot 3816.

From *The Pellegrini Collection, Part IV*. NGC ID# 2822, PCGS# 7337

1903 Silver Dollar, Brilliant PR64
Just 755 Pieces Struck

16498 1903 PR64 PCGS. A brilliant near-Gem proof, the stunning silver surfaces framed by a thin frame of golden toning at the rims. The untuned fields display watery-deep mirrors, while the raised elements show a thin mattelike frost despite the Mint's best efforts to restrain cameo contrast on the 1903 proofs. Glassy-smooth and pinpoint-sharp, this gleaming example is refreshingly free of any marks or lines and Choice for the assigned grade. Population: 74 in 64 (1 in 64+), 76 finer (2/17).

From *The Martin Peterson Collection*. NGC ID# 2823, PCGS# 7338

**1903 Morgan Dollar, PR64
Spectacular Multicolor Toning**

16499 1903 PR64 PCGS. The Philadelphia Mint switched to an all-brilliant finish for proof coins after 1902, reducing the mint frost on the devices and eliminating cameo contrast on the great majority of the coins. This attractive near-Gem example exhibits sharply detailed design elements and deeply mirrored fields with the expected lack of contrast. The Choice surfaces are spectacularly toned in shades of cerulean-blue, greenish-gold, and lavender patina. Population: 74 in 64 (1 in 64+), 76 finer (2/17). NGC ID# 2823, PCGS# 7338

16500 1904 PR62 PCGS. Glassy, uncontrasted fields on each side are characteristic of this quicksilver period in U.S. proof manufacture, although the chromelike effect here is dampened a bit by champagne-gold patina on each side. The strike is surprisingly soft over the ear but adequate elsewhere, and there are few signs of overt contact. NGC ID# 2824, PCGS# 7339

**1904 Dollar, Brilliant PR64
Low Mintage of 650 Proofs**

16501 1904 PR64 PCGS. A low mintage of just 650 proofs — third-lowest of the series — represents the final year of Morgan dollar proof coinage (not counting the controversial 1921 Zerbe and Chapman proofs). Struck with the Mint's preferred brilliant finish lacking any substantial cameo contrast, this untuned and gleaming example is razor-sharp with only a few delicate lines that are microscopic in nature. Housed in an old blue-label holder with the barcode on the reverse. Population: 88 in 64 (2 in 64+), 72 finer (2/17). *From The Martin Peterson Collection.* NGC ID# 2824, PCGS# 7339

PEACE DOLLARS

16502 1921 MS65 NGC. This brilliant Gem displays bright, satiny luster as it typical of the High Relief Peace dollar. The strike is above-average, and there are only a few light, unobtrusive surface grazes. This is a thoroughly appealing first-year type coin. *From The R. Thayer Sheets Yorktown Collection.* NGC ID# 2U4E, PCGS# 7356

16503 1921 MS65 PCGS. Only a little more than one million Peace dollars were struck in 1921, all of which had the distinctive high relief design seen only in that year. The highly lustrous surfaces of this specimen reveal just a few whispers of light tan toning. The design features are well impressed except for minor softness in the centers, as is typical for the issue. A few minute marks scattered over each side are not inconsistent with the grade. *Ex: Long Beach Signature (Heritage, 9/2005), lot 6209.* NGC ID# 2U4E, PCGS# 7356

16504 1921 MS65 PCGS. This is a beautifully preserved, lightly toned Gem High Relief Peace dollar with golden toning on the obverse that lightens toward the center, while the reverse exhibits deeper gold and russet hues. The central high points are weakly struck, but Liberty's cheek and the fields are clean — only some faint grazes on Liberty's neck affect the grade. NGC ID# 2U4E, PCGS# 7356

16505 1921 MS65 PCGS. This frosty, champagne-tinted Gem displays above-average central sharpness for the High Relief type, while the surfaces reveal only a few trivial marks. High-grade examples of the 1921 Peace dollar are in constant demand from type collectors. NGC ID# 2U4E, PCGS# 7356

16506 1922-D MS66 NGC. This brilliant, untuned Gem is richly frosted with an especially sharp strike. The silver surfaces are bright and highly lustrous, while the few minor abrasions on either side of this example do not distract. Only 19 pieces are certified in a higher numeric grade by NGC and PCGS combined (2/17). *Ex: Long Beach Signature (Heritage, 2/2005), lot 10688; New York Signature (Heritage, 2/2014), lot 4343.* NGC ID# 257D, PCGS# 7358

16507 1926 MS66 PCGS. This is a sharply struck, frosty Premium Gem and among the finest seen by PCGS (3/17). Each side displays hints of light golden toning, with a few olive streaks on Liberty's portrait. Abrasions are almost nonexistent. NGC ID# 257N, PCGS# 7367

**1926 Silver Dollar, MS66
None Finer at PCGS**

16508 1926 MS66 PCGS. CAC. Prominent golden overtones and frosty luster bring out the silver on one of the few minimally toned areas, the body of the eagle. Carefully preserved, this Premium Gem 1926 Peace dollar is tied for numerically finest known to PCGS (2/17), and housed in a green label holder. *Ex: FUN Signature (Heritage, 1/2011), lot 6236.* NGC ID# 257N, PCGS# 7367

16509 1927 MS65 PCGS. CAC. Ice-blue and straw-gold toning visits this lustrous and well struck Gem. Refreshingly free from abrasions throughout. A low mintage issue, and a rarity any finer. Encapsulated in a green label holder. CAC: 57 in 65, 4 finer (2/17). NGC ID# 257S, PCGS# 7370

**1928 Peace Dollar, MS65
Frosty and Lustrous**

16510 1928 MS65 PCGS. This is a boldly struck example of the *Guide Book* key date, showing frosty, mostly brilliant luster with occasional hints of light golden toning. A few trivial grazes are not out of line for the grade. The 1928 is occasionally available in this grade, but PCGS has seen only 18 finer representatives (3/17), which are out of reach for most collectors. NGC ID# 257V, PCGS# 7373

16511 1928-S MS64+ PCGS. An important condition rarity in the Peace dollar series, the 1928-S is rarely found in high grades, with just 61 finer examples certified by PCGS (2/17). This example is a virtual Gem, exhibiting brilliant silver luster and frosty mint surfaces with a hint of champagne toning. NGC ID# 257W, PCGS# 7374

16512 1935 MS66 NGC. Light to medium wheat-gold toning graces this high-grade final-year Peace dollar. The coruscating surfaces have a mattelike appearance, as made, and are uncommonly free from marks. Likely to command a significant premium. Certified in a former-generation holder. Census: 69 in 66 (1 in 66+), 5 finer (2/17).

From The Martin Peterson Collection. NGC ID# 2582, PCGS# 7378

16513 1935 MS66 PCGS. The 1935 Peace dollar is scarce at the MS66 level, and finer coins are rare. This impressive Premium Gem displays sharply detailed design elements and lustrous, well-preserved surfaces throughout. Shades of golden-tan and lavender toning add to the outstanding eye appeal. NGC ID# 2582, PCGS# 7378

16514 1935 MS66 PCGS. Although not truly rare in MS66, the 1935 Peace dollar is unknown numerically finer at PCGS (2/17). This Premium Gem offers a bold strike and frosty mint luster. Each side displays original golden toning and no major abrasions. NGC ID# 2582, PCGS# 7378

16515 1935 MS66 PCGS. The well-preserved surfaces of this spectacular Premium Gem are visited by subtle hints of golden-tan toning, with vibrant mint luster on both sides. The design elements are sharply detailed and eye appeal is terrific. Some Plus-graded examples have been certified, but PCGS has graded no coins in higher numeric grades (2/17). NGC ID# 2582, PCGS# 7378

EISENHOWER DOLLARS

1973-D Eisenhower Dollar, MS67 Rare Registry-Grade Coin

16516 1973-D MS67 PCGS. A top-grade rarity with satiny nickel-gray luster beneath a blush of light golden toning. Close examination fails to reveal any noteworthy abrasions. The 1973-D is unknown above the MS67 level, and only 15 pieces are in the top grade at PCGS and NGC combined (2/17). The clad Eisenhower dollar set is a major challenge to assemble in MS66 or MS67. Population: 13 in 67, 0 finer (2/17). NGC ID# 258B, PCGS# 7413

16517 1977 MS67 PCGS. The 1977 Ike dollar is rare in MS67 and unknown finer. This Registry coin offers sharp detail and satin luster with wisps of lavender and ice-blue throughout otherwise sun-gold toning. Population: 22 in 67, 0 finer (2/17). NGC ID# 258M, PCGS# 7423

16518 1977 MS67 PCGS. The obverse is primarily orange-gold, but the borders offer lilac and sea-green patina. The reverse displays similar colors, but sea-green is most prevalent. An essentially immaculate Superb Gem. Population: 22 in 67, 0 finer (2/17). NGC ID# 258M, PCGS# 7423

PROOF EISENHOWER DOLLARS

16519 1973-S Silver, Doubled Die Obverse, FS-101, PR70 Deep Cameo PCGS. This minor *Cherrypickers'* variety shows faint doubling on IN GOD WE TRUST, causing parts of the letters to be thicker than usual. As a date, this flawless Deep Cameo proof is conditionally rare. Both sides are brilliant and sharp, and the dramatic white-on-black contrast is picture-perfect. PCGS has only attributed one FS-101 coin this fine, but the present piece and some others exist unattributed by PCGS in this grade. Population: 38 in 70 Deep Cameo (2/17). NGC ID# 258U, PCGS# 396480 Base PCGS# 97431

1976-S Clad Type Two Bicentennial Dollar PR70 Deep Cameo

16520 1976-S Clad, Type Two, PR70 Deep Cameo PCGS. PCGS has seen only 27 Deep Cameo Type Two clad proofs in this topmost grade (2/17), making the present coin a major condition rarity for Registry collectors. The design elements are sharply struck against deeply mirrored fields. Warm golden toning blankets each side. A picture-perfect proof. NGC ID# B77T, PCGS# 97435

16521 1976-S Silver PR70 Deep Cameo PCGS. The silver Bicentennial proof is rare in PR70 Deep Cameo at PCGS. This brilliant Registry Set essential displays incredible white-on-black contrast and flawless preservation. A beautiful silver Bicentennial dollar. Population: 54 in 70 Deep Cameo (2/17). NGC ID# 64AW, PCGS# 97436

SUSAN B. ANTHONY DOLLAR

1979-P Susan B. Anthony Dollar, MS67 Wide Rim Guide Book Variety

16522 1979-P Wide Rim, FS-301, MS67 PCGS. This *Guide Book* variety is in high demand in Superb Gem condition, where it is scarcely known. The current piece is among the finest that PCGS has seen. The strike is bold, although some die erosion is seen in the reverse fields. Delicate hints of ice-blue and champagne accent nickel-gray surfaces. Population: 18 in 67 (1 in 67+), 0 finer (2/17). NGC ID# 2593, PCGS# 145367 Base PCGS# 99571

COMMEMORATIVE SILVER

1893 Isabella Quarter, PR61 Rare, 'Unofficial' Proof Striking

16523 1893 Isabella Quarter PR61 NGC. Although many standard references list 103 Isabella quarters as proof striking, there are no official mint records confirming a proof mintage and experts still debate the issue. Both PCGS and NGC population data list a limited number of proofs, but the grading service's positions are constantly evolving. Recently, John Dannreuther indicated he had seen only one coin that he would consider a true proof and research by Kevin Flynn indicates only eight proofs were originally struck. The debate is far from settled and will likely continue for some time.

This attractive example has all the earmarks of a proof — meticulously struck, with deeply mirrored fields, wide square rims, and exceptionally sharp definition on every intricate detail of Isabella's snood and the reverse figure's spindle, hair, and distaff. Mostly brilliant, a light halo of reddish-umber toning embraces the rims and margins. A few light lines and marks in the fields determine the assigned grade. Census: 2 in 61, 41 finer (2/17). NGC ID# BYMM, PCGS# 9221

16524 1900 Lafayette Dollar MS64 PCGS. DuVall 2-C. The second S in STATES (on the obverse) is repunched on this available type-coin variety. This Choice example shows a bold strike and luminous luster cast in a light golden-gray hue. There are no distracting abrasions. NGC ID# BYKW, PCGS# 9222

16525 1921 Alabama 2X2 MS65 NGC. CAC. The low mintage variety with the state admission number incused on the right obverse field, an ingenious means of increasing collector demand. A coruscating Gem with light to medium straw-gold and lavender toning. Housed in a prior generation holder. NGC ID# BYEZ, PCGS# 9225

16526 1921 Alabama 2X2 MS66 PCGS. CAC. Mottled almond-brown and lilac-gray patina lightly colors the satiny surfaces of this Premium Gem Alabama half dollar, featuring the scarce and popular 2x2 in the right obverse field. Merely 6,006 examples were distributed, and only eight coins are reported finer at PCGS (2/17). NGC ID# BYEZ, PCGS# 9225

16527 1935/34-D Boone MS67 PCGS. CAC. The 1935-D / 1934 Boone half dollar has the lowest reported mintage of any U.S. silver commemorative issue: 2,003 pieces. An essentially immaculate Superb Gem. The lustrous surfaces display pastel ice-blue and chestnut-gold toning. Population: 68 in 67 (4 in 67+), 9 finer. CAC: 15 in 67, 1 finer (2/17). NGC ID# BYFU, PCGS# 9263

16528 1938-S Boone MS67 PCGS. CAC. From a small distribution of 2,100 pieces, this final-year Boone commemorative is lustrous, well struck, and immaculate. Sea-green, lilac, powder-blue, and orange-gold toning endows both sides. Housed in a green label holder. Population: 34 in 67 (2 in 67+), 2 finer (10/13).
Ex: New York Signature (Heritage, 11/2013), lot 4825, which realized \$1,410. NGC ID# BYG8, PCGS# 9276

1936 Cleveland Half Dollar, MS67+ Pastel Toned

16529 1936 Cleveland MS67+ PCGS. CAC. Frosted mint luster brightens the pastel shades of pale blue, green, and gold over each side. There are a couple of minute flecks over the portrait but virtually no other imperfections, explaining the MS67+ assessment and CAC endorsement. The Cleveland commemorative half dollar is practically unobtainable in higher grades, with a single MS68 submission at PCGS (2/17). NGC ID# BYGB, PCGS# 9288

16530 1936 Delaware MS67+ PCGS. CAC. Lovely lime-green, rose-red, and butter-gold toning endows both sides of this lustrous and practically pristine Superb Gem. The strike is sharp though slightly incomplete on the sails. PCGS has certified 17 pieces as MS67+, with only three finer. CAC: 54 in 67, 1 finer (2/17). NGC ID# BYGJ, PCGS# 9301

16531 1936 Gettysburg MS66+ PCGS. This Plus-graded Premium Gem exhibits sharply detailed design elements and impeccably preserved surfaces, under delicate shades of pale gold toning. Vibrant mint luster adds to the incredible eye appeal. NGC ID# BYGM, PCGS# 9305

16532 1922 Grant With Star MS63 NGC. CAC. Although the former generation holder bears a green CAC sticker, one wonders why this scarce Grant with Star half dollar did not instead receive a gold CAC seal. The strike is sharp, the semi-prooflike fields are practically unmarked, and the moderate golden-brown toning contributes further to the eye appeal. NGC ID# BYPP, PCGS# 9307

1922 Grant With Star Half, Strong MS65 Key Classic Commemorative Issue

16533 1922 Grant With Star MS65 NGC. For decades, a sharply struck Grant with Star in Gem condition has challenged collectors. Many coins were sold to the general public and subsequently mishandled in one way or another. Fortunately, the present coin remains in full Gem condition, carefully preserved and refreshingly original. The MS65 grade is not impossible to obtain, but for the Grant with Star, it is scarce both by demand and condition. This example shows an excellent strike and the surfaces display pale orange-gold toning spread evenly over each side. NGC reports just 70 numerically finer coins (2/17).
Ex: FUN Signature (Heritage, 1/2005), lot 10615.

From The R. Thayer Sheets Yorktown Collection. NGC ID# BYPP, PCGS# 9307

16534 1928 Hawaiian MS64 PCGS. Bright luster issues from the untuned surfaces of this near-Gem commemorative. The strike is solid, leaving not even the hint of weakness on the design elements. A handful of faint obverse marks prevents the attainment of full Gem classification. A great example for a high-grade commemorative collection.

Ex: FUN Signature (Heritage, 1/2008), lot 2338.

From The R. Thayer Sheets Yorktown Collection. NGC ID# BYGR, PCGS# 9309

**1928 Hawaiian Half Dollar, MS64
Green Label Holder, Green CAC**

16535 1928 Hawaiian MS64 PCGS. CAC. The Hawaiian Sesquicentennial is considered a key of the classic commemorative half dollar series, boasting a mintage of only 10,008 coins, including 50 proofs and a handful of assay pieces. This Choice example displays a bold strike and satiny luster with a hint of light golden toning. CAC-endorsed in a green label holder. NGC ID# BYGR, PCGS# 9309

**1928 Hawaiian Half Dollar, MS65
Outstanding Surface Quality and Eye Appeal**

16536 1928 Hawaiian MS65 NGC. Vibrant reddish-gold and deep brown toning with bits of aquamarine encircles pearlescent silver centers on each side of this lustrous, sharply struck Hawaiian half. A fully original example of this scarce and extremely popular silver commemorative with remarkably high-quality surfaces that are suggestive of an even finer grade. The chief's regalia is fully defined and Captain Cook's portrait is crisply rendered with only a few tiny, inconsequential marks. Housed in a previous generation NGC holder.

Ex: FUN Signature (Heritage, 1/2005), lot 10622.

From The R. Thayer Sheets Yorktown Collection. NGC ID# BYGR, PCGS# 9309

**1928 Hawaiian Half Dollar, MS65
Undisputed Classic Commemorative Key**

16537 1928 Hawaiian MS65 PCGS. CAC. The 1928 Hawaiian half dollar is the undisputed key to the classic silver commemorative series given its low distribution of 9,958 coins. Pale almond-gold patina covers most of this original Gem, leaving the other areas with an attractive layer of ivory-gray coloration. Strike and preservation are impressive. NGC ID# BYGR, PCGS# 9309

16538 1923-S Monroe MS65 PCGS. This delightful Gem exhibits sharply detailed design elements and well-preserved surfaces, under attractive shades of violet, lavender-gray, and burnt-orange toning. Vibrant mint luster adds to the outstanding eye appeal. NGC ID# BYH4, PCGS# 9333

16539 1938 New Rochelle MS67+ PCGS. Crimson, gold, and pastel blue shadings provide color to this impressive MS67+ New Rochelle half dollar, leaving only the central reverse untuned. Fully struck with a handful of stray ticks in the left reverse field. PCGS shows six finer representatives (2/17). NGC ID# BYDX, PCGS# 9335

16540 1928 Oregon MS67+ PCGS. CAC. Delicate honey-gold, lime-green, and violet-red toning adorns this lustrous and fully struck Superb Gem. Both sides are practically void of contact. A desirable silver commemorative. PCGS has certified only five pieces finer (2/17). CAC: 36 in 67, 1 finer (2/17). NGC ID# BYH8, PCGS# 9342

16541 1926 Sesquicentennial MS65 PCGS. A layer of dusky golden-gray patina reveals scattered blushes of fiery-orange coloration. As usual, the strike is flat, a characteristic that makes the 1926 Sesquicentennial half dollars vulnerable to abrasions. Hence, examples are scarcely seen in Gem condition. There are merely nine finer grading events at PCGS (2/17). NGC ID# BYJ4, PCGS# 9374

16542 1926 Sesquicentennial MS65 NGC. CAC. George Washington and his less heralded Jazz Age successor are paired in jugate fashion on the obverse. The reverse features the Liberty Bell. A beautiful Gem with vibrant luster, mark-free fields, and delicate straw-gold toning. The borders display freckles of tan and green patina. NGC ID# BYJ4, PCGS# 9374

**1926 Sesquicentennial Half, MS65+
Splendidly Toned, Rare Any Finer**

16543 1926 Sesquicentennial MS65+ PCGS. CAC. Rainbow iridescence at the margins yields to shades of gold, lilac, and a few deep-gray speckles that comprise the attractive, natural patina of this high-end Gem Sesquicentennial half dollar. Smooth satiny luster coruscates within the colorfully toned sloped borders. It will be challenging to improve on this Plus-graded example with CAC endorsement, since notably few coins are any finer from the mintage of 141,120 pieces. Population: 17 in 65+, 9 finer. CAC: 79 in 65, 4 finer (2/17). NGC ID# BYJ4, PCGS# 9374

16544 1935 Spanish Trail MS65 PCGS. Bright and clean, with lots of luster and a light overlay of milky patina on otherwise brilliant surfaces. This Gem Spanish Trail half dollar is also well-struck and a suitable type coin.

Ex: FUN Signature (Heritage, 1/2008), lot 2412.

From The R. Thayer Sheets Yorktown Collection. NGC ID# BYJ5, PCGS# 9376

16545 1935 Spanish Trail MS66 NGC. A sharp, satiny example of this popular commemorative, showing light golden toning atop unabraded surfaces. Although collectible in this grade, the Spanish Trail half dollar is elusive any finer.

From The R. Thayer Sheets Yorktown Collection. NGC ID# BYJ5, PCGS# 9376

16546 1938 Texas MS67 PCGS. CAC. The 1938 Texas half dollar is scarce in MS67 and prohibitively rare any finer. CAC-approved coins are in the minority overall. This Superb Gem displays a bold strike and satin luster with delicate champagne toning. Eye appeal abounds. Population: 62 in 67 (5 in 67+), 1 finer. CAC: 34 in 67, 1 finer (2/17). NGC ID# BYJL, PCGS# 9394

**1938 Texas Half Dollar, MS67+
Only a Single Coin Finer at PCGS**

16547 1938 Texas MS67+ PCGS. CAC. The kneeling visage of the goddess Victory embraces numerous Texas icons on the reverse of this 1938 Texas Centennial half. Yearly mintages from 1934 to 1938 culminated in a net distribution of 3,780 pieces, of which just one coin is numerically finer than this high-end Superb Gem at PCGS. Remarkably well-struck on both sides of the complicated Coppini design, this example resonates with brilliant satin luster and hints of lilac and gold patina. Population: 5 in 67+, 1 finer. CAC: 34 in 67, 1 finer (2/17). NGC ID# BYJL, PCGS# 9394

**1927 Vermont Commemorative Half, MS67
Extremely Rare Any Finer**

16548 1927 Vermont MS67 PCGS. The Vermont Sesquicentennial half dollar is seldom offered in MS67, and the number of finer coins can be counted on two hands with fingers left over, even including pieces graded MS67+. The conditional rarity of this issue is underappreciated. The present coin displays a bold strike and satiny luster. Olive-gold toning is deeper on the obverse than the reverse, where it is also joined by amber and forest-green near the borders. Population: 54 in 67 (2 in 67+), 1 finer (2/17). NGC ID# BYJR, PCGS# 9401

16549 1952 Washington-Carver MS67 NGC. Attractive shades of champagne-gold, lime-green, and lavender toning blanket the well-preserved surfaces of this delightful Superb Gem. A lens reveals a few light lines on the portrait, but the design elements are well-detailed and ample mint luster shines through the toning. The eye appeal is exceptional. Census: 39 in 67 (2 in 67+, 10 in 67★, 2 in 67+★), 1 finer (2/17). NGC ID# BYL3, PCGS# 9434

16550 1952 Washington-Carver MS67 PCGS. CAC. The centers are lightly toned, but the borders show orange-red and apple-green patina. Lustrous, well struck, and nearly void of contact. A high mintage issue, but seldom seen as a Superb Gem. Population: 26 in 67 (5 in 67+), 1 finer. CAC: 24 in 67, 0 finer (1/17). NGC ID# BYL3, PCGS# 9434

16551 1952 Washington-Carver MS67 NGC. CAC. Attractive shades of champagne-gold, lavender, and magenta toning blanket the well-preserved surfaces of this spectacular Superb Gem. Well-detailed design elements and vibrant mint luster add to the outstanding eye appeal. Census: 39 in 67 (2 in 67+, 10 in 67★, 2 in 67+★), 1 finer. CAC: 24 in 67, 0 finer (2/17). NGC ID# BYL3, PCGS# 9434

16552 1952-D Washington-Carver MS66 PCGS. From a distribution of 8,006 pieces, the 1952-D Washington-Carver half dollar is virtually unobtainable in grades above MS66. This well-detailed, well-preserved Premium Gem offers lustrous surfaces under delicate shades of pale gold toning. Population: 58 in 66 (3 in 66+), 0 finer (2/17). NGC ID# BYL4, PCGS# 9435

COMMEMORATIVE GOLD

16553 1904 Lewis and Clark Gold Dollar MS64 PCGS. A boldly struck lemon-gold near-Gem. The fields display infrequent minor contact. The only double-headed U.S. coin design. Certified in a green label holder.

Ex: Long Beach Signature (Heritage, 9/2003), lot 7584; FUN Signature (Heritage, 1/2004), lot 9234, which realized \$3,335. NGC ID# BYLE, PCGS# 7447

**1904 Lewis and Clark Gold Dollar, MS65+
Better Date for Type Purposes**

16554 1904 Lewis and Clark Gold Dollar MS65+ PCGS. For those seeking a single high-grade example of the Lewis and Clark gold dollar, this 1904 is the better option. Examples are more available in the upper levels of Mint State than coins struck the following year despite similar mintage of slightly more than 10,000 pieces. This lustrous wheat-gold Gem has a moderately reflective reverse and bold definition throughout. Impressively clean fields. NGC ID# BYLF, PCGS# 7447

16555 1905 Lewis and Clark Gold Dollar MS64 PCGS. From a distribution of 10,041 pieces, the 1905 Lewis and Clark gold dollar is more elusive than its 1904 counterpart. This attractive Choice example offers sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster throughout. NGC ID# BYLG, PCGS# 7448

16556 1915-S Panama-Pacific Gold Dollar MS66 PCGS. This Premium Gem is sharply struck and displays luminous yellow-gold mint luster with no notable abrasions. This is one of the more popular gold dollar issues in the classic commemorative series. Finer examples exist but may be out of reach for the casual collector. NGC ID# BYLH, PCGS# 7449

**1915-S Pan-Pac Two and a Half, MS63
Collector-Grade Example**

16557 1915-S Panama-Pacific Quarter Eagle MS63 PCGS. This Select Pan-Pac quarter eagle displays much better eye appeal than the grade would suggest, delivering satiny yellow-gold luster with no major abrasions. The strike is well-rendered throughout. This popular Panama-Pacific commemorative is seldom offered in such an affordable grade. NGC ID# BYLP, PCGS# 7450

**1915-S Pan-Pac Quarter Eagle, MS63
Attractive Coloration**

16558 1915-S Panama-Pacific Quarter Eagle MS63 PCGS. CAC. This Select Uncirculated Pan Pac quarter eagle earns CAC endorsement for its rich, honey-gold color and above-average surface quality. Orange and rose-gold highlights emphasize the softly lustrous, collector-favorite design. A few small abrasions are grade-consistent, yet the eye appeal alone suggests a finer grade. NGC ID# BYLP, PCGS# 7450

16559 1917 McKinley Gold Dollar MS66 NGC. A lovely Premium Gem with brilliant light yellow surfaces, this piece exhibits sharp details and satin luster with exceptional eye appeal. NGC has only certified 57 numerically finer examples (2/17). NGC ID# BYLL, PCGS# 7455

16560 1917 McKinley Gold Dollar MS66 PCGS. The 10,000 McKinley gold dollars were the only gold coins issued by the United States in 1917, due to the financial stresses of World War I. This impressive Premium Gem exhibits well-detailed design elements and impeccably preserved orange-gold surfaces, with vibrant mint luster on both sides. NGC ID# BYLL, PCGS# 7455

**1917 McKinley Memorial Gold Dollar
Frosty MS67**

16561 1917 McKinley Gold Dollar MS67 PCGS. Frosty, unblemished mint luster gives this Superb Gem 1917 McKinley gold dollar exceptional eye appeal. Both sides show a blend of yellow-gold and peach-orange hues, and a touch of strike softness on the central reverse pillars is hardly discernible. None are numerically finer at either grading service. Population: 82 in 67 (11 in 67+), 0 finer (1/17). NGC ID# BYLL, PCGS# 7455

16562 1922 Grant Gold Dollar, No Star, MS65 NGC. CAC. The No Star Grant Memorial gold dollar is slightly scarcer in Gem and finer grades than its With Star counterpart. This CAC-approved example displays frosty yellow-gold luster and a sharp strike. Eye appeal is excellent. NGC ID# BYLN, PCGS# 7458

**1922 Grant Memorial Gold Dollar
No Star Obverse, MS67**

16563 1922 Grant Gold Dollar, No Star, MS67 PCGS. This Superb Gem is among the finest No Star Grant gold dollars certified by PCGS (3/17), and it is conditionally scarce as such. The strike is bold, and each side offers warm straw-gold luster over satiny surfaces. The No Star variety is scarcer in high grade than its With Star counterpart. NGC ID# BYLN, PCGS# 7458

16564 1922 Grant Gold Dollar, With Star, MS66 PCGS. This is an incredibly attractive Premium Gem that requires careful scrutiny with a loupe to differentiate it from most MS67 coins on the market. The strike is bold, and each side offers frosty lemon-gold toning. A small alloy spot on the lower-right reverse attests to the originality of the surfaces. NGC ID# BYPS, PCGS# 7459

16565 1922 Grant Gold Dollar, With Star, MS66+ PCGS. The With Star version, this piece boldly struck with satiny lemon-gold mint luster. A loupe reveals no mentionable abrasions. The Plus designation increases the appeal of this high-end representative. NGC ID# BYPS, PCGS# 7459

16566 1926 Sesquicentennial Quarter Eagle MS65 PCGS. The Sesquicentennial quarter eagle was the final gold commemorative prior to 1984. The present orange-gold and apple-green Gem is richly patinated and evenly struck. A lens is required to locate incidental contact. NGC ID# 2FE9, PCGS# 7466

MODERN BULLION COINS

16567 1986 Silver Eagle MS70 PCGS. The 1986 silver eagle was the first pure silver coin struck by the U.S. Mint. Although intended for bullion investors, it also proved popular with collectors. Millions were produced, but relatively few meet the lofty requirements of the MS70 level. But this brilliant and fully impressed example is as flawless as its grade implies. NGC ID# 26J4, PCGS# 9801

16568 1986 Half-Ounce Gold Eagle MS70 NGC. The inaugural half-ounce Gold Eagle is in high demand among Registry collectors. This piece is flawlessly preserved and showcases beautiful silky-smooth yellow-gold luster. NGC ID# 28Y8, PCGS# 9805

16569 1986 Half-Ounce Gold Eagle MS70 NGC. A flawlessly preserved example of the first-year issue in this popular bullion series. Modeled after Saint-Gaudens 1907 double eagle obverse, the design elements are fully struck. Beautiful straw-gold surfaces yield satiny mint luster. NGC ID# 28Y8, PCGS# 9805

16570 1987 Half-Ounce Gold Eagle MS69 PCGS. The surfaces of this delightful half-ounce Gold Eagle are just one tick away from perfection and the design elements are fully detailed throughout. Vibrant mint luster adds to the incredible eye appeal. PCGS has certified only six numerically finer examples(2/17). NGC ID# 26N8, PCGS# 9812

**1989 Silver Eagle, MS70
Elusive Issue in This PCGS Grade**

16571 1989 Silver Eagle MS70 PCGS. According to Mint records, production of one-ounce Silver Eagles increased to 5.2 million pieces in 1989, but the issue remains elusive in the ultimate grade of MS70, at least in PCGS holders. This spectacular MS70 specimen exhibits fully struck design elements and vibrant mint luster throughout, with brilliant surfaces that personify numismatic perfection. Population: 43 in 70 (2/17). NGC ID# 26JA, PCGS# 9826

16572 1991 Silver Eagle MS70 NGC. The second edition of *American Silver Eagles* explains: "At the MS-70 level the 1991 has one of the strongest values in the marketplace." Indeed, it represents one of the most elusive issues at this ultimate grade level. This flawless representative is fully struck and satiny with a couple of trivial milk spots on the obverse. NGC ID# 26JE, PCGS# 9846

1992 Half-Ounce Gold Eagle, MS70

16573 1992 Half-Ounce Gold Eagle MS70 NGC. The mintage of the 1992 half-ounce gold eagle was 54,404 pieces, less than one-fifth the mintage of its one-ounce counterpart. MS69 examples can be located with minimal effort, but those that meet the ideal requirements of the MS70 level are few and far between. The present fully struck butter-gold specimen is devoid of contact, strike-throughs, or flan imperfections. NGC ID# 26ND, PCGS# 9862

**1993 Quarter-Ounce Gold Eagle, MS70
Registry-Grade Rarity, Unimprovable Surfaces**

16574 1993 Quarter-Ounce Gold Eagle MS70 NGC. Scarce in the unimprovable MS70 condition, this 1993 quarter-ounce Gold Eagle comes from a mintage of just 71,864 pieces. The present example displays flawless lemon-gold surfaces and brilliant, frosty luster. A total of 113 pieces are certified at this ultimate Superb Gem grade — 17 at PCGS and 96 at NGC (1/17). NGC ID# 26M9, PCGS# 9870

16575 1993 Quarter-Ounce Gold Eagle MS70 NGC. The 1993 quarter-ounce Gold Eagle was struck to the extent of 71,864 coins. While that total is not necessarily among the lowest in the series, this ranks among the Top 5 scarcest issues in the finest levels of preservation. Each side lacks any impairments whatsoever. Completely defined and highly appealing. Census: 98 in 70 (2/17). NGC ID# 26M9, PCGS# 9870

16576 1994 Quarter-Ounce Gold Eagle MS70 NGC. A conditionally scarce, perfectly preserved example of this better-date quarter-ounce Gold Eagle. The strike is full, and each side showcases satiny yellow-gold mint luster. Pieces are scarce this fine at NGC and rare in the same grade at PCGS. NGC ID# 26MA, PCGS# 9880

1994 Quarter-Ounce Gold Eagle, MS70 Full Details, Exquisite Surfaces

16577 1994 Quarter-Ounce Gold Eagle MS70 PCGS. The mintage of 1994 quarter-ounce Gold Eagles increased only slightly over the comparably scarce 1993 issue. Just 72,650 pieces were struck. PCGS examples in the flawless MS70 grade are seldom encountered, and therefore always in demand by Registry Set enthusiasts. This frosty and lustrous lemon-yellow Gold Eagle will entice many suitors who demand perfection. Population: 18 in 70 (1/17). NGC ID# 26MA, PCGS# 9880

1995-W Silver Eagle PR67 Deep Cameo Green Label Holder

16578 1995-W Silver Eagle PR67 Deep Cameo PCGS. Key to the proof silver eagle series, the 1995-W was only available from the Mint as part of a costly proof set with four gold eagle denominations. Relatively few sets were sold, and prices for the silver eagle soon escalated on the aftermarket. This is a fully struck and unabraded example with scattered small tan freckles. Housed in a green label holder.
From The Martin Peterson Collection. NGC ID# CFWX, PCGS# 9887

1995-W Silver Eagle, PR69 Deep Cameo Low-Mintage Proof Key

16579 1995-W Silver Eagle PR69 Ultra Cameo NGC. The bullion program 10th anniversary proof set's low distribution of 30,125 sets established the scarcity of the 1995-W Silver Eagle, which was only offered to the public as part of the West Point Mint's special set. This example is brilliant and virtually flawless with dramatic white-on-black contrast. NGC ID# CFWX, PCGS# 9887

16580 1996 Quarter-Ounce Gold Eagle MS70 NGC. With a mintage of 60,318 coins, the 1996 quarter-ounce Gold Eagle represents a somewhat better date in the series — one that is particularly elusive in this unimprovable grade. Fully struck with pristine, lemon-gold surfaces, this piece is certain to impress. NGC ID# 26MC, PCGS# 9904

16581 1997 One-Ounce Platinum Eagle MS69 PCGS. This spectacular one-ounce Platinum Eagle exhibits fully detailed design elements and virtually perfect brilliant surfaces struck in the innovative reverse proof format, with reflective devices and frosty fields. PCGS has graded only one numerically finer example (2/17). NGC ID# 26TY, PCGS# 99751

16582 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 PCGS. A fully struck, impeccably preserved specimen of this exceptionally popular modern bullion issue, conceived by Mint Director Ed Moy. The design is modeled after Augustus Saint-Gaudens' famous 1907 patterns (Judd-1917), which were struck on a double-thick, reduced diameter planchet. NGC ID# 26S4, PCGS# 407404

16583 2009 One-Ounce Gold Ultra High Relief Twenty Dollar, Early Releases, MS70 NGC. An ideal specimen of the 2009 Ultra High Relief one-ounce gold bullion coin, modeled after the ultra-rare Judd-1917 patterns in the Smithsonian Institution. The coins were struck on double-thick planchets with the diameter of a regular-issue ten dollar gold piece. This magnificent specimen is fully struck and brightly lustrous, with technically perfect orange-gold surfaces. NGC ID# 2TY2, PCGS# 407405 Base PCGS# 407404

16584 2009 Ultra High Relief, First Strike MS70 Prooflike NGC. A delightful, technically perfect example of this incredibly popular one-ounce gold bullion coin, with fully struck design elements and semiprooflike yellow-gold surfaces. The 2009 Ultra High Relief's were designed to replicate Saint-Gaudens' ultra-rare Judd-1917 patterns, struck on a reduced diameter planchet of double thickness. NGC ID# 26S4, PCGS# 506614 Base PCGS# 506602

16585 2015-W High Relief One-Ounce Gold, First Strike, Moy and Mercanti Signatures, MS70 PCGS. This lovely Liberty gold piece exhibits brilliant yellow surfaces and full design definition with satin luster. The PCGS label bears the signatures of Edmund C. Moy and John Mercanti. PCGS# 546087 Base PCGS# 545532

COINS OF HAWAII

16586 1883 Hawaii Quarter MS66 PCGS. CAC. An impressively well-preserved example with a sharp strike and coveted CAC endorsement. The vibrantly lustrous surfaces display champagne toning overall with deeper olive and multicolor hues around the borders. PCGS reports only 19 Superb Gems finer. CAC: 48 in 66, 17 finer (2/17). NGC ID# 2C5B, PCGS# 10987

16587 1883 Hawaii Dollar AU53 PCGS. The 1883 Hawaiian coinage, dime through silver dollar, was struck at San Francisco on standard U.S. silver planchets. Of the four regular issue denominations, the dollar is scarcest. The present nearly untuned example has light high point wear, but the legends and motifs display luster, and the fields exhibit only unimportant marks. NGC ID# 2TGD, PCGS# 10995

GSA DOLLARS

16588 1878-CC Soft Pack GSA MS65 NGC. Toned and circulated Morgan dollars were often confined to these soft packs, while brilliant Uncirculated coins were placed in the usual hard packs. Inexplicably, this untuned, frosty Gem found its way into this atypical packaging format. A lovely first-year representative with bold central detail and minimal marks.

16589 1878-CC GSA MS64+ Prooflike NGC. A well struck, brilliant, and lustrous near-Gem. Marks are inconsequential for the designated grade. A desirable GSA example of the first Carson City Morgan dollar issue. Without box or certificate. NGC ID# 253M, PCGS# 518846 Base PCGS# 7081

1879-CC GSA Dollar, MS63 Much Better Carson City Issue

16590 1879-CC GSA MS63 NGC. CAC. Normal Mintmark. The GSA release of the 1970s included just 4,123 examples of the 1879-CC, the final sizeable distribution from an original mintage of 756,000 pieces. This Select coin is one of the better representatives of the GSA hoard with mostly brilliant with lustrous, semireflective fields. A crescent of pale gold toning at the lower reverse joins thickly frosted devices for nice eye appeal. Numerous small abrasions chronicle the rough handling, transport, and long storage in Mint-sewn bags. Band-certified by NGC with CAC endorsement, in its original GSA holder and box with numbered certificate. Census (GSA Hoard coins): 258 in 63 (11 in 63+, 3 in 63★), 113 finer (2/17). NGC ID# 253T, PCGS# 518848 Base PCGS# 7086

1879-CC GSA Dollar, MS63 VAM-3, 'Capped Die' Variety

16591 1879-CC Capped Die, VAM-3, GSA, MS63 NGC. A Top 100 Variety. A lustrous better-date Carson City dollar. The lightly toned olive-gold and silver-gray surfaces show slight blending of impression at the centers. The reverse is well preserved, and the obverse displays wispy grazes. The scarce variety with myriad tiny die chips near the mintmark; believed since 1965 to be a Large CC over a Small CC. A GSA box and certificate of issue accompany the lot.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 253U, PCGS# 533225 Base PCGS# 7088

16592 1880/79-CC Reverse of 1878, VAM-4, GSA, MS64+ NGC. A Top 100 Variety. A Plus-graded Choice example of this popular overdate, with the undertype 79 visible beneath the final two primary digits in the date. The parallel top arrow feather identifies the Reverse of 1878. The design elements are well-detailed and the well-preserved surfaces radiate vibrant mint luster throughout. Band certified in the original GSA government holder. NGC ID# AP7P, PCGS# 518922 Base PCGS# 407108

16593 1880-CC GSA MS65 NGC. VAM-8. A hint of golden patina visits this lustrous Gem. The obverse field is smooth, and the portrait displays delicate marks. The centers show inexactness of impression, usual for VAM-8. A GSA box and certificate are included. NGC ID# 2542, PCGS# 518851 Base PCGS# 7100

1881-CC GSA Dollar, MS66+

16594 1881-CC GSA MS66+ NGC. VAM-2. Only a whisper of tan toning visits this highly lustrous and sharply struck silver dollar. The fields are well preserved, and the cheek shows only minor grazes. VAM-2 shows recutting within the upper loops of the 8s in the date, and is prevalent among GSA examples of this better and lower mintage Carson City issue. NGC ID# 2547, PCGS# 518863 Base PCGS# 7126

16595 1881-O GSA MS65 PCGS. Although the 1881-O is plentiful in Uncirculated grades, it is scarce in a GSA holder, and GSA Gems are decidedly rare. This lightly toned and lustrous example has nearly pristine fields, and the cheek displays only delicate contact. GSA Population: 3 in 65, 0 finer (2/17). NGC ID# 2548, PCGS# 519013 Base PCGS# 7128

16596 1882-CC GSA MS66 NGC. CAC. VAM-2C3. A Hit List 40 Variety. Liberty's upper lip is doubled, and the lower back of the cap shows a small die break. Lustrous and sharply struck with silver-gray bag toning on Liberty's cheek and rich arcs of aquamarine and golden-brown toning across portions of both sides. The variety is undesignated on the NGC label. Includes original GSA box and certificate. NGC ID# 254H, PCGS# 518866 Base PCGS# 7134

16597 1883-CC GSA MS66+ NGC. The virtually pristine, brilliant surfaces of this Plus-graded Premium Gem radiate vibrant mint luster and the well-detailed design elements show just a touch of blending on the hair strands above Liberty's ear. Band certified in the original government GSA holder. NGC ID# 254H, PCGS# 518869 Base PCGS# 7144

16598 1885-CC GSA MS65 NGC. With its original box and certificate of authenticity, this important GSA-issued 1885-CC Morgan dollar exhibits frosty and highly lustrous silver surfaces that are brilliant and untuned. Nearly 65% of the 228,000-coin mintage remained in Treasury vaults until the GSA sales of the 1970s.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 254M, PCGS# 518875 Base PCGS# 7160

16599 1885-CC GSA MS65 NGC. VAM-3. Light almond-gold patina adorns this lustrous and nicely struck silver dollar. The reverse is impressively unmarked, and the obverse shows only distributed wispy contact. The lowest mintage Carson City Morgan issue. A GSA box accompanied the lot. NGC ID# 254M, PCGS# 518875 Base PCGS# 7160

16600 1885-CC GSA MS65 NGC. VAM-3. A hint of olive-gold toning visits this well struck, lustrous, and low mintage Carson City dollar. The reverse is virtually pristine, as is Liberty's cheek. Minor grazes on her jaw decide the grade. A GSA box and certificate are included. The certificate has a few pencil notations. NGC ID# 254M, PCGS# 518875 Base PCGS# 7160

16601 1885-CC GSA MS65 NGC. VAM-3. Brilliant aside from a narrow arc of apricot-gold toning along the upper obverse rim. A better date Carson City Gem that boasts potent luster and a sharp strike. The fields are smooth, and the portrait displays only wispy contact. NGC ID# 254M, PCGS# 518875 Base PCGS# 7160

1885-CC GSA Morgan, MS66 Challenging Grade in GSA Holder

16602 1885-CC GSA MS66 NGC. The 1885-CC Morgan in original GSA plastic is challenging in MS66 and rare finer. This Premium Gem is frosty-white and sharply struck. The reverse is virtually flawless, and the obverse shows only a few faint grazes on the cheek that define the grade. A thoroughly eye-appealing Carson City GSA dollar. Original box and certificate included. Box is slightly torn at the binding but intact. NGC ID# 254M, PCGS# 518875 Base PCGS# 7160

1885-CC GSA Dollar, MS66+ Doubled Dash, VAM-4, Hot 50

16603 1885-CC Doubled Dash, VAM-4, GSA, MS66+ PCGS. A Hot 50 Variety. The distinctive and very scarce variety with a thick "dash" below the second 8 in the date. A lustrous and brilliant representative that boasts an intricate strike and outstanding preservation. The 1885-CC has the lowest mintage of any Carson City Morgan issue, and is much scarcer than its 1882-CC, 1883-CC, and 1884-CC predecessors. PCGS# 523597 Base PCGS# 518875

1890-CC VAM-9A Dollar, MS62 Much Better GSA Issue

16604 1890-CC GSA MS62 NGC. VAM-9A. Relatively few examples of the 1890-CC dollars (3,949 pieces) were included in the GSA Hoard, making it a challenging issue for the GSA collector. This brilliant and frosty coin shows some light scuffs on the cheek but the fields are minimally marked for the assigned grade. As usual, the strike is soft above the ear and at the talons, but sharp in all other regards. A bold die crack across stars 1 and 2 characterize the VAM-9A variety. Band-certified by NGC in the original GSA holder and box, without certificate. NGC ID# 255D, PCGS# 518878 Base PCGS# 7198

1890-CC GSA Dollar, MS63 Scarce in Original Holder

16605 1890-CC GSA MS63 NGC. Only 3,949 1890-CC Morgan dollars were released as part of the GSA hoard during the 1970s, compared to the hundreds of thousands of Carson City dollars from 1880 to 1885. This brilliant, softly frosted example presents bold detail over the eagle's breast feathers and relatively smooth fields. NGC ID# 255D, PCGS# 518878 Base PCGS# 7198

1891-CC GSA Dollar, MS60 Well-Known 'Spitting Eagle' Variety

16606 1891-CC Spitting Eagle, VAM-3, GSA, MS60 NGC. A Top 100 Variety. Among the most well-known varieties of Carson City dollars, the so-called "Spitting Eagle" is identified by a die lump beneath the eagle's beak. A number of examples emerged from the GSA auctions, but the variety is nonetheless popular. This example is lightly toned despite occasional dabs of tan toning. The cheek and obverse field display grade-consistent marks.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 255H, PCGS# 518881 Base PCGS# 7206

1891-CC GSA Dollar, Untoned MS63

16607 1891-CC GSA MS63 NGC. The 1891-CC was considered an available Nevada branch mint issue before other dates from 1880 to 1885 were distributed en masse during the 1970s. The GSA release included 5,687 1891-CC dollars, examples of which are seldom offered in their original holders. Not a blush of color is present on either side. Light frost radiates over minimally abraded, well-defined surfaces. Slight roller marks occur on the cheek. NGC ID# 255H, PCGS# 518881 Base PCGS# 7206

1891-CC GSA Dollar, MS63 Untoned and Minimally Marked

16608 1891-CC GSA MS63 NGC. A Select Uncirculated survivor of the GSA release, one of only 5,687 pieces to represent the 1891-CC issue among the hundreds of thousands of earlier Carson City dollars in the GSA holding. Brilliant and frosty with surprisingly few marks for the grade, this coin is Mint-fresh and vibrantly attractive. The strike is quite sharp throughout. Housed in the original GSA holder with box and band-certified by NGC, but no certificate accompanies the coin. Few 1891-CC GSA dollars are finer. Census (GSA Hoard coins): 78 in 63, 8 finer (2/17). NGC ID# 255H, PCGS# 518881 Base PCGS# 7206

REDFIELD DOLLARS

1883-S Redfield Dollar, MS63 Red Paramount Holder

16609 1883-S MS65 Paramount (MS63 NGC). Ex: Redfield Collection. The 1883-S is much more elusive in Mint State than its '78-S through '82-S predecessors. Examples in circa-1980 Paramount "Redfield" holders are infrequently encountered. This well-struck example has blushes of cherry-red toning along the obverse border. The portrait and reverse are mostly white. The reverse is impressively unabraded, while the obverse displays delicate contact.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 254K, PCGS# 7148

CERTIFIED MODERN PROOF SETS

16610 Five-Piece 1937 Proof Set PR63 to PR66 NGC. All five coins are individually held, and are from the same submission. The set includes:

Cent PR63 Red. Orange centers cede to lime-green borders. A few scattered flecks.

Nickel PR63. A precisely struck almond-gold specimen with distributed minute ebony freckles.

Dime PR65. The strike is razor-sharp, and the glassy surfaces appear as made save for faint green-gold toning.

Quarter PR66. Light golden-brown patina enriches the margins of this boldly struck Premium Gem.

Half dollar PR64. An undisturbed Choice half dollar bathed in dusky lavender, sea-green, and chestnut shades. (Total: 5 coins)

16611 Five-Piece 1937 Proof Set, PR66 to PR67 PCGS. This high-grade proof set includes:

Cent PR66 Red. CAC. A fully struck Premium Gem with glimmering copper-pink surfaces and no evidence of carbon. Housed in a green label holder.

Nickel PR67. Fully struck and reflective with satiny devices. Housed in an old green label holder.

Dime PR67. CAC. Housed in an old green label holder. The strike is full, and the reflective fields offer dusky champagne toning.

Quarter PR67. CAC. A beautiful Superb Gem proof, cast in dusky golden toning with deeper crimson along the lower reverse border.

Half Dollar PR67. CAC. Fully struck and CAC-approved, this high-end proof half dollar shows light golden toning similar to that seen on the other silver pieces in this set. (Total: 5 coins)

16612 Five-Piece 1937 Proof Set, PR66 to PR67 PCGS. CAC. The set includes:

Cent PR66 Red. CAC. A brilliant proof with fire-orange and lemon-yellow highlights atop the coppery-pink surfaces.

Nickel PR67. CAC. Fully struck and beautifully mirrored, this high-end proof displays a hint of light champagne toning.

Dime PR67. CAC. A brilliant and fully struck proof with virtually flawless preservation in the fields.

Quarter PR67. CAC. This glimmering Superb Gem closely matches the nickel in the set, showing light golden color and beautifully preserved mirrors.

Half Dollar PR67. CAC. This piece is fully struck and deeply reflective, every bit the visual and technical equal of the lower denominations in the set. (Total: 5 coins)

16613 Five-Piece 1938 Proof Set PR63 to PR67 NGC. The coins are separately certified but from the same grading submission. The set includes:

Cent PR63 Red and Brown. A rose-red and olive-gold example with eye appeal that surpasses its numerical grade.

Nickel PR65. Light caramel-gold shades visit crisply struck and undisturbed surfaces.

Dime PR67. Jade-green and orange-red embrace the upper obverse. The strike is precise, and carbon is absent.

Quarter PR66. The mirrored fields and sharply impressed motifs display lightly dappled gunmetal toning.

Half dollar PR66. Pastel powder-blue and honey-gold shades attest to the originality of this exemplary example. (Total: 5 coins)

16614 Five-Piece 1939 Proof Set PR66 NGC. The quintet is separately certified in holders with certification numbers from the same grading submission. The set includes:

Cent PR66 Red and Brown. The central reverse and left obverse field are pumpkin-gold. The right obverse border is fire-red.

Reverse of 1938 nickel PR66. Powder-blue, wheat-gold, lime-green, and ruby-red invigorate both sides.

Dime PR66. A well struck specimen with a nearly white obverse and a lightly toned reverse.

Quarter PR66. A flashy and precisely struck example. Tiny freckles of tan-brown toning emerge beneath a loupe.

Half dollar PR66. Caramel-gold and plum-red tints grace this flashy and fully impressed Premium Gem. (Total: 5 coins)

16615 Five-Piece 1940 Proof Set PR65 to PR66 NGC. The five coins are individually certified in holders bearing certification numbers from the same submission. The set includes:

Cent PR65 Red. An outstanding orange-gold Gem.

Reverse of 1940 nickel PR65. The boldly struck surfaces display medium sea-green, ice-blue, and wheat-gold toning.

Dime PR66. A needle-sharp Premium Gem with mirrored fields and narrow peripheral bands of russet-red patina.

Quarter PR66. Light, even olive-gold toning graces undisturbed and lustrous surfaces.

Half dollar PR66. Delicate lilac, sea-green, and straw-gold patina endows this flashy and flawless specimen. (Total: 5 coins)

16616 Five-Piece 1941 Proof Set PR64 to PR67 NGC. The quintet are separately housed in holders from the same grading submission. The set includes:

Cent PR64 Red and Brown. An intricately struck orange-red Choice cent. The glassy fields are unperturbed.

Nickel PR65. The strike is razor-sharp across jade-green and chestnut-gold surfaces. One tiny tick on the jaw.

Dime PR66. A flashy Premium Gem with sun-gold and lilac-red accents. A fleck or two on the right reverse field.

Quarter PR66. Iridescent honey-gold, cherry-red, and lime-green toning adorns the obverse margin.

No AW half dollar PR67. Pastel gold, green, and lilac patina is limited to the borders. The designer's monogram was lapped from the reverse die, as often seen for the issue. (Total: 5 coins)

16617 Six-Piece 1942 Proof Set PR65 to PR66 NGC. The sextet resides in separate holders, bearing certification numbers from the same grading submission. The set includes:

Cent PR65 Red. The obverse is butter-gold, and the reverse is orange. The portrait high points are cherry-red, and the upper left reverse has a few narrow horizontal streaks.

Type One nickel PR66. A lightly toned and lovely specimen. One minute tick on the steps.

Type Two nickel PR66. Consistent and moderate tan-gold and lavender-gray toning drapes both sides.

Dime PR66. Orange-red, lemon-gold, and magenta shades are most prominent along the right reverse margin.

Quarter PR66. Aquamarine and apricot-gold toning graces the reverse periphery.

Half dollar PR66. A precisely struck representative with smooth, glassy surfaces and faint green-gold toning. (Total: 6 coins)

ERRORS

1959-D Lincoln Cent, MS64 Struck on a Silver Dime Blank

16618 1959-D Lincoln Cent — Struck on a Silver Dime Blank — MS64 NGC. 2.5 grams, identical to the statutory weight of a silver Roosevelt dime. This pearl-white off-metal error is both lustrous and well preserved. Struck aligned with the collar at 3 o'clock, with broad rims near that area and very narrow rims opposite at 9 o'clock. The left-side legends, especially IN GOD WE, exhibit stretching toward the rims. The portrait and Memorial are sharply struck.

2000-P Sacagawea Dollar, MS67 Struck on a Maryland Quarter

16619 2000-P Sacagawea Dollar — Struck on a 2000-P Maryland Quarter — MS67 NGC. This is a stunning Superb Gem example with intense light gray luster and remarkable surface quality. Indications of the Maryland quarter undertype remain visible, including part of the word OLD on the baby's cheek, and part of the word LINE on Sacagawea's chin. Washington's ear is apparent beneath UNUM.

SO-CALLED DOLLARS

1901 Leshner Dollar, AU50
First Type, HK-787
Serial No. 26

- 16620** 1901 Leshner Dollar, First Type, Serial No. 26, HK-787, AU50 PCGS. Joseph Leshner's referendum souvenir dollar prototype, soon replaced with the more familiar design featuring a mining landscape and the Colorado State Seal. Leshner struck only 100 pieces of this first type, each with a different hand-engraved serial number. This example is #26, and displays sea-green toning in protected areas. The open fields are rose-gold. Population: 2 in 50, 7 finer (2/17). Ex: C.W. Cowell Collection (B. Max Mehl, 12/1923), lot 923; Baltimore ANA Signature (Heritage, 8/1993), lot 7950. NGC ID# 26BJ, PCGS# 19000

1900 HK-789 Leshner Dollar, MS63
A.B. Bumstead, Type Two, Serial No. 689
Iconic Hard Money Private Issue

- 16621** 1900 Leshner Dollar, A.B. Bumstead, Type Two, Serial No. 689, HK-789, MS63 NGC. CAC. Victor, Colorado grocer A.B. Bumstead was Joseph Leshner's best customer for his scheme to circulate "referendum souvenir" silver medals in the West. The present piece has a serial number, and lacks the upper reverse scrollwork seen on Type One examples. The smooth gunmetal-gray surfaces display golden-brown and forest-green undertones. Census: 4 in 63, 0 finer. CAC: 1 in 63, 1 finer (2/17). NGC ID# 26BL, PCGS# 19002

- 16622** 1946 U.N. Monetary Pattern, HK-873, Gold. 37 mm. Struck by Medallic Art Company under the direction of Abe Kosoff and Hans Schulman. Mintage is 314 pieces, with many likely melted over the years. Included with the lot is its original cardboard holder, as issued by Medallic Art Co. PCGS# 643657

U.S. TRADE TOKENS (1890-1900)

1890 Deseret Award Medal, Mint State
10K Gold, Awarded to Marie Gorlinski

- 16623** 1890 Deseret Agricultural and Manufacturing Society. Utah Territorial Fair. Award Medal. 10K Gold. Mint State Uncertified. Rulau-Ut-SL-4. 27.0 mm, 9.1 grams, specific gravity 12.02, indicating 10K gold. This splendid piece has delicate and attractive blue and rose toning on its light yellow surfaces. Awarded to "Miss Marie H. Gorlinski for Collection of Water Color Paintings." Her obituary appeared in the December 29, 1938 issue of the *Salt Lake Tribune* in Salt Lake City, Utah. She was the widow of Dr. Michael A. Hughes, born at Baton Rouge, Louisiana on June 27, 1861, and a resident of Salt Lake City from 1872 to 1917. Her obituary notes: "Mrs. Hughes was well known in Utah art circles, having studied in Milan, Italy, and exhibited frequently here. Flower were her specialty. She was also active in Catholic social circles."

INGOTS

San Francisco Assay Office Silver Ingot
'Grease Bar', 99.73 Ounces

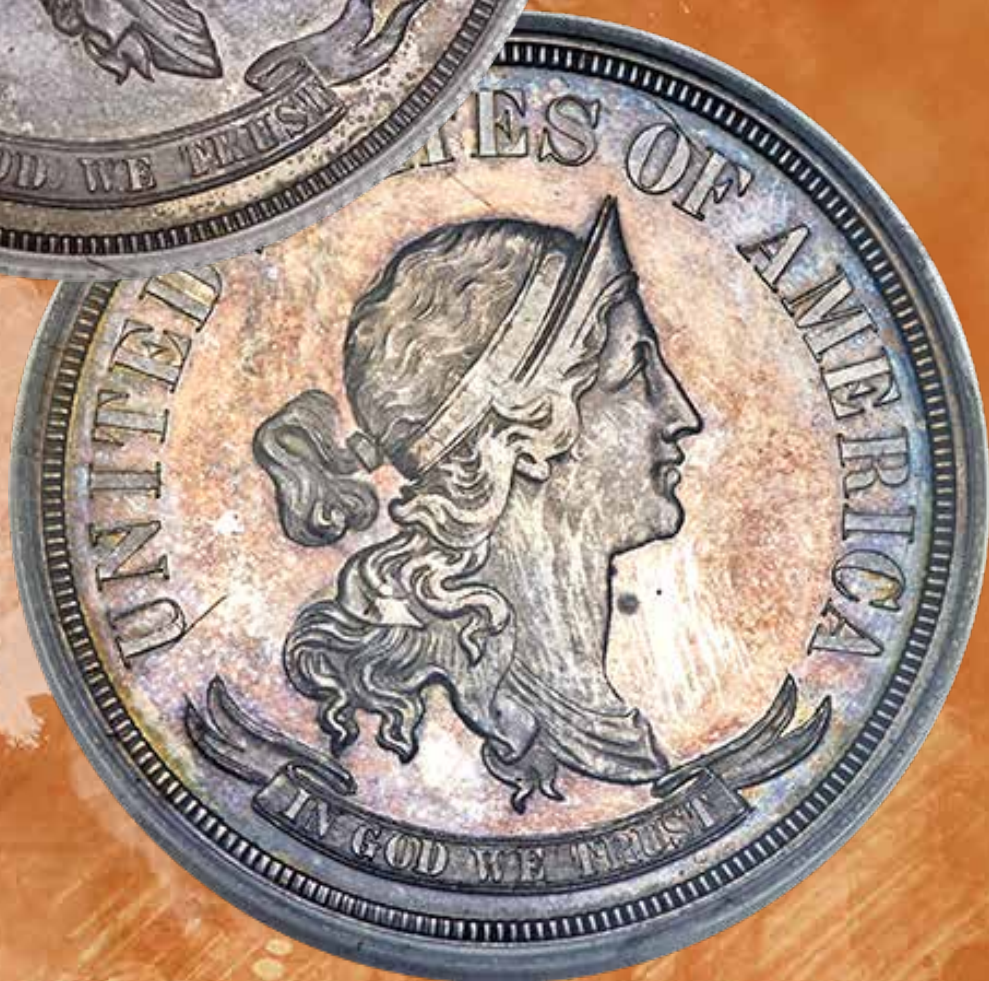

- 16624** Plain (1968) San Francisco Assay Office Silver Ingot. 99.73 Ounces. Commonly known as "Grease Bars" from the weight marking in a grease pencil. These otherwise plain ingots were produced late, ending in 1968. This 99.73 troy ounce silver ingot is entirely unmarked, except for a grease pencil marking of the weight, "99.73." Approximate dimensions are 7.5 inches x 3.25 inches x 0.75 inches. The ingot was received by Mr. Walter E. West in exchange for silver certificates, according to the accompanying certificate:

"Today, in behalf of Mr. Walter E. West, Muskegon, Mich. I have received from the government agency as shown above, one bar of fine silver, weighing 99.73 oz. (troy) in exchange for the required amount of silver certificates, duly surrendered. March 7, 1968. [signed] Harry Boisen."

Ex: Long Beach Signature (Heritage, 5/2008), lot 2847.

End of Session Three

SESSION FOUR

PATTERNS

1854 Judd-161 Large Cent
Near-Gem No Stars Pattern

- 16625** 1854 One Cent, Judd-161 Original, Pollock-187, R.4 PR64 Brown PCGS. CAC. Similar to the regular issue large cent, but there are no obverse stars, and the wreath is smaller. Struck in bronze with a plain edge. Deep golden-brown and chocolate colors with hints of orange-red and aqua imbue surfaces that display attractive, subtle iridescence. The strike is a bit soft in the centers, minor retained obverse laminations are noted at 9 and 10 o'clock, and clash marks (as made) outline the devices. Certified in a green label holder with CAC endorsement.

Ex: FUN Signature (Heritage, 1/2006), lot 4543. NGC ID# 29A6, PCGS# 11663

1866 With Motto Dollar in Copper
Judd-540, PR62 Brown

- 16626** 1866 Dollar, Judd-540, Pollock-605, R.8, PR62 Brown NGC. A regular obverse die is paired with a With Motto reverse. Struck in copper with a reeded edge. In the past, these pieces have been termed regular dies trial strikings, but that does not seem to be the case. It is more likely these copper dollars were deliberately struck for sale to collectors. The grade is derived from light hairlining. Otherwise, the surfaces are even, deep brown over each side. Well, but not fully struck. PCGS# 60738

1869 William Barber Half Dollar in Silver
Judd-742, Deeply Toned PR64

- 16627** 1869 Standard Silver Half Dollar, Judd-742, Pollock-823, R.5, PR64 PCGS. A bust of Liberty faces right with UNITED STATES OF AMERICA around and a scroll with IN GOD WE TRUST below. Liberty wears a cap ornamented with two large stars. William Barber's initial "B" can be seen within the folds of the ribbon at the back of the cap, and pronounced doubling is seen on the motto IN GOD WE TRUST. The reverse has 50 CENTS centered within a wreath of oak and laurel leaves with STANDARD SILVER above and the date 1869 below. Struck in silver with a reeded edge. The surfaces are dusky blue-gray with golden toning around the margins. NGC ID# 29SS, PCGS# 60969

1869 Standard Silver Half, PR61
Judd-748, Struck in Silver

- 16628** 1869 Standard Silver Half Dollar, Judd-748, Pollock-831, R.5, PR61 PCGS. Standard Silver design with a bust of Liberty facing right on the obverse. Liberty is wearing a diadem inscribed LIBERTY, the legend is around the border, and the motto IN GOD WE TRUST is on a scroll at the bottom. The reverse exhibits the denomination 50 CENTS within a wreath of oak and laurel. STANDARD SILVER is at the periphery, the date 1869 is below the wreath. Struck in silver with a reeded edge. A few delicate lines exist beneath mirrored shades of blue and pale-umber toning. Housed in an old green label holder, the sharp motifs on this example exhibit cameo contrast that is undesignated on the previous generation PCGS slab. Population: 2 in 61, 41 finer (1/17). NGC ID# 26VS, PCGS# 60977

1871 Five Cent Pattern in Nickel
Judd-1050, PR66

16629 1871 Five Cents, Judd-1050, Pollock-1184, Low R.6, PR66 NGC. The obverse bears a portrait of Liberty similar to that used on the nickel three cent piece. The date is below and UNITED STATES OF AMERICA is above the central device. The reverse depicts a reversed Roman numeral five (backward) and the word CENTS is within a wreath. Struck in nickel with a plain edge. These pieces were also struck in copper and aluminum. This is an attractive, thoroughly brilliant example with nicely mirrored fields. The strike details are strong throughout, especially strong for a nickel product. NGC ID# 2A2L, PCGS# 61309

1759 (1999) Martha Washington Dollar, MS65
Judd-2185, "N" and "N" Variant

16630 1759 (1999) Martha Washington Dollar, "N" and "N", Judd-2185, Pollock-Unlisted, Low R.7, MS65 NGC. The 1759-dated obverse has a portrait of Martha Washington facing right, while the reverse shows a view of Mount Vernon. This design, which omits a denomination and the UNITED STATES OF AMERICA, has been used by the Mint to test candidate coinage alloys since 1965. The present piece was likely struck in 1999, when the Sacagawea dollar was planned with a "golden" color to distinguish the denomination from a quarter. The letter N was crudely entered into the left and right field of the obverse die, to identify pieces struck in that specific non-manganese alloy. A torn sticker accompanies the piece identifying the composition as 77% copper / 20% zinc / 3% nickel. Plain edge. The surfaces are remarkably bright with the only mentionable flaws being a faint trace of a fingerprint and slight abrasion across Martha's cheek. NGC ID# 2ANM, PCGS# 511836

1759 (1999) Martha Washington Dollar, MS65
Judd-2185, 1% Manganese Alloy

16631 1759 (1999) Martha Washington Dollar, Judd-2185, Pollock-Unlisted, Low R.7, MS65 NGC. The Martha Washington design, previously used to test clad coinage circa 1965, was revived in 1999 to test "golden" alloys for the pending Sacagawea dollar. Unlike the coin above, this piece lacks the "N" and "N" designation that indicates a non-manganese alloy. A sticker accompanies with the specific alloy composition of the piece: 73% copper / 24% zinc / 2% nickel / 1% manganese. Plain edge. Slightly different in hue from the piece above, this example has a brighter yellow cast and the fields are semiprooflike. NGC ID# 2ANM, PCGS# 511836

GOLD DOLLARS

16632 1849 Closed Wreath, D-5, Close Stars, MS64 NGC. A fully struck green-gold representative. Wispy field grazes are all that limit the grade. Scarce any finer. The fifth and final Dannreuther die marriage for the issue. All five varieties had been described by Breen in his 1988 *Encyclopedia*, though he incorrectly assigned Small and Large Head subtypes instead of identifying different star placements. NGC ID# 25BA, PCGS# 521672 Base PCGS# 7503

16633 1849-O Open Wreath MS63 NGC. Struck in substantial numbers (215,000 pieces), approximately 0.5% survive today in all grades. The 1849-O is relatively easy to locate in lower grades, but MS63 and finer pieces can be a challenge. This is a sharply defined example that shows green-gold tinted surfaces. Light abrasions are peppered over each side, and good mint luster is seen throughout. Census: 49 in 63 (1 in 63+), 47 finer (2/17). NGC ID# 25BE, PCGS# 7508

16634 1851 MS65 PCGS. Struck at a time of high mintages due to the great influx of California gold, this issue is ideal for type collections. This Gem exhibits a hint of green on its brilliant and frosty yellow surfaces, with sharp design details. NGC ID# 25BK, PCGS# 7513

16635 1851-C AU58 NGC. Variety 3. From a mintage of 41,267 pieces, the 1851-C is the most available Type One gold dollar from the Charlotte Mint and a popular choice of branch mint type collectors. This attractive near-Mint specimen shows just a trace of friction on the sharply detailed design elements and the lustrous, orange-gold surfaces are lightly abraded throughout. NGC ID# 25BL, PCGS# 7514

**1853 Gold Dollar, Frosty MS65
Sharp Type One Example**

16636 1853 MS65 PCGS. Always the date of first choice for type collectors needing a Gem Type One gold dollar, this frosty and lustrous 1853 example stands above other contenders. Attractive, greenish-gold patina deepens to olive-gold at the rims. Fine granularity across the surfaces creates tiny facets that capture light and bolster the vibrant mint luster. The strike is pinpoint-sharp on the stars, hair strands, and wreath details, with only brief blending at the top of the bun where the impression is incomplete. There are no singularly important abrasions. NGC ID# 25BU, PCGS# 7521

16637 1854 Type Two MS62 PCGS. This frosty orange-gold type coin is graded MS62 due to some faint lines that appear under a loupe, but the surfaces are devoid of severe abrasions. The strike is a trifle soft on the 8 in the date and the highest hair curls, as usual. Luster glows beneath a light and this coin is very attractive for the grade. NGC ID# 25C3, PCGS# 7531

16638 1855 Type Two MS61 NGC. Faint hairlines and other trivial blemishes are evident on each side of this lustrous piece. Attractive green-gold luster adds to its eye appeal. Struck from lightly clashed dies as usual.

Ex: Long Beach Signature (Heritage, 9/2010), lot 5172. NGC ID# 25C4, PCGS# 7532

16639 1856 Slanted 5 MS64 PCGS. Vibrant, satiny mint luster radiates from both sides of this attractive Choice specimen, and the vivid orange-gold surfaces show minimal signs of contact. The design elements are sharply detailed in most areas, with a touch of softness on the date and some dramatic clash marks on the reverse. PCGS has graded 34 numerically finer examples (2/17). NGC ID# 25CB, PCGS# 7540

16640 1857-C VF30 PCGS. Variety 1. A radiant orange-gold example. Glimpses of luster remain, and the sole mentionable mark is a hair-thin line above Liberty's mouth. Only a single die marriage is known, featuring a downward-slanted date. A mere 13,280 pieces were struck for the penultimate Charlotte gold dollar issue. Encapsulated in an old green-label holder. NGC ID# 25CE, PCGS# 7545

16641 1874 MS65 PCGS. This is a well-preserved, luminous orange-gold example, showing a few faint lines on the obverse that determine the grade but do not detract. Some strike weakness is seen on the wreath bowknot as well as the 8 in the date. Finer 1874 gold dollars are elusive. NGC ID# 25DC, PCGS# 7575

16642 1874 MS66 NGC. Philadelphia-area dealers apparently set aside a few thousand 1874 gold dollars, but most such pieces fall short of the quality of the present Premium Gem. The caramel-gold surfaces are lustrous and show only incidental contact. Census: 55 in 66 (1 in 66+, 2 in 66★), 38 finer (2/17). NGC ID# 25DC, PCGS# 7575

16643 1876 MS64 PCGS. A scant 3,200 gold dollars were struck for commerce during the Centennial year, and they are surprisingly rare in nice Mint State. The present near-Gem has a good strike and an undisturbed appearance. The surfaces are mostly orange-gold, though hints of aquamarine infrequently intrude. Encased in an old green label holder. Population: 39 in 64 (2 in 64+), 15 finer (2/17).

From The Martin Peterson Collection. NGC ID# 25DE, PCGS# 7577

16644 1889 MS66+ PCGS. An strongly struck and well-preserved caramel-gold and jade-green Premium Gem. The lower reverse is die doubled south, as always encountered on commercial strikes of the date. From a final-year output of 29,000 gold dollars. NGC ID# 25DU, PCGS# 7590

16645 1889 MS66+ PCGS. Rich orange toning aids the eye appeal of this boldly struck and lustrous Premium Gem. Any imperfections are inconsequential. The lower portion of the wreath is die doubled south, as always seen on commercial strikes of the final-year Liberty gold dollar. NGC ID# 25DU, PCGS# 7590

CLASSIC QUARTER EAGLES

16646 1834 AU58 NGC. Breen-6138, Variety 1, R.1. A bright yellow-gold example with the usual dash of strike weakness on the central high points. Scattered abrasions accompany the grade, but this remains a pleasing Classic Head type coin. NGC ID# 25FS, PCGS# 7692

16647 1836 Script 8 AU58 NGC. Breen-6143, Variety 11, R.2. A butter-gold Borderline Uncirculated representative. Luster is plentiful, and a lens is needed to notice the moderate field marks. Although some Classic half eagle dates (such as the 1835 and 1837) also have both Script 8 and Block 8 varieties, on the 1836 quarter eagle secures a *Guide Book* listing for the two varieties. Housed in a prior-generation holder.

From The Martin Peterson Collection. NGC ID# 25FU, PCGS# 7694

16648 1836 Block 8 AU55 PCGS. Breen-6142, Variety 8, R.3. A well-struck almond-gold Choice AU Classic type coin. Luster glimmers from design elements, and although the obverse rim has a tick or two near 10 o'clock, no other contact is consequential. NGC ID# 25FU, PCGS# 97694

1838 Two and a Half, Near-Mint Smooth Green-Gold Surfaces

16649 1838 AU58 PCGS. Breen-6146, Variety 19, R.2. Luster illuminates the borders and devices of this lightly abraded olive-green quarter eagle. The strike is consistent by the standards of the Classic type. The sole die marriage for this conditionally scarce Philadelphia issue. Population: 20 in 58, 36 finer (2/17). NGC ID# 25FY, PCGS# 7696

LIBERTY QUARTER EAGLES

16650 1845-O XF45 PCGS. Variety 1. The 1 in the date is repunched north. The only dies for this challenging New Orleans issue. Only 4,000 pieces were struck, and most survivors are in VF to AU grades. A charming green-gold example with one small abraded area on the field above the eagle's beak. Housed in a green-label holder. Population: 7 in 45, 18 finer (2/17).

From The Martin Peterson Collection. NGC ID# 25GR, PCGS# 7739

16651 1847 AU58 PCGS. Other than a few scattered marks, this partially lustrous orange-gold near-Gem yields outstanding visual appeal. Slight strike weakness on the eagle's left (facing) leg feathers is typical of the issue. The 1847 quarter eagle is scarce in the upper AU grades and rare as Uncirculated. Population: 4 in 58, 15 finer (2/17). NGC ID# 25H5, PCGS# 7744

**1848-C Two and a Half, AU55
Rare Variety 2, Buckled Obverse**

16652 1848-C AU55 NGC. Variety 2. The 1848-C has a meager mintage of 16,788 pieces, yet two die marriages are known. At least 80% of survivors are Variety 1. The present example is the rare Variety 2, identifiable at a glance by the wavy, buckled obverse field. Presumably, the obverse die was improperly annealed prior to use. The minimally marked straw-gold surfaces show blending of impression on Liberty's neck curl and the eagle's head and neck, yet nice luster and substantial eye appeal remain. Census (all varieties): 26 in 55, 44 finer (2/17).
Ex: New York Signature (11/16), lot 4356. NGC ID# 25HB, PCGS# 7750

**1861 Liberty Quarter Eagle, MS64+
New Reverse, Type Two**

16653 1861 New Reverse, Type Two, MS64+ PCGS. CAC. Two reverse hubs were employed on Liberty quarter eagles struck in the era from 1859 through 1861. These hubs were known as Type One and Type Two, or alternatively, the Old Reverse and the New Reverse. More examples of the New Reverse coins remain extant for all three years. This Plus-graded Choice example exhibits sharply detailed design elements and lightly marked orange and rose-gold surfaces. NGC ID# 25JX, PCGS# 7794

16654 1877-S MS62+ PCGS. A lovely canary-gold representative of this conditionally rare San Francisco issue. A majority of certified '77-S quarter eagles are in AU grades, but this coruscating and unblemished example has strong claims to Select Mint State. Population: 50 in 62 (1 in 62+), 32 finer (2/17). NGC ID# 25KX, PCGS# 7827

16655 1878 MS64+ NGC. From a substantial mintage of 286,260 pieces, the 1878 Liberty quarter eagle is a popular type coin, but the population dwindles in grades above the MS64 level. This Plus-graded Choice specimen offers sharply detailed design elements and lustrous yellow-gold surfaces with only minor signs of contact. NGC has graded 42 numerically finer examples (2/17). NGC ID# 25KY, PCGS# 7828

16656 1878-S MS63 PCGS. Despite the mintage of 178,000 pieces, the 1878-S Liberty quarter eagle is surprisingly difficult to locate in high grade. This attractive Select specimen exhibits sharply detailed design elements and lustrous orange-gold surfaces, with a few scattered minor contact marks. Population: 39 in 63, 18 finer (2/17). NGC ID# 25KZ, PCGS# 7829

16657 1887 MS63 PCGS. A sharply struck honey-gold Select example of this scarce low mintage date. The coruscating surfaces show fewer marks than anticipated. Philadelphia struck a record number (prior to 1921) of silver dollars in 1887, the likely reason for the tiny productions of gold coins at the facility that year. Population: 32 in 63, 22 finer (1/17). NGC ID# 25LB, PCGS# 7839

**1891 Quarter Eagle, MS64 Prooflike
Doubled Die Reverse, FS-801**

16658 1891 Doubled Die Reverse, FS-801, MS64 Prooflike NGC. CAC. Only nine Prooflike 1891 quarter eagles are reported at NGC, this MS64 Prooflike being the sole finest among them (2/17). All examples feature a Doubled Die Reverse with broad doubling on AMERICA, the arrow tips, feathers, and claws. This fully struck Choice two and a half presents deep orange-gold coloring and glassy fields. Lightly abraded. NGC ID# 4DXB, PCGS# 145709 Base PCGS# 7843

16659 1895 MS64 PCGS. Although the mintage for the 1895 seems very low at 6,000 pieces, it was nonetheless a 50% increase over the 4,000 production of quarter eagles in 1894. The present well-struck near-Gem offers smooth orange fields with glimpses of rose-red toning in design recesses. Population: 36 in 64, 31 finer (2/17). NGC ID# 25LK, PCGS# 7847

**1896 Two and a Half, MS66+
Seldom Offered Finer**

16660 1896 MS66+ PCGS. CAC. The availability of this issue declines sharply in MS66, and finer pieces are genuinely rare. This high-end, CAC-approved Premium Gem displays a full strike and frosty green-gold luster. A few faint grazes on the obverse appear only with a loupe. Outstanding for type representation. Population: 35 in 66 (3 in 66+), 7 finer. CAC: 12 in 66, 3 finer (1/17). NGC ID# 25LL, PCGS# 7848

**1902 Quarter Eagle, MS67
Superb Quality and Eye Appeal**

- 16661 1902 MS67 PCGS.** The 1902 Liberty Head issue had an original mintage of 133,500 pieces, and in lesser Mint State grades examples are plentiful. Superb Gems are quite scarce, as confirmed by the current offering that is numerically exceeded by just one coin for the finest-certified at PCGS (2/17). This visually impressive quarter eagle is fully struck and displays a rich, frosty sheen over light honey-gold surfaces. A pair of tiny red-orange specks on the obverse are too small to distract the viewer of this exceptional piece — flawlessly preserved and essentially blemish-free on both sides.
Ex: San Francisco Signature (Heritage, 3/2014), lot 10567. NGC ID# 25LT, PCGS# 7854

- 16662 1903 MS66 PCGS.** This pristine Premium Gem exhibits bold motifs and frosty yellow-gold luster. Any Liberty quarter eagle from the 20th century will serve ideally as a type coin. Finer examples of the 1903 are elusive.
Ex: ANA Signature (Heritage, 2/2014), lot 5211. NGC ID# 2688, PCGS# 7855

- 16663 1903 MS67 PCGS.** This Superb Gem type coin is among the finest 1903 quarter eagles seen by PCGS. The strike is sharp, and frosty yellow-gold luster adorns each side. The reverse has a few tiny alloy spots that attest to the originality of the surfaces. Population: 85 in 67 (4 in 67+), 0 finer (2/17). NGC ID# 2688, PCGS# 7855

- 16664 1904 MS66 NGC.** Frosty yellow-gold luster is a familiar sight for this popular 20th century issue, although the present coin is better preserved than most. The strike is sharp, and the type coin appeal is high. NGC ID# 25LV, PCGS# 7856

**1904 Quarter Eagle, MS67
Frosty Liberty Head Type Coin**

- 16665 1904 MS67 PCGS.** Frosty yellow-gold surfaces show wisps of peach throughout the fields, and the design elements are sharply impressed. No mentionable flaws appear on this Superb Gem type coin, and the eye appeal is correspondingly high. Extremely rare in finer condition. NGC ID# 25LV, PCGS# 7856

- 16666 1906 MS66+ PCGS.** This satiny Premium Gem is sharply struck with bright yellow-gold luster. There are no bothersome abrasions, and the reverse fields have semiprooflike reflectivity. Suitable for type purposes, if the collector does not wish to spend significantly more money on a higher numeric grade. NGC ID# 7JW8, PCGS# 7858

- 16667 1907 MS65 NGC.** A Gem Liberty Head type coin, struck from dies that still showed polishing lines in the fields. The resulting satiny luster has hints of reflectivity in the fields. The strike is sharp, and neither side exhibits critical abrasions. NGC ID# 2688, PCGS# 7859

- 16668 1907 MS66 NGC. Breen-6329.** The base of the 7 in the date is nicely repunched. Per Breen, the discovery coin was lot 1497 in a June 1959 New Netherlands auction. A thoroughly lustrous apricot-gold Liberty type coin that boasts a precise strike and only incidental contact.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 2688, PCGS# 7859

- 16669 1907 MS66+ PCGS.** Frosty straw-gold luster is original, as a coppery alloy spot near the ES in STATES attests. A small tick on Liberty's jaw is all that denies a Superb Gem designation. Eye appeal is pleasing on this final-year Liberty Head type coin. NGC ID# 2688, PCGS# 7859

INDIAN QUARTER EAGLES

- 16670 1911-D Weak D AU55 NGC.** A lightly circulated apricot-gold example of this popular series key. Smooth aside from a slight edge nick near star 4. The Denver mintmark is very faint, but perceptible when the coin is lightly rotated beneath a lens. NGC ID# 2895, PCGS# 7954

- 16671 1911-D — Improperly Cleaned — NGC Details. AU.** Strong D. The mintmark is clear, as is the diagnostic knife rim along the upper-right obverse border. This well-detailed key-date quarter eagle displays smooth yellow-gold surfaces and satin luster. Faint hairlines in the fields denote a light cleaning, although the visual appeal is not significantly different than that of most uncleaned coins in this grade.

**1911-D Quarter Eagle, AU55
Choice Strong D Example**

- 16672 1911-D AU55 PCGS.** Strong D mintmark. Orange-gold surfaces retain much of their original mint luster for exceptional eye appeal. High point wear is consistent with the assigned Choice About Uncirculated grade, but the all-important mintmark is readily visible and fully formed. This is the sought-after series key in all grades, always in demand, and especially so since there are no distracting marks or abrasions to mention. Housed in a previous generation green label holder.
From The Martin Peterson Collection. NGC ID# 7KR7, PCGS# 7943

- 16673 1914-D MS64 NGC.** This attractive Choice example displays sharply detailed design elements and vibrant mint luster throughout. A few minor contact marks, mostly in the reverse field, determine the grade. NGC has graded 47 numerically finer examples (2/17). NGC ID# 2899, PCGS# 7947

- 16674 1914-D MS64 PCGS.** Just one grade point finer, and this Denver issue is among the top three key dates in the series. The present near-Gem 1914-D quarter eagle displays well-struck design elements and satiny wheat-gold luster. There are no obtrusive abrasions. PCGS has seen 51 numerically finer submissions (2/17). NGC ID# 2899, PCGS# 7947

16675 1915 MS64+ PCGS. CAC. From a production of 606,000 coins, this softly frosted near-Gem radiates glittering luster and honey-gold tones. The strike is uniformly bold, save for the central band on the headdress. Two small ticks behind the eagle's head define the grade. NGC ID# 7KRC, PCGS# 7948

**1915 Quarter Eagle, MS65
Only Six Coins Finer at PCGS**

16676 1915 MS65 PCGS. The typical 1915 two and a half dollar gold piece at the leading certification services grades just shy of MS61, highlighting the importance of this Gem offering. Additionally, only six submissions have been awarded a higher technical assessment at PCGS (3/17). The devices on each side are fully struck. Eye-appealing shades of orange and rose-gold adorn well-preserved surfaces. NGC ID# 7KRC, PCGS# 7948

16677 1925-D MS65 NGC. A coruscating sea-green and butter-gold Gem. Apparent abrasions are limited to a slender line through the R in PLURIBUS. The bottom two headdress feathers are incomplete, but the remainder of the strike is sharp. NGC ID# 7KRD, PCGS# 7949

16678 1926 MS65 PCGS. An impressive Indian quarter eagle, this U.S. sesquicentennial dated issue exhibits frosty yellow luster and lovely light orange overtones. It is sharply struck with exceptional eye appeal. NGC ID# 7KRE, PCGS# 7950

16679 1926 MS65 NGC. Dusky caramel-gold shades encompass this lustrous Indian Gem. Minor field contact east of the M in UNUM precludes a finer grade. The lowest headdress feathers show only inconsequential incompleteness. NGC ID# 7KRE, PCGS# 7950

16680 1926 MS65 PCGS. Sea-green and peach-red shades embrace this sharply struck and lustrous Indian gold type coin. A loupe reveals only incidental signs of contact. Surprisingly rare any finer. Encapsulated in an old green-label holder.
From The Martin Peterson Collection. NGC ID# 7KRE, PCGS# 7950

16681 1926 MS65+ PCGS. The 1926 is one of several popular type-coin issues from the late part of the Indian quarter eagle series. This high-end Gem displays a bold strike and frosty yellow-gold mint luster. A few tiny alloy spots appear on the reverse beneath a loupe. PCGS lists 45 finer representatives (3/17). NGC ID# 7KRE, PCGS# 7950

16682 1926 MS65+ PCGS. This is a sharp, frosty Gem with above-average surfaces for the grade. Original yellow-gold luster illuminates clean fields. The 1926 is available in this grade but scarce finer. PCGS has seen only 45 higher-grade submissions (3/17). NGC ID# 7KRE, PCGS# 7950

16683 1926 MS65+ PCGS. CAC. A high-grade olive-green and pumpkin-gold type representative. Lustrous, well struck, and unmarked with a couple of pinpoint alloy spots on the eagle's legs. CAC has been stingy with this issue at the Gem level, and the present lot provides a rare opportunity to secure both the Plus and CAC designations. CAC: 74 in 65, 1 finer (1/17). NGC ID# 7KRE, PCGS# 7950

16684 1927 MS65 NGC. A charming apricot-gold Gem. The well struck and coruscating surfaces display minimal imperfections. Within wealthy families, Uncirculated Indian quarter eagles were popular Christmas presents during the 1920s. NGC ID# BUTL, PCGS# 7951

16685 1927 MS65+ PCGS. A sharply defined Gem, this 1927 quarter eagle exhibits frosty luster and brilliant yellow surfaces with excellent eye appeal. Trivial copper toning spots appear at the central obverse. PCGS has only certified 22 finer examples (2/17). NGC ID# BUTL, PCGS# 7951

**1929 Indian Quarter Eagle, MS65
Rarely Seen Any Finer**

16686 1929 MS65 PCGS. The final-year 1929 issue is somewhat available in Mint State grades up to MS64, but it is scarce in Gem condition and very rare in Premium Gem. This is an outstanding Gem coin. Bright mint luster illuminates variegated toning — primarily orange-gold, but with lemon-gold, red, and lilac shades that combine for abundant eye appeal. The strike is quite sharp, while a few incidental, light marks are the sole factors that resist an even finer grade. PCGS lists just four numerically finer pieces (2/17). NGC ID# 289F, PCGS# 7953

THREE DOLLAR GOLD PIECES

16687 1854 AU58 NGC. Only the slightest trace of friction is evident on the high points of the strongly impressed design elements and the lightly abraded orange-gold surfaces retain much of their original mint luster. Eye appeal is quite strong for the grade.
From The Martin Peterson Collection. NGC ID# 25M3, PCGS# 7969

16688 1854 AU58 PCGS. This caramel-gold Borderline Uncirculated example is surprising void of marks, and displays luster throughout the legends. Liberty's eyebrow and forehead curls show only a whisper of wear. The single-year small DOLLARS subtype. NGC ID# 25M3, PCGS# 7969

16689 1854 MS62 NGC. The 1854 is the first issue for the three dollar gold denomination, and the production of 138,618 pieces marked the only instance in the series where the annual mintage exceeded 100,000 coins. This example is sharply struck and features clean green-gold surfaces and rich luster. A few light hairline scratches are consistent with the grade. In high demand as a type issue.
Ex: Dallas Signature (Heritage, 7/2006), lot 1099; FUN Signature (Heritage, 1/2008), lot 3976.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 25M3, PCGS# 7969

1854-O Three Dollar, XF40
Introductory New Orleans Representative

- 16690 1854-O XF40 NGC. Variety 2.** This is the usual variety with lapping at the lower reverse. The 1854-O (24,000 pieces) is much scarcer than the Philadelphia coins struck that same year — the first date in the three dollar gold series — but far more available than the rare 1854-D. This pale gold XF example maintains good detail with the highest points of the design expectedly worn. The date is incomplete, and small marks are peppered throughout. NGC ID# 25M5, PCGS# 7971

1866 Three Dollar, Lustrous AU58

- 16691 1866 AU58 PCGS.** Struck in the amount of 4,000 circulation strikes, the 1866 three dollar gold issue had a typical production for a series that was basically low-mintage from the early 1860s forward, save for 1874 and 1878. This near-Mint coin boasts still-lustrous wheat-gold surfaces with a light peppering of minor marks and one copper alloy spot near the upper obverse rim. Population: 25 in 58, 46 finer (2/17). NGC ID# 25MM, PCGS# 7987

- 16692 1866 — Cleaning — Genuine PCGS. Unc. Details.** The 1866 has a meager commercial mintage of 4,030 pieces, and unlike many later low mintage dates, few Mint State examples were saved. The apricot-gold surfaces appear slightly wavy but are minimally marked and only inoffensively hairlined.

- 16693 1874 MS62 PCGS.** Light gold surfaces are markedly prooflike, although no such designation has been awarded. The motifs are generally well-defined, save for typical softness on the bowknot. Faint marks are scattered throughout this three dollar gold type coin. NGC ID# 7KDE, PCGS# 7998

- 16694 1888 — Improperly Cleaned — NGC Details. Unc.** This sharply struck peach-gold example is highly pleasing to the unaided eye, although a lens reveals parallel hairlines across both sides. UNITED is die doubled, as seen on all business strikes for this low-mintage date.
From The R. Thayer Sheets Yorktown Collection.

CLASSIC HALF EAGLES

- 16695 1834 Plain 4 AU55 PCGS. Breen-6502, McCloskey 2-B, R.3.** Rich apricot-gold patina confirms the originality of this lightly marked first-year Classic five. Luster dominates the borders and motifs. The centers display only minor incompleteness of strike. In a green-label holder.
From The Martin Peterson Collection. NGC ID# 25RR, PCGS# 8171

- 16696 1834 Plain 4 AU58 PCGS. Breen-6501, McCloskey 1-A, R.3.** A large mintage of 657,460 pieces was split between the Plain 4 and Crosslet 4 fives in 1834, with the Plain 4 the much more-available of the two variants. This near-Mint example displays lightly abraded, greenish-gold surfaces with considerable bright mint luster still intact. The coin is crisply struck from an early die stage — an ideal representative of the Classic Head design. NGC ID# 25RR, PCGS# 8171

- 16697 1838 AU53 NGC. Breen-6515, McCloskey 2-B, R.1.** The Small Arrows, Large 5 variety. This final-year Classic half eagle has rich orange-red and olive-green toning. Liberty's forehead and curls show minor wear, but no marks merit mention, and luster outlines design elements.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 25S4, PCGS# 8176

- 16698 1838-C — Cleaning — PCGS Genuine. VF Details. Breen 6516, Variety 2, R.5.** Just 17,159 pieces were struck, making this Charlotte issue second only to the 1834 Crosslet 4 in rarity among the Classic Head fives. Olive-gold color spreads evenly over both sides of this smoothly worn example, which at one time was cleaned but not harshly. A heavy diagonal die break with a long, wide retained internal cud adds interest to the reverse, as does the repunched 5 in the denomination. This is a suitable coin for any collection of mintmarked gold despite the old cleaning.

LIBERTY HALF EAGLES

- 16699 1839 AU53 PCGS.** The 1839 Liberty half eagle is a one-year type coin with the original, more ornate bust of Liberty on the obverse. The Philadelphia issue is not much more common than its popular branch mint counterparts and is underrated in high grade. This AU example displays bold detail and green-gold patina with hints of luster in the peripheral fields. Scattered light abrasions are typical of the grade. Population: 17 in 53, 62 finer (2/17). NGC ID# 25S7, PCGS# 8191

- 16700 1841-D Tall D — Improperly Cleaned — NGC Details. AU. Variety 5-B.** All examples of the 1841-D were struck from the same obverse die, but two reverse varieties are known. The Small D, Variety 5-A, is several times more available than the elusive Tall D, Variety 5-B. The present caramel-gold example has minimal wear, but is slightly bright and exhibits subtle field marks near the forehead and above the wings.

- 16701 1847-C VG8 PCGS. Variety 1.** A glossy butter-gold Charlotte half eagle. No marks are noticeable, and the legends are clear aside from a portion of the L in LIBERTY. The eagle's wings are well-defined for the VG level. NGC ID# 25TN, PCGS# 8233

1849-C Five Dollar, AU55
Strongly Struck C-Mint Half Eagle

- 16702 1849-C AU55 NGC. Variety 1.** The usual die state with a die crack left of the U in UNITED to the olive leaf. This Charlotte Mint issue is known for its relatively strong strike, as shown on both sides of this reddish-gold Choice AU example. The stars display full centers and radials, and only moderate softness appears over Liberty's ear and the eagle's neck. Census: 43 in 55, 45 finer (2/17). NGC ID# C5XD, PCGS# 8241

16703 1853-C — Cleaned — ANACS. AU55 Details. Variety 1. A Charlotte type coin with only a hint of high point wear. The peach-gold surfaces are mildly bright. A pair of parallel thin marks are noted above star 4, and the reverse field exhibits strike-throughs below the wings. NGC ID# 25UE, PCGS# 8254

16704 1854-D Weak D AU53 NGC. Variety 37-DD. The very top of the Dahlonega mintmark is apparent below the feather tip. The low date variant for the issue. The 1854-D mintage was 56,413 pieces, and survivors are about evenly divided into four die pairs. Variety 37-DD is the sole Weak D marriage. This original apricot-gold example is smooth aside from a grooved area on the upper reverse rim. A mint-made lamination is noted near the I in LIBERTY. NGC ID# 25UL, PCGS# 98258 Base PCGS# 8258

1854-D Weak D Five, AU55 Appealing for the Grade

16705 1854-D Weak D AU55 PCGS. Variety 37-DD. The mintmark was shallowly entered into the die on this variety — PCGS has certified a minimal number in all grades, but the date in general is scarce above the present AU55 grade level. This piece displays a bold strike and partially lustrous yellow-gold surfaces. The mintmark is faint but fully outlined and easily seen with a loupe. Abrasions are limited. NGC ID# 25UL, PCGS# 98258 Base PCGS# 8258

16706 1856-C — Tooled — Genuine PCGS. AU Details. A lemon-gold Charlotte half eagle that offers substantial luster. The strike is above average for the Southern branch facility. The reverse field has a few mint-made strike-throughs, and the field near Liberty's chin is pinscratched and smoothed.

16707 1856-S AU55 NGC. Medium S. Luster fills the legends and surrounds individual stars. A nicely struck example of this early San Francisco issue. The almond-gold surfaces are moderately marked, as expected for the Choice AU level. NGC ID# 25UZ, PCGS# 8270

1856-S Five Dollar, AU58 Better Date in High Grade

16708 1856-S AU58 PCGS. Designated as a near-Mint coin by PCGS and clearly worthy, as the devices are bold and hints of luster remain in the fields. This straw-gold San Francisco half eagle is lightly marked but shows no major abrasions. The 1856-S boasts a fairly significant mintage of more than 105,000 pieces, however, high-end AU coins are scarce, and Mint State pieces are decidedly rare. Population: 14 in 58, 6 finer (1/17). NGC ID# 25UZ, PCGS# 8270

16709 1861 AU58 NGC. CAC. A collectible near-Mint example of this popular type-coin issue, showing luster in the fields with satiny golden color overall. The strike is bold, and neither side displays obtrusive abrasions. NGC ID# 25VK, PCGS# 8288

1866 With Motto Half Eagle, AU50 Scarce First Year of Type

16710 1866 AU50 PCGS. The 1866 Motto five is even rarer than what one might expect by its production of just 6,700 pieces. Per PCGS, less than 100 survivors are known. The present green-gold example qualifies for its About Uncirculated grade by virtue of strong definition on the devices and minimally abraded surfaces. We note a thin mark on the nose and short reeding impressions near stars 5 and 11. Glimpses of mint luster remain. Population: 8 in 50, 17 finer (2/17). NGC ID# 25VZ, PCGS# 8311

16711 1873 Open 3 MS61 PCGS. From a mintage of 112,505 pieces, the 1873 Open 3 half eagle is surprisingly difficult to locate in high grade. This impressive Mint State specimen offers well-detailed design elements, with just a touch of softness on the curls on Liberty's neck. The lustrous orange-gold surfaces show the minimum number of minor contact marks for the grade. Population: 14 in 61, 35 finer (2/17). NGC ID# 25WK, PCGS# 8328

16712 1873 Open 3 MS62 PCGS. The Open 3 and Closed 3 half eagles of this date are similarly available in the absolute sense, but both are scarce in Mint State. This Open 3 coin displays yellow-gold luster with a hint of reflectivity in the fields. Slight strike weakness is seen on the eagle's neck and the hair curls around Liberty's brow. Scattered abrasions define the grade. Population: 14 in 62, 21 finer (2/17). NGC ID# 25WK, PCGS# 8328

1874-CC Half Eagle, VF25 Collectible Carson City Five

16713 1874-CC VF25 PCGS. Variety 1-C. The base of the 7 is over a dentil, and the mintmark is level. Half eagle production at the Carson City Mint reached its highest point to date in 1874. A mintage of 21,198 coins would only be surpassed in 1880. The 1874-CC is relatively available despite a typical survival rate of 1%. This well-circulated five dollar gold piece shows hues of olive and rose with full centers on the stars. The portrait and eagle are worn, but the overall impression is clear. Pleasing with attractive coloration. Population: 9 in 25, 100 finer (2/17).

From The R. Thayer Sheets Yorktown Collection. NGC ID# 25WP, PCGS# 8334

1877-CC Five Dollar, Choice VF
Only 8,680 Examples Struck

- 16714 1877-CC VF35 PCGS. Variety 1-B.** Carson City half eagles were seldom used in local trade. The 8,680 five dollar gold pieces struck there in 1877 mostly found their way to San Francisco, the Eastern states, and abroad, per Rusty Goe (2003). Although we will never know where this VF35 example circulated, it shows clear signs of commercial usage. Blending is evident over well-defined motifs, and small marks are peppered throughout. The surfaces display hints of reddish-gold and olive. A very scarce, in-demand issue.
From The R. Thayer Sheets Yorktown Collection. NGC ID# BT9Z, PCGS# 8343

- 16715 1877-CC — Scratch — Genuine PCGS. XF Details. Variety 1-A.** A trio of light pinscratches on the left reverse field confirm a test mark made long ago. The 1877-CC is a rare Carson City issue with a production of only 8,680 pieces. All went into commerce, and perhaps as few as 200 pieces survive. A wheat-gold example with its share of luster about the legends and stars.
From The R. Thayer Sheets Yorktown Collection.

1878-CC Half Eagle, XF Details
Nevada Mint Rarity

- 16716 1878-CC — Graffiti — PCGS Genuine. XF Details. Variety 1-A.** Auction appearances of the 1878-CC are scant. Merely 9,054 coins were struck, and it is likely that fewer than 100 examples remain available to collectors. These factors account for what should be intense interest in this XF Details representative. Thin horizontal depressions occur on each side, but design definition is good and the reddish-gold surfaces are eye-appealing.
From The R. Thayer Sheets Yorktown Collection.

1879-CC Five Dollar, XF45
Appealing in Every Respect

- 16717 1879-CC XF45 PCGS. Variety 1-A.** This green and reddish-gold Carson City half eagle enjoys strong detail on the curls, stars, and talons despite moderate friction. Luster shines from the peripheral areas. A scattering of small field marks appear over each side, but none of them are of any singular importance. As double eagle and eagle output fell at the Carson City Mint in 1879, half eagle production rose to 17,281 coins. An appealing example in all respects. Population: 21 in 45, 79 finer (2/17).
From The R. Thayer Sheets Yorktown Collection. NGC ID# 25X8, PCGS# 8349

- 16718 1880-CC AU53 PCGS. Variety 1-B.** A lightly circulated example of this low mintage and scarce Carson City issue. The strike is usual for the Old West facility, and the sun-gold surfaces are pleasing aside from faded thin marks near the cheek and chin.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 25XB, PCGS# 8352

- 16719 1880-S MS64 PCGS.** The 1880-S Liberty half eagle is conditionally rare in grades above MS64. This sharply detailed Choice specimen offers well-preserved orange-gold surfaces, with vibrant mint luster on both sides. PCGS has graded only two numerically finer examples (2/17). NGC ID# 25XC, PCGS# 8353

- 16720 1880-S MS64+ PCGS. CAC.** A logical selection for type collectors, the 1880-S is readily available but only through the MS64 grade. Any finer, it is a bonafide condition rarity. This radiant and razor-sharp example carries important third-party recognition with the PCGS Plus designation and CAC endorsement. Cherry-red highlights surround the central devices, with lilac overtones balancing sun-gold coloration. A few tiny marks at the borders are typical of the issue but wholly nondistracting. The luster and eye appeal are outstanding. Population: 16 in 64+, 2 finer. CAC: 30 in 64, 0 finer (2/17). NGC ID# 25XC, PCGS# 8353

- 16721 1881-CC — Rim Damage — Genuine PCGS. XF Details. Variety 1-A.** The PCGS assessment seems strict, since the rims exhibit only a few scattered small nicks. Liberty's hair displays wear, but the borders teem with luster. The surfaces are moderately glossy and lightly hairlined.
From The R. Thayer Sheets Yorktown Collection.

- 16722 1881-S MS63 PCGS.** An attractive Select specimen of this popular branch mint half eagle, with sharply detailed design elements and vibrant mint luster on both sides. The pleasing orange-gold surfaces show only minor signs of contact. NGC ID# 25XF, PCGS# 8357

**1882-CC Half Eagle, Appealing AU55
Choice Branch Mint Type**

- 16723 1882-CC AU55 PCGS. Variety 1-A.** Full Mint State coins are quite rare, increasing the demand for Choice About Uncirculated examples such as this lustrous Carson City five. The comparatively high mintage of 82,817 pieces makes the 1882-CC a logical selection for type collectors as well as for series specialists and Carson City enthusiasts. This coin retains its satiny-smooth mint luster over minimally abraded surfaces. The coin is crisply struck with greenish overtones across attractive, yellow-gold fields and devices. Population: 62 in 55, 97 finer (2/17).
From The R. Thayer Sheets Yorktown Collection. NGC ID# 25XH, PCGS# 8359

- 16724 1882-S MS64+ PCGS.** A sharp, frosty example that is just a few light grazes away from Gem condition. This Plus-designated 1882-S half eagle displays a vibrant cartwheel effect and original yellow-gold luster. PCGS has seen only 17 finer representatives (3/17). NGC ID# 25XJ, PCGS# 8360

- 16725 1883-CC — Repaired - Polished — ANACS. AU Details. Variety 1-A.** The small mintage of 12,958 coins made the 1883-CC half eagles scarce from day one. Today, few pieces exist in Mint State and even About Uncirculated coins are rare. This example shows AU details but smoothing in the left obverse field creates an undulating surface. Overall, the fields and devices are bright and reflective from polishing with resultant hairlines and an unnatural sheen. A challenging Carson City issue nevertheless.

**1888-S Half Eagle, MS64
None Graded Higher**

- 16726 1888-S MS64 ANACS.** Medium orange-gold fields showcase minimal ticks and grazes with radiant cartwheel luster that rolls over each side. Central design detail is bold but the strike characteristics soften around the margins. This underrated, conditionally rare San Francisco half eagle is a monumental rarity in MS64. David Akers wrote in 1979, "I have seen only a few mint state pieces and consider this date to be very rare and undervalued." True enough even today, with the present coin one of the "sleepers" of the sale. Neither PCGS nor NGC report seeing an example finer than MS63, with eight such coins at PCGS and three at NGC but none finer (3/17). NGC ID# B2B6, PCGS# 8373

- 16727 1890-CC AU58 NGC. Variety 1-A.** A pleasing pumpkin-gold near-Mint example of this popular Carson City issue. Nicely struck and partly lustrous with no noticeable marks. The mintage was 53,800 pieces, about one-fourth the production of the 1891-CC. NGC ID# C5XF, PCGS# 8376

- 16728 1890-CC AU58 PCGS. Variety 1-A.** Peach-gold luster dominates the borders and LIBERTY. A splendid Borderline Uncirculated representative of this low mintage Carson City emission. The strike shows blending at the centers, but marks are few and the eye appeal is undeniable.
From The R. Thayer Sheets Yorktown Collection. NGC ID# C5XF, PCGS# 8376

- 16729 1891-CC MS61 PCGS. Variety 1-A.** A crisply struck yellow-gold Carson City five. Luster dominates the borders and devices. Minor marks are present throughout the fields and cheek, appropriate for the MS61 level.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 25Y5, PCGS# 8378

- 16730 1891-CC MS61 NGC. Variety 1-A.** Booming luster, a sharp strike, and consistent apricot-gold color ensure the eye appeal of this attractive Carson City type coin. Small marks are present, but fewer than anticipated for the MS61 level. An early die state without peripheral cracks.
Ex: Long Beach Signature (Heritage, 5/2009), lot 1692, which realized \$1,437.50. NGC ID# 25Y5, PCGS# 8378

- 16731 1892-CC AU53 NGC. Variety 1-A.** Hints of coppery color deepen the patina of the fields on this otherwise olive-gold 1892-CC five. Light high-point wear and scattered abrasions are expected for the grade, although this coin generates ample appeal with its blatantly original coloration. NGC ID# 25Y7, PCGS# 8380

- 16732 1892-CC AU53 PCGS. CAC. Variety 1-A.** A lightly circulated peach-gold Carson City five. The strike is good, and luster dominates the stars and legends. Marks are unobtrusive overall, though we note a field cluster near star 12. NGC ID# 25Y7, PCGS# 8380

- 16733 1892-CC AU58 PCGS. Variety 1-A.** A partly lustrous and pleasing Borderline Uncirculated Carson City five. The pumpkin-gold surfaces are well struck and minimally marked. The grade is determined by a trace of wear on Liberty's eyebrow and coronet tip.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 25Y7, PCGS# 8380

- 16734 1892-CC MS61 NGC. Variety 1-A.** Just one die pair is known for the issue. A sharply struck caramel-gold Carson City five. No marks are of individual relevance, and luster dominates the borders and devices. NGC ID# 25Y7, PCGS# 8380

- 16735 1893-CC AU55 PCGS. Variety 1-A.** Three die marriages are known from the scant mintage of 60,000 pieces. A flashy lemon-gold Choice AU Carson City type coin. No marks are conspicuous, and the strike is sharp throughout.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 25YB, PCGS# 8384

**1893-CC Liberty Five Dollar, MS61
Rich Gold Color With Reddish Accents**

16736 1893-CC MS61 PCGS. Variety 1-A. The spike from a denticle left of the 1, and the mintmark placement attribute the die marriage. Rusty Goe writes in *The Mint on Carson Street* (2003): “Workmanship on 1893-CC half eagles was as good as or better than on any other year in the series and many quality examples survive today.” Here is one of them. Both sides are brightly lustrous and well-struck. Rich, mellow-gold surfaces feature splashes of reddish color near the borders — a common trait among 1893-CC fives — and tiny flecks throughout. From a final-year mintage of 60,000 coins.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 25YB, PCGS# 8384

16737 1899 MS65 PCGS. This sharp Gem displays semiprooflike fields that showcase frosty yellow-gold luster on the devices. A lack of major abrasions delivers exceptional visual appeal. The 1899 half eagle is occasionally available in this grade, but semiprooflike coins are scarce, and any higher-grade pieces are rare. PCGS reports only two dozen numerically finer 1899 fives (3/17). NGC ID# 25YS, PCGS# 8398

**1902-S Half Eagle, MS66
Impressive Strike and Luster**

16738 1902-S MS66 PCGS. A brilliant, high-luster Premium Gem, this scintillating butter-gold 1902-S radiates bold cartwheel flash from the vibrant, frosted surfaces. A few trivial marks can be coaxed out of hiding with a strong loupe, but the eye always returns to the sharp strike and exceptional visual impact. Population: 36 in 66 (2 in 66+), 7 finer (2/17). NGC ID# 25YZ, PCGS# 8406

**1904 Half Eagle, MS66
Frosty, Lemon-Gold Surfaces**

16739 1904 MS66 PCGS. Of the two half eagle issues produced at the Philadelphia and San Francisco mints in 1904, this is by far the more available in high grades. Nevertheless, Premium Gems of comparable technical and aesthetic quality are decidedly rare. Frosty luster and lemon-gold color adorn well-preserved surfaces. The stars, curls, and feathers are crisply rendered. Population: 25 in 66 (3 in 66+), 5 finer (2/17). NGC ID# 25Z6, PCGS# 8409

16740 1906-S MS64+ PCGS. Near-Gem examples of the 1906-S are very scarcely offered, let alone those with an added Plus designation, while anything finer is rare. Luminous green-gold surfaces house well-defined relief elements. The fields are surprisingly clean with a few pockets of superficial chatter. Population: 41 in 64 (4 in 64+), 18 finer (3/17). NGC ID# 25ZB, PCGS# 8415

INDIAN HALF EAGLES

16741 1909 MS64 NGC. An apricot and lime-green Choice Indian type coin. The lustrous surfaces are well struck, and smooth aside from a faint field scuff below the Y in LIBERTY. A costly acquisition any finer. Housed in a prior generation holder.

From The Martin Peterson Collection. NGC ID# 28DH, PCGS# 8513

16742 1909-D MS64+ NGC. The original apricot-gold and sea-green surfaces display coruscating luster and a sharp strike. A lens reveals unobtrusive contact across the reverse field. Despite its high mintage, the 1909-D is surprisingly scarce any finer. NGC ID# 28DJ, PCGS# 8514

**1910 Five Dollar, MS64+
Outstanding Surface Quality**

16743 1910 MS64+ PCGS. CAC. This is a well-struck, lustrous 1910 half eagle that showcases original peach, yellow, and mint-gold hues. A few minor, grade-limiting grazes are primarily restricted to the reverse. The 1910 is occasionally available in MS64, but this Plus-graded CAC coin is far above average. PCGS has seen only 26 finer coins (2/17). NGC ID# 28DK, PCGS# 8517

**1910-D Five Dollar, MS63+
Satin and Razor-Sharp**

16744 1910-D MS63+ PCGS. With a production of 193,600 coins, the 1910-D half eagle is relatively accessible through MS63. Finer examples, however, are condition rarities. This medium yellow-gold Select five dollar is clearly high-end for the grade. Scattered marks appear on both sides, but they do not distract from the overall appeal. A satiny, razor-sharp representative. NGC ID# 28DL, PCGS# 8518

16745 1911-D AU55 PCGS. Slight high-point wear mellows the luster on this 1911-D half eagle, although the design elements remain sharp, and the mintmark is clear. Yellow-gold patina exhibits relatively few abrasions, whereas many Indian fives in this grade are heavily marked up. NGC ID# 28DR, PCGS# 8521

16746 1911-D AU55 NGC. The low mintage 1911-D circulated to a surprising extent, since only about 15% of the NGC Census is in Mint State grades. The circulation was likely in the West, where a hard money tradition lingered until World War I. The present yellow-gold example shows light wear on the cheekbone, but the motifs show luster, and no marks are apparent.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 28DR, PCGS# 8521

16747 1911-D AU55 NGC. A key date with only 72,500 coins struck. This Choice AU 1911-D half eagle displays light high-point wear that softens the clarity of the mintmark, although the D is still visible. Bright yellow-gold surfaces are lightly abraded. NGC ID# 28DR, PCGS# 8521

**1911-D Half Eagle, AU58
Low-Mintage Denver Issue**

16748 1911-D AU58 NGC. A better date, boasting a small mintage of 72,500 coins. This near-Mint 1911-D half eagle displays a bold strike and bright yellow-gold patina. Hints of luster remain in the recesses, and abrasions are at a minimum. The 1911-D is among the scarcer issues in the Indian half eagle series in high grade. NGC ID# 28DR, PCGS# 8521

16749 1913 MS64 PCGS. Satiny luster delivers lovely straw-gold color on each side of this near-Gem, while the design elements are well-defined. Abrasions are less pronounced than on many other equally graded Indian Head fives. The 1913 is available in this grade, but PCGS has seen only 55 finer submissions (2/17). NGC ID# 28DT, PCGS# 8525

16750 1913 MS64 NGC. CAC. Narrow sea-green margins frame pumpkin-gold fields and devices. Well struck and coruscating. Marks are essentially confined to a single hair-thin line on each side, west of star 7 and north of PLURIBUS. Certified in a first generation "rattler" holder. CAC: 89 in 64, 11 finer (2/17). NGC ID# 28DT, PCGS# 8525

16751 1914-D MS63 NGC. A satiny representative with nicely struck orange-gold surfaces. The obverse is smooth aside from a diagonal line near the date, and the reverse field shows only scattered small abrasions. NGC ID# 28DV, PCGS# 8528

16752 1916-S MS62 PCGS. This is an outstanding coin for the grade, showing unusually clean fields. Original olive-gold and reddish hues adorn the central obverse, while the periphery shows fiery orange-gold luster. The reverse closely matches the obverse border coloration. The strike is sharp, and the mintmark is clearly defined. NGC ID# 28DY, PCGS# 8532

LIBERTY EAGLES

16753 1846/5-O XF45 PCGS. Variety 3. This is the rare early die state that shows the mintmark recut at the top. The coin shows bold detail and faintly lustrous yellow-gold surfaces with uniform, mild surface chatter. Eye appeal is pleasing for the grade. Population: 20 in 45, 33 finer (1/17). NGC ID# 262Y, PCGS# 8596 Base PCGS# 8595

1847 Ten Dollar, Semireflective MS61

16754 1847 MS61 PCGS. The 1847 represents a collectible date among No Motto ten dollar gold coins, examples of which can be found with little trouble through high-end AU. Only in Mint State does the 1847 begin to pose a real challenge. This MS61 is well-struck with light straw-gold color and partial reflectivity in the fields. Thin, wispy marks and small abrasions define the grade. Population: 8 in 61, 24 finer (2/17). NGC ID# 262Z, PCGS# 8597

16755 1847-O — Rotated Reverse — VF35 PCGS. Variety 1. This moderately worn 1847-O Liberty eagle shows the reverse rotated approximately 170 degrees from the usual orientation. The pleasing orange-gold surfaces are lightly abraded and LIBERTY remains bold, although some wear shows on the curls below the coronet. NGC ID# 2632, PCGS# 8598

16756 1847-O AU58 NGC. Variety 7. At least eight die pairs exist for the 1847-O ten, which has the highest mintage of any New Orleans gold issue. This dusky apricot-gold representative lacks noticeable marks, and has a good strike except on the vertical shield lines. NGC ID# 2632, PCGS# 8598

16757 1852 AU58 NGC. This lovely California Gold Rush-era eagle exhibits lustrous yellow surfaces with hints of orange overtones. A few scattered marks are noted, with a trace of high-point rub. NGC ID# 263C, PCGS# 8608

16758 1856-S AU53 NGC. CAC. Breen-6923. Large S. Breen called this variety "very rare," though more examples have surfaced over the past 30 years. All San Francisco tens issued prior to 1879 have low mintages, and are scarce to rare in AU grades. This peach-gold piece offers original and moderately marked surfaces. NGC ID# 263S, PCGS# 8621

16759 1857 XF45 PCGS. CAC. Rich orange toning confirms the originality of this better date Philadelphia eagle. Luster illuminates the stars and legends, and noticeable marks are confined to a field scuff above the eagle's neck. A narrow, vertical strike-through (as made) is near Liberty's shoulder tip. A scant 16,606 pieces were issued. Encapsulated in a green label holder. Population: 31 in 45, 51 finer. CAC: 2 in 45, 7 finer (2/17). NGC ID# 55GV, PCGS# 8622

16760 1859 AU53 PCGS. Among the many underappreciated issues of the Liberty ten series is the 1859. The mintage is just 16,013 pieces, and attractive AU examples are highly elusive. This briefly circulated wheat-gold representative is lightly marked aside from a dull curved line above STATE. Population: 8 in 53, 19 finer (2/17). NGC ID# 263Z, PCGS# 8628

16761 1860 XF45 PCGS. CAC. The advent of the double eagle took the wind out of No Motto Liberty ten mintages. The 1860 Philadelphia eagle has a production of only 15,055 pieces. Like the present coin, most of the few hundred survivors are the Bulging Bun subtype, though Rounded Bun examples are also known. The peach-gold surfaces are well-defined and moderately marked. The remaining luster is exceptional for the XF45 level. In a green label holder. CAC: 6 in 45, 7 finer (2/17). NGC ID# 2644, PCGS# 8631

1860 Ten Dollar, AU55 Scarce When Choice

16762 1860 AU55 PCGS. Despite a low mintage of 15,055 pieces, the 1860 eagle is known from two different hubs, known as the Rounded Bun and Bulging Bun. The present coin is a Bulging Bun variety with six folds in the central hairbun. The coin displays pleasing definition and luster for the Choice About Uncirculated level. We note a few minor orange alloy spots and thin marks that often accompany the issue, as well as light abrasions from transport and brief circulation. Population: 19 in 55, 15 finer (2/17). NGC ID# 2644, PCGS# 8631

16763 1861 AU55 PCGS. Five-fold Rounded Bun subtype. This apricot-gold Civil War type coin has a good strike and displays the expected number of small to moderate abrasions. Luster connects the legends and individually surrounds the stars. NGC ID# 2647, PCGS# 8633

1872-CC Ten Dollar, VF25 Rarely Seen Problem-Free

16764 1872-CC VF25 PCGS. Variety 1-A. The Nevada branch mint cut ten dollar gold coin output by nearly half from 1871 to 1872. Only 4,600 eagles were manufactured that year. Fewer than 100 pieces are believed to have survived the ravages of time, and many of them are seen with detracting issues that prohibit a numerical assessment. This is a problem-free example of Variety 1-A, the far-rarer of two die pairs. The mintmark is even, and the second vertical stripe is bold. Each side displays deep orange-gold tones and smooth wear suggestive of extensive time spent in Western circulation. The surfaces radiate an amazing, attractive hue given the numeric grade. Housed in a green label holder.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 53M3, PCGS# 8664

16765 1874-CC — Cleaning — Genuine PCGS. VF Details. Variety 1-A. The 1874-CC is the most available Carson City ten dollar issue of its decade, but is rare by practically any other measure. Just 16,767 pieces were coined. The present apricot-gold example is slightly bright and glossy from a wipe. Minor marks are distributed but none merit singular mention.

From The R. Thayer Sheets Yorktown Collection.

16766 1875-CC — Graffiti — Genuine PCGS. VF Details. Variety 1-A. The Wide CC variant of this challenging and very low mintage issue. A few bright, straight marks near stars 4 and 5 correspond to the PCGS designation. A green-gold example with relatively sharp definition on the eagle's wings.

From The R. Thayer Sheets Yorktown Collection.

1876-CC Ten Dollar, VF Sharpness Scarce CC-Mint Issue, 4,696 Pieces Struck

16767 1876-CC — Damage — PCGS Genuine. VF Details. Variety 1-A. The Carson City branch mint accomplished a paltry production total of 4,696 coins, which when combined with a high attrition rate that explains the issue's meager survivorship. Scratches and digs, including one near star 4 and others on Liberty's hair bun account for the Details grade. Still, a scarce CC-Mint ten dollar and a good fit for a circulated set.

From The R. Thayer Sheets Yorktown Collection.

**1878-CC Eagle, VF20
60 to 75 Examples Extant**

16768 1878-CC VF20 PCGS. Variety 1-A. Gold deposits at the Nevada mint continued to decline in 1878. Only 3,244 ten dollar gold coins were struck then, down from 3,332 pieces the year before. The survivorship of the 1878-CC is correspondingly meager with an estimated 60 to 75 coins extant. Examples appear at auction no more than four of five times a year. Few of them are in what most would consider to be affordable grades. This well-worn, orange-gold eagle provides an excellent opportunity to obtain a representative of this rare emission. Housed in a previous generation green label holder.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 265K, PCGS# 8681

16769 1879-S MS62 PCGS. High mintmark. A canary-gold representative of this underappreciated Liberty ten issue. The strike is good, and the fields display the expected number of small to moderate abrasions. Population: 26 in 62, 6 finer (2/17). NGC ID# 265R, PCGS# 8686

**1881-CC Eagle, Wheat-Gold AU55
Underrated Carson City Ten**

16770 1881-CC AU55 PCGS. Variety 1-A. A single die pair was employed to coin 24,015 1881-CC eagles. Survivors are among the most often-seen for the decade and mint. This luminous, Choice AU ten displays wheat-gold surfaces with faint accents of rose and green. Luster remains vibrant and plentiful, while scattered marks and trivial friction are indicative short-lived stay in commercial channels.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 265X, PCGS# 8692

16771 1883-CC Fine 15 PCGS. Variety 3-D. Although the '83-CC has a mintage of only 12,000 pieces, four die marriages are known. Variety 3-D appears to rarest, and has the closest spacing of the mintmark. This is a minimally marked caramel-gold example with considerable plumage detail within the wings. STATES is strike doubled.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 2667, PCGS# 8700

16772 1891-CC AU55 PCGS. Variety 1-A. Bright luster accompanies protected areas of this briefly circulated Carson City ten. The strike is bold, and neither side has any distracting abrasions. A late die state with clashes and cracks.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 266U, PCGS# 8720

16773 1891-CC AU58 NGC. Variety 1-A. An orange-gold near-Mint Carson City type coin. A broad band of luster illuminates the margins. Lightly marked, save for a single thin line on the cheek. A narrow, vertical streak of struck-in grease is noted near the ST in STATES. Certified in a prior generation holder. NGC ID# 266U, PCGS# 8720

**1891-CC/CC Ten Dollar, MS62
Sharp, Frosty FS-501 Coin**

16774 1891-CC/CC FS-501, Variety 4-C, MS62 PCGS. The mintmark is repunched on this variety, and the obverse shows a prominent spike below Liberty's throat. This coin is sharp and frosty with no trace of high-point friction. Bright yellow-gold luster reveals scattered tiny ticks that determine the grade. Finer 1891-CC tens are elusive. NGC ID# 266U, PCGS# 145728 Base PCGS# 8720

16775 1893 MS64+ PCGS. Available in lower grades, the 1893 Liberty ten becomes elusive in Plus-graded MS64 and is decidedly rare any finer. The present coin displays a sharp strike and frosty rose-gold mint luster. A few light, trivial ticks prevent a full Gem designation. PCGS reports only 12 finer coins (1/17). NGC ID# 266Z, PCGS# 8725

16776 1893-CC VF35 PCGS. Variety 1-A. Pockets of peach-tinged luster fill the legends and outline the stars. The remainder of this final-year Carson City eagle is olive-gold. Both sides are free from relevant contact. A better issue, since only 14,000 pieces were produced.

From The R. Thayer Sheets Yorktown Collection. NGC ID# 2672, PCGS# 8726

16777 1895-O MS61 PCGS. Variety 3. Late-date New Orleans eagles have low mintages, and are scarce but collectible in Mint State. This apricot-gold example has a good strike and is free from any singularly relevant marks. Luster dominates the borders and devices. NGC ID# 2679, PCGS# 8733

16778 1898 MS64 PCGS. A better date in high grade, the 1898 gold eagle is scarce in MS64 and rare finer. This near-Gem offers a bold strike and frosty, original green-gold mint luster. There are no severe abrasions. Population: 78 in 64 (2 in 64+), 11 finer (2/17). NGC ID# 267G, PCGS# 8740

16779 1899 AU58 Prooflike NGC. A scarce Prooflike example of this otherwise common date, showing a sharp strike and deeply reflective fields. The bright yellow-gold surfaces are lightly marked. NGC reports two Prooflike coins in this grade and 13 finer (1/17). NGC ID# 267J, PCGS# 78742

16780 1901 MS64+ PCGS. An accessible type coin that shows nearly Gem-quality surface preservation. This high-end Choice 1901 eagle displays a sharp strike and frosty yellow-gold mint luster. A few light grazes do not detract. NGC ID# 7LHF, PCGS# 8747

16781 1901 MS64+ PCGS. CAC. This lustrous near-Gem boasts better-than-average surfaces for the grade, illuminated by original wheat-gold hues. The strike is sharp, and only minor marks and ticks are observed with a loupe. A nice 20th century type coin. NGC ID# 7LHF, PCGS# 8747

16782 1901-S MS64+ PCGS. Splendid pumpkin-gold and lime-green patina graces this highly lustrous and fully struck Liberty type coin. Minor field marks near star 9 are all that precludes an even finer grade. NGC ID# 267S, PCGS# 8749

16783 1902 MS63 PCGS. A pleasing Select example with frosty yellow-gold luster that shows no evidence of having been dipped. Scattered light marks define the grade. PCGS reports only 25 higher-graded 1903 eagles (2/17). NGC ID# 267T, PCGS# 8750

16784 1903-O MS62 PCGS. Variety 2. The 1903-O is a New Orleans Motto type coin, but commands a premium in Mint State due to a fairly low mintage. This crisply struck example has good luster, and the pumpkin-gold surfaces are less abraded than is customary for the MS62 level. NGC ID# 267W, PCGS# 8753

16785 1903-O MS62 PCGS. Variety 2. The 1903-O is a fairly collectible New Orleans issue in Mint State, although pieces grading finer than MS62 are elusive. This example displays a sharp strike and original, frosty yellow-gold luster. There are no distracting abrasions, only some light handling marks on the obverse that limit the grade. NGC ID# 267W, PCGS# 8753

16786 1903-O MS63 PCGS. Variety 2. The 1903-O has a relatively low mintage of 112,771 pieces, and is typically encountered in AU and bagmarked Mint State grades. The present example has surprisingly few abrasions, and we note only a small field scuff near the coronet tip. NGC ID# 267W, PCGS# 8753

16787 1904 MS63 PCGS. CAC. The 1904 is a moderately scarcer Philadelphia issue, available in nice Mint State but to a much lesser degree than, for example, the 1901 or 1907. This Select apricot-gold Liberty eagle has good luster and is well struck. No marks merit singular mention. CAC: 11 in 63, 15 finer (2/17). NGC ID# 267Y, PCGS# 8755

1904-O Ten Dollar, MS63+ Better Date in High Grade

16788 1904-O MS63+ PCGS. The Mint State population of the 1904-O eagle declines rapidly in MS63, and finer examples are rare. This Plus-designated Select coin displays sharp detail and frosty straw-gold mint luster. Grade-limiting abrasions are light and evenly scattered, with no severe distractions. PCGS records 20 finer representatives (2/17). NGC ID# 7LHK, PCGS# 8756

16789 1905 MS64 NGC. The 1905 Liberty eagle is scarce in MS64 condition and rare any finer. This sharply detailed Choice specimen offers well-preserved orange-gold surfaces with satiny mint luster and outstanding eye appeal. NGC has graded 32 numerically finer examples (2/17). NGC ID# 7LD3, PCGS# 8757

16790 1906-S MS63 NGC. Although the mintage of the 1906-S implies common-date status, third party census data conflicts with that assessment. Most certified examples are in AU55 to MS62 grades, and Select pieces are surprisingly rare. This lustrous and crisply struck Liberty ten shows a smattering of minor marks, none distracting. Census: 10 in 63, 9 finer (2/17). NGC ID# 53FB, PCGS# 8762

1907 Liberty Head Ten, MS65 Only Seven Finer Examples Graded

16791 1907 MS65 NGC. The final-year Liberty Head eagle proves exceedingly scarce in MS65, and there are only a handful of finer representatives certified. This peach-gold Gem is strongly struck with razor-sharp stars and crisp detail on the eagle. The fields are exceptionally clean and radiate luminous frost. A reeding mark on the neck serves as a pedigree identifier. Census: 83 in 65 (2 in 65+), 7 finer (3/17). NGC ID# 2688, PCGS# 8763

1907 Liberty Eagle, Rose-Gold MS65

16792 1907 MS65 NGC. Christian Gobrecht's Liberty Head design was implemented on ten dollar gold coins for the final time in 1907, when 1.2 million eagles were struck. Gems are elusive, while anything finer is extremely rare. Thickly frosted and boldly rendered, this MS65 representative presents rose-gold surfaces with only minor field chatter on the obverse. A series of reeding marks appear left of the chin. Census: 83 in 65 (2 in 65+), 7 finer (2/17). NGC ID# 2688, PCGS# 8763

INDIAN EAGLES

16793 1907 No Motto MS62 NGC. A well-struck, lustrous Mint State example of the most popular No Motto type-coin issue. The orange-gold surfaces show minimal abrasions for the grade, offering strong eye appeal. NGC ID# 28GF, PCGS# 8852

16794 1907 No Motto MS62 NGC. Vibrant cartwheel luster and minimally marked sun-gold surfaces confirm the quality of this first-year Indian ten. The strike is incomplete on the high points, but the eye appeal is undeniable.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 28GF, PCGS# 8852

16795 1907 No Motto MS62 NGC. The third and final version of the 1907 Indian Head eagle was well-saved in Mint State as a novelty, making the date plentiful for modern-day type collectors. This piece displays satiny yellow-gold mint luster and grade-appropriate abrasions. Some minor strike softness appears on the central high points. NGC ID# 28GF, PCGS# 8852

16796 1908-D No Motto MS61 NGC. A lovely lemon-gold example. Nicely struck, lustrous, and conditionally scarce. Smooth except for one small rim nick opposite the arrows. The 1908-D No Motto ten is the only issue with a mintmark placement above the branch. Certified in a former generation holder.
From The Martin Peterson Collection. NGC ID# 28GH, PCGS# 8854

16797 1908 Motto MS63 NGC. The motto IN GOD WE TRUST was added to the reverse in 1908, an important consideration for type purposes. This sharply detailed Select example displays lightly marked orange-gold surfaces with vibrant mint luster throughout. NGC ID# 28GJ, PCGS# 8859

16798 1908 Motto MS63 PCGS. Lustrous orange-gold surfaces showcase well-struck design elements with only minimal abrasions. The With Motto 1908 Indian Head ten is popular as a first-year issue for the modified reverse that shows the motto IN GOD WE TRUST. Its availability in MS63 is attractive to the budget-conscious collector. NGC ID# 28GJ, PCGS# 8859

**1908-D Indian Ten Dollar, MS63
Lustrous, With Motto Variety**

16799 1908-D Motto MS63 PCGS. The 1908-D Motto ten is much scarcer than the mintage suggests. Although a generous 836,500 pieces were struck, the Mint State population is low — especially in Select and finer grades. This example is lustrous with dusky lilac-gray accents over lightly abraded, finely textured orange-gold surfaces. The strike is generally sharp except at Liberty's forecurls and the eagle's front shoulder, which show minor incompleteness. Population: 129 in 63 (2 in 63+), 46 finer (2/17). NGC ID# 28GK, PCGS# 8860

16800 1909 MS63 PCGS. A slightly better date overall, the 1909 Indian ten is notably scarce finer than MS63. This is a well-struck, minimally abraded example with original golden surfaces and strong eye appeal. NGC ID# 28GM, PCGS# 8862

16801 1909 MS63 PCGS. Greenish-gold color, seen on each side of this Select Philadelphia ten dollar gold piece, is typical for the issue. Well-struck devices and softly shimmering luster are additional attributes. The 1909 is exceedingly elusive in MS64 and above. NGC ID# 28GM, PCGS# 8862

16802 1909-D MS61 NGC. With a moderately low mintage of slightly more than 121,000 pieces, the 1909-D ten is challenging in Uncirculated condition. This collectible lower-end example is well-struck and lustrous. Heavily abraded surfaces are expected for the grade. NGC ID# 28GN, PCGS# 8863

16803 1909-D MS62 PCGS. The 1909-D Indian eagle is seldom encountered in Mint State, especially in grades above MS62. This attractive MS62 example offers well-detailed design elements and lustrous yellow and orange-gold surfaces with some scattered minor contact marks on both sides. NGC ID# 28GN, PCGS# 8863

16804 1910 MS64 PCGS. The availability of the 1910 Indian eagle declines sharply above MS64, making this near-Gem ideal for the budget-conscious collector. The strike is sharp, and each side displays warm orange-gold luster with only a few small marks on the relief elements. NGC ID# 28GR, PCGS# 8865

16805 1910-S MS61 PCGS. Original orange-gold luster illuminates this Mint State 1910-S Indian eagle, while the design elements are well-defined. Scattered abrasions define the grade. The 1910-S is a better date in Uncirculated condition. NGC ID# 268D, PCGS# 8867

16806 1910-S MS62 PCGS. Moderately abraded, as the grade suggests, this Mint State 1910-S Indian ten is nonetheless pleasing visually with its original wheat-gold color and well-defined design elements. Finer 1910-S eagles are infrequently available. NGC ID# 268D, PCGS# 8867

16807 1911 MS64 PCGS. This is a sharply struck near-Gem with rich peach-gold luster and minimal surface grazes. The 1911 is available in MS64, but finer examples are infrequently offered and may be out of reach for the budget-conscious collector. NGC ID# 28GT, PCGS# 8868

16808 1912-S MS61 PCGS. Delicate rose highlights appear throughout green-gold surfaces on this Mint State 1912-S Indian ten. The strike is sharp, and grade-limiting abrasions are uniformly dispersed, causing minimal distraction. NGC ID# 269G, PCGS# 8872

**1913-S Eagle, Near-Mint
Low Mintage, Conditionally Scarce**

16809 1913-S AU58 PCGS. CAC. Hints of gunmetal-gray visit the high points of this otherwise orange-gold better-date Indian ten. Cartwheel luster is substantial, and marks are surprisingly few despite a brief stint in the pre-World War West Coast economy. The 1913-S has a scant mintage of 66,000 pieces, and only about 20% of all third-party graded examples are designated as Mint State. NGC ID# 28GZ, PCGS# 8874

16810 1914 MS63 PCGS. A sharp strike and vibrant yellow-gold mint luster characterize this Select Uncirculated 1914 eagle. Scattered light abrasions are not out of line for the grade. This is a better date in finer grades. NGC ID# 28H2, PCGS# 8875

16811 1914-D MS63 PCGS. Original green-gold mint luster illuminates well-struck design elements on this Select 1914-D ten. Scattered light surface marks limit the grade, but none are individually noticeable. The '14-D is a better date in Mint State. NGC ID# 28H3, PCGS# 8876

16812 1914-D MS63 NGC. The 1914-D is a rare date in Gem condition, although this Select example remains accessible for budget-conscious collectors. The strike is sharp, and each side displays original yellow-gold mint luster. Scattered light marks determine the grade. NGC ID# 28H3, PCGS# 8876

**1915 Ten Dollar, MS64+
High-End for the Grade**

16813 1915 MS64+ PCGS. The certified population of 1915 ten dollar gold coins drops off dramatically between MS64 and MS65, by 78% to be exact. This MS64+ representative nearly qualifies for that rarified grade, but a couple of minimal ticks near Liberty's nose and in the upper reverse field stand in the way. Rich orange-gold combines with light lilac hues on each side. Frosty luster washes over strongly defined motifs. NGC ID# 28H5, PCGS# 8878

1916-S Ten Dollar, MS62
Appealing for the Grade

16814 1916-S MS62 PCGS. This satiny olive-gold piece has strong overall eye appeal. The softly struck obverse has few marks for the grade, though the reverse is somewhat abraded. The 1916-S is occasionally available in this grade but is elusive any finer. For the MS62 level, the present coin is highly appealing.
Ex: Dallas Signature (Heritage, 11/2006), lot 2489. NGC ID# 28H7, PCGS# 8880

16815 1926 MS64 NGC. The 1926 eagle is available and frequently comes with strong eye appeal, making it popular among type collectors and investors. This Choice example is well-struck and shows frosty green-gold mint luster. A few small marks on the cheek limit the grade. NGC ID# 28H9, PCGS# 8882

1926 Eagle, MS65
Quite Elusive Any Finer

16816 1926 MS65 NGC. Along with the 1932, this Indian Head issue is a mainstay in type collections. The 1926 can be obtained with little searching through MS65. Finer coins prove to be exceedingly elusive, however. Delicate lavender hues blend with warm, sun-gold shadings. Thickly frosted and strongly struck.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 28H9, PCGS# 8882

16817 1932 MS64 NGC. The 1932 Indian eagle claims a huge mintage of more than 4.4 million pieces, making it an available date and a favorite choice of type collectors. This attractive Choice specimen offers well-detailed design elements and lightly marked orange-gold surfaces with satiny mint luster on both sides. NGC ID# 28HB, PCGS# 8884

16818 1932 MS64+ NGC. Frosty, radiant yellow-gold luster gives this high-end Choice 1932 Indian eagle unusually strong visual appeal for the grade. A few light grazes do not detract, and neither does slight strike softness on the eagle's shoulder. NGC ID# 28HB, PCGS# 8884

16819 1932 MS64+ NGC. Glowing orange-gold luster engulfs this richly luminous final-year type coin, while a lack of major abrasions delivers excellent eye appeal for the grade. The design elements are boldly defined. NGC ID# 28HB, PCGS# 8884

16820 1932 MS64+ PCGS. CAC. Plus-graded and CAC-endorsed, this beautiful near-Gem type coin displays frosty yellow-gold luster and boldly rendered design elements. A small mark on Liberty's jaw prevents a full MS65 designation. NGC ID# 28HB, PCGS# 8884

16821 1932 MS64+ NGC. CAC. A spectacular Plus-graded Choice specimen of the 1932 Indian eagle, the only collectible U.S. gold coin of the decade. This particular example is highly attractive with frosty yellow brilliance and splashes of rich orange toning. NGC ID# 28HB, PCGS# 8884

1932 Indian Eagle, MS65
Frosty and Sharp

16822 1932 MS65 PCGS. An immensely attractive Indian ten, as is the reputation of the 1932 issue. This Gem type coin showcases a bold strike and frosty yellow-gold mint luster. The obverse is well-preserved, although a few marks are seen on the eagle. Above MS65, the 1932 climbs out of reach for many collectors. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

16823 1853 XF40 PCGS. CAC. Breen-7160. Breen describes the repunched date variety as "plain extra outlines left of inner curves of 3." An orange-gold representative with more remaining luster than is usual for the XF40 grade. The fields display the expected quantity of small to moderate marks. Certified in a green label holder. NGC ID# 268M, PCGS# 8908

16824 1853 XF45 PCGS. Luster remains in the protected regions of the fields on this Choice XF example, complementing original orange-gold patina. The devices are bold with little wear. Moderate abrasions are expected for the issue and grade. NGC ID# 268M, PCGS# 8908

1854 Twenty Dollar, Choice AU
Breen-7167, Repunched Date

16825 1854 Small Date AU55 NGC. Breen-7167. The variety is designated as VP-001 on the NGC insert, but it is the well-known repunched date. The 1 is doubled south, below the flag and base, and the 54 are doubled north. The date was initially entered with an upward slant, then corrected. Obverse star 6 is partially lapped, and the crossbar of the A in STATES was lightly added by hand on the working die. This nicely struck caramel-gold representative exhibits pockets of luster and the expected number of obverse abrasions. NGC ID# 268R, PCGS# 8911

**1856 Liberty Head Twenty, AU55
Elusive Type One Philadelphia Issue**

16826 1856 AU55 NGC. The 1856 twenties were distributed far and wide from a mintage of 329,878 pieces, with surviving pieces seldom finer than the XF level. Choice About Uncirculated examples are truly scarce. This representative displays mint luster in protected areas and smooth wear from brief circulation. Only a few tiny marks dot the natural, caramel-gold surfaces. Census: 80 in 55 (1 in 55+★), 82 finer (2/17). NGC ID# 268Y, PCGS# 8917

1857-S Double Eagle, AU58

16827 1857-S AU58 NGC. Although bright luster illuminates design recesses, this Type One double eagle did not originate from the S.S. *Central America* shipwreck. That is because the mintmark is tilted left and centered over the right half of the N in TWENTY, a placement different from any of the eight die varieties known from the S.S.C.A. holdings. In addition, the E in AMERICA has a defective upper crossbar, and the U in UNITED lacks an upper left serif. An original pumpkin-gold example with a sharp strike and distributed small to moderate marks. NGC ID# 2696, PCGS# 8922

16828 1859-S XF45 PCGS. This rose and honey-gold No Motto double eagle was one of 636,445 twenty dollar gold pieces manufactured at the San Francisco Mint in its fifth full year of operation. Although it saw brief circulation, evidence of which occurs in the form of scattered marks and slight blending, partial luster remains. Housed in a green label holder. NGC ID# 269C, PCGS# 8928

16829 1860 XF45 PCGS. Specialists regard the 1860 Philadelphia double eagle as one of the most collectible No Motto twenties. This Choice XF representative is an excellent candidate for type purposes. Flashy wheat-gold surfaces are still lustrous and well-detailed. Numerous abrasions are expected. NGC ID# 269D, PCGS# 8929

16830 1862-S XF40 PCGS. CAC. The pumpkin-gold surfaces display ample hints of luster. The eagle's plumage is bold, and although small marks are scattered, none are of individual consequence. Encapsulated in a green label holder. NGC ID# 269N, PCGS# 8938

**1862-S Twenty Dollar, AU53
Appealing Collector-Grade Example**

16831 1862-S AU53 NGC. Shipwreck finds greatly increased the population of About Uncirculated or finer coins for this heavily circulated San Francisco issue. Nearly 200 1862-S twenties were rescued from the combined S.S. *Brother Jonathan* and S.S. *Republic* salvage operations. The history of the present coin is unknown, but it matters little. Sharp definition remains over the lightly abraded wheat-gold surfaces, with traces of mint luster among the obverse stars and reverse devices. NGC ID# 269N, PCGS# 8938

16832 1865-S XF45 NGC. Small S. A deep orange-gold hue colors this Choice XF Type One double eagle. Flashes of luster issue from the recesses, especially on the reverse. The obverse is incompletely defined, as usual, while the reverse is sharper. Lightly scattered abrasions appear throughout. NGC ID# 269V, PCGS# 8944

**1866 Double Eagle, AU53
Inaugural With Motto Representative**

16833 1866 Motto AU53 PCGS. James Barton Longacre's double eagle design went unchanged from 1849 through 1865. In 1866, IN GOD WE TRUST was added within the reverse stars, creating the Type Two subtype. Examples of this first-year issue are seldom seen in problem-free AU condition. Uncirculated representatives are out of reach for most collectors. This moderately lustrous twenty dollar presents glints of rose and green amid dominant orange-gold coloration. Minimally marked and well-defined. Housed in a green label holder. NGC ID# 269X, PCGS# 8949

16834 1866-S Motto, Misplaced Date, FS-301, XF45 PCGS. Tall S. The top of an errant 8 protrudes from the denticles left of the 1 in the date. Attractive orange-gold surfaces retain flashes of luster. The obverse stars show complete radial lines, and the eagle's wingtips are strongly defined. Reeding marks and a couple of rim nicks at the upper obverse pose minimal distraction. NGC ID# 269Y, PCGS# 145734 Base PCGS# 8950

**1868-S Twenty Dollar, AU58
Scarcer Type Two Issue**

16835 1868-S AU58 NGC. The 1868-S is a scarce and overlooked issue in the Type Two series. It ranks 22nd out of 31 issues in among Type Twos with strike and preservation of surfaces being problems that are often encountered. This piece exhibits a better-than-average strike with remarkably clean surfaces and even reddish-tinted patina. NGC ID# 26A4, PCGS# 8954

16836 1869-S AU53 NGC. CAC. Luster fills protected areas of this moderately marked apricot-gold representative. The obverse stars show incompleteness of strike, but the major devices are evenly brought up. Scarce with a CAC seal. CAC: 15 in 53, 73 finer (2/17). NGC ID# 26A6, PCGS# 8956

**1872 Liberty Twenty, AU58
Very Scarce in Finer Grades**

16837 1872 AU58 PCGS. Cartwheel mint luster intact and very little evidence of any wear whatsoever, this lightly abraded near-Mint twenty displays a fresh, frosty glow. The surfaces are a busy with tiny bagmarks and abrasions, but there is no denying the rich, sun-gold eye appeal. The 1872 is a scarce Type Two double eagle in any Uncirculated condition. NGC ID# 26AD, PCGS# 8963

16838 1873 Closed 3 AU58 NGC. CAC. This is the much scarcer Closed 3 variant of the 1873 double eagle from Philadelphia. Substantial luster rolls around each side, and high-point friction is almost nonexistent save for a scattering of abrasions on the obverse. The coin is uncleaned and appealing. Finer examples of the Closed 3 issue are scarce. NGC ID# 26AL, PCGS# 8966

**1873 Open 3 Twenty, MS62+
Type Two Condition Scarcity**

16839 1873 Open 3 MS62+ PCGS. CAC. The 1873 Open 3 double eagle is plentiful in grades up to MS62, and scarce in finer grades. Even those graded MS62+, such as the present piece, are seldom encountered. This attractive example has brilliant and frosty yellow luster with scattered, grade-consistent marks, all of a trivial nature. NGC ID# 26AL, PCGS# 8967

**1873 Open 3 Twenty Dollar, MS62+
Doubled Die Obverse, FS-101**

16840 1873 Open 3, Doubled Die Obverse, FS-101, MS62+ PCGS. Always popular for type, this 1873 Open 3 double eagle is even more appealing with the doubled LIBERTY die pair, a *Cherry-pickers'* variety. Plus-graded by PCGS for its smoothly lustrous surfaces and relatively few abrasions, this sharply struck and frosted medium-gold example shows few deterrents from an even finer grade. NGC ID# 26AH, PCGS# 148749 Base PCGS# 8967

**1874-CC Twenty Dollar, AU Details
Natural Luster Remains**

16841 1874-CC — Cleaning — PCGS Genuine. AU Details. Variety 1-A. Medium yellow-gold surfaces display traces of luster within the hidden areas, but the exposed regions exhibit evidence of cleaning. This lightly circulated Carson City twenty is well-defined with high-point blending. Marks are scattered uniformly. *From The R. Thayer Sheets Yorktown Collection.*

16842 1875-CC — Reverse Scratched — NGC Details. AU. Variety 6-B. This variety exhibits die lines after the Y in LIBERTY and a tine off the upper-left point of star 11. The noted scratches occur around UNITED. Otherwise, this lustrous AU twenty dollar features good detail and pleasing peach-gold color.

16843 1875-CC — Improperly Cleaned — NGC Details. AU. Variety 5-A. Designated AU Details, although the coin is sharper and more lustrous than many low-end Uncirculated pieces on the market. This Carson City type coin displays bright yellow-gold surfaces that have few distracting abrasions. Scattered hairlines seen under a loupe deny a numeric grade from NGC.

16844 1876-CC — Cleaning — Genuine PCGS. AU Details. Variety 1-A. Both sides display faint vertical hairlines, but this Centennial-year Carson City double eagle is otherwise attractive. Luster outlines the stars and fills the legends. A glimpse of struck-in grease is noted near the A in STATES. *From The R. Thayer Sheets Yorktown Collection.*

16845 1876-CC — Improperly Cleaned — NGC Details. AU. Variety 4-A. Hints of luster remain in the fields of this AU-level 1876-CC double eagle despite a light cleaning that leaves scattered hairlines on each side. The strike is bold, and the surfaces show only light, scattered contact marks — far more appealing than most Carson City twenties in the AU grade range.

16846 1876-CC — Improperly Cleaned — NGC Details. AU. Exported in large quantities when minted, the 1876-CC has since returned to collector's hands in quantity. This example — although cleaned with the inevitable fine lines visible primarily on the obverse — is otherwise pleasing with traces of mint luster at the borders. Orange-gold color typical of Carson City double eagles from the 1870s remains. Tiny abrasions and a few dark, carbonlike flecks are noted.

**1877 Double Eagle, Scarce MS62
Semiprooflike Type Three Example**

16847 1877 MS62 PCGS. CAC. This is an exceptionally appealing, sharply struck MS62 example, with only pinpoint abrasions in the left obverse field and across the portrait that might limit the assigned grade. The lustrous fields are partially prooflike and vibrant, sun-gold color illuminates both sides. The coin displays CAC endorsement — an award earned by less than 5% of the certified specimens seen by PCGS and NGC in MS62 or finer grades. Rare any finer. Population: 153 in 62 (7 in 62+), 18 finer. CAC: 16 in 62, 2 finer (2/17). NGC ID# 2547, PCGS# 8982

16848 1878-S MS61 PCGS. Alternating shades of rose, green, and orange-gold blend with frosty luster over the entirety of this Uncirculated S-mint twenty with myriad abrasions. From a mintage of 1.7 million coins, the 1878-S is accessible in MS60 and MS61, but the population drops drastically in higher grades. NGC ID# 338K, PCGS# 8987

1882-S Double Eagle, MS62+

16849 1882-S MS62+ PCGS. Breen-7284. Tall S. An attractive canary-gold representative that boasts a bold strike and vibrant cartwheel sheen. Small marks are scattered, but none require individual mention, and the eye appeal is pleasing for the designated grade. Many '82-S twenties were exported, and held as foreign bank reserves, but most such pieces were loosely stored and typically abraded. NGC ID# 26BG, PCGS# 8998

16850 1883-CC — Improperly Cleaned — NGC Details. XF Variety 2-A. An appealing olive-gold Carson City double eagle despite an old, light cleaning. Hints of luster remain in the protected peripheral fields, and the surfaces show only minor abrasions. A linear mark on Liberty's jaw is the only singular abrasion of note.

16851 1883-S MS62 PCGS. Small squat S. The shorter of the two mintmark sizes for this popular San Francisco issue. The well struck surfaces are lustrous and display attractive apricot-gold and olive-green toning. Moderate marks are distributed. Liberty's neck has a small, oval spot. NGC ID# 26BJ, PCGS# 9000

16852 1884-CC — Improperly Cleaned — NGC Details. AU. Variety 1-A. The apricot-gold surfaces are smooth and glossy — a bit too glossy, the result of a cleaning at some point in the past. Bright golden luster remains at the margins. The customary scattering of small marks needs a glass to view, and any hairlines from the cleaning are negligible. Strong definition on the devices confirms the About Uncirculated sharpness noted by NGC.

16853 1889-CC — Scratch — Genuine PCGS. AU Details. Benjamin Harrison's narrow electoral victory over Grover Cleveland allowed the Carson City Mint to resume coinage in 1889, after a four-year hiatus. The 1889-CC double eagle has a low mintage of 30,945 pieces, and is scarcer than most later CC-mint issues. This canary-gold example shows light wear on the cheek and several faint vertical marks on the right obverse.

16854 1889-S MS62 PCGS. Impressively sharp strike definition includes the obverse stars and Liberty's hair curls. The rich orange-gold coloration and vibrant luster are pleasing. An attractive example of this San Francisco issue that recently saw its population increase with the discovery of the Saddle Ridge Hoard. NGC ID# 26BW, PCGS# 9012

**1890-CC Twenty Dollar, AU53
Old-Time Coloration**

16855 1890-CC AU53 NGC. Variety 1-A. Lapped reverse die state. Original olive-gold patina gives this About Uncirculated example pleasing visual appeal, as do hints of luster that remain in the protected regions of the fields. The central devices are sharp, and there are no abrasions that are outside of the norm for a Carson City double eagle in this grade. NGC ID# 26BY, PCGS# 9014

16856 1891-S MS63 NGC. Minute S. This Select orange-gold double eagle has vibrant luster and a precise strike. The fields are only lightly abraded, though Liberty's cheek displays moderate marks. Seldom encountered any finer. NGC ID# 26C4, PCGS# 9018

**1893-CC Double Eagle, XF45
Original "Dirty Gold" Surfaces**

16857 1893-CC XF45 PCGS. CAC. Variety 2-A. Demand for the 1893-CC twenty dollar — the final-year issue from the Carson City Mint — exceeds supply year after year. Attractive, Choice XF examples with original surfaces are seen with less frequency than problematic AU coins, presenting the discerning, budget-conscious collector with a rare opportunity. Unadulterated, "dirty gold" surfaces show lovely olive and reddish hues. Abrasions are remarkably scant, and design definition remains crisp despite a moderate degree of circulation. NGC ID# 26C9, PCGS# 9023

16858 1893-S MS63 PCGS. This is a particularly vibrant, frosty 1893-S twenty with rich fire-orange coloration. Other than a small alloy spot on the reverse below the I in AMERICA, there are no distractions of note. Finer examples of this Type Three San Francisco issue are elusive. NGC ID# 26CA, PCGS# 9024

16859 1894-S MS63 PCGS. An attractive Select specimen, with well-detailed design elements and vivid orange-gold surfaces that show a few scattered, minor contact marks. Vibrant mint luster adds to the outstanding eye appeal.

From The Martin Peterson Collection. NGC ID# 26CC, PCGS# 9026

16860 1895 MS63+ PCGS. Broad sea-green margins frame orange-gold centers. Lustrous and well struck with the customary signs of coin-to-coin contact for the MS63+ level. Despite the myriad modern gold bullion issues of the U.S. Mint, many collectors will always prefer the classic gold coins struck before the Roosevelt recall. NGC ID# 26CD, PCGS# 9027

1895 Double Eagle, MS64+ High-End for the Grade

16861 1895 MS64+ PCGS. Despite its 1.1 million-coin production, the 1895 double eagle is only obtainable through MS64. Full Gems are very rare, commanding five-figure prices when found. This frosted, honey-gold Liberty Head twenty showcases crisp strike detail on the stars and curls. The presence of only a few superficial grazes gives this near-Gem the look of a higher-graded coin. There are only five finer submissions at PCGS (3/17). NGC ID# 26CD, PCGS# 9027

1895 Liberty Twenty, MS64+ Conditionally Rare Any Finer

16862 1895 MS64+ PCGS. A Plus-graded Choice example of this popular issue, with razor-sharp definition on all design elements and vivid orange-gold surfaces that show only minor signs of contact. Vibrant mint luster adds to the outstanding overall presentation. The 1895 Liberty double eagle is conditionally rare in finer grades. PCGS has graded five numerically finer examples (2/17). NGC ID# 26CD, PCGS# 9027

16863 1896 Repunched Date, FS-301, MS63 PCGS. The date numerals are noticeably repunched at the top on this in-demand *Cherrypickers'* variety. This Select example displays a bold strike and yellow-gold luster with semiprooflike fields. Eye appeal is excellent. NGC ID# 26CF, PCGS# 145739 Base PCGS# 9029

16864 1896 Repunched Date, FS-301, MS63 PCGS. Apple-green and apricot-gold toning encompass lustrous and inoffensively abraded surfaces. A sharply struck representative. All four date digits are obviously repunched north. Breen (1988) called the variety "very rare" but more examples have since surfaced. NGC ID# 26CF, PCGS# 145739 Base PCGS# 9029

1896-S Double Eagle Vibrant MS61 Prooflike

16865 1896-S MS61 Prooflike NGC. A brilliant, lemon-gold example of this readily available San Francisco double eagle from a mintage of more than 1.4 million pieces. Prooflike pieces are just a small minority of survivors. This example at one time displayed fully mirrored fields on both sides, although the surfaces are busy with chatter and small reeding marks in its current state. Through it all, the coin retains its sharp, Mint-fresh appeal and blazing luster. Census: 29 in 61 (1 in 61★) Prooflike, 15 finer (2/17). NGC ID# 26CG, PCGS# 79030

16866 1897-S MS63 PCGS. An impressive cameo-like Liberty double eagle with reflective fields, and sharply defined satin devices. The few scattered marks that limit the grade are trivial and undistracting. NGC ID# 26CJ, PCGS# 9032

1897-S Twenty Dollar, MS64+ Few Available Finer

16867 1897-S MS64+ PCGS. Vibrant original luster illuminates well-preserved surfaces on this satiny 1897-S double eagle. A few light grazes on the cheek prevent a Gem designation, although the eye appeal surpasses that of most other Choice-graded coins. PCGS has seen only 14 finer submissions (2/17). NGC ID# 26CJ, PCGS# 9032

**1897-S Double Eagle, MS64+
Conditionally Scarce, Seldom Finer**

16868 1897-S MS64+ PCGS. Several of the San Francisco Mint late-series Liberty Head twenties are challenging in high grades, and the 1897-S is among them. Heavily exported and often bagmarked, the issue is readily available up to the near-Gem level but it is scarce-to-rare any finer. This lustrous, frosted example shows remarkably unabraded fields and a needle-sharp strike. Lovely green-gold coloration adds to the appeal. Population: 54 in 64+, 14 finer (2/17). NGC ID# 26CJ, PCGS# 9032

**1897-S Double Eagle, Sharp MS64+
Exceptionally Well-Preserved**

16869 1897-S MS64+ PCGS. The rarity of many S-Mint twenties changed dramatically with the discovery and dispersal of the Saddle Ridge Hoard, consisting of more than 1,400 double eagles dated between 1847 and 1894. No 1897-S twenties were included in the find, allowing its population of high-grade pieces to remain unaffected. Scarce in Plus-graded Choice Uncirculated and rare in full Gem condition, the issue is seldom available without coarse abrasions. This delightful, greenish-gold example is sharply struck, lustrous, with minimal marks. Rose-gold highlights add eye appeal. Population: 54 in 64+, 14 finer (2/17). NGC ID# 26CJ, PCGS# 9032

**1897-S Twenty Dollar, Frosty MS64+
Lavender and Honey-Gold Hues**

16870 1897-S MS64+ PCGS. CAC. Near-Gem representatives of the 1897-S come to market with a degree of frequency that makes the issue collectible in that grade, but anything finer, including MS64+ coins like this, are conditionally rare and seldom appear at auction. Frosty luster graces well-preserved surfaces with melded lavender and honey-gold hues. Uniformly well-struck. PCGS reports 14 finer submissions (2/17). NGC ID# 26CJ, PCGS# 9032

**1897-S Double Eagle, MS64+
Exemplary Quality**

16871 1897-S MS64+ PCGS. CAC. CAC and PCGS have rightly recognized the exemplary technical and aesthetic quality of this high-end Choice Uncirculated twenty, one of 1.4 million double eagles minted in San Francisco in 1897. The stars show full centers, and Liberty's hair strands are boldly defined and delineated. Thin grazes and microscopic ticks barely prevent an even higher grade. Rarely seen finer. NGC ID# 26CJ, PCGS# 9032

**1897-S Double Eagle, MS64+
Thick, Frosty Luster**

16872 1897-S MS64+ PCGS. CAC. Mike Fuljenz, writing in *Type Three Double Eagles 1877-1907* (second edition), explains that locating a high-quality MS64 example of the 1897-S that falls "just a mark or two away from the MS65 five figure price tag" is a savvy decision. Fewer than 30 coins are believed extant in that grade. This outstanding MS64+ double eagle is strongly defined with gorgeous sun-gold coloration and thick, frosty luster. Well-preserved. NGC ID# 26CJ, PCGS# 9032

**1897-S Twenty Dollar, MS64+
Coruscating Mint Frost**

16873 1897-S MS64+ PCGS. CAC. The central relief elements on each side are razor-sharp, most notably Liberty's hair strands. The stars are slightly softer, but the coruscating mint frost and rich orange-gold color that blend throughout deliver a degree of eye appeal that more than compensates for the minor peripheral strike deficiency. Preservation is excellent for the grade. Attractive rose and green accents add to the visual quality of this high-end Choice double eagle. Only 14 finer examples at PCGS (3/17). NGC ID# 26CJ, PCGS# 9032

**1897-S Twenty Dollar, MS64+
Superior Mint Luster**

- 16874 1897-S MS64+ PCGS. CAC.** The 1897-S is known as a well-produced and sharply struck Type Three. This piece certainly lives up to both of those standards. In addition, the mint luster on this coin is simply incredible. It is thick and frosted and rolls around each side as the coin is angled beneath a light. A few minor abrasions are present, but this piece has originality and eye appeal to spare. NGC ID# 26CJ, PCGS# 9032

**1897-S Double Eagle, MS64+
Subtle Yellow-Gold and Lilac Patina**

- 16875 1897-S MS64+ PCGS. CAC.** Strong mint frost is a typical characteristic of 1897-S twenties, and that is a common theme among the several pieces we have in this auction. This example also exhibits yellow-gold color with just the faintest hint of lilac around the margins. A few abrasions — more luster grazes really — are present on the obverse. NGC ID# 26CJ, PCGS# 9032

**1897-S Twenty, MS64+
Even, Light Reddish-Gold Patina**

- 16876 1897-S MS64+ PCGS. CAC.** The 1897-S twenty is a relatively high-mintage issue with 1.4 million pieces struck, but production quality was obviously high in the San Francisco mint as seen by the strike quality and thick mint luster seen on the several pieces in this auction. This piece differs slightly from others with its light reddish-tinged mint frost. Still, sharply struck throughout and well-preserved. NGC ID# 26CJ, PCGS# 9032

- 16877 1899-S MS63 PCGS. CAC.** A lustrous lemon-gold Select representative. Small marks are present, but they are significantly fewer in number and relevance than is usual for the designated third-party grade. CAC: 46 in 63, 26 finer (2/17). NGC ID# 26CN, PCGS# 9036

- 16878 1900 Poor 1 PCGS.** Here is an oddity seldom encountered among Liberty Head double eagles. Assigned the unheard of grade of Poor 01 by PCGS, this 1900 twenty dollar is worn smooth on both sides with some central details surviving on both sides, although the reverse legend are long gone and the rims no longer remain. Natural gold patina endures. Surely, the coin is a long-cherished pocket piece to have acquired such wear. It is the single-lowest grade granted for the issue from more than 96,000 submissions a both major services combined. PCGS population: 1 in 1, 42878 finer (2/17). NGC ID# 26CP, PCGS# 9037

- 16879 1900 MS64 PCGS.** Rich peach patina dominates, although the obverse displays glimpses of sea-green toning. Lustrous and sharply struck with well-preserved fields and delicate contact on the face and neck of Liberty. Encapsulated in an old green-label holder. **From The Martin Peterson Collection.** NGC ID# 26CP, PCGS# 9037

- 16880 1900 MS64+ PCGS.** This high-end Choice example displays a sharp strike and frosty yellow-gold luster. A few light marks on the cheek limit the grade, but the fields are largely well-preserved. The 1900 double eagle is often acquired for type representation as the final issue of the 19th century. NGC ID# 26CP, PCGS# 9037

- 16881 1900 MS64+ PCGS. CAC.** A dusky peach-gold example of this collectible turn-of-the-century emission. Cartwheel luster is prevalent, and the strike is precise throughout. Occasional small marks fail to deny the eye appeal. NGC ID# 26CP, PCGS# 9037

- 16882 1900 MS64+ PCGS. CAC.** This piece has especially vibrant luster accentuated on the obverse by a glint of reflectivity in the fields. The strike is sharp, and both sides are mostly free of major abrasions save for a few grazes on Liberty's cheek that deny a Gem designation. NGC ID# 26CP, PCGS# 9037

- 16883 1904 MS64+ PCGS.** The devices are strongly detailed, as expected for this well-made and mass-produced twenty dollar gold issue struck to the extent of 6.2 million coins. A medium yellow-gold near-Gem with carefully preserved, minimally marked surfaces awash in frosted luster. NGC ID# 26CY, PCGS# 9045

- 16884 1904 MS63+ Prooflike NGC.** Mirrored fields and surprisingly few bagmarks separates the present 1904 double eagle from its many peers. The strike is good, since only the S in TRUST shows softness. NGC ID# 26CY, PCGS# 79045

- 16885 1904-S MS64+ NGC. CAC.** Plentiful in MS64, the 1904-S double eagle becomes significantly more difficult to acquire in MS65. This high-end Choice coin offers a balance between price and quality. The strike is sharp, and each side offers frosty straw-gold mint luster. A few light marks on Liberty's cheek define the grade. NGC ID# 26CZ, PCGS# 9046

**1904-S Double Eagle, Attractive MS65+
Only Two Coins Finer at NGC**

- 16886 1904-S MS65+ NGC.** The San Francisco issue of this year is far scarcer in high grade than its Philadelphia counterpart. This high-end Gem 1904-S double eagle displays a sharp strike and glimmering straw-gold luster with beautifully clean fields. In fact, a few faint marks on the cheek are the only grade-limiting abrasions observed anywhere on the coin. There are only two finer examples at NGC (2/17). NGC ID# 26CZ, PCGS# 9046

16887 1907 MS64+ PCGS. Vibrant yellow-gold luster rolls around each side of this high-end near-Gem, illuminating sharp design elements. A hair-thin pinscratch near the 1 in the date is likely all that kept this piece from a full MS65 designation at PCGS. That grading service has recorded only 22 finer examples (3/17). NGC ID# 26D7, PCGS# 9052

1907-D Double Eagle, MS64+

16888 1907-D MS64+ PCGS. A lustrous and beautiful lemon-gold near-Gem. The strike is crisp, the reverse is practically pristine, and the obverse shows only trivial contact. The 1907-D will never be rare in Uncirculated grades, but examples of the present quality will always be in demand, from both type collectors and specialists. NGC ID# 26D8, PCGS# 9053

SAINT-GAUDENS DOUBLE EAGLES

16889 1907 Arabic Numerals MS64 PCGS. Rich orange toning embraces this lustrous and well struck gold type coin. The reverse is exceptionally smooth for the MS64 level, though the obverse field shows scattered minor contact. NGC ID# 26F5, PCGS# 9141

16890 1907 Arabic Numerals MS64 PCGS. This Choice 1907 Arabic Numeral Saint is well-struck and displays frosty yellow-gold luster, characteristic of original surfaces. Scattered light abrasions are not out of line for the grade, as none individually stand out. NGC ID# 26F5, PCGS# 9141

16891 1908 No Motto MS65 NGC. Long Rays Obverse. A lustrous pumpkin-gold Gem of the short-lived No Motto design. The strike is sharp except on the eagle's leg feathers. Impressively unabraded, and a desirable example of the type.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 26F6, PCGS# 9142

16892 1908 No Motto MS66 NGC. Long Rays Obverse. A highly lustrous Premium Gem. The strike is decidedly above average, and the orange-gold surfaces exhibit only infrequent minor marks. Many high grade 1908 No Motto twenties collected in overseas vaults, then returned to the United States over a period of decades.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 26F6, PCGS# 9142

1908 With Motto Twenty, MS64 Elusive Any Finer

16893 1908 Motto MS64 PCGS. The With Motto 1908 Saint-Gaudens double eagle is far scarcer in high grade than the No Motto variant, which was heavily represented in the Wells Fargo Hoard. This Choice With Motto coin displays a bold strike and satiny lemon-gold luster. Scattered light marks account for the sub-Gem grade. NGC ID# BNAK, PCGS# 9147

16894 1908-D Motto MS63 NGC. This first-year With Motto double eagle exhibits extraordinary visual appeal for the Select Mint State grade. Both sides are highly lustrous with brilliant orange-gold surfaces. NGC ID# 26F9, PCGS# 9148

16895 1908-D Motto MS64 PCGS. Rich apple-green and pumpkin-orange toning competes for territory across this lustrous and carefully preserved Saint-Gaudens twenty. A bold strike further improves the eye appeal. Certified in a green-label holder.
From The Martin Peterson Collection. NGC ID# 26F9, PCGS# 9148

16896 1909-S MS64 PCGS. Deep orange-gold coloration and a bold impression are characteristics of this Choice Uncirculated double eagle. Rose accents complement the rich tones as frost luster radiates throughout. Small marks are undistracting. NGC ID# 26FE, PCGS# 9153

16897 1909-S MS64 NGC. This is a boldly struck near-Gem with frosty wheat-gold luster that shows hints of rose in the centers. A few light marks are consistent with the grade. The 1909-S becomes a more challenging date in higher grades. NGC ID# 26FE, PCGS# 9153

16898 1909-S MS64+ PCGS. The San Francisco Mint struck a staggering number of double eagles in 1909 — more than 2.7 million. Yet, Gem-quality survivors evade many collectors. This Plus-graded Choice example displays a bold strike and noteworthy surface preservation. Original peach-gold luster adorns each side. NGC ID# 26FE, PCGS# 9153

1909-S Saint-Gaudens Twenty, MS65 Outstanding Mint Luster, Few Marks

16899 1909-S MS65 PCGS. Struck from worn dies, which imparts a finely granular texture to the surfaces that captures the mint luster and returns it twofold to the eye. This is a radiant Gem twenty, virtually free of marks, with vibrant orange accents over the sun-gold coloration. The strike is as sharp as can be expected given the used state of the dies, and the eye appeal is truly exceptional. PCGS reports just 19 coins in finer grades for the 1909-S (2/17). NGC ID# 26FE, PCGS# 9153

16900 1910 MS64 PCGS. A lovely near-Gem with only a few minor abrasions scattered about. The surfaces are light yellow with hints of pink and a couple of faint alloy spots located with 10x magnification. Finer 1910 double eagles are elusive.
Ex: Long Beach Signature (Heritage, 9/2005), lot 5239. NGC ID# 26FE, PCGS# 9154

16901 1910 MS64+ PCGS. A crisply struck apricot-gold example with sweeping luster and a few ticks on the reverse rim near 9 o'clock. The 1910 is usually seen in bagmarked Uncirculated condition, and becomes a great rarity above the MS65 level. NGC ID# 26FF, PCGS# 9154

1911 Double Eagle, MS64
Elusive in Finer Grades

16902 1911 MS64 NGC. Even though almost 200,000 pieces were minted of this issue, there are very few high-grade survivors known today. This near-Gem features apricot-gold patination over lustrous surfaces. Nicely struck, with just a few rather insignificant marks.
Ex: Long Beach Bullet (Heritage, 9/2004), lot 2406. NGC ID# 26FK, PCGS# 9157

16903 1911-D MS65 NGC. This early series branch mint Gem exhibits sharply detailed design elements and well-preserved orange-gold surfaces. Vibrant mint luster radiates from both sides, adding to the outstanding overall presentation.
From The Martin Peterson Collection. NGC ID# 26FK, PCGS# 9158

16904 1911-D/D FS-501 MS64 PCGS. The curve of the mintmark is widely repunched east. One of the few Federal gold RPM varieties to attain a *Cherry-pickers'* listing. This well-struck Choice double eagle offers splendid pumpkin-orange patina. The lustrous surfaces are smooth save for unobtrusive field marks below the beak.
Ex: Dallas Signature (Heritage, 12/2007), lot 68433, which realized \$1,495. NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158

16905 1911-S MS64 PCGS. This lustrous near-Gem exhibits frosty yellow-gold surfaces and trivial grade-consistent marks. A relatively plentiful issue, the 1911-S is an ideal type candidate. NGC ID# 26FL, PCGS# 9159

16906 1911-S MS64 PCGS. Satiny yellow-gold luster yields interspersed tinges of deeper peach and orange throughout the well-preserved fields. The strike is bold, and the only singular abrasions are a couple of small ticks on Liberty's legs. NGC ID# 26FL, PCGS# 9159

16907 1912 MS63 PCGS. Sharply struck with the usual accompaniment of small to medium-sized abrasions. Good luster adds to the eye appeal of this collectible 1912 double eagle.
Ex: Long Beach Signature (Heritage, 6/2006), lot 4060. NGC ID# 26FM, PCGS# 9160

1912 Double Eagle, MS64
Only Issue of the Year

16908 1912 MS64 PCGS. Only the Philadelphia Mint struck double eagles in 1912, making an example of this issue essential for a complete date set. Choice examples are usually the finest obtainable, as Gems are scarce and expensive. This near-Gem displays a bold strike and satiny wheat-gold luster. A few light marks define the grade. NGC ID# 26FM, PCGS# 9160

1912 Twenty Dollar, MS64
Seldom Offered Finer

16909 1912 MS64 PCGS. The 1912 Saint is available in this grade for a price, but finer coins evade even well-heeled collectors. This near-Gem is well-struck and satiny with yellow-gold luster. Abrasions are minimal, mostly seen hidden within the eagle's feathers. PCGS reports 52 finer submissions (2/17). NGC ID# 26FM, PCGS# 9160

1913 Double Eagle, MS64
Uncommonly Clean Surfaces

16910 1913 MS64 PCGS. Lovely peach and mint-green coloration is distributed across both sides of this pleasing near-Gem. The coin exhibits typically soft overall strike details, with generally bold definition on the important focal areas of Liberty and the eagle. The reverse is well-preserved, while a handful of small abrasions are noted on the obverse, limiting the grade. PCGS has only graded 14 pieces numerically finer (2/17).
Ex: Long Beach Signature (Heritage, 2/2007), lot 5186. NGC ID# 26FN, PCGS# 9161

16911 1913-D MS64 PCGS. The availability of the 1913-D double eagle drops in Gem condition, making this Choice coin important for budget-restricted collectors. The strike is bold, and each side displays vibrant straw-gold mint luster. NGC ID# 26FR, PCGS# 9162

16912 1913-S MS61 NGC. The 1913-S is a favorite among Saint-Gaudens collectors due to a low mintage of 34,000 pieces. This lustrous peach-gold example has a good strike, and displays no more than the anticipated number of small to moderate marks. NGC ID# 26FR, PCGS# 9163

**1914 Twenty Dollar, MS64
Better Date in High Grade**

16913 1914 MS64 PCGS. This highly lustrous near-Gem displays glittering, mattelike surfaces and unusually rich lime-gold and rose toning. The strike detail is somewhat weak on 14 in the date, on Liberty's torch hand, and in a few other areas, although this is unnoticed by the naked eye. The surfaces seem typically marked for the grade.

Ex: *Long Beach Signature* (Heritage, 2/2007), lot 5201. NGC ID# 26FS, PCGS# 9164

16914 1914-S MS65 PCGS Secure. From a mintage of nearly 1.5 million pieces, the 1914-S Saint-Gaudens double eagle is a popular branch mint type coin. This attractive Gem offers sharply detailed design elements and vivid orange-gold surfaces that radiate vibrant mint luster on both sides. NGC ID# 82KA, PCGS# 9166

**1915 Double Eagle, Choice Mint State
Pleasing Eye Appeal**

16915 1915 MS64 PCGS. Garrett and Guth (2006) speak to the outstanding quality of the 1915 double eagles. This piece is no exception but boasts eye-catching luster beneath light rose and yellow patina. The strike is razor sharp, and there are only a few wispy abrasions on either side. A small milky patch in the field to the left of Liberty is barely worthy of mention. PCGS has certified 51 pieces finer (2/17).

Ex: *Long Beach Signature* (Heritage, 9/2008), lot 4453. NGC ID# 26FV, PCGS# 9167

**1915-S Twenty Dollar, MS66
Unknown Finer at PCGS**

16916 1915-S MS66 PCGS. There are several assortments of 1915-S double eagles in MS66, but one only coin in MS67, which is NGC-certified (2/17). This Premium Gem PCGS coin is among the finest that even patient collectors will be able to acquire. The figure and eagle are well brought up, and both sides show rich straw-gold color. The coin displays very well to the unaided eye. NGC ID# 26FW, PCGS# 9168

16917 1916-S MS64 NGC. Particularly vibrant yellow-gold mint luster gives this Choice 1916-S double eagle strong eye appeal despite scattered light surface marks. The strike is well-executed throughout. NGC ID# 34NJ, PCGS# 9169

**1916-S Saint-Gaudens Double Eagle, MS65+
Nice Luster and Color**

16918 1916-S MS65+ PCGS. Mint records indicate 796,000 Saint-Gaudens double eagles were struck at the San Francisco Mint in 1916, and no double eagles were produced afterward until 1920, due to the financial effects of World War I.. This Plus-graded Gem exhibits well-detailed design elements and lustrous orange-gold surfaces with no mentionable distractions. NGC ID# 34NJ, PCGS# 9169

**1920 Double Eagle, MS64
Only One Coin Finer at PCGS**

16919 1920 MS64 PCGS. A challenging post-World War I issue that is essentially unavailable any finer, with just one such coin known to PCGS (2/17). Both sides of this near-Gem are yellow-gold with strong detail and few flaws. The obverse has strong, satiny luster, while the reverse luster is more swirling and vibrant.

Ex: *Long Beach Signature* (Heritage, 9/2008), lot 4471. NGC ID# 26FY, PCGS# 9170

**1920 Saint-Gaudens Twenty, MS64
Lustrous, Original Surfaces**

16920 1920 MS64 PCGS Secure. Only a single 1920 double eagle is finer than this piece at PCGS (2/17). Housed in a Secure holder, this near-Gem is considered high end for the issue. The strike is sharp, and orange-gold luster abounds — several faint, coppery allow spots on the obverse attest to the originality of the surfaces. A loupe reveals a few marks on Liberty and the eagle that prevent Gem classification. NGC ID# 26FY, PCGS# 9170

**1923-D Double Eagle, MS66
Radiant Peach-Gold Surfaces**

16921 1923-D MS66 PCGS. The 1923-D was sent overseas in large quantities, avoiding the mass meltings suffered by other branch mint double eagle issues from the 1920s. Examples are readily accessible through MS66, though they become excessively scarce in MS67, and are well-known for their excellent production quality. This needle-sharp twenty dollar gold piece offers swirling luster over luminous peach-gold surfaces. A diagonal tick on Liberty's chest defines the grade. Fantastic visual appeal. NGC ID# 26G6, PCGS# 9176

16922 1924 MS65 NGC. A lustrous lemon-gold Saint-Gaudens type coin. The strike is bold except on Liberty's raised knee, and perceptible marks are confined to the sun near the G in GOD.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 26G7, PCGS# 9177

16923 1924 MS65 NGC. This is a crisply struck Gem with pleasing luster. The pale orange-yellow surfaces are minimally marked, showing just a few small flaws consistent with the grade.
Ex: Long Beach Signature (Heritage, 9/2006), lot 4724. NGC ID# 26G7, PCGS# 9177

16924 1924 MS65+ NGC. The 1924 will never be rare, but most pieces are bagmarked, unlike the present minimally abraded, high-grade example. In particular, the fields are splendidly preserved. A lustrous and well struck apricot-gold Gem. NGC ID# 26G7, PCGS# 9177

16925 1924 MS66 NGC. *Ex: Depression "3 Bag" Hoard.* A magnificent Saint-Gaudens type coin. The orange-gold surfaces teem with luster, and patience is required to locate the few incidental marks. In addition, the strike is complete. NGC ID# 26G7, PCGS# 9177

**1924 Double Eagle, MS66+
Remarkably Clean Surfaces**

16926 1924 MS66+ PCGS. CAC. This high-end Premium Gem is indeed worthy of the CAC green label, as a loupe fails to reveal any distractions in the fields or on the figure of Liberty. Vibrant, frosty wheat-gold luster gives each side enduring eye appeal. The 1924 is a common date, but examples with this degree of quality and eye appeal are worth strong consideration as type coins. NGC ID# 26G7, PCGS# 9177

16927 1925 MS65 NGC. A sharp, frosty coin with particularly vibrant, frosty mint luster. Each side displays bright yellow-gold coloration. A few minor ticks do not detract. This high-end Saint would serve well as a type coin. NGC ID# 26GA, PCGS# 9180

16928 1925 MS66 PCGS. Thick, frosty, original rose-gold luster adorns this Premium Gem 1925 Saint-Gaudens double eagle. The strike is sharp, and only a few light marks on the obverse figure deny an even finer grade. PCGS reports seven Superb Gems finer (2/17). NGC ID# 26GA, PCGS# 9180

16929 1926 MS65 NGC. A beautiful pumpkin-orange Gem. Potent luster, a bold strike, and smooth fields all contribute to the eye appeal. A couple of tiny alloy spots (as made) emerge beneath a loupe. Housed in a prior generation holder.
From The Martin Peterson Collection. NGC ID# 26GD, PCGS# 9183

16930 1927 MS65 NGC. This olive-gold double eagle provides sweeping luster and a full strike. The fields exhibit wispy contact, but no marks are of singular significance. The 1922 through 1928 Philadelphia issues are often selected for type purposes, as is the 1923-D.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 26GG, PCGS# 9186

16931 1927 MS65 NGC. A thoroughly lustrous lemon-gold Gem. The strike is good, though slightly incomplete on the eagle's breast feathers. The obverse field displays only delicate marks. The reverse is smooth aside from a slight rim nick at 11:30.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 26GG, PCGS# 9186

16932 1927 MS65 NGC. This is a boldly struck Gem with frosty yellow-gold mint luster and a radiant cartwheel effect. There is a thin, threadlike strike-through hidden in the olive branch near the upper-right obverse. Overall, this is an eye-appealing Saint-Gaudens type coin. NGC ID# 26GG, PCGS# 9186

16933 1927 MS65+ PCGS. A radiant type coin with undeniably clean rose and lemon-gold surfaces for the grade, this Plus-designated Gem features good detail on the visage and torch hand. The Capitol is incompletely defined. Thick, frosty luster swirls over each side. NGC ID# 26GG, PCGS# 9186

16934 1927 MS65+ PCGS. This available Philadelphia issue never fails to offer strong eye appeal in high grade, and the present Plus-graded Gem is an outstanding example. The strike is sharp, and each side displays mostly unabraded, satiny yellow-gold luster. A few trivial marks on the obverse figure deny a full MS66 designation. NGC ID# 26GG, PCGS# 9186

16935 1927 MS66 NGC. Vibrant cartwheel luster, a sharp strike, and rich green-gold toning attest to the quality of this high-grade Saint-Gaudens type coin. Although the 1927 is plentiful in bagmarked Mint State grades, stellar examples are always in demand.
From The R. Thayer Sheets Yorktown Collection. NGC ID# 26GG, PCGS# 9186

**1927 Twenty Dollar, MS66+
High-End Type Coin**

16936 1927 MS66+ PCGS. This is a boldly struck, luminous high-end Premium Gem with largely unblemished yellow-gold luster. The availability of the 1927 double eagle makes it popular for type representation, although Superb Gem examples are conditionally rare. This Plus-designated Premium Gem offers a balance of quality and affordability. NGC ID# 26GG, PCGS# 9186

16937 1928 MS65 PCGS. Pleasing orange and green-gold colors combine with potent luster for imposing eye appeal. This Gem type coin is crisply struck and reasonably preserved. Light die doubling is noted on the date and monogram.
Ex: Palm Beach Signature (Heritage, 3/2005), lot 7534. NGC ID# 34VK, PCGS# 9189

16938 1928 MS66 PCGS. This is a beautifully preserved example of the last readily available date in the series, excellent for type purposes. The strike is sharp, and the fields are remarkably clean. Even Liberty's figure shows little in the way of high-point contact. A single small alloy spot near the 9 o'clock rim on the obverse attests to the originality of the surfaces. NGC ID# 34VK, PCGS# 9189

16939 1928 MS66 NGC. A spectacular Premium Gem example of this popular type issue, with impeccably preserved orange-gold surfaces and sharply detailed design elements throughout. Vibrant mint luster radiates from both sides, adding to the outstanding visual appeal.
From The Martin Peterson Collection. NGC ID# 34VK, PCGS# 9189

TERRITORIAL GOLD

16940 1852 Humbert Ten Dollar — Tooled — NGC Details. VF. "K-10c," R.6. This rare, unlisted Kagin variety has the N in UNITED on the reverse centered over OF. Well-circulated olive-gold surfaces show evidence of die deterioration around the obverse legends, save for AMERICA. The other side is similarly soft. Tooling marks on each side prevent a numeric assessment, but this remains a collectible Gold Rush souvenir. Listed on page 393 of the 2017 *Guide Book*.

BOOK

16941 A California Gold Rush History by Q. David Bowers. A shrinkwrapped example of the ultimate Gold Rush numismatic reference, published to promote and accompany sales of gold bars and coins recovered from the 1857 wreck of the S.S. *Central America*. The book has a pinch of gold inside the front cover, and displays color plates of all assayer ingots from the shipwreck known at the time of its 2002 publication. Just 400 copies were printed.

CALIFORNIA FRACTIONAL GOLD

16942 1855/4 Liberty Octagonal 25 Cents, BG-106, R.3, MS66 Prooflike NGC. The present lot is the single finest NGC-certified BG-106 quarter. As of (2/17), it is the sole Prooflike piece to attain the MS66 level, and none are designated as Deep Prooflike. The flashy honey-gold surfaces are nicely struck and void of detractions. Breen-Gillio Die State III with portions of Liberty's curls lapped away. An early Frontier, Deviercy & Co. variety. NGC ID# 2TTL, PCGS# 710375

1856 Octagonal Liberty Half Dollar
Rare BG-310 Variety, MS62

16943 1856 Liberty Octagonal 50 Cents, BG-310, High R.6, MS62 NGC. A rare Period One variety from the workshop of Antoine Louis Nouzillet. Well struck and flashy with minimal detractions. The obverse is rose-red and orange, while the reverse displays apricot-gold toning. NGC has certified just three examples, all as MS62 (2/17). NGC ID# 2BJH, PCGS# 10435

16944 1872 Washington Octagonal 25 Cents, Baker-503, BG-722, Low R.4, MS62 PCGS. This attractive BG-722 Washington Head is one of the most popular of all small California gold pieces. 'As issued' with brilliant, prooflike mirrored fields, the well-struck and frosted central devices contrast nicely with the reflective surfaces that glow with vibrant, antique-gold patina. A few light lines and minor abrasions seem of little import given the outstanding eye appeal. Housed in a previous generation green label holder. NGC ID# 2BN4, PCGS# 10549

16945 1870 Goofy Head Octagonal 25 Cents, BG-789, R.4, MS66 NGC. Breen-Gillio Die State II. The single finest-graded example of the distinctive, crudely executed, and anonymous "Goofy Head" octagonal quarter variety. Well struck and unmarked with original lime-green surfaces. Census: 1 in 66, 0 finer (2/17).
Ex: Baltimore Signature (Heritage, 3/2009), lot 3469, which realized \$1,782.50. NGC ID# 2BR9, PCGS# 10616

16946 1866 Liberty Round 25 Cents, BG-804, R.4, MS66+ PCGS. Lovely ice-blue, apricot-gold, and lime-green toning endows this well struck and undisturbed Gem. A hair-thin line above the first L in DOLLAR provides the sole imperfection. The wreath is lapped with disconnected elements, as always for BG-804. Population: 9 in 66 (1 in 66+), 0 finer (2/17). NGC ID# 2BSS, PCGS# 10665

1870 Round Liberty Quarter Dollar
BG-808, Lustrous MS67

16947 1870 Liberty Round 25 Cents, BG-808, R.3, MS67 PCGS. A fairly plentiful Period Two round quarter dollar by Frontier & Co., although seldom offered in this fine of condition. This Superb Gem displays satiny luster rather than prooflike fields, and the yellow-gold surfaces are devoid of abrasions. Minor strike softness is seen in the centers, as usual. NGC ID# 2BSW, PCGS# 10669

16948 1872/1 Indian Round 25 Cents, BG-870, R.3, MS66 Prooflike NGC. Flashy sun-gold fields, an even strike, and unmarked surfaces ensure exceptional eye appeal. The dies are widely rotated. Among the many varieties from San Francisco jeweler Christopher Mohrig. Census: 3 in 66 Prooflike, 0 finer (2/17). PCGS# 710731

16949 1869 Liberty Octagonal 50 Cents, BG-907, Low R.5, MS67 NGC. A flawless Superb Gem. The caramel-gold surfaces are undisturbed, and the strike is sharp throughout. This Frontier & Co. product is one of just two 1869 octagonal halves in the Breen-Gillio series, along with Robert B. Gray's BG-919. As of (2/17), NGC has certified 16 BG-907 halves, with the present lot as the single finest. NGC ID# 2BW3, PCGS# 10765

16950 1874/3 Indian Octagonal 50 Cents, BG-943, High R.4, MS66 Prooflike NGC. A lovely caramel-gold Premium Gem. The mirrored fields are undisturbed. The central reverse shows minor inexactness of strike. A BG-unlisted late die state. The obverse border was lapped, effacing much of the final star. The dentils are thinner, and likely re-engraved by the maker. The reverse exhibits several delicate die cracks. Census: 1 in 66 Prooflike, 1 finer (2/17). NGC ID# 26PA, PCGS# 710801 Base PCGS# 10801

19186 2016-W Walking Liberty Half-Ounce Gold — Reverse Struck Thru — SP69 NGC.

CERTIFIED MODERN PROOF SETS

19187 Five-Piece 1938 Proof Set PR65 to PR66 NGC. The set includes: Cent PR66 Red; Nickel PR66; Dime PR66; Quarter PR65; Half Dollar PR66. (Total: 5 coins)

19188 Five-Piece 1939 Proof Set PR64 to PR65 NGC. The set includes: Cent PR64 Red and Brown; Reverse of 1938 Nickel PR65; Dime PR65; Quarter PR65; Half Dollar PR65. (Total: 5 coins)

19189 Five-Piece 1939 Proof Set PR64 to PR67 NGC. The set includes: cent PR64 Red and Brown; Reverse of 1938 nickel PR66; dime PR66; quarter PR67; and a half dollar PR66. All coins are from the same NGC grading submission.
From The Pellegrini Collection, Part IV. (Total: 5 coins)

19190 Five-Piece 1939 Proof Set PR65 to PR66 NGC. The set includes: Cent PR65 Red and Brown; Reverse of 1938 Nickel PR65; Dime PR65; Quarter PR65; Half Dollar PR66. (Total: 5 coins)

19191 Five-Piece 1939 Proof Set PR64 to PR67 NGC. The set includes: Cent PR65 Red; Reverse of 1938 Nickel PR67; Dime PR65; Quarter PR64; Half Dollar PR66. (Total: 5 coins)

19192 Five-Piece 1939 Proof Set PR65 to PR66 PCGS. The set includes: cent PR65 Red; Reverse of 1938 nickel PR66; dime PR66; quarter PR65; and a half dollar PR66. All five coins are housed in green label holders.
From The Pellegrini Collection, Part IV. (Total: 5 coins)

19193 Five-Piece 1940 Proof Set PR64 to PR66 NGC. The set includes: cent PR64 Red and Brown; Reverse of 1940 nickel PR64; dime PR64; quarter PR65; and a half dollar PR66. All coins are ex: Highland Collection, and are from the same NGC grading submission.
From The Pellegrini Collection, Part IV. (Total: 5 coins)

19194 Five-Piece 1940 Proof Set PR65 to PR67 NGC. The set includes: cent PR65 Red and Brown; Reverse of 1940 nickel PR66; dime PR67; quarter PR66; and a half dollar PR67. All coins are ex: Highland Collection, and are from the same NGC grading submission.
From The Pellegrini Collection, Part IV. (Total: 5 coins)

19195 Five-Piece 1940 Proof Set PR66 to PR67 PCGS. The set includes: cent PR66 Red; Reverse of 1940 nickel PR66; dime PR66; quarter PR67; and a half dollar PR67. (Total: 5 coins)

19196 Five-Piece 1941 Proof Set PR64 to PR66 PCGS. The set includes: cent PR64 Red and Brown; nickel PR65; dime PR66; quarter PR66; and a half dollar PR64. The holders exhibit consecutive certification numbers.
From The Pellegrini Collection, Part IV. (Total: 5 coins)

19197 Five-Piece 1941 Proof Set PR64 to PR66 NGC. The set includes: cent PR64 Red and Brown; nickel PR64; dime PR66; quarter PR66; and a half dollar PR66. All coins are ex: Highland Collection, and are from the same NGC grading submission.
From The Pellegrini Collection, Part IV. (Total: 5 coins)

19198 Five-Piece 1941 Proof Set PR64 to PR66 PCGS. The set includes: cent PR64 Red; nickel PR66; dime PR66; quarter PR66; and a half dollar PR66. (Total: 5 coins)

19199 Five-Piece 1942 Proof Set PR62 to PR66 NGC. The set includes: cent PR62 Red and Brown; Type One nickel PR64; dime PR64; quarter PR65; and a half dollar PR66. All coins are ex: Highland Collection, and are from the same NGC grading submission.
From The Pellegrini Collection, Part IV. (Total: 5 coins)

19200 Five-Piece 1942 Proof Set PR63 to PR65 NGC. The set includes: Cent PR63 Red and Brown; Type One Nickel PR64; Dime PR65; Quarter PR64; Half Dollar PR64. (Total: 5 coins)

19201 Five-Piece 1942 Proof Set PR64 to PR66 PCGS. The set includes: cent PR66 Red; type one nickel PR66; dime PR67; quarter PR67; and a half dollar PR66. (Total: 5 coins)

19202 Five-Piece 1951 Proof Set PR65 to PR68 NGC. The set includes: 1951 Cent PR65 Red NGC; 1951 Nickel PR68 Cameo NGC; 1951 Dime PR66 NGC; 1951 Quarter PR67* NGC and a 1951 Half PR66 NGC.
From The R. Thayer Sheets Yorktown Collection. (Total: 5 coins)

19203 Five-Piece 1971-S Proof Set, Uncertified. Includes the scarce No S proof nickel (FS-501). Housed in original Mint hard plastic holder and blue box. All five coins are brilliant and free of distractions.
From The R. Thayer Sheets Yorktown Collection. (Total: 5 coins) PCGS# 569930 Base PCGS# 4204

MINT SETS

19204 Uncertified 1945 to 1963 Mint Sets. The 19 mint sets are housed in two Wayne Raymond National Coin Albums. The sets are complete for all issued denominations. (Total: 235 coins)

WASHINGTONIA

19205 Undated Washington - Lincoln 'Reverse' Medal MS60 NGC. King-856, Baker-240C, Cunningham 1-820W, Musante GW-764. White metal, 28mm, plain edge.

LINCOLN

19206 Abraham Lincoln Bronze Plaque MS63 NGC. King-753, Cunningham-24-100Bz. 65 x 87 mm. Plain edge. Medallist Art Co. New York, per NGC. A reduction of the famous Victor D. Brenner plaque.

U.S. PRESIDENTS & STATESMEN

19207 (1864) Fremont and Cochrane Campaign Medal MS61 NGC. DeWitt-JF-1864-2. Silver, 35mm.

19208 1897 Ulysses S. Grant A.N.S. Medal, Grant's Tomb Dedicated. Housed in the original case. Dies and case by Tiffany & Co. The medal is Choice; the box is tattered.

19209 1864 Geo. B. McClellan Campaign Medal MS64 NGC. DeWitt-GMcC-1864-14. Brass, 31mm, plain edge.

SO-CALLED DOLLARS

19210 1876 U.S. Centennial Exposition, Nevada Dollar, MS62 NGC. HK-19, Julian CM-36a. Silver, plain edge. Philadelphia, PA.

19211 Four-Piece Lot of 1893 World's Columbian Exposition So-Called Dollars. The lot includes: Official Medal, Large Letters, MS64 NGC, HK-154, Eglit-23, brass; Ferris Wheel Dollar MS60 NGC, HK-170 Variety, Eglit-157, aluminum, S in TONS over O instead of P; World Globe Dollar VF30 NGC, HK-174, Eglit-9, aluminum; and a Harvey Land Association — Improperly Cleaned — NGC Details, XF, Eglit-214, aluminum, 44.5mm. (Total: 4 medals)

19212 Three-Piece Lot of 1893 World's Columbian Exposition So-Called Dollars. The lot includes: Official Medal, Large Letters, MS63 NGC, HK-154 Variant, Eglit-23, brass, S in WORLD'S close to R in DEPARTMENT; World Globe Dollar XF45 NGC, HK-174, Eglit-9, aluminum; Columbus Bust Dollar MS62 NGC, HK-227, Eglit-430, aluminum. (Total: 3 medals)

19213 1898 Trans-Mississippi Exposition Official Medal MS63 NGC, HK-283, brass; 1904 Louisiana Purchase Exposition Official Souvenir Medal MS62 NGC, HK-302, Hendershott-30-200, yellow bronze; 1904 Louisiana Purchase Exposition Official Souvenir Medal — Holed — NGC Details, Unc., HK-303, Hendershott-30-140, bronze; 1909 Alaska-Yukon-Pacific Exposition, U.S. Government Building Dollar, MS62 NGC, HK-367 Variant, brass, tree branch points to K in ALASKA instead of S; 1926 U.S. Sesquicentennial Exposition, Official Medal, MS63 Brown NGC, HK-451, Baker-F421A, copper. (Total: 5 medals)

19214 Two-Piece Lot of 1909 Hudson-Fulton Celebration Medals. The lot includes: Hendrik Hudson Daalder MS64 NGC, HK-370, DeLorey-74, aluminum; and a American Numismatic Society MS62 NGC, silver, 51mm. (Total: 2 medals)

19215 Three-Piece Lot of 1915 Panama-Pacific Exposition Medals. The lot includes: Official Medal MS63 Brown NGC, HK-400; Louisiana at PPIE MS64 Brown NGC, HK-406; and a Divine Disvncta, Award of Honor, Cleveland Folding Machine — Damaged — NGC Details. Unc., gilt lead, 70 mm. (Total: 3 medals)

19216 Three-Piece Lot of 1933 Century of Progress So-Called Dollars. The lot includes: Official Medal MS64 Brown NGC, HK-463, bronze; A & P Carnival - Pig MS63 NGC, HK-464, gilt; and an A & P Carnival - Cow MS63 NGC, HK-464a, gilt. (Total: 3 medals)

19217 Three-Piece Lot of 1933 Century of Progress So-Called Dollars. The lot includes: Official Medal MS63 NGC, HK-463, bronze; Indian Head Dollar MS64 NGC, HK-470, brass; and a Michigan Dollar MS65 Red NGC, HK-473, gilt, reddish. (Total: 3 tokens)

19218 1953 Louisiana Purchase Sesquicentennial MS65 Red NGC, HK-509, copper; 1960 Pony Express Centennial, East Tincup Dollar, MS63 NGC, HK-585, gilt bronze; 1906 Cincinnati Fall Festival MS61 NGC, HK-652, brass; 1936 Long Island Tercentenary MS62 NGC, HK-694, bronze; (1953) God & Freedom, Die Struck, AU55 NGC, HK-917, copper over lead; 1976-D Colorado Statehood Centennial MS65 Prooflike NGC, Turner-41, silver, struck at Denver Mint. (Total: 6 medals)

19219 1959 Rush to the Rockies Official Medal MS64 NGC, HK-542, silver; 1959 Rush to the Rockies Official Medal MS65 NGC, HK-542, silver; 1959 Rush to the Rockies Official Medal MS66 NGC, HK-542, silver. (Total: 3 medals)

19220 1959 Rush to the Rockies Official Medal MS65 NGC, HK-542, silver; 1959 Rush to the Rockies Official Medal MS66 NGC, HK-542, silver; 1959 Rush to the Rockies Official Medal MS66 NGC, HK-542, silver. (Total: 3 medals)

19221 1922 Jacksonville TX Golden Jubilee AU55 NGC, HK-671, silver-plated; circa-1945 Four Freedoms W.W. II Victory Medal MS65 NGC, HK-913, gilt. (Total: 2 medals)

19222 1896 Bryan Dollar, Gorham Mfg. Co., MS61 NGC. Zerbe-5, HK-780, Schornstein-6. Silver, 52 mm.

EXPOSITIONS AND FAIRS

19223 (1889) International Industrial Exhibition, Buffalo, NY, SP65 Brown PCGS.

HARD TIMES TOKEN

19224 1843 A. Loomis, Cleveland, OH — Environmental Damage — PCGS Genuine. Fine Details. Low-158, Rulau-HT-377. Copper.

CIVIL WAR MERCHANTS

19225 1864 J.A. Bolen, Liberty Cap, Springfield, MA, MS64 Red and Brown NGC. Miller-Mass-103 Variety, Rulau-Ma-Sp-25, Musante JAB-9, Fuld-MA760A-6a. Copper, 28mm, plain edge.

19226 1863 Alden & Frink, Cohoes, NY, MS63 Brown NGC, Fuld-NY140A-1a; 1864 Great Central Fair, Philadelphia, PA, MS62 Brown NGC, Baker-363A, Fuld-PA750L-1a, Julian GW-43b, Musante GW-672; 1864 Great Central Fair, Philadelphia, PA, MS61 NGC, Baker-363, Fuld-PA750L-1f, Julian CM-43a, Musante GW-672; 1864 Great Central Fair, Philadelphia, PA, MS62 Brown NGC, Baker-363A, Fuld-PA750L-2a, Julian CM-43b, Musante GW-672. (Total: 4 coins)

CIVIL WAR PATRIOTICS

19227 1863 Army & Navy MS62 Brown NGC, Fuld-13/297a; 1863 Our Navy — Edge Damage — NGC Details, Unc., Fuld-41/337a; 1863 Army & Navy AU58 NGC, Fuld-91/303a; 1863 Pro Bono Publico AU55 NGC, Fuld-191/443a, struck on a clipped planchet. (Total: 4 tokens)

19228 1864 Our Navy MS63 Brown NGC, Fuld-241/338a; and an Undated J.J. Benson, 1st Mounted Rifles Sutler Token AU55 NGC, S&I-NY-1-10B, R.6, brass. (Total: 2 tokens)

U.S. TRADE TOKEN (1866-1889)

19229 (1862) Young America / Arsenal Without Sun MS62 Red and Brown NGC. Miller-Mass-101A, Rulau-Ma-Sp-7, Musante JAB M/E-3. Copper, 28mm, plain edge.

MISCELLANEOUS MEDALS AND TOKENS

19230 1858 First Telegraphic Cable MS63 NGC. Bronze, 69 mm. Dies by Tiffany & Co., New York. The obverse is rotated double or triple struck, presumably due to a loose hammer die.

19231 1866-Dated Massachusetts Humane Society Award Medal MS64 Brown NGC. Bronze, 57mm. Dies by Wyon.

HOBO NICKELS

19232 Two Original Hobo Nickels. The first hobo nickel appears to be a nice example of the known carver "Tall Ear," with a distinctive ear, fully dressed fields, carved on an early date Buffalo nickel (here a 1913 Type One piece). The hat brim touches the L in LIBERTY, and the simple collar mimics that of a sailor — both Tall Ear signatures. The second nickel is an above-average hobo nickel by an unknown early carver, although it has some resemblance to the work of "Bowin," who used multiple straight and repeated overlapping punches on nicely dressed fields. The hat sits unusually high on the head with turned-up brims and a patterned band with an "X" for a bow, above a C-shaped ear. (Total: 2 coins)

End of Auction

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., Currency Auctions of America, Inc., Heritage Auctions (HK) Limited, or Heritage Auctions – Europe Cooperatief U.A. as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

- All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
- Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
- Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots (the Buyer's Premium is 19.5% for auctions in Hong Kong), and except for Gallery Auction lots as noted below;
- Nineteen and one-half percent (19.5%) on Comic, Movie Poster, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
- Twenty percent (20%) on Sports Collectibles lots;
- Twenty-two percent (22%) on Wine Auction lots;
- For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$250,000, plus twenty percent (20%) of any amount between \$250,000 and \$2,500,000, plus twelve percent (12%) of any amount over \$2,500,000.
- Minimum Buyer's Premium per lot is \$19, except for Sports Collectibles lots wherein the Buyer's Premium is \$14 per lot.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

- Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
- All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
- If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

- In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

- Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.xz#biddingTutorial>.
- Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
- Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
- Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments (see [HA.com/c/ref/web-tips.xz#guidelines-increments](http://www.ha.com/c/ref/web-tips.xz#guidelines-increments)).

| Current Bid | Bid Increment | Current Bid | Bid Increment |
|------------------------|---------------|--------------------------------|---------------|
| < \$10..... | \$1 | \$10,000 - \$19,999..... | \$1,000 |
| \$10 - \$49..... | \$2 | \$20,000 - \$49,999..... | \$2,000 |
| \$50 - \$99..... | \$5 | \$50,000 - \$99,999..... | \$5,000 |
| \$100 - \$199..... | \$10 | \$100,000 - \$199,999..... | \$10,000 |
| \$200 - \$499..... | \$20 | \$200,000 - \$499,999..... | \$20,000 |
| \$500 - \$999..... | \$50 | \$500,000 - \$999,999..... | \$50,000 |
| \$1,000 - \$1,999..... | \$100 | \$1,000,000 - \$4,999,999..... | \$100,000 |
| \$2,000 - \$4,999..... | \$200 | \$5,000,000 - \$9,999,999..... | \$250,000 |
| \$5,000 - \$9,999..... | \$500 | >= \$10,000,000..... | \$500,000 |

- If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

- Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE

HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

- The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise. Regardless that bids are made on a Property, Auctioneer reserves the right to withdraw the Properties, or any part of the Properties, from the Auction at any time prior to the opening of any lot containing such Properties for sale by the auctioneer (crier), or in the case of Internet-only auctions when the bid opens for either live bidding online or the beginning of the extended period, if any
- Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
- Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
- Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
- All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
- Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
- Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
- The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
- The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

- All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
- Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer. Alternatively, Auctioneer at its sole option, may charge a twenty (20%) fee based on the amount of the purchase. In either case the Auctioneer may offset amount of its claim against any monies owing to the Bidder or secure its claim against any of the Bidder's properties held by the Auctioneer..
- Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
- In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
- If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
- In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
- Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
- Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its

Terms and Conditions of Auction

affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping-zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.

33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.

34. All shipping charges will be borne by the successful Bidder. On all shipments in which Heritage charges the Delivery, Handling, and Transit Fee *infra*, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file, this is the "Secure Location". A common carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature). Auctioneer shall arrange, select, and engage common carriers and other transportation vendors on your behalf. Transit services are subject to the following terms and conditions:

- Scope of Transit Services: Your properties for transit will be insured under one or more insurance policies issued by an authorized broker to Auctioneer. The properties will be insured for the invoice price of the properties (hammer price plus Buyer's Premium) ("Insured Value). For each shipment, you will provide a Secure Location to which the items will be delivered. NOTICE: **Auctioneer is neither an insurance company nor a common carrier of any type.**
- Auctioneer's Compensation for Transit Services: Auctioneer will provide transit services to Buyer for ¼ of 1% of the Insured Value, plus packaging and handling fees and fees for the common carrier (collectively, "Delivery, Handling, and Transit Fee"). You agree to pay Delivery, Handling, and Transit Fee and comply with all terms of payment as set forth in paragraphs 23 to 31 of this Agreement.
- Auctioneer's Limitation of Liability for Transit Services: You understand and agree that Auctioneer's liability for loss of or damage to the items, if any, ends when the items have been delivered to the Secure Location, and Auctioneer has received evidence of delivery. If you claim that any property has sustained loss or damage during transit, you must report any such loss or damage to Auctioneer within seventy-two (72) hours of the delivery date. Your recovery for loss of or damage to any property is limited to the lesser of actual cash value of the property or the Insured Value. **Under no circumstances is Auctioneer liable for consequential or punitive damages.**

35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

- 36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment, or afford them the capacity to void their purchase or payment. For further information, please contact Ron Brackemyre at 800-872-6467 ext. 1312.

- 36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.

- 36C. Auctioneer shall not be liable for any loss caused by or resulting from:

- Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- Breakage of statuary, marble, glassware, bric-a-brac, porcelain, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions.

39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.

40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.

41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.

42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.

47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.

48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and /or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administered by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.

49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.

50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.

51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.

53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.

54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City: This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site. All lots are subject to the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Terms and Conditions of Auction

Additional Terms & Conditions:

COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. **AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY.** Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet **THREE (3) DAY RETURN POLICY:** Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be

liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

Notice as to an Auction in New York City

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site.

All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 6-8-2016

AUCTIONS

WHY CHOOSE HERITAGE AUCTIONS?

LEADERS The world's largest collectibles auctioneer and the 3rd largest auction house in the world.

LOCATIONS Dallas, New York, Beverly Hills, San Francisco, Chicago, Palm Beach, Paris, Geneva, Amsterdam and Hong Kong.

TECHNOLOGY On an average day, more than 37,000 unique collectors visit our website. HA.com receives significantly more traffic than Christies.com and Sothebys.com combined! (Source: SimilarWeb.com)

RESULTS 1+ million online bidder-members from 186 countries and \$850 million in 2016 sales.

TRUST Knowing that your treasures are being researched and valued by leading experts using current market reports.

INTEGRITY From your first phone call to our last handshake, your collection is handled with the utmost care and priority.

TRANSPARENCY No hidden reserves. No hidden fees.

QUALITY A commitment to exceptional customer service, attention to detail and first-class marketing efforts to bring a worldwide audience to your treasures.

TIMELY PAYMENT Each of our 45,000+ consignors have received their settlement checks in full and on time, without exception.

EXPERTISE Our success depends on providing clients with the best possible advice.

EFFICIENCY We focus on helping clients save valuable time and resources.

INNOVATION We continually make our services more accessible and useful.

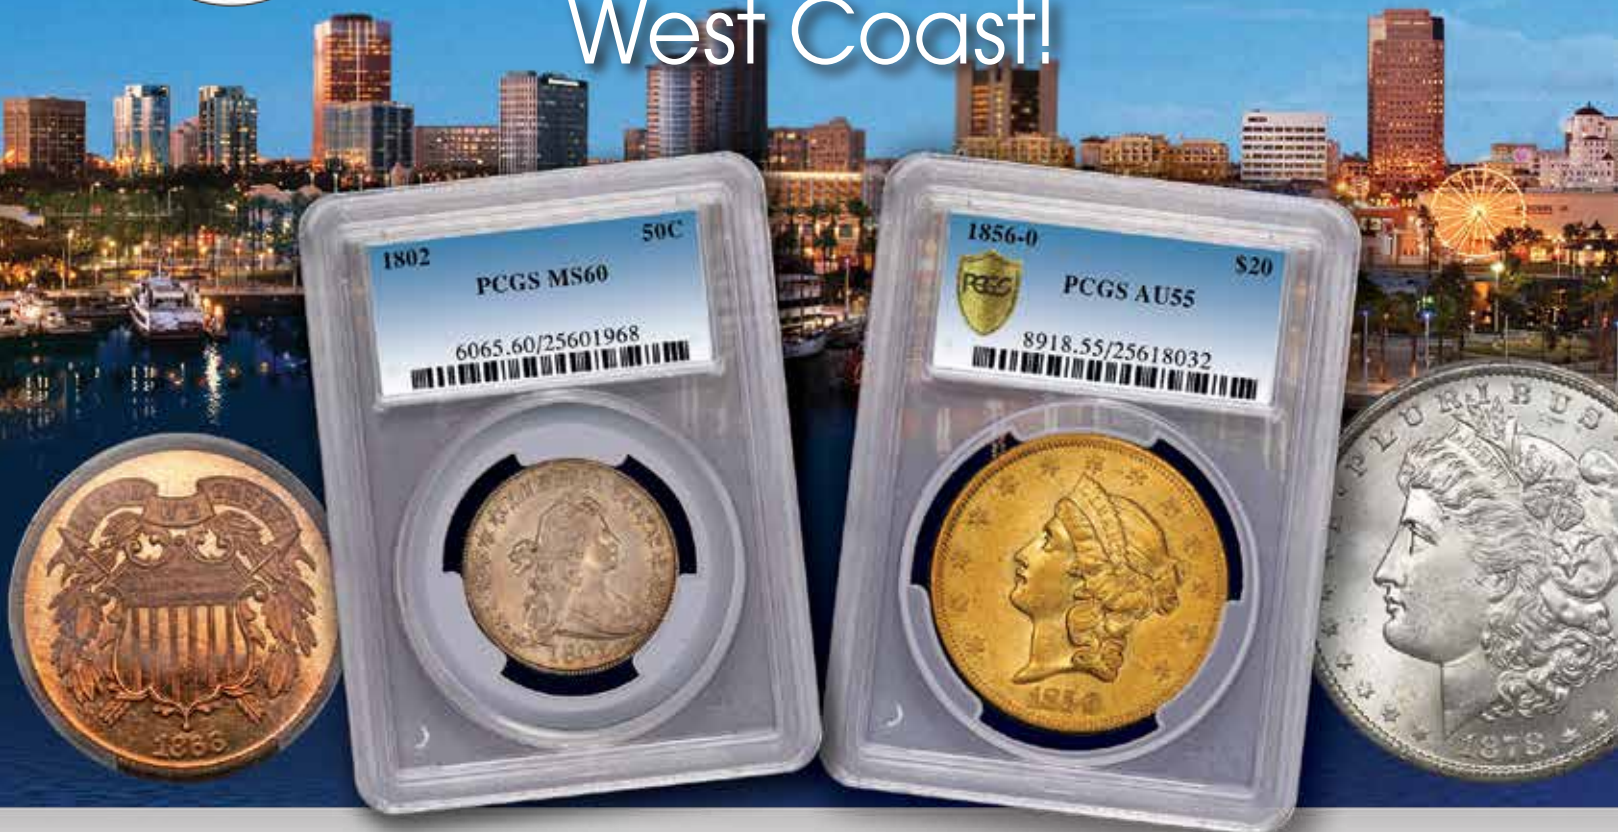

LONG-TERM PERSPECTIVE We strive to carefully construct only sustainable, win-win agreements with clients and partners.
